Part One

Economic Review ¹

¹ Reflects information available as of July 21, 2014

2013 Overview

British Columbia's economy continued to grow modestly in 2013, with its annual performance on par with the Canadian average.

Similar to previous years, Statistics Canada published only real dollar industry-side GDP data in the preliminary release of its Provincial Economic Accounts in April 2014. As a result, the following analysis refers to real GDP figures at basic prices, as opposed to the usual market price definition.

BC's economy grew by 2.0 per cent in 2013 (the fifth highest rate among provinces), which was greater than the 1.8 per cent growth observed in 2012.

Chart 1.1 Provincial Economic Growth²

Source: Statistics Canada, April 2014 Preliminary Industry Accounts

Strong external demand for BC products pushed the value of BC's international merchandise exports up by 6.3 per cent in 2013 compared to 2012. Meanwhile, shipments of manufactured goods grew steadily, rising by 3.1 per cent on the year.

Domestically, BC employment fell by 0.2 per cent in 2013, the first annual decline for the province since 2009. Meanwhile, BC's housing starts dropped by 1.5 per cent in 2013, reaching around 27,100 units on the year (but near the ten-year historical average of about 30,100 units). Retail sales grew by 2.4 per cent last year, while consumer prices fell by 0.1 per cent.

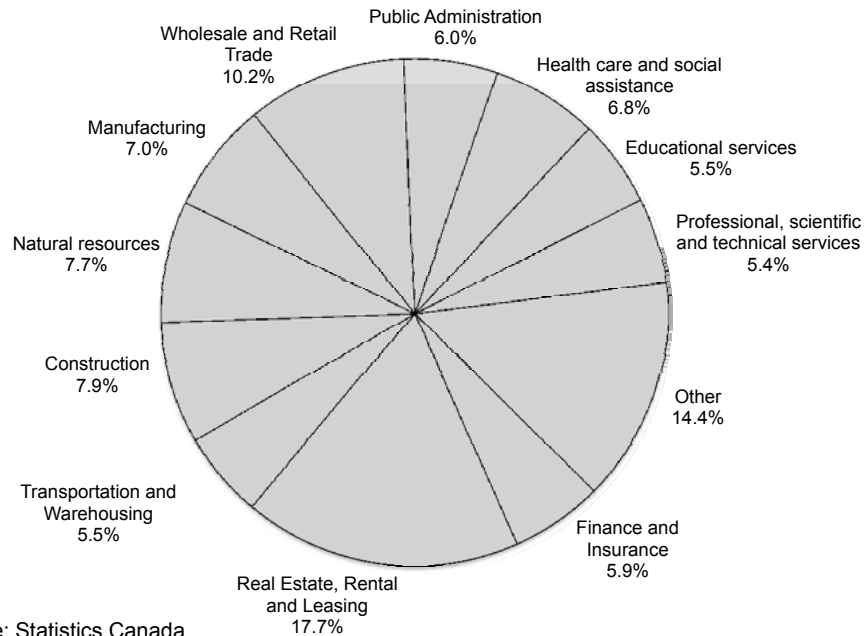

British Columbia Economy

In 2013, service-producing industries accounted for 75.5 per cent of BC's real GDP and goods-producing industries accounted for 24.5 per cent. The two largest service industries last year were real estate, rental and leasing (17.7 per cent of BC's total real GDP) and wholesale and retail trade (10.2 per cent of BC's total real GDP). At the same time, construction and natural resources produced the highest amount of GDP in the goods sector in 2013, with construction accounting for 7.9 per cent of BC's total GDP and natural resources comprising 7.7 per cent.

² Provincial and National real GDP estimates are based on Statistics Canada's preliminary industry accounts, released in April 2014. Further information on British Columbia's economic performance will be available in November 2014, when Statistics Canada releases revised GDP data for 2013 and previous years for the full income and expenditure accounts, including nominal data.

Chart 1.2 Composition of British Columbia real GDP by industry

Shares of BC GDP at basic prices by major industry, 2013

Source: Statistics Canada

In total, BC's real GDP increased by 2.0 per cent in 2013 after growing by 1.8 per cent in 2012. Growth in BC's service-producing industries accelerated in 2013 compared to 2012, but slowed in the province's goods-producing industries.

Output in service-producing sectors increased by 2.2 per cent in 2013, up from the 1.7 per cent gain recorded in 2012. Notable growth was recorded in finance and insurance (+3.8 per cent) and real estate and rental and leasing (+3.7 per cent).

Meanwhile, output in BC's goods-producing industries increased 1.2 per cent in 2013, somewhat slower than the 1.9 per cent growth observed in 2012. Gains in agriculture, forestry, fishing and hunting (+3.3 per cent), mining, quarrying, and oil and gas extraction (+5.1 per cent) and construction (+1.3 per cent) helped offset a small contraction in manufacturing (-0.2 per cent).

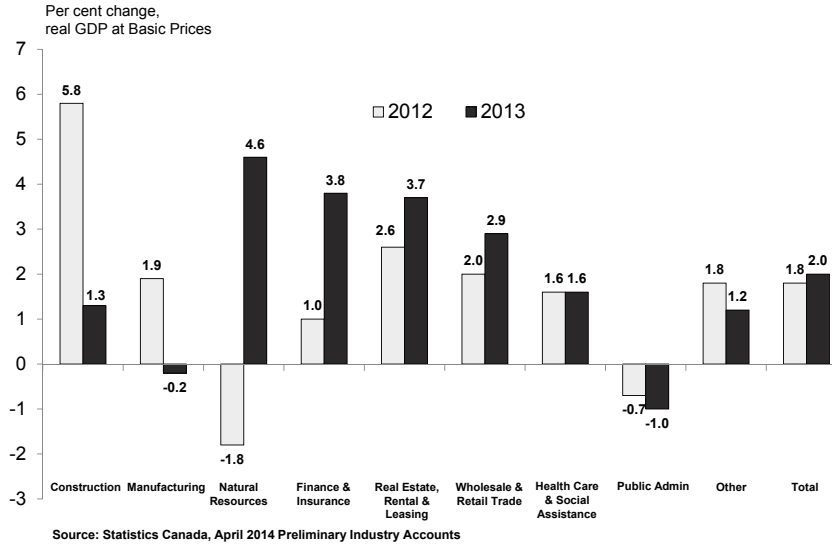

External Trade and Commodity Prices

Exports by destination:

The value of BC's international merchandise exports gained 6.3 per cent in 2013, after a decline of 3.6 per cent in 2012. The improvement in export activity last year reflected strengthening global demand for BC products as well as higher prices for commodities such as lumber, pulp and natural gas.

The value of BC goods exports to the US increased by 10.6 per cent in 2013, following annual growth of 0.2 per cent in 2012. Last year's gain in exports to the US was led by a 27.8 per cent increase in softwood lumber exports and a 34.2 per cent rise in natural gas exports. Strong performances from these commodities more than offset declines in exports of pulp and paper products (-8.3 per cent) and fish products (-2.4 per cent) to the US.

Chart 1.3 British Columbia real GDP growth by industry

The value of BC merchandise exports to China improved by 15.0 per cent in 2013 after growing by 19.8 per cent in 2012. The annual gain in 2013 was driven largely by copper ores and concentrates (+69.0 per cent) and softwood lumber (+30.6 per cent), while the value of coal exports to China fell on the year (-8.3 per cent). Appendix Tables A1.7 and A1.8 provide further detail on exports by major market and commodity groups.

The share of BC’s total goods exports to China continued to increase in 2013, with 19.8 per cent sent to that country, up from 18.3 per cent in 2012. In addition, the share of BC’s total exports to the US grew for the second consecutive year after annual declines each year from 2002 to 2011.

Chart 1.4 Export shares by market

Source: BC Stats

Commodity exports and prices:

The annual gain in BC goods exports in 2013 was primarily due to improvements in wood product exports, which increased by 25.5 per cent from 2012. Last year's strong growth in wood products exports was mainly driven by softwood lumber exports, which saw a 9.2 per cent gain in the volume of lumber exported, as well as a 19.7 per cent jump in the annual lumber price (see below). Significant gains were also observed in exports of metallic mineral products (+10.9 per cent) and machinery and equipment (+6.0 per cent). At the same time, exports of energy products fell by 1.6 per cent (as a substantial decline in coal exports offset a gain in natural gas exports) and exports of pulp and paper products declined by 1.9 per cent.

After posting annual declines for four consecutive years, the price of natural gas increased in 2013, with the Plant Inlet price rising to \$2.03 C/GJ from \$1.36 C/GJ in 2012.

The price of oil fluctuated somewhat through 2013, but remained at historically high levels for a second consecutive year. The West Texas Intermediate daily oil price averaged \$97.98 US/barrel on the year, up \$3.93 US/barrel from the previous year.

The price of lumber improved significantly in 2013, fuelled by strengthening demand from the US housing market. The Western SPF 2x4 price averaged \$358 US/000 board feet last year, a gain of 19.7 per cent over 2012. At the same time, the price of pulp improved by 5.2 per cent last year while newsprint fell by 3.7 per cent.

- the price of lumber averaged \$358 US/000 board feet in 2013, an increase from \$299 US in 2012;
- the price of pulp averaged \$857 US per tonne, up from \$814 US in 2012; and
- the price of newsprint dropped to \$599 US per tonne from \$621 US per tonne in 2012.

Manufacturing shipments:

Shipments of BC's manufactured goods grew steadily in 2013, up 3.1 per cent on the year following a gain of 1.8 per cent in 2012. Annual increases occurred for shipments of wood products (+22.6 per cent) and computer and electronic products (+15.8 per cent),

Chart 1.5 Lumber and natural gas prices

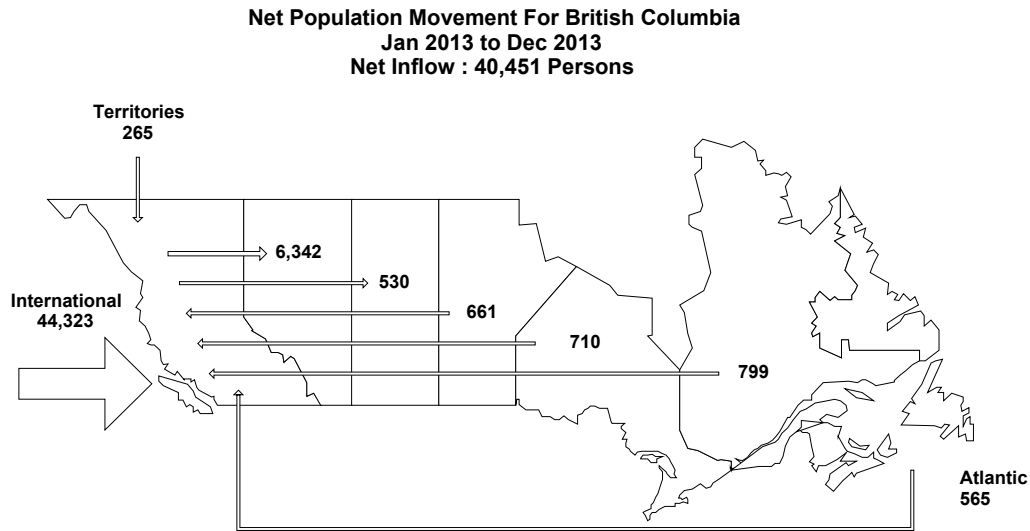

Source: Madison's Lumber Reporter and Ministry of Natural Gas Development

while declines were observed for shipments of transportation equipment (-7.0 per cent) and paper products (-6.9 per cent).

Population

BC's population on July 1, 2013 was 4.58 million people, an increase of 0.9 per cent from same date in 2012. Last year's growth was largely attributable to the 44,323 persons BC welcomed via net international migration. Meanwhile, interprovincial migration in BC was negative for a second consecutive year in 2013, as a net total of 3,872 persons left BC for other provinces. A natural increase of 10,595 persons also added to the province's growing population in 2013.

Map 1.1 Net interprovincial and international migration in BC, 2013

Source: BC Stats

Labour Developments

Employment activity in BC stalled during 2013, following an annual gain of 1.7 per cent (or 37,800 jobs) in 2012. Employment in the province fell by 0.2 per cent (or 4,400 jobs) last year, as a gain of 5,100 full-time jobs was more than offset by a decline of 9,500 part-time jobs. BC's unemployment rate averaged 6.6 per cent in 2013, down from 6.7 per cent in 2012. The slight reduction in this rate was due to a decrease of 8,400 persons in BC's labour force last year.

Employment in BC's service industries rose by 0.5 per cent (or 8,500 jobs) in 2013 compared to 2012. Major gains occurred in wholesale and retail trade (+13,500 jobs), professional, scientific and technical services (+12,600 jobs) and finance, insurance, real estate and leasing (+11,700 jobs). These improvements helped to offset employment weakness in sectors such as health care and social assistance (-12,200 jobs) and transportation and warehousing (-7,700 jobs).

BC's goods-producing industries experienced a 2.8 per cent decrease in employment last year, losing 12,900 jobs compared to 2012. Substantial job declines that occurred in manufacturing (-15,800 jobs) and utilities (-1,800 jobs) more than offset the small gains in other primary industries (+3,800 jobs) and agriculture (+1,600 jobs) – see Appendix Table A1.5 for more details.

Inflation

Consumer prices in BC fell by 0.1 per cent during 2013 compared to 2012. Small price declines in services and durable goods offset slight gains in prices for non-durable and semi-durable goods on the year. Rising electricity and gasoline prices drove the small gain in non-durables, while higher prices for clothing pushed up semi-durables. At the same time, lower prices for household appliances provided downward pressure on durable goods, while prices for services eased in response to lower prices for health care and restaurant meals. The return to the PST tax system in April 2013 also contributed to the stalled pace of inflation in BC last year. However, inflation was slow across Canada during most of 2013, as many provinces experienced strong competition among retailers and overall slow domestic economic activity.

Source: Statistics Canada (CANSIM Tables 326-0020, 282-0072, 384-0040, 384-0037 - accessed June 2014)

Consumer Expenditure and Housing

Following a 1.9 per cent increase in 2012, BC retail sales advanced by 2.4 per cent in 2013. The modest pace of growth observed last year is likely attributable to low prices for retail goods and debt-conscious consumers holding back spending. Significant increases were observed at motor vehicle and parts dealers (+5.4 per cent), general merchandise stores (+3.6 per cent) and furniture and home furnishings stores (+3.4 per cent). These gains worked to offset declines in sales at electronics and appliance stores (-5.1 per cent) and sporting goods, hobby, book and music stores (-0.1 per cent).

Chart 1.6 Retail sales

After registering a 4.0 per cent gain in 2012, BC housing starts declined last year, falling by 1.5 per cent to reach about 27,100 units. An annual drop of 3.1 per cent in multiple unit starts offset a 2.3 per cent increase in single unit starts. At the same time, residential building permits (a leading indicator of potential new housing activity) grew by 2.3 per cent in 2013 over 2012.

Home sales in BC improved by 7.8 per cent in 2013 compared to the previous year, following an 11.8 per cent decline in 2012. The average price for BC homes also increased in 2013, climbing by 4.4 per cent to reach about \$537,400.

Tourism

The number of international travelers to BC improved by 2.9 per cent in 2013 compared to the previous year, after remaining flat in 2012. The number of non-US visitors grew by 5.3 per cent in 2013, while the number of travelers from the US increased by 2.1 per cent on the year. Last year marked just the third time since 2001 that the number of travelers to BC increased, with 2004 and 2010 being the other two years that saw annual gains. International travel to BC in recent years registers at levels observed in the early 1990s.

Chart 1.7 Visitor Entries to British Columbia

External Environment

The global economy continued its slow recovery in 2013 from the financial crisis that occurred in 2008/09. Overall, the world economy grew by 3.0 per cent in 2013, down slightly from the 3.2 per cent gain recorded in 2012. GDP in the euro area fell by 0.5 per cent in 2013, the second consecutive year that the region posted an annual contraction. Chinese GDP grew 7.7 per cent on the year, holding steady from 2012, while Japanese economic growth improved slightly to 1.5 per cent from 1.4 per cent. At the same time, US real GDP improved by 1.9 per cent in 2013, slower than the 2.8 per cent growth rate observed in 2012.

United States Economy

In 2013, the US economic landscape was characterized by an ongoing, sluggish recovery from the 2008/09 recession and substantial fiscal uncertainty due to political turmoil in Congress (that ultimately led to a temporary shutdown of federal government services in October). US real GDP expanded by 1.9 per cent overall in 2013, a significant drop from the 2.8 per cent growth observed in 2012.

US employment climbed gradually last year, gaining 2.3 million jobs compared to 2012. Although the US labour market continued to improve, the level of employment in 2013 was still 1.6 million jobs lower than it was in 2007. The unemployment rate dropped to 7.4 per cent in 2013 from 8.1 per cent in 2012, but did so alongside falling labour force participation (and remained high by historical standards).

The American housing market continued its gradual recovery in 2013, as housing starts gained 18.7 per cent to reach 926,700 units. Meanwhile, the average existing home price increased by 10.7 per cent last year, but was still significantly below the historically high level observed in 2006.

The US current account deficit (the combined balances on trade in goods and services income, and net unilateral current transfers) declined from \$461 billion in 2012 to reach \$400 billion in 2013.

Canadian Economy

The Canadian economy grew by 2.0 per cent in 2013 following a 1.8 per cent increase in 2012, as real GDP advanced in every province except for New Brunswick, where it remained flat. Canada's services-producing industries improved by 2.0 per cent in 2013, a slightly greater pace than the 1.8 per cent growth registered the previous year. At the same time, output in the country's goods sector increased by 2.0 per cent last year, up from 1.9 per cent in 2012.

Canada's current account deficit narrowed in 2013 to reach \$60.3 billion, after recording a balance of \$62.2 billion the previous year. Firming international demand supported Canada's trade sector last year, as the value of Canadian merchandise exports rose 3.7 per cent compared to 2012. This is an improvement from the modest 2.1 per cent growth observed in 2012, with the 2013 increase being led by a strong gain in energy exports. However, the growth of manufactured goods shipments slowed last year, with the total value of Canadian shipments increasing by just 0.3 per cent in 2013 following an annual gain of 3.4 per cent in 2012.

Canada's labour market grew modestly in 2013, as national employment increased by 223,500 jobs (or 1.3 per cent) over 2012. At the same time, the national unemployment rate ticked down 0.1 percentage points in 2013 to average 7.1 per cent on the year.

The number of Canadian housing starts declined in 2013, falling 12.5 per cent to about 187,900 units, after growing by 10.8 per cent in 2012. Further, residential building permits were flat on the year, following a gain of 8.8 per cent the previous year. On the other hand, sales activity in the Canadian housing market advanced modestly in 2013, with home sales up 0.8 per cent and prices up 5.3 per cent compared to 2012.

Canadian retail sales advanced by 3.2 per cent in 2013 compared to the previous year, greater than the 2.5 per cent annual increase that occurred in 2012. Inflation was slow across the country last year, with annual consumer prices growing by just 0.9 per cent compared to the 1.5 per cent increase in 2012.

International Economy

The euro zone's economy continued to struggle in 2013, with many of the region's member nations remaining troubled. Overall, the euro zone's real GDP shrank by 0.5 per cent in 2013 after a 0.7 per cent contraction in 2012. While several countries posted annual declines last year, the euro zone's two largest economies, Germany and France, posted real GDP growth of just 0.5 per cent and 0.3 per cent, respectively. In addition, a notable slowing trend in consumer price growth emerged in the euro zone in 2013, with the year-over-year inflation rate beginning the year at 2.0 per cent in January and then falling to just 0.9 per cent in December. For 2013, euro zone inflation registered 1.4 per cent compared to 2012.

Japan embarked on a new era of economic stimulus in 2013, aimed at accelerating the country's growth after nearly two decades of stagnation. Reforms included a mix of monetary and fiscal policies, as well as a substantial increase in government spending. The country saw strong quarterly gains during the first half of the year, but growth slowed considerably in the latter half. In total, Japan's real GDP grew by 1.5 per cent in 2013 after expanding by 1.4 per cent in 2012.

Chart 1.8 External Economic Growth

Source: International Monetary Fund, April 2014

China's annual rate of economic growth held steady in 2013, gaining 7.7 per cent compared to 2012. Although this pace is considerably greater than most other nations, it is much slower than the 9.3 per cent and 10.4 per cent annual growth rates observed in 2011 and 2010, respectively. This slowing trend partly reflects the Chinese government's efforts to curb excessive lending and rebalance the economy towards consumer-driven growth and away from investment- and export-led growth.

Overall, the International Monetary Fund estimates that global real GDP expanded by 3.0 per cent in 2013, down slightly from the 3.2 per cent growth observed the year before. Five years after the global financial crisis, many world nations continue to endure a long slow period of economic recovery that is likely to persist for several more years.

Financial Markets

The Bank of Canada held the overnight target rate at 1.00 per cent throughout 2013, where it has remained since September 2010. As reasons for holding the rate at 1.00 per cent, the Bank noted on several occasions that Canada's pace of inflation remains well below its 2.0 per cent target rate. The Bank also cited considerable slack in the Canadian economy and households continuing to repair their balance sheets as reasons for maintaining its monetary stimulus.

The US Federal Reserve held its intended federal funds rate in the 0.00 to 0.25 per cent range throughout 2013. Reserve officials have maintained the rate in this highly accommodative range since December 2008. In December 2013, the Fed announced its plan to reduce its asset purchases by \$10 billion per month starting in early 2014.

After beginning 2013 above parity at 101.4 US cents, the Canadian dollar fell gradually throughout the year and reached 94.0 US cents on December 31, 2013. Overall, the dollar averaged 97.1 US cents in 2013, down from the 100.1 US cents in 2012. While raising the price of imports for Canadians, the depreciation of the Canadian dollar likely helped Canadian exporters last year.

Conclusion

BC's diverse economy continued its modest pace of growth in 2013, as the province's real GDP expanded by 2.0 per cent on the year after growing by 1.8 per cent in 2012. BC's economic growth in 2013 was fifth among Canadian provinces and equal to the national average.

Domestically, employment in BC fell by 0.2 per cent in 2013, or by 4,400 jobs, as losses in part-time employment outweighed gains in full-time employment. Meanwhile, BC's annual unemployment rate dropped 0.1 percentage points to average 6.6 per cent on the year, lower than the national average of 7.1 per cent. BC housing starts declined by 1.5 per cent in 2013 to reach about 27,100 units and BC retail sales gained 2.4 per cent on the year.

Internationally, the value of BC merchandise exports climbed by 6.3 per cent in 2013 following a decline the previous year, along with strong external demand for BC products. Shipments of manufactured goods also improved in 2013, growing by 3.1 per cent on the year after a 1.8 per cent gain in 2012.

Part Two

Financial Review

2013/14 Overview

Table 2.1 Operating Statement

(\$ millions)	June Update 2013 ¹	Actual 2013/14	Actual 2012/13 ¹
Revenue	44,239	43,728	42,049
Expense	(43,936)	(43,375)	(43,201)
Surplus (deficit) before forecast allowance	303	353	(1,152)
Forecast allowance	(150)	-	-
Surplus (Deficit)	153	353	(1,152)
Capital spending:			
Taxpayer-supported capital spending	3,723	3,151	3,279

	6,336	5,670	6,044
Provincial Debt:			
Taxpayer-supported debt	42,558	41,068	38,182
Self-supported debt	19,864	19,625	17,634
Total debt (including forecast allowance)	62,572	60,693	55,816
Taxpayer-supported debt-to-GDP ratio:			
As previously reported	18.4%		17.0%
Impact of Statistics Canada update	<u>0.4%</u>		<u>0.4%</u>
	18.8%	18.2%	17.4%

¹ Figures have been restated to reflect government accounting policies in effect at March 31, 2014, and the impact of Statistics Canada methodology change for measuring economic growth.

The provincial government ended the 2013/14 fiscal year with a surplus of \$353 million, \$200 million higher than budget and a significant improvement over the previous year's deficit (see Table 2.1).

Revenues were \$511 million lower than budget primarily due to taxation revenue being \$402 million lower than expected. Other revenue decreases reflect lower than projected commercial Crown corporation net earnings and asset sales. (See Revenue section for further details.)

Total government expenses were \$561 million lower than budgeted, as \$731 million in ministry savings, prior year liability adjustments, and other expense reductions were partially offset by \$170 million in statutory spending, mainly for natural disaster related costs, accrued pension liabilities and election related expenses. (See Expense section for further details.)

As the expense reductions exceeded the revenue decreases by \$50 million, the \$150 million forecast allowance was not required.

Taxpayer-supported infrastructure spending on hospitals, schools, post secondary institutions, transit, roads and social housing was \$572 million less than budget, mainly due to project scheduling delays. This spending has been deferred to future years.

Similarly, self-supported capital spending on hydroelectric and transportation projects, and in support of other commercial activities, was \$94 million less than budget due to procurement delays. (See Capital section for further details.)

Chart 2.1 2013/14 surplus – major changes from June Update 2013

\$ millions

Overall, government debt increased by \$4.9 billion in 2013/14, compared to a budgeted increase of \$6.8 billion. The lower increase is primarily due to implementation of government's cash management strategy and to lower than anticipated taxpayer-supported capital spending. (See Debt section for further details.)

Financial information in this publication, including this chapter and Appendix 2, is sourced from the government's 2013/14 *Public Accounts*.

Revenue

In 2013/14, revenue totaled \$43.7 billion – \$511 million lower than budget and up 4.0 per cent from 2012/13. Compared to budget, lower revenues from personal income tax, sales taxes, miscellaneous sources and commercial Crown corporations were partially offset by higher revenue from corporate income and other taxes, natural resources, fees, investment earnings and federal government transfers.

Chart 2.2 Revenue changes from June Update 2013

\$ millions

Income tax revenue

Personal income tax revenue was down \$409 million mainly due to the effects of weaker 2012 tax assessments and lower estimated 2013 and 2014 personal income growth, reflecting a decline in employment levels in 2013 and relatively weak employment growth in the first three months of 2014. The lower 2012 assessments resulted in a one-time revenue loss of \$179 million and reduced the tax base accordingly.

Corporate income tax revenue was up \$318 million mainly due to strong 2012 tax assessments which had the effect of increasing the settlement payment from the federal government for that year as well as current instalment payments. The 2012 assessments reflected a 10.0 per cent increase in the BC corporate income tax base while at the same time BC corporate profits declined by 8.1 per cent.

Table 2.2 Corporate Income Tax Revenue Changes from June Update 2013

	Revenue changes (\$ millions)	Indicators (\$ billions)	June Update	
			2013	Actual
Prior-year adjustment	206	2012 BC corporate tax base	26.7	28.9
Advance instalments	114	2012 National corporate tax base .	240.9	252.8
<i>International Business Activity Act</i> refunds	(2)			
	<u>318</u>			

Consumption and other tax revenue

Provincial sales tax revenue was down \$624 million from budget. The loss included a one-time \$226 million reduction in harmonized sales tax revenue, reflecting updated entitlement information received from the federal government for the 2010/11 to 2012/13 fiscal years including the effects of higher rebates and lower input tax credits. The decline in provincial sales tax revenue was due to weaker-than-expected sales, in line with lower growth in consumer expenditures and a decline in the BC consumer price index (inflation).

Table 2.3 Consumption and Other Tax Revenue Changes from June Update 2013

	Revenue changes (\$ millions)	Indicators (annual percent change)	June Update	2013/14
			2013	Public Accounts
Harmonized sales	(226)	Nominal consumer expenditures	3.1%	2.5%
Provincial sales	(398)	Nominal business investment	6.4%	6.4%
Total sales	(624)			
Fuel	(9)	BC consumer price index	0.9%	-0.1%
Carbon	35	BC housing starts	-13.3%	-1.5%
Tobacco	15	Real GDP	1.4%	1.4%
Property transfer	222	Nominal GDP	3.1%	2.6%
Property	27	Gasoline volume growth	0.0%	2.0%
Insurance premium	23			

Fuel tax revenue was marginally down \$9 million from budget.

Carbon tax revenue was \$35 million higher than budget due to stronger sales of gasoline and natural gas.

Tobacco tax revenue was \$15 million above budget as the effects of implementing an increase in the tax rate (effective October 1, 2013) did not reduce the sales as much as expected.

Property tax revenue was \$27 million above budget mainly due to an increase in the assessed values of non-residential land and improvements.

Insurance premium tax revenue was \$23 million above budget due to higher than expected activity.

Property transfer tax revenue was \$222 million higher than budget due to the effects of a stronger housing market including the impact of increases in average property prices and a higher number of transactions than projected.

Natural resources revenue

Natural gas royalties were \$48 million above budget due to higher prices and production volumes, partly offset by a complementary increase in the utilization of offsetting royalty credit programs. Natural gas prices averaged \$2.57 during 2013/14 (\$Cdn/gigajoule, plant inlet), 14.2 per cent higher than budget, reflecting increased North American market demand due to unseasonably cold weather during the winter months.

Table 2.4 Energy and Mineral Revenue Changes from June Update 2013

	Revenue changes (\$ millions)	Indicators	June Update	
			2013	Actual
Natural gas royalties	48	Natural gas price (\$Cdn/GJ, plant inlet) ..	\$2.25	\$2.57
		Production (annual change)	9.6%	10.2%
Coal, metals and other minerals	(97)	Metallurgical coal price (\$US/tonne)	\$172	\$155
		Copper price (\$US/lb)	\$3.40	\$3.22
Columbia River Treaty electricity sales ..	25	Electricity price (\$US/Mwh)	\$36.79	\$41.29
		Oil price (\$US/bbl)	\$93.41	\$99.04
Sales of Crown land leases ¹	10	Bonus bid cash receipts (\$ million)	\$110	\$221
		Bonus bid price per hectare (\$)	\$1,100	\$1,860
Other	6	Hectares disposed (thousands).....	100	119

¹ Sales of Crown land tenures are recognized over nine years.

Coal, metals and other minerals revenue was \$97 million below budget, mainly due to lower-than-expected coal and copper prices.

Receipts from electricity sales under the *Columbia River Treaty* were \$25 million above budget due to higher electricity prices.

Other energy-related revenue sources were \$16 million above budget mainly due to higher sales of Crown land leases reflecting a higher than budgeted average bid price per hectare.

Forests revenue was \$126 million above budget mainly due to higher stumpage revenue, reflecting higher stumpage rates and lumber prices as well as increased forest related recoveries. These improvements were partly offset by lower harvest volumes and reduced

Table 2.5 Forest Revenue Changes from June Update 2013

	Revenue changes (\$ millions)	Indicators	June Update	
			2013	Actual
Stumpage from timber tenures	98	SPF 2x4 (\$US/1000 bf, calendar year) ..	\$348	\$358
BC Timber Sales	47	Total stumpage rate (\$/m ³).....	\$7.08	\$9.61
<i>Softwood Lumber Agreement</i> border tax ...	(43)	Harvest volumes (million m ³)	64.5	63.4
Vote recoveries	12	Export tax rate (percent)	2.5	1.7
Logging tax and other receipts	12	US lumber exports (billion bf) ¹	7.0	5.7
	126			

¹ Source: Department of Foreign Affairs, Trade and Development

entitlement of the federal government border tax collections. BC's entitlement of border tax collections under the *Softwood Lumber Agreement, 2006* was \$43 million below budget due to lower effective export tax rates – a result of higher prices.

Other natural resources revenue, such as water rentals and hunting/fishing licences, was \$9 million below budget.

Other taxpayer supported sources

Other taxpayer supported revenue which includes fees, licences, investment earnings and other miscellaneous sources was \$126 million below budget mainly due to lower than expected revenue from SUCH sector entities and reprofiling sales of surplus assets to 2014/15 in order to better capture maximum market value.

Table 2.6 Other Revenue Changes from June Update 2013

	Revenue changes (\$ millions)	
Fees	98	mainly higher revenue from SUCH sector entities
Miscellaneous sources	(232)	mainly lower revenue from SUCH sector and Crown agencies
Investment earnings	55	mainly higher earnings from SUCH sector and Crown agencies
Release of surplus assets	(47)	reprofiling to 2014/15
Total other	(126)	

Federal government transfers

Federal government contributions were up \$22 million reflecting a \$36 million improvement in other federal government transfers mainly due to higher direct funding to the post secondary institutions. This improvement was partly offset by a \$14 million decrease in the Canada Health Transfer and Canada Social Transfer entitlements mainly due to a lower population share.

Commercial Crown corporations

Commercial Crown corporation net income of \$2.6 billion was \$114 million below budget, and \$75 million lower than 2012/13.

British Columbia Hydro and Power Authority

BC Hydro net income of \$549 million was \$4 million higher than plan, reflecting an 11.84 per cent allowed return on deemed equity for 2013/14.

In compliance with BC Utilities Commission (BCUC) orders, BC Hydro uses several regulatory accounts to better match costs and benefits for different generations of customers, smooth out the rate impact of large non-recurring costs, and defer to future periods differences between forecast and actual costs or revenues. BC Hydro had 27 regulatory accounts totaling \$4.7 billion at March 31, 2014 – up \$265 million from the prior year. Approximately 80 per cent of the regulatory balance is being recovered through current electricity rates over an estimated average period of 14 years.

A California litigation settlement was reached in October 2013 between Powerex, a BC Hydro subsidiary that participates in energy markets across North America, and 5 California parties. The litigation related to electricity market prices during 2000

and 2001. The settlement amount, totaling US\$750 million, reflects cancellation of US\$477 million owed to Powerex by the US parties and a cash payment of US\$273 million into escrow. It is anticipated that the settlement will become final and the funds released from escrow by the end of the 2014/15 fiscal year.

BC Hydro pays a dividend to government equivalent to 85 per cent of net income unless the payment would result in BC Hydro's debt to equity ratio falling below 80:20. In such cases the payment is reduced until the ratio is restored. In 2013/14, the corporation's dividend to government was \$167 million (30 per cent of net income). BC Hydro has not paid a full dividend since 2005/06. Government has put in place a plan to phase out the payment of dividends by BC Hydro within five years as part of a ten-year plan to stabilize rate increases and improve BC Hydro's capital structure to a 60:40 debt to equity ratio.

More information about BC Hydro's financial results and performance measures is provided in the corporation's annual report available at its website: www.bchydro.com.

British Columbia Liquor Distribution Branch

LDB net income of \$877 million was \$26 million higher than plan mainly due to stronger sales in wines, draught beer and refreshment beverages, and lower operating expenses.

As part of an initiative to improve service for both wholesale and retail customers and to improve efficiencies, LDB will modernize and streamline its warehouse and distribution systems. This initiative includes the sale of its Vancouver distribution centre and construction of a purpose-built facility. The property sale is expected to be finalized by the fall of 2014 and the new warehouse to be complete in 2017.

More information about LDB's financial results and performance measures is provided in the corporation's annual report available at its website: www.bclldb.com.

British Columbia Lottery Corporation

BCLC net income of \$1,165 million (net of payments to the federal government) was \$3 million higher than plan reflecting higher net income from casino and community gaming operations, partially offset by lower net income from lottery and eGaming channels.

Higher net income from casino and community gaming operations was mainly due to higher revenue from table games (up \$49 million) and lower taxes (down \$23 million reflecting return to the GST/PST tax structure), partially offset by lower slot machine revenue (down \$39 million) and higher operating costs (up \$18 million).

Lower net income from lottery and eGaming operations was mainly due to reduced revenue from eGaming (down \$42 million), partially offset by higher revenue from Instant lottery products (up \$25 million), lower operating expenses (down \$7 million), and lower taxes (down \$7 million reflecting return to the GST/PST tax structure).

In order to achieve operating efficiencies and streamline business functions, BCLC incurred one-time restructuring costs of \$25 million in 2013/14 including staff reductions, management of warranties and licences, and the contracting of food and security services.

More information about BCLC's financial results and performance measures is provided in the corporation's annual report available at its website: www.bclc.com.

Insurance Corporation of British Columbia

ICBC net income of \$136 million was \$121 million lower than plan mainly due to a reduction in the discount rate for future care claims (to 2.0 per cent from 3.5 per cent) and future wage loss claims (to 1.5 per cent from 2.5 per cent) as amended by the Office of the Chief Justice of the BC Supreme Court under the legislated authority of that office. The impact of this amendment reduced net income by \$242 million.

In addition to this impact, claims costs were higher by \$17 million, and an unfavourable \$76 million deferred premium acquisition cost adjustment was recorded as future claims costs are expected to exceed associated unearned premium revenue. The above negative impacts were partially offset by higher investment income (up \$195 million) and lower operating costs (down \$19 million, including Transformation Program costs).

In 2013, the provincial government directed ICBC to transfer \$237 million of its excess Optional capital to government's consolidated revenue fund and allocate the remaining \$113 million to the Basic insurance line of business to bolster its capitalization ratio. The latter was in addition to the transfer of \$373 million of excess Optional capital transferred to Basic insurance in 2012, also at government's direction. The infusion of capital was needed to offset the impact of the Basic insurance rate deficiency in those years, despite an 11.2 per cent rate increase in February 2012.

ICBC applied to the BCUC for a 4.9 per cent Basic insurance rate increase in 2013 to offset claims loss trends, and subsequently was approved for a 5.2 per cent increase by the BCUC. The 0.3 per cent difference is deferred to the 2014 Revenue Requirements Application to be filed by August 31, 2014.

The loss cost for bodily injury claims increased by 2.4 per cent in 2013 (compared to an increase of 9.3 per cent in 2012) and the loss cost for collision claims increased by 1.6 per cent (compared to an increase of 3.1 per cent in 2012).

More information about ICBC's financial results and performance measures is provided in the corporation's annual report available at its website: www.icbc.com.

Other commercial Crown entities

The Transportation Investment Corporation's net loss of \$88 million was a \$4 million improvement over the *June Update 2013* plan. Based on a year's worth of actual traffic data, TI Corp has revised its traffic and revenue projections to reflect a more modest traffic growth than anticipated during the project's planning, reducing annual revenue estimates by 20 per cent below the previous forecast.

Net income from other commercial Crown entities was \$30 million below plan mainly due to the delayed sale of LDB's Vancouver warehouse property (\$35 million was included in other commercial Crown corporation revenue for this initiative – see section on LDB above for more details).

The Columbia Power Corporation is realigning its corporate structure to better reflect the operations of a commercial enterprise that will participate in joint development power projects. As such, in March 2014, CPC's board of directors approved a \$250 million contributed surplus repayment and \$30 million dividend to the provincial government, and a \$20 million loan repayment to the Columbia Basin Trust. This restructuring was financed through a \$335 million debenture issued in April 2014.

A detailed review of revenue changes by quarter is available in Appendix Table A2.1. Multi-year trends in provincial government revenue sources can be found in Appendix Tables A2.5 and A2.6.

¹ Amounts have been restated to reflect government accounting policies and organization in effect at March 31, 2014.

² Actual results for ministries and special offices reflect the accountabilities in the *Balanced Budget and Ministerial Accountability Act*. Under BBMAA, spending funded by the Contingencies Vote is not attributed to the various ministries, but is shown as a separate accountability of the Minister of Finance.

³ Reflects payments made under an agreement where an expense from a voted appropriation is recorded as revenue by a special account.

Expense

In 2013/14, government expenses totaled \$43.4 billion; \$561 million (1.3 per cent) lower than budget and \$174 million (0.4 per cent) higher than the previous year. The actual expense growth in 2013/14 was less than one fourth that of the projection in *June Update 2013*.

Chart 2.3 Expense changes from June Update 2013

\$ millions

Consolidated Revenue Fund

Due to government's ongoing expenditure management regimen, ministries were able to realize operating savings of \$169 million in addition to the \$30 million target for further expenditure management built into *June Update 2013*, but which had not been allocated at the time of the budget. This resulted in an overall \$199 million decrease in ministry spending, including the following:

- Health spending was down \$164 million, mainly due to lower than anticipated take-up of new initiatives in Regional Health Services, and savings from lower MSP and PharmaCare costs (Ministry of Health).
- Other savings included lower spending of \$10 million on corporate services and technology solutions (Ministry of Technology, Innovation and Citizens' Services), savings of \$6 million on highway operations and infrastructure improvements (Ministry of Transportation and Infrastructure). Expenditure management initiatives in other ministries totaled \$19 million.

In addition to the ministry specific savings above, other expense reductions in the Consolidated Revenue Fund included a \$105 million reduction in refundable tax credits, \$22 million in interest cost savings due to reduced borrowing requirements (Management of Public Funds and Debt Vote, net of eliminations) and \$33 million in unused allocations for Contingencies, legislative and other appropriations.

Government used the Contingencies Vote as a prudent budgeting tool to fund priority initiatives and manage both current and future budget pressures. These included:

- \$22 million for various agreements with First Nations, including treaty related costs (Ministry of Aboriginal Relations and Reconciliation);
- \$42 million for re-profiling transfers to independent schools and public libraries (Ministry of Education);
- \$11 million for the Columbia River Treaty review, Geoscience BC, and other ministry operations (Ministry of Energy and Mines);
- \$12 million for overseas and related initiatives (Ministry of International Trade);
- \$11 million for the Resort Municipalities Initiative (Ministry of Jobs, Tourism and Skills Training);
- \$15 million for court related costs, and for the Family Maintenance Enforcement and Immediate Roadside Prohibition Programs (Ministry of Justice);
- \$22 million for Community Living BC caseload growth; and
- \$7 million in other areas.

As well, \$60 million was paid directly from the Contingencies Vote to First Nations for accommodation costs related to government's release of assets for its economic generation initiative.

During the year, government invoked standing statutory authority to cover \$170 million in unforeseen costs. These included:

- \$59 million in direct fire response costs (Ministry of Forests, Lands and Natural Resource Operations);
- \$21 million for emergency flood response costs under the *Emergency Program Act* (Ministry of Justice);
- \$49 million for the amortization of the unfunded actuarial liability in the Teachers' Pension Plan (Ministry of Finance);
- \$31 million to finance the cost of the 2013 provincial election (Elections BC); and
- \$10 million in other areas.

Liabilities accrued in prior years were adjusted downward by \$159 million to reflect actuarial valuations and other updated information. These included reductions of:

- \$69 million in the Ministry of Finance, primarily related to accruals for long term disability benefits and self-insurance liabilities;
- \$62 million in the Ministry of Health, primarily related to accrued expenses for regional operations, MSP payables, and account operations;
- \$16 million in the Ministry of Forests, Lands and Natural Resource Operations, primarily related to accrued costs for competitiveness and innovation initiatives; and
- \$12 million of other adjustments.

Recovered Expenses

Program spending funded or co-funded by parties outside of government was \$75 million less than budget. The change reflects:

- a \$147 million decrease relating to a change in accounting treatment for the flow-through of medical service plan payments from ICBC and WorkSafeBC for accident related costs; and
- a \$68 million reduction in free Crown grants (the expense is offset by a fair market valuation recovery);

partially offset by,

- an \$83 million increase in other recoverable healthcare costs, primarily for PharmaCare costs under Product Listing Agreements with drug companies and for services provided to patients from outside BC;
- a net \$29 million increase in expenses associated with labour market and immigration initiatives, which are recovered from the federal government; and
- a net \$28 million increase in other spending related to First Nations revenue sharing agreements, out-of-province firefighting costs and other cost-shared programs.

Operating Transfers

Operating grants paid to government agencies increased by \$200 million primarily due to higher grants to health authorities (\$154 million) and post-secondary institutions (\$35 million). Grants to other service delivery agencies showed an overall net increase of \$11 million.

The increase in grants resulted in an overall decrease in expense due to the related party nature of these transfers, which represent an expense to ministries, but revenue to service delivery agencies. If the increase in service delivery agency operating spending is less than the increase in transfers, as is the case in 2013/14 (\$33 million less), the overall expense has been deferred to future years.

Service Delivery Agency Spending

Service delivery agency spending was \$32 million higher than budget, including a \$135 million gain in the actuarial valuation of the health organizations' employee benefit liability. Excluding this adjustment, operating costs were \$167 million higher than budget.

School districts' spending was \$63 million higher due to higher costs for salaries and wages (\$15 million) and operating costs (\$32 million). As well, capital amortization expense was \$16 million higher than projected.

Post-secondary institution spending was \$7 million lower than budget, reflecting a \$29 million reduction in university spending, mainly due to reduced third party research grants, partially offset by a \$22 million increase in college expenses, mainly in the area of salaries and benefits.

Health authority and hospital society spending was \$31 million higher than projected; however the increase included a \$135 million positive adjustment to the employee benefit liability. Excluding the liability adjustment, spending was \$166 million higher than

planned, which was funded by the increase in grants provided to the health authorities identified in the Operating Transfers section above. The spending increase reflected a growing demand for healthcare services delivered by these organizations on behalf of government, and included higher costs for salaries and benefits (\$52 million) as well as higher net operating and other expenses (\$114 million).

An overall reduction of \$55 million in other service delivery agency spending reflected lower transportation infrastructure spending (\$13 million), lower housing subsidy costs (\$22 million), other net spending decreases (\$23 million), and interest cost savings (\$19 million). These reductions were partially offset by a \$22 million increase in community living services spending.

A detailed review of the above changes by quarter is available in Appendix Table A2.1. Further information on 2013/14 spending by function is provided in Appendix Table A2.7.

Provincial Capital Spending

Capital spending in 2013/14 totaled \$5.7 billion – \$3.2 billion on taxpayer-supported infrastructure and \$2.5 billion on the self-supported infrastructure of commercial Crown corporations.

Spending on government direct capital (i.e. government ministry infrastructure, including IT systems, court houses and correctional institutions) as well as health and education facilities comprised an aggregate 35 per cent of total capital spending in 2013/14. While this spending is predominantly taxpayer financed, a portion is funded from third party contributions.

Chart 2.4 Capital spending, 2013/14

Per Cent of Total

Total: \$5,670 million

Spending on highways and public transportation is primarily taxpayer-supported, and reflects government's transportation and transit investment plan. Roughly 15 per cent of total government spending in this category in 2013/14 was for the Port Mann Bridge replacement and associated Highway 1 improvements, which is a self-supported commercial project to be funded from tolls. This project is essentially complete.

Spending on power generation and transmission projects is the largest single category of capital spending and is entirely self-supported. The spending primarily reflects BC Hydro's refurbishment and expansion of its generating and transmission assets, as well as the Waneta Dam power expansion project undertaken by the Columbia Power Corporation (CPC).

Other capital spending includes taxpayer-supported spending on social housing, as well as spending by other commercial Crown corporations on IT systems and equipment.

Table 2.9 Capital Spending

(\$ millions)	June Update 2013	Actual 2013/14	Actual 2012/13

	2,613	2,519	2,765
Total capital spending	6,336	5,670	6,044

Taxpayer-supported Capital Spending

In 2013/14, government spending on taxpayer-supported infrastructure was \$572 million below budget.

Education facilities spending was \$121 million less than budget reflecting:

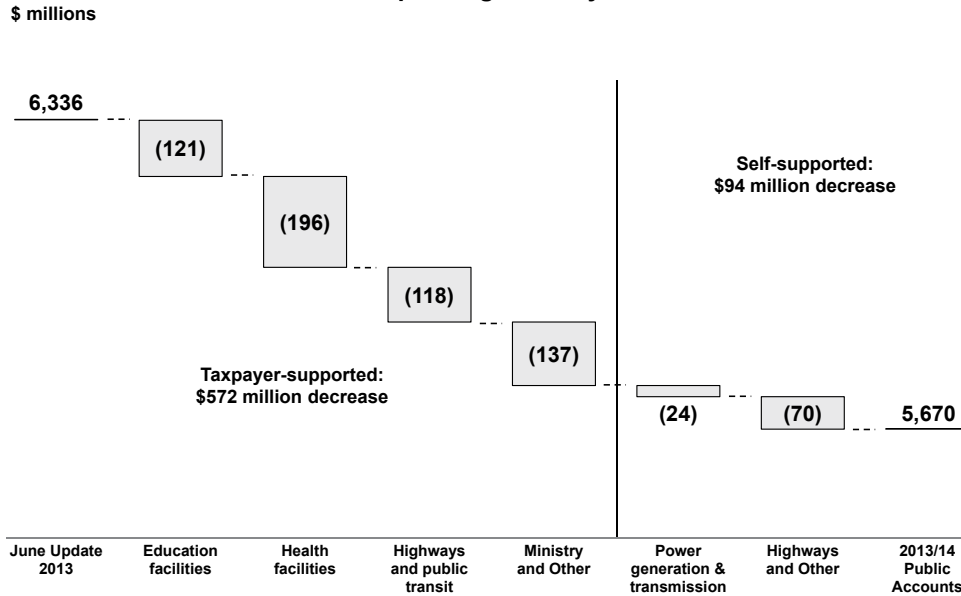

- a \$67 million decrease by school districts due to changes to project schedules, requiring the reprofiling of capital spending for several projects including Queen Mary Elementary School, Centennial Secondary School, and the Wellington Secondary School seismic upgrade; and
- a \$54 million decrease by post-secondary institutions, which is mainly attributed to project schedule and spending adjustments to contributor-funded projects, including the University of British Columbia's Ponderosa Common Student Residence and District Energy Hot Water Conversion projects.

Health facilities spending was \$196 million less than budget, reflecting scheduling changes for various projects, including the Clinical and Systems Transformation, Surrey Memorial Emergency Department/Critical Care Tower, Queen Charlotte Hospital, Interior Heart and Surgical Centre, and Children's and Women's Hospital projects.

Highways and public transit spending was \$118 million less than budget, mainly due to changes to project planning and construction schedules, as well as changes in the timing of federal contributions towards project costs.

Government direct spending was \$109 million less than budget due to schedule and spending changes for various projects and unused project reserves. Other taxpayer-

Chart 2.5 Capital spending changes from June Update 2013
Total spending lower by \$666 million

supported spending was \$28 million lower than planned, partially due to social housing project scheduling changes.

The above scheduling changes do not represent a reduction in capital spending; rather, the spending has been deferred to future years.

Self-supported Capital Spending

Commercial Crown corporation spending on capital projects in 2013/14 was \$94 million less than budget.

Power generation and transmission spending was \$24 million less than planned mainly due to differences in the timing of expenditures on the Waneta Dam expansion project (a joint venture of the Columbia Power Corporation and Columbia Basin Trust in partnership with Fortis Inc.).

Highways spending by TI Corp on the Port Mann Bridge project was \$71 million less than planned, mainly reflecting the contractor's rescheduling of capital spending into 2014/15.

Other self-supported spending was \$1 million greater than budget, mainly reflecting \$26 million in residential and commercial building investments on the UBC and Great Northern Way campuses. This increase was partially offset by lower spending by the BC Lottery Corporation on its gaming management system project and equipment replacement (down \$20 million), and scheduling changes by other commercial Crown corporations (down \$5 million).

Further details on capital spending are provided in Appendix Table A2.10.

Major Capital Projects

Significant capital projects (those with multi-year budgets totaling \$50 million or more) are shown in Table 2.10. During 2013/14, \$2.3 billion was invested in these larger projects that will provide long-term social and economic benefits for the province.

¹ Only projects that receive provincial funding and have been approved by Treasury Board and/or Crown corporation boards are included in this table. Ministry service plans may include projects that still require final approval. Capital costs reflect current government accounting policy.

² Assets have been put into service and only trailing costs remain.

³ Reflects the combined shares of Columbia Power Corporation (32.5 per cent) and Columbia Basin Trust (16.5 per cent) in their partnership with Fortis Inc. for the development of an electricity generating facility at the Waneta Dam south of Trail.

As projects are completed, or new ones receive approval, the projects are removed or added from the \$50 million table. During the fiscal year the Victoria Royal Jubilee Hospital patient care centre project was completed and the following projects added:

- the Joseph and Rosalie Segal Family Health Centre project at Vancouver General Hospital (\$82 million);
- a clinical and systems transformation project in the health sector (\$480 million);
- the Big Bend substation power project in Burnaby (\$56 million) and
- the Long Beach reinforcement power project comprising the expansion of two substations on Vancouver Island (\$56 million).

Financing Capital Spending

Provincial capital infrastructure spending is financed through a combination of sources:

- operating cash flows (i.e. cash derived from the operating surplus and management of operating accounts);
- partnerships with the private sector (public-private partnerships or P3s);
- cost-sharing with partners; and
- borrowing (debt financing).

Chart 2.6 Financing taxpayer-supported capital spending

Chart 2.6 shows that 60 per cent of 2013/14 taxpayer-supported capital spending was financed from direct borrowing, 24 per cent from operating cash flows, 10 per cent from external capital contributions and 6 per cent from public-private partnerships.

Commercial Crown capital spending of \$2.5 billion was financed 79 per cent from direct borrowing (\$2.0 billion), and 21 per cent from operating cash flows (\$0.5 billion).

Provincial Debt

As at March 31, 2014, total provincial debt totaled \$60.7 billion – 26.9 per cent of BC’s nominal GDP. The primary driver for borrowing is capital spending, with over 83 per cent of debt incurred to finance infrastructure. As well, 32 per cent of the total debt is self-supported through the commercial activities of Crown corporations.

The taxpayer-supported debt to GDP ratio, a measure often used by investors and credit rating agencies to analyze a government’s ability to manage its debt load, stood at 18.2 per cent. While this is up 0.8 percentage points from 2012/13, it is still significantly below the peak of 21 per cent in 2002/03. British Columbia’s taxpayer-supported debt to GDP is one of the lowest in Canada, translating into a strong credit rating and lower debt service costs.

Chart 2.7 Provincial debt components

Per Cent of Total

Total: \$60,693 million

Government direct operating debt is the cumulative borrowing incurred to finance core government operations when operating spending by ministries and special offices exceeds CRF revenue. This includes both net spending on direct program delivery and on operating grants provided to service delivery agencies, but does not include the issuance of capital grants. There is a standing legislative requirement to retire this debt before government can use supplementary appropriations to authorize additional spending during a year.

Debt for schools, post-secondary institutions and health facilities for the most part was incurred by government as a result of the direct funding of this infrastructure through capital grants, whereas highways and public transit debt primarily reflects direct borrowing by government controlled agencies, such as the BC Transportation Financing Authority and the Transportation Investment Corporation (TI Corp). TI Corp, whose debt accounts for just over one-fifth of the highways and public transit debt, is a commercial enterprise that operates and maintains the Port Mann Bridge under a tolling regime.

Power generation and transmission debt is entirely commercial in nature and is predominantly the debt of BC Hydro. A small portion of this debt reflects borrowing for the Columbia River power projects managed by Columbia Power Corporation (CPC).

Other debt includes government borrowing for direct capital (post-2008/09), government's obligations under the immigrant investor program, and borrowing to finance the reconstruction of the BC Place stadium roof (all taxpayer-supported debt). It also includes the commercial borrowing of the BC Lottery Corporation (BCLC) for gaming equipment and gaming management software as well as the debt of post-secondary institution commercial subsidiaries.

Table 2.11 Provincial Debt Summary ¹

(\$ millions)	June Update 2013	Actual 2013/14	Actual 2012/13
Taxpayer-supported debt

Highways and public transit	3,315	3,209	2,610
Other	421	387	382
	19,864	19,625	17,634
Forecast allowance	150	-	-
Total provincial debt	62,572	60,693	55,816
Debt to GDP			
Taxpayer-supported	18.8 ²	18.2	17.4
Total	27.4 ²	26.9	25.4

¹ Debt is after deduction of sinking funds and unamortized discounts; it includes the current portion, but excludes accrued interest, which is reported on government's statement of financial position as an accounts payable.

² Revised to reflect Statistics Canada's Provincial Economic Accounts Update released on November 8, 2013.

Total debt increased by \$4.9 billion in 2013/14 – a \$1.9 billion improvement over the \$6.6 billion increase for the year projected in *June Update 2013*. The improvement reflected a \$1.5 billion reduction in taxpayer-supported borrowing, a \$239 million reduction in self-supported borrowing, and the expiry of the \$150 million forecast allowance reflected the budget projection for total debt.

Lower borrowing requirements for taxpayer-supported debt primarily reflected the positive impact of government's cash management strategy (initially through the Central Deposit Program) in reducing borrowing for operating needs. Lower capital borrowing requirements reflected lower than expected capital spending, partially offset by the impact of lower capital contributions from third parties.

Under the Central Deposit Program (CDP), government encourages SUCH sector and other taxpayer-supported organizations to deposit their cash reserves with the Provincial Treasury, rather than their local bank. Provincial Treasury in turn uses the cash balances

Chart 2.8 Debt changes from June Update 2013

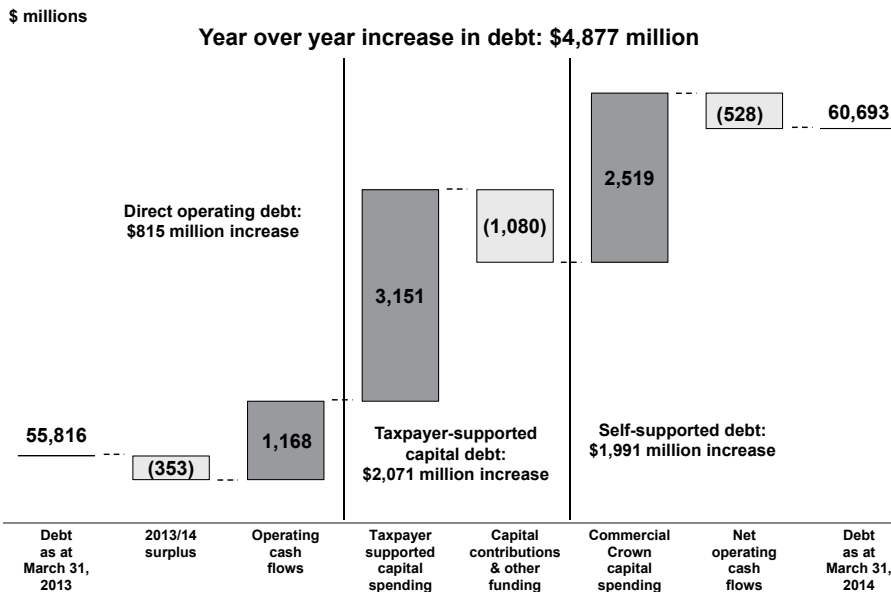

for debt management purposes until the funds are required by the organizations. By March 31, 2014, the CDP resulted in a revolving cash balance of \$1.2 billion, reducing government’s short term debt borrowing accordingly.

For self-supported debt, the \$239 million reduction in borrowing from budget reflects the impact of lower capital spending and reduced requirements for operating cash inflows on the part of commercial Crown corporations.

Surplus versus change in debt

The majority of government’s borrowing in 2013/14 financed its capital program, with only one-sixth of the \$4.9 billion increase in debt attributable to operating requirements.

Chart 2.9 Reconciliation of surplus to change in debt

The \$353 million surplus was more than offset by negative operating cash flows of \$1.2 billion, resulting in an overall \$815 million increase in direct operating debt. The negative cash flows were a result of:

- a \$993 million increase in accounts receivable (i.e. a delay in the collection of revenue), primarily in the area of sales taxes as a result of the reinstatement of the PST;
- a \$938 million decrease in amounts owed to the federal government, mainly related to the reimbursement of HST instalment over-payments; and
- \$256 million in other net positive cash flows, mainly resulting from non-cash amounts in the surplus (e.g. capital asset amortization net of deferred revenue recognition and commercial Crown corporation retained earnings);

partially offset by,

- the conversion of \$1,019 million of investment balances to cash, primarily from the liquidation of sinking funds.

The \$2.1 billion increase in taxpayer-supported capital debt reflects the net financing requirements of the \$3.2 billion infrastructure program. The \$1.1 billion in capital spending not financed by debt was funded by \$316 million in capital contributions from the federal government and other external organizations, and by the use of \$764 million of operating cash flows by service delivery agencies for capital purposes.

The \$2.0 billion increase in self-supported debt primarily reflects the capital spending of BC Hydro, TI Corp and BCLC, which is financed through the fiscal agency loan program. A portion of this infrastructure spending and the capital spending of the other commercial Crown corporations were funded by \$528 million in net operating cash flows.

Debt Indicators

Table 2.12 provides a historical summary of financial indicators depicting the province's debt position, recent borrowing trends and related interest cost burden.

Further details on provincial debt are provided in Appendix Tables A2.11 to A2.13.

Table 2.12 Key Debt Indicators¹

¹ Figures for prior year have been restated to conform with the presentation used for 2013/14 and to include the effects of changes in underlying data and statistics.

² The ratio of debt to population (e.g. debt at March 31, 2014 divided by population at July 1, 2013).

³ The ratio of debt outstanding at fiscal year end to provincial nominal gross domestic product (GDP) for the calendar year ending in the fiscal year (e.g. debt at March 31, 2014 divided by 2013 GDP).

⁴ The ratio of interest costs (less sinking fund interest) to revenue. Figures include capitalized interest expense in order to provide a more comparable measure to outstanding debt.

⁵ Weighted average of all outstanding debt issues.

⁶ Includes revenue of the consolidated revenue fund (excluding dividends from enterprises) plus revenue of all government organizations and enterprises.

⁷ Excludes revenue of government enterprises, but includes dividends from enterprises paid to the consolidated revenue fund.

⁸ Excludes debt of commercial Crown corporations and agencies and funds held under the province's warehouse borrowing program.

⁹ Nominal GDP for the calendar year ending in the fiscal year (e.g. GDP for 2013 is used for the fiscal year ended March 31, 2014). As nominal GDP for the calendar year ending in 2013 is not available, the 2013 GDP projected in February 2014 has been used for the fiscal year ended March 31, 2014 for demonstration purposes.

¹⁰ Population at July 1st within the fiscal year (e.g. population at July 1, 2013 is used for the fiscal year ended March 31, 2014).

Credit Rating

A credit rating reflects a borrower's ability to pay interest and to repay principal. It impacts the borrower's debt servicing costs and the investor's rate of return since an investor will demand a higher interest rate on a higher-risk, lower-rated security. Table 2.13 provides an interprovincial comparison of credit ratings.

Table 2.13 Interprovincial Comparison of Credit Ratings, July 2014

Province	Rating Agency ¹		
	Moody's Investors Service	Standard & Poor's	Dominion Bond Rating Service
British Columbia	Aaa	AAA	AA (High)
Alberta	Aaa	AAA	AAA
Saskatchewan	Aa1	AAA	AA
Manitoba	Aa1	AA	A (High)
Ontario	Aa2	AA-	AA (Low)
Quebec	Aa2	A+	A (High)
New Brunswick	Aa2	A+	A (High)
Nova Scotia	Aa2	A+	A (High)
Prince Edward Island	Aa2	A	A (Low)
Newfoundland	Aa2	A+	A

¹ The rating agencies assign letter ratings to borrowers. The major categories, in descending order of credit quality are: AAA/Aaa; AA/Aa; A; BBB/Baa; BB/Ba; and B. The "1", "2", "3", "high", "low", "+", and "-" modifiers show relative standing within the major categories. For example, AA+ exceeds AA and Aa2 exceeds Aa3.

BC's fiscal outlook and its record for meeting annual budget targets has resulted in ratings of Aaa and AAA (the highest possible ratings) from Moody's and Standard & Pools respectively, while Dominion Bond Rating Service rates the province at AA (high).

Pension Plans

The province contributes to four defined benefit pension plans (Public Service, Municipal, Teachers' and College) for many of its employees. These pension plans are managed under joint trusteeship arrangements with the plan members. Under joint trusteeship, the provincial government has no formal claim on plan surpluses or assets; however, government is responsible for 50 per cent of any unfunded liabilities in the Public Service, Teachers' and College plans and 35 per cent of any unfunded liability in the Municipal plan since the province's interest in the plan is only 70 per cent.

As a result, government's balance sheet only includes its share of any unfunded pension liabilities incurred by the four pension plans under the joint trusteeship arrangements (e.g. \$212 million under the Teachers' Pension Plan (TPP) in 2013/14), as well as the entire liability for the MLA Superannuation Account, which is not part of a joint trusteeship arrangement.

In the event that a plan is determined to be in a deficit position, the pension boards, by agreement, are required to address the deficit through contribution adjustments or other measures. As a result, it is expected that any unfunded pension liability in the future would be short-term in nature.

For example, the TPP first reported an unfunded liability in 2009/10. Contribution rates for both teachers and government were increased at the time, as per the joint trusteeship arrangement, and again in 2012/13 in order to address the unfunded liability over the expected average remaining service lifetime of the plan.

The pension valuations do not include future indexing of pensions, as this is a non-guaranteed supplemental benefit to the plans that is determined by the amount of available assets in separate inflation accounts. The estimated financial positions of each plan (based on extrapolations of the most recent actuarial valuations) as at March 31, 2014 are shown in Table 2.14.

Table 2.14 Pension Plan Balances

(\$ millions)	Pension Plan					Total	
	Public Service	Municipal ¹	Teachers' ²	College	Other ³	2013/14	2012/13
Accrued benefit obligation	(16,309)	(20,423)	(17,477)	(2,889)	(681)	(57,779)	(55,197)
Pension fund assets	16,729	19,227	15,806	2,851	662	55,275	53,463
Subtotal	420	(1,196)	(1,671)	(38)	(19)	(2,504)	(1,734)
Unamortized actuarial (gain) loss	994	1,999	1,247	187	(6)	4,421	4,170
Accrued net asset (obligation)	1,414	803	(424)	149	(25)	1,917	2,436

¹ The balance shown for the Municipal Pension Plan (MPP) is based on an extrapolation of the December 31, 2012 actuarial valuation. The MPP recently underwent an actuarial valuation that was not completed in time for the Public Accounts. The assessment shows the plan to be in deficit, but the amount of the deficit has yet to be finalized. Government will be making the necessary adjustments to unfunded pension liability in its financial statements once the final amount is known.

² The government is responsible for 50 per cent of the unfunded pension liability incurred under the Teachers' Pension Plan and has accrued this liability in its 2013/14 accounts. The liability will be settled in future periods through increased employer contributions.

³ Represents other defined benefit plans, outside of the four main pension plans, which are funded by entities within the government reporting entity. Includes the Retirement Plan for Non-Teaching Employees of the Board of School Trustees of School District No. 43 (Coquitlam), the University of Victoria's pension plan for employees other than faculty and professional staff, and Simon Fraser University's Academic Pension Plan and Administrative/Union Pension Plan.

Actuarial valuations are performed on the pension plans normally every three years. The pension plans and the dates of their last actuarial valuation are:

- Public Service Pension Plan, March 31, 2011;
- Municipal Pension Plan, December 31, 2012;
- Teachers' Pension Plan, December 31, 2011; and
- College Pension Plan, August 31, 2012.

Key actuarial assumptions used for valuation purposes are generally conservative. Currently the valuations of each of the pension plans assume a long-term annual rate of return on fund assets of 6.50 per cent and a long-term salary escalation rate of 3.75 per cent.

The pension plans are administered by the BC Pension Corporation in accordance with direction received from the various pension boards. The audited financial statements of each pension plan, along with full descriptions, benefit formulas, inflation assumptions and funding policies may be found on the corporation's website at www.pensionsbc.ca.

Contractual Obligations

Contractual obligations represent the annual nominal future cash payments for multi-year contracts for the delivery of services and construction of assets – except in the case of P3 contracts, where the initial obligations represent the accrued liabilities as the assets are constructed despite no cash outlay on the part of government.

As at March 31, 2014, taxpayer-supported entities have incurred \$43.0 billion in contractual obligations, and self-supported Crown corporations and subsidiaries have

incurred \$59.9 billion in contractual obligations, for a total of \$102.9 billion in contract payments that will be made over the next up to 50 years, depending on the terms of the contract.

Contractual obligations represent ongoing program costs where the projected expense has been quantified in an agreement. They are not off-balance sheet debt; nor are they unfunded costs. Rather, these annual costs have been incorporated into the overall program budgets of the contracting ministries and other entities similar to other future-oriented government program costs such as legislated entitlements and capital asset amortization. In the case of self-supported Crown corporations and subsidiaries, the payments will be made from future revenue streams.

Table 2.15 Taxpayer-supported Contractual Obligations

(\$ millions)	2014/15	2015/16	2016/17	2017/18	2018/19	2019/20+	Total
Coastal ferry services agreement	193	194	194	194	194	8,536	9,505
Capital construction and maintenance P3s	785	600	329	276	286	5,195	7,471
Provincial policing contracts	363	331	331	331	331	4,307	5,994
Housing subsidy agreements	330	243	242	234	233	5,016	6,298
Program delivery agreements	1,940	540	489	154	142	1,381	4,646
Operating and maintenance agreements	701	544	405	355	322	672	2,999
Service delivery agreements	803	795	768	643	532	896	4,437
Capital and economic development agreements .	448	247	172	133	122	498	1,620
	<u>5,563</u>	<u>3,494</u>	<u>2,930</u>	<u>2,320</u>	<u>2,162</u>	<u>26,501</u>	<u>42,970</u>

Taxpayer-supported contractual obligations can be grouped into eight categories (see Table 2.15) as follows:

- Coastal ferry services agreement – annual operating subsidy provided by the Ministry of Transportation and Infrastructure to BC Ferry Services Inc. in support of its smaller routes.
- Capital construction and maintenance P3s – the initial two years reflect accrued liabilities for projects under construction, the annual amounts smooth out in later years to reflect the annual service payments that will be made to maintain the asset and retire the liabilities.
- Provincial policing contracts – annual operating cost of the policing contract with the RCMP (aside from major cities such as Vancouver, which have their own police forces, policing in British Columbia is provided by the RCMP under contract).
- Housing subsidy agreements – annual operating cost of the subsidy agreements between BC Housing Management Commission and cooperative subsidized housing associations.
- Program delivery agreements – annual operating cost of agreements with third-party entities that provide services to the public on behalf of government, such as care homes. Some agreements are for one year only.
- Operating and maintenance agreements – annual operating cost of agreements with third-party entities that operate and maintain government infrastructure on behalf of government. Over three-fourths of this category relates to the road and bridge maintenance agreements with the Ministry of Transportation and Infrastructure.

- Service delivery agreements – annual operating cost of agreements with third-party entities that provide services directly to government, such as the Telecommunications Service Master Agreement with Telus.
- Capital and economic development agreements – annual cost of agreements to build infrastructure, such as Columbia Basin Trust’s share of the Waneta expansion project, or to share economic benefits, such as First Nations agreements with the Ministry of Forests, Lands and Natural Resource Operations.

Almost all (94 per cent or \$56.5 billion) of the contractual obligations for self-supported Crown corporations and subsidiaries are for BC Hydro power purchase agreements with independent power producers (IPPs). This ongoing cost of energy is factored into BC Hydro’s financial statement projections in the fiscal plan, although any contractual increases to the tariffs paid to the IPPs will have to be recovered from future electricity rate increases.

The remaining contractual obligations for self-supported Crown corporations and subsidiaries relate to maintenance and service agreements, whose costs also are factored into government fiscal plan projections.

2013/14 *Public Accounts* Audit Qualification

The Auditor General disagreed with BC’s Comptroller General on the application of Canadian GAAP in the 2013/14 *Public Accounts* towards reporting transfers received from the federal government and/or non-government sources for the purchase and construction of assets.

Rather than deferring the transfers and amortizing the amount to revenue on the same basis as the amortization of the related expenditure, the Auditor General advocates reporting transfers as revenue in the period the transfers are made, unless the transfer establishes a financial liability on the part of the recipient. The Comptroller General feels PSAB guidance still supports deferral in situations where use of the funds is externally restricted to expenditures of this nature.

As well, the Auditor General has accepted that TI Corp meets the accounting standard for being classified as a government business enterprise, a treatment not agreed to in previous audits.

Under the Auditor General’s approach to transfers, liabilities (i.e. deferred revenue) would have been reduced by \$3.8 billion, and the surplus would have been \$232 million higher. The full text of the Auditor General’s opinion and the comments of the Comptroller General of British Columbia can be found in the 2013/14 *Public Accounts*.

Part 3

Supplementary Information

- General Description of the Province
- Constitutional Framework
- Provincial Government
- Annual Financial Cycle
- Government's Financial Statements
- Provincial Taxes

General Description of the Province

British Columbia is located on Canada's Pacific coast, and has a land and freshwater area of 95 million hectares. It is Canada's third largest province and comprises 9.5 per cent of the country's total land area.

Geography

The province is nearly four times the size of Great Britain, 2.5 times larger than Japan and larger than any American state except Alaska. BC's 7,022-kilometre coastline supports a large shipping industry through ice-free, deep-water ports. The province has about 8.5 million hectares of grazing land, 1.8 million hectares of lakes and rivers, and 950,000 hectares of agricultural land that is capable of supporting a wide range of crops.

Physiography

BC is characterized by mountainous topography, but also has substantial areas of lowland and plateau country. The province has four basic regions, a northwesterly trending mountain system on the coast, a similar mountain system on the east, and an extensive area of plateau country between the two. The northeastern corner of the province is lowland, a segment of the continent's Great Plains.

The western system of mountains averages about 300 kilometres in width and extends along the entire BC coast and the Alaska panhandle. The Coast Mountains contain some of the tallest peaks in the province. The western system includes the Insular Mountains that form the basis of Vancouver Island and Haida Gwaii (previously known as the Queen Charlotte Islands). These islands help to shelter the waters off the mainland coast of BC, which form an important transportation route for people and products.

The interior of the province is a plateau of rolling forest and grassland, 600 to 1,200 metres in average elevation. North of Prince George the interior becomes mountainous, but plateau terrain returns just south of the Yukon boundary in the area drained by the Liard River. The southern interior's water system is dominated by the Fraser River, which has a drainage area covering about one-quarter of the province. The Rocky Mountains, in the eastern mountain system, rise abruptly on the southern BC–Alberta boundary and are cut by passes that provide dramatic overland transportation routes into the province. The Rocky Mountain Trench lies immediately to the west of the Rockies. This extensive valley, the longest in North America, is a geological fault zone separating different earth plates. It is the source of many of BC's major rivers, including the Peace, Columbia and Fraser.

Climate and Vegetation

Coastal BC has abundant rainfall and mild temperatures associated with a maritime climate. The Pacific coast has an average annual rainfall of between 155 and 440 centimetres, while the more sheltered coasts of eastern Vancouver Island and the mainland along the Strait of Georgia average between 65 and 150 centimetres. Canada's longest frost-free periods of over 180 days per year are enjoyed along the edges of the coastal zone and far inland along the Fraser River valley. Temperatures fall quickly up the steep slopes of the Coast Mountains. The predominant trees in this coastal region are the western hemlock, western red cedar and balsam (amabilis fir) in the wetter parts, and Douglas fir and grand fir in the drier areas.

BC's interior region has a mainly continental type of climate, although not as severe as that of the Canadian prairies. Considerable variation in climate occurs, especially in winter, as mild Pacific storms bring relief from cold spells. The southern interior has the driest and warmest climate of the province. In the valleys, annual precipitation ranges from less than 30 centimetres to 50 centimetres, while daily temperatures can average over 20 degrees Celsius in July and just under freezing in January. The climate becomes more extreme further north and precipitation increases. The frost-free period in the north is short and variable. Lodgepole pine is the dominant tree of commercial value in the interior.

The northeast region of the province is an extension of the western prairie region of Alberta. It has a continental climate that is more extreme than that of the northern interior region. However, it does have long hot summers and a frost-free period long enough to grow grain, forage and other crops.

Population

BC is the third largest Canadian province in terms of population, which was estimated at 4.6 million persons—accounting for 13.3 per cent of Canadians on July 1, 2013. BC's population grew at an average annual compound rate of 1.1 per cent between 2003 and 2013, equivalent to the annual growth rate of the overall Canadian population for the same period.

Greater Vancouver, a major Canadian shipping, manufacturing and services centre, had the largest urban population in BC with 2,451,783 persons in 2013. Victoria, the province's capital, is located on Vancouver Island and its regional district had a population of 370,912 persons in 2013.

Constitutional Framework

The structure of the British Columbia government is based on British parliamentary tradition and precedent. Prior to 1866, BC was composed of two British-controlled colonies – the Colony of Vancouver Island was established in 1849, and the Colony of British Columbia was established in 1858 on the mainland. In the *Union Proclamation* of 1866, the two colonies were joined to form the single united Crown Colony of British Columbia. On July 20, 1871, BC entered into Confederation with Canada. Although the Colony of Vancouver Island had a parliamentary form of government as far back as 1856, the first fully elected government was not instituted in BC until the autumn after Confederation with Canada. Responsible government was achieved in late 1872, when the Lieutenant Governor acquiesced to an executive council that was responsible to the legislative assembly.

Upon entering Confederation, BC came under the authority of the *British North America Act, 1867 (BNA Act)*, a statute of the British parliament. Until 1982, the *BNA Act* defined the major national institutions and established the division of authority between the federal and provincial governments. In 1982, the *BNA Act* was renamed the *Constitution Act, 1867* and its amendments were incorporated into the *Constitution Act, 1982*. The *Constitution Act, 1982*, which also includes the Canadian Charter of Rights and Freedoms, is companion legislation to the *Canada Act, 1982*. With the passage of the *Canada Act, 1982*, the British Parliament ended its legal right to legislate for Canada. Canada, as a federal state, divides legislative powers between the federal and provincial governments.

Provincial Government

BC's government is modeled after the British system. Functionally there are three main branches: the legislature, the executive and the judiciary.

Legislature

Legislative powers in British Columbia are exercised by a single legislative chamber, which is elected for a term of four years. BC, the first province in Canada to legislate fixed election dates, requires an election on the second Tuesday in May every four years. An election may also be called if the government loses a vote of confidence in the legislative assembly.

The legislature consists of the Lieutenant Governor and 85 elected members of the legislative assembly. The legislative assembly represents the people of BC in the conduct of the province's affairs. The assembly is required by law to meet at least once a year with a normal session lasting several months. However, special sessions can last just a few days or many months, depending on the nature of the government's business.

The legislature operates on a fixed schedule – the second Tuesday in February each year is usually reserved for the Throne Speech and the third Tuesday in February each year is reserved for the Budget Speech. After an election, a new budget must be tabled within 90 days of the post-election appointment of the Executive Council.

Executive

The executive is composed of the Lieutenant Governor and the executive council. The Lieutenant Governor, the Queen's representative in British Columbia, holds a largely ceremonial place in the modern provincial government. By constitutional custom, the Lieutenant Governor is appointed by the Governor General of Canada for a term usually lasting five years.

The Lieutenant Governor, on the advice of the premier, appoints members of the executive council and is guided by the executive council's advice as long as it holds the confidence of the legislative assembly. Following a general election, the Lieutenant Governor calls upon the leader of the political party with the largest number of elected members to serve as premier and to form the provincial government.

The Lieutenant Governor, on recommendation of the premier, convenes, prorogues and dissolves the legislative assembly and gives Royal Assent to all measures and bills passed by the assembly before they become law.

The executive council, or cabinet, is headed by the premier and is composed of selected members of the ruling party. Ministers are the head of government ministries, and are usually members of cabinet.

Cabinet determines government policy and is held responsible by the legislative assembly for the operation of the provincial government. Deputy ministers are the chief operating officers of ministries and are appointed by cabinet. Deputy ministers are responsible for carrying out government policies and for managing the work of their ministries.

Judiciary

The judiciary performs functions that are central to the orderly operation of society. Judges hear and give judgment in criminal prosecutions and in actions arising from disputes between private citizens or between the government and private citizens. Judges apply both judge-made law, known as “common law,” and laws made by the Parliament of Canada and provincial legislatures. The judiciary is increasingly called on to determine whether laws passed by governments conform to the values expressed in the Canadian Charter of Rights and Freedoms.

BC’s judicial system is made up of the Provincial Court of British Columbia, the Supreme Court of British Columbia and the Court of Appeal of British Columbia. The Provincial Court includes Small Claims, Adult Criminal, Youth and Family divisions. The provincial government appoints Provincial Court judges, and the federal government appoints Court of Appeal and Supreme Court judges.

The federal judicial system includes the Tax Court of Canada, the Federal Court of Canada (Appeals division and Trial division) and the Supreme Court of Canada. The Federal Court of Canada hears cases in limited areas of exclusively federal jurisdiction, for example, reviewing decisions made by federal tribunals such as the Canada Labour Relations Board. The Supreme Court of Canada is the court of final resort and hears selected appeals from the Federal Court of Appeal and provincial Courts of Appeal.

Provincial Government Jurisdiction

Under Canada’s constitutional framework, BC has ownership and jurisdiction over natural resources and is responsible for education, health and social services, municipal institutions, property and civil rights, the administration of justice and other matters of purely provincial or local concern.

Annual Financial Cycle¹

British Columbia’s *Budget Transparency and Accountability Act* (BTAA) outlines the province’s reporting requirements during the financial cycle and imposes specific reporting deadlines or release dates for these publications. In particular, fixed dates for presentation of the Throne Speech and budget, as well as dates for quarterly and annual reports, are set by law.

Under the BTAA, the provincial government focuses its budgeting and reporting on a summary accounts basis. The BTAA requirements include reporting on the advice of the Economic Forecast Council; presentation of the annual *Estimates, Budget and Fiscal Plan, Quarterly Reports*, and *Public Accounts* in accordance with GAAP as set by a recognized standard setting organization and determined by Treasury Board (see page 53); publication of *Quarterly Reports* with revised forecasts; annual three-year service plans and service plan reports for each ministry and government organization; and an annual three-year government strategic plan and report.

Chart 3.1 summarizes the annual financial process of the province. This process consists of four main stages.

¹ Reflects the financial cycle for normal years.

Chart 3.1 Financial Planning and Reporting Cycle Overview

Planning and Budget Preparation

Treasury Board, a committee of the Executive Council (i.e. Cabinet) reviews longer-term estimates of revenue, expense, capital and debt, and establishes a preliminary fiscal plan within the framework of the government’s overall strategic plan. Ministries, service delivery agencies and Crown corporations prepare three-year service plans, including performance measures and targets, and operating and capital budgets, for review by government. Treasury Board makes recommendations to Cabinet on budget allocations for ministries and agencies, and assesses commercial Crown corporation net income benchmarks, within the context of the fiscal plan. Included as inputs into this process are a consultation paper published by September 15th that invites public comment on issues for consideration as government develops its fiscal and service plans, and province-wide public hearings held by a committee of the legislature. A report outlining the results of the budget consultation process is made public by November 15th of each year.

Implementation and Reporting

The government’s revenue, expense and capital plans for the next three fiscal years, as well as other information on the government’s finances, are presented to the Legislative Assembly by the Minister of Finance in a budget document called the *Budget and Fiscal Plan*. The financial plan for the next fiscal year is also included in the document called the *Estimates*, which describes the individual appropriations to be voted on by the Legislative Assembly. Government’s strategic plan, service plans and a report on major capital projects (those where government contribution exceeds \$50 million) must also

be tabled in the Legislature. Throughout the year, the authorized funding as specified in the *Estimates* and ministry service plans is spent on programs and services. Crown corporations follow approved service plans under the direction of their own Boards of Directors. *Quarterly Reports*, including full-year forecasts, are published by legislated dates, thereby providing regular updates to the public on the government's finances.

Evaluation

At the end of the fiscal year, the *Public Accounts* are prepared by the Comptroller General and examined by the Auditor General to ensure that the financial statements fairly present the government's financial position. The *Public Accounts* are augmented by the *British Columbia Financial and Economic Review*, which provides an overview of annual and historical financial and economic results. In addition, annual service plan reports are made public that compare actual results with ministry and Crown corporation performance targets.

Accountability

The *Public Accounts* are presented to the Legislative Assembly and are reviewed by two committees of the Legislative Assembly (the Select Standing Committee on the *Public Accounts* and the Select Standing Committee on Crown corporations). At the same time, the *Ministerial Accountability Report* is published detailing the individual and collective financial performance of cabinet ministers, and the performance and revenue results achieved by the Ministers of State and the Minister of Finance. The Minister of Finance also presents to the Legislative Assembly plans, reports and statements related to the revenue-neutrality objectives of the *Carbon Tax Act*. In addition, at the same time as, or shortly after, the *Public Accounts* are tabled, ministries and most Crown corporations release their service plan reports detailing results for the previous fiscal year. A report on the government's strategic plan is also presented.

Government's Financial Statements

Government Reporting Entity

The provincial government conducts its activities through:

- ministries;
- service delivery agencies;
- the SUCH sector (school districts; universities; colleges, university colleges and institutes; and health authorities and hospital societies); and
- commercial Crown corporations.

The accounts relating to the ministries and other direct activities of government are contained in the Consolidated Revenue Fund (CRF), whose financial results are reported as a separate entity in the *Public Accounts*. The CRF comprises all money over which the legislature has direct power of appropriation. The operations of service delivery agencies, the SUCH sector entities and commercial Crown corporations are recorded in their own financial statements, which are subject to audit by the Auditor General or by private sector auditors.

The relationship between the Legislature and government's service delivery agencies, including the SUCH sector, and commercial Crown corporations is guided by either legislation or governance agreements between the boards of directors and their responsible ministers. In general, government is moving towards adopting governance agreements as its primary guide for these relationships.

According to generally accepted accounting principles (GAAP) for senior governments as established by the Public Sector Accounting Board (PSAB) of the Canadian Institute of Chartered Accountants, the province's financial reporting consolidates the financial results of all these entities into a single set of financial statements. The provincial government publishes its financial statements annually in the *Public Accounts*.

Compliance with GAAP

British Columbia's *Budget Transparency and Accountability Act* (BTAA) requires all financial documents produced by the province under that legislation to fully comply with GAAP. Compliance with this requirement began with the February 2004 budget and was completed in the 2004/05 *Public Accounts*.

Under GAAP, the CRF must be converted from a net basis to provide gross revenues and expenses. Next, service delivery agencies are consolidated with the CRF on a line-by-line basis for both the income statement and balance sheet. Commercial Crown corporations² and commercial subsidiaries owned by service delivery agencies are disclosed on a modified equity basis – i.e. their net income is reported as revenue and their retained earnings as an investment.

Where the accounting policies of service delivery agencies differ from those used by the central government in preparing its own consolidated revenue fund financial statements, the service delivery agency financial statements are adjusted to conform to government's accounting policies.

While PSAB GAAP makes specific pronouncements for fully consolidated entities, it prescribes adherence to International Financial Reporting Standards for entities consolidated on a modified equity basis. Modified equity means that there are no adjustments for differences between the accounting policies used by the entity being consolidated and the parent organization.

The government of British Columbia recently passed legislation that authorizes Treasury Board to adopt different standards than those promoted by PSAB in order to ensure that British Columbia's financial reporting reflects the policy framework within which the Crown corporations and agencies operate. Any alternate standard adopted by Treasury Board must come from other areas of Canadian GAAP, or from a widely-accepted accredited accounting standard setting body in another jurisdiction (e.g. the US Financial Accounting Standards Board). As authorized by the *BTAA*, Treasury Board mandated one variance from IFRS – the use of regulatory accounting by BC Hydro – to ensure financial reporting reflects the policy framework within which the Crown corporation operates.

The full text of government's significant accounting policies can be found in Note 1 to the Consolidated Summary Financial Statements in the 2013/14 *Public Accounts*.

² Crown corporations are considered commercial if the majority of their operating revenue comes from non-government sources, and their operating revenue is sufficient to cover operating and debt service costs without the need for government grants or other forms of assistance. Otherwise they are included with the service delivery agencies.

Summary of Tax Changes Announced in *Budget 2014*

Income Tax Act

BC Early Childhood Tax Benefit of \$55 per Month per Child Under Six Years of Age Introduced

As announced in *June Update 2013*, effective April 1, 2015, the BC Early Childhood Tax Benefit is introduced.

The refundable tax credit will provide \$146 million annually to approximately 180,000 BC families with young children. Families will receive a maximum benefit of \$55 per month, or \$660 annually, for each child under the age of six.

The benefit will be administered through the federal Canada Child Tax Benefit system. Families can apply for the monthly benefit by applying for the Canada Child Tax Benefit. To be eligible, individuals must file their personal income tax returns.

The maximum benefit will be available to all eligible families with family net incomes up to \$100,000. The benefit will start to phase out at \$100,000 in annual family net income and will be fully phased out at \$150,000. About 140,000 families will be eligible for the full benefit, while an additional 40,000 families with family net incomes over \$100,000 will receive a partial benefit.

BC Mining Flow-Through Share Tax Credit Extended

As announced on January 27, 2014, the BC mining flow-through share tax credit is extended to the end of 2014.

Corporate Income Tax Preference for Credit Unions Phased Out

Under the federal and provincial income tax rules, credit unions receive preferential corporate income tax treatment by way of a lower tax rate on a portion of their income. As announced on March 20, 2013, the federal government

is phasing out its preferential income tax treatment for credit unions over five years beginning in 2013.

The Act is amended to phase out the provincial preferential income tax treatment for credit unions over five years beginning in 2016.

Distant Location Tax Credit Extended to Capital Regional District

The Film and Television Production Regulation is amended to include the Capital Regional District (CRD) for purposes of the Distant Location Tax Credit. Effective for productions with principal photography beginning on or after February 19, 2014 the distant location tax credit applies in the CRD. This extension applies to both the Production Services Tax Credit and the Film Incentive BC tax credit.

Scientific Research and Experimental Development Tax Credit Extended

The British Columbia Scientific Research and Experimental Development Tax Credit is extended for an additional three years to September 1, 2017. The credit is available to eligible taxpayers that undertake eligible research and development activities in the province.

Medicare Protection Act

Medical Services Plan Premiums Increased and Premium Assistance Enhanced

Effective January 1, 2015, Medical Services Plan premiums are increased to help fund health care for British Columbians.

Maximum monthly premium rates will increase by about four per cent or \$2.75 per month to a total of \$72.00 for single persons, by \$5.00 per month to a total of \$130.50 for two person families and by \$5.50 per month to a total of \$144.00 for families of three or more persons.

Also effective January 1, 2015, premium assistance is enhanced to ensure those receiving assistance will not be affected by the increase. Further details on the premium assistance enhancement will be available later in 2014.

Provincial Sales Tax Act

Exemption for Settler's Effects Expanded

Effective February 19, 2014, the exemption for tangible personal property brought, sent or delivered into British Columbia by a new resident is expanded to include tangible personal property that enters British Columbia within one year from the date the individual becomes a resident of British Columbia.

The exemption requirements that the tangible personal property must have been owned by the individual for at least 30 days before the date the individual became a resident of British Columbia and must be for use solely for a non-business purpose remain the same.

Purchase Price of Accommodation Sold with Meals and Services for a Single Price Clarified

Effective February 19, 2014, if an accommodation provider only sells packages of accommodation, meals and services for a single price, regardless of the type of services provided or the type of the accommodation provider, the purchase price of that accommodation is the lesser of:

- 15 per cent of the total value of the consideration accepted by the accommodation provider, or
- \$100 per day.

There is no change in the determination of the purchase price of accommodation if:

- the accommodation is only sold with meals, or
- the accommodation is sold with meals and services but is also available separately.

Multijurisdictional Vehicle Exit Tax Clarified

Effective April 1, 2013, the multijurisdictional vehicle exit tax is changed so that the tax is only payable when a vehicle, previously licensed under a licence to which a prorating agreement applies, is licensed for use solely within British Columbia.

A person who has paid the multijurisdictional vehicle exit tax in circumstances other than where the vehicle was licensed for use solely within British Columbia will be entitled to a refund of the exit tax paid.

Various Technical Amendments Made

A number of technical amendments are made for clarity and certainty.

The amendments clarify:

- various exemptions and refunds;
- the taxation of leases;
- the original purchase price of certain passenger vehicles subject to the one to three per cent surtax;
- the taxation of vehicles brought, sent or received in British Columbia and registered under vehicle registration legislation;
- the purchase price of software purchased with qualifying educational programs for a single price;
- tax payment agreements;
- the taxation of tangible personal property used to improve real property; and
- various other administrative matters.

The amendments also expand voluntary registration to include out of province businesses.

Carbon Tax Act and Motor Fuel Tax Act

Collector Appointments and Vendor Penalties Clarified

To facilitate vendor compliance with collector obligations, the director is authorized to appoint a vendor as a collector up to four

years retroactively, to a date that is on or after the first day of the month in which the vendor's first sale of fuel in British Columbia after its manufacture or importation occurred.

The penalties which may be imposed on a vendor who sells fuel before being appointed a collector are clarified to recognize retroactive collector appointments.

Assessment of Interest Clarified

The assessment of interest is clarified, particularly where before a notice of assessment is issued there is both a refund claim and an amount owing for the same period (consistent with similar provisions in the *Provincial Sales Tax Act*).

Tobacco Tax Act

Tobacco Tax Rates Increased

Effective April 1, 2014, the tax rate on cigarettes is increased from \$44.60 to \$47.80 per carton of 200 cigarettes, and the tax rate on fine-cut tobacco is increased from 22.3 cents per gram to 23.9 cents per gram.

Home Owner Grant Act

Home Owner Grant Phase-out Threshold Decreased

The threshold for the phase-out of the Home Owner Grant is decreased from \$1,295,000 to \$1,100,000 for the 2014 tax year. For properties valued above the threshold, the grant is reduced by \$5 for every \$1,000 of assessed value in excess of the threshold.

This threshold ensures that at least 93.8 per cent of homeowners are eligible for their full grant. Previously, the threshold was set so that at least 95 per cent of homeowners were eligible for their full grant.

School Act

Provincial Residential School Property Tax Rates Set

The longstanding rate setting policy is that average residential school property taxes, before application of the Home Owner Grant, increase by the previous year's provincial inflation rate. This rate setting policy has been in place since 2003 and will continue in 2014. The rates will be set when revised assessment roll data are available in the spring.

Provincial Non-Residential School Property Tax Rates Set

A single province-wide school tax rate is set for each of the non-residential property classes. Consistent with longstanding policy, the rates for 2014, except the rate for the industrial property classes, will be set so that non-residential school tax revenue will increase by inflation plus new construction. This general approach to setting non-residential school tax rates has been in place since 2005. The rates will be set when revised assessment roll data are available in the spring.

The exceptions to the general rate setting policy are the industrial property classes. The major industry class tax rate and the light industry class tax rate will be set to be the same rate as the business class tax rate, consistent with the policy announced in *Budget 2008*.

Taxation (Rural Area) Act

Provincial Rural Area Property Tax Rates Set

A single rural area residential property tax rate applies province-wide. The longstanding rate setting policy that average residential rural property taxes increase by the previous year's provincial inflation rate will continue for 2014.

Consistent with longstanding policy, non-residential rural area property tax rates will be set so that total non-residential rural area tax revenue will increase by inflation plus new construction. The rates will be set when revised assessment roll data are available in the spring.

Land Tax Deferment Act

Deferment Programs Amended to Allow Granting of Easements

Under the property tax deferment programs, eligible homeowners can defer property taxes until the home is sold, transferred to a new owner or becomes part of an estate, if they meet a minimum equity requirement. Currently, repayment of deferred taxes is required if the property becomes subject to an easement, statutory right of way or similar interest.

Effective on Royal Assent, the Act is amended to allow the deferment to continue when the property becomes subject to an easement, statutory right of way or similar interest if the homeowner continues to meet the minimum equity requirements of the program.

Ports Property Tax Act

Tax Rate Cap Made Permanent

As announced in *Budget 2012*, the Act is amended to extend the municipal tax rate caps on designated port property and new improvements past 2018, to remove the condition that new improvements under the Act must be added to an assessment roll before 2019, and to extend the provisions for compensation to municipalities.

University Act

Exemption from Property Tax for Affiliated Colleges Clarified

Effective on Royal Assent, the Act is amended to confirm that property (i.e. land and improvements) of a university

that is leased to a college affiliated with the university is exempt from property taxation so long as it is held for college purposes.

The exemption is retroactive to the extent necessary to give it effect for the 2014 taxation year.

Regent College Act

Exemption from Property Tax Clarified

Effective on Royal Assent, the Act is amended to provide an exemption from property tax for property of Regent College so long as the property is occupied by the College and used by it for educational purposes. This is consistent with the exemption the College received when it was located on property of a university and with the exemptions for other private theological colleges.

The exemption is retroactive to the extent necessary to give it effect for the 2014 taxation year.

Property Transfer Tax Act

First Time Home Buyers' Threshold Increased

Effective for registrations on or after February 19, 2014, the fair market value threshold for eligible residential property under the First Time Home Buyers' Program is increased to \$475,000 from \$425,000. The partial exemption continues and now applies to homes valued between \$475,000 and \$500,000.

With this change, eligible first time home buyers can save up to \$7,500 in property transfer tax on the purchase of their home.

Table 3.1 Provincial Taxes (as of July 2014)

Type and Statute Reference	Tax Base	Tax Rate	Characteristics and Exemptions
Income — <i>Income Tax Act</i>	Taxable Income (1) Corporate. (2) Personal.	The general corporate income tax rate increased from 10% to 11% of taxable income effective April 1, 2013. The small business corporate income tax rate is 2.5%. Tax rates of 5.06%, 7.7%, 10.5%, 12.29%, 14.7% and 16.8% corresponding to tax brackets of up to \$37,606, \$37,606.01 to \$75,213, \$75,213.01 to \$86,354, \$86,354.01 to \$104,858, \$104,858.01 to \$150,000 and over \$150,000. The top rate of 16.8%, which is applied to taxable income over \$150,000, is a temporary measure for the 2014 and 2015 tax years only.	The Canada Revenue Agency administers BC's personal and corporate taxes under the Tax Collection Agreement between the province and the federal government. Corporate tax credits include the scientific research and experimental development tax credit, book publishing tax credit and the film tax credits. In addition, the political contributions tax credit, mining exploration tax credit, logging tax credit, training tax credits and venture capital tax credits are available to both individuals and corporations. BC provides a set of non-refundable credits similar to most federal non-refundable credits. BC Family Bonus is combined with the federal government's Canada Child Tax Benefit in a single monthly payment to families. Tax credits include training tax credits, political contributions tax credit, BC Low Income Climate Action Tax Credit, BC Sales Tax Credit, the mining flow-through share tax credit and venture capital tax credits.
Real Property Transfers — <i>Property Transfer Tax Act</i>	Fair market value of property or interest in property transferred; for presold strata units purchased at arm's length, total consideration for the strata unit.	1% on the first \$200,000 of value transferred and 2% on amounts in excess of \$200,000.	Exemptions include: transfers of principal residences, recreational residences and family farms to related individuals; transfers of property between spouses pursuant to written separation agreements or court orders; transfers of property to local governments, registered charities and educational institutions; transfers of property to veterans under the <i>Veterans' Land Act</i> (Canada); transfers of land to be protected, preserved, conserved or kept in a natural state; and transfers of leases less than 31 years in duration. A number of technical exemptions are also provided. Eligible first time home-buyers are exempt from tax on transfers of eligible properties.
BC Transition Tax on New Housing— <i>New Housing Transition Tax and Rebate Act</i>	Taxable sales of new housing or an interest in new housing by a builder, or a builder's self-supply of new housing, where (a) the GST (rather than the HST) becomes payable on the sale or self-supply on or after April 1, 2013 and before April 2015, and (b) the construction or substantial renovation of the housing was 10% or more complete before April 1, 2013.	The tax is generally 2% of the consideration. A rebate may available to some builders of new housing that is subject to the tax.	The BC Transition Tax and Rebate are temporary measures to ease the transition from the HST to the PST. They are designed to help ensure that the amount of tax payable in respect of a new home during the transition, regardless of when construction begins, is comparable to the amount of tax payable in respect of a home fully constructed under the PST.
Retail Sales Tax <i>Provincial Sales Tax Act</i>	Purchase and lease of tangible personal property Purchase of software, accommodation, related services, telecommunication services and legal services Gifts of vehicles, boats and aircraft	General rate 7% Liquor 10% Accommodation 8% Vehicles 7 to 12% Boats and aircraft 7% or 12% Manufactured buildings reduced rate of tax.	Collected through businesses required to be registered under the Act and paid by purchasers and lessees. Major consumer exemptions include, but are not limited to: <ul style="list-style-type: none"> • Food for human consumption (all food including prepared food) • Residential energy • Children's clothing and footwear (child-sized clothing and adult sized clothing for children under 15 years of age) • Basic cable and residential land-line telephone services • Vitamins, drugs, and household medical aids Major business exemptions include, but are not limited to: <ul style="list-style-type: none"> • Goods acquired solely for re-sale or re-lease • Goods purchased to be incorporated into goods for sale or lease • Certain production machinery and equipment purchased by major industries (manufacturers, logging, mining, oil and gas) for qualifying activities at qualifying locations.

Table 3.1 Provincial Taxes (as of July 2014) – Continued

Type and Statute Reference	Tax Base	Tax Rate	Characteristics and Exemptions
Tobacco — <i>Tobacco Tax Act</i>	By cigarette, cigar retail price, and weight on other tobacco products.	23.9 cents per cigarette or tobacco stick and per gram of loose tobacco; 90.5% of taxable price on cigars to a maximum tax of \$7 per cigar.	Tax is payable on tobacco by purchasers at the time of retail purchase. Tobacco is subject to a security scheme. Security is payable by wholesale dealers registered under the Act when tobacco is delivered to them.
Carbon Dioxide Equivalent Emissions from combustion of fuels and combustibles — <i>Carbon Tax Act</i>	Purchase, use or, in certain circumstances, transfer or importation of <ul style="list-style-type: none"> • Aviation Fuel • Gasoline • Heavy Fuel Oil • Jet Fuel • Kerosene • Light Fuel Oil • Methanol (not produced from biomass) • Naphtha • Butane • Coke Oven Gas • Ethane • Pentane Plus • Gas Liquids • Natural Gas • Propane • Refinery Gas • High Heat Value Coal • Low Heat Value Coal • Coke • Petroleum Coke • Also combustion of peat and tires (whole or shredded) when used to produce heat or energy (combustibles). 	Tax rates vary by type of fuel or combustible based on carbon dioxide equivalent emitted by each fuel or combustible. Tax rates effective July 1, 2012 are equivalent to \$30 per tonne of carbon dioxide equivalent.	Tax is payable on fuels by purchasers at the time of retail purchase. Fuels, other than natural gas, are subject to a security scheme similar to the security scheme under the Motor Fuel Tax Act. Security is payable by collectors registered under the Act when fuel is sold in British Columbia for the first time after manufacture or importation. Tax on the purchase of natural gas is collected and remitted at the retail level. Tax on use, transfer and import is self-assessed. Tax on the burning of combustibles is self-assessed. Exemptions include fuels which are exported for use outside of British Columbia, fuel used for certain non-energy purposes, and fuel used for eligible inter-jurisdictional transportation because the resulting emissions are generally not considered as domestic emissions under the federal National Inventory Report. There are also minor exemptions similar to exemptions in other consumption tax Acts for administrative and technical reasons.
Motor Fuel — <i>Motor Fuel Tax Act</i>	Purchase, use, or in certain circumstances, transfer or importation of		Tax generally applies to all fuels purchased for use, or used in internal combustion engines. Tax is payable on fuels by purchasers at the time of retail purchase. Most fuels are subject to a security scheme similar to the security scheme under the <i>Carbon Tax Act</i> . Security is payable by collectors registered under the Act when fuel is sold in British Columbia for the first time after manufacture or importation. Qualifying persons with disabilities who own or lease a vehicle are entitled to refunds of provincial tax paid up to an annual maximum of \$500. The additional tax collected in the South Coast BC Transportation Service Region, on behalf of <i>TransLink</i> , helps fund regional transportation costs. The additional tax collected in the Victoria Regional Transit Service Area, on behalf of BC Transit, helps fund the public transit system.

Table 3.1 Provincial Taxes (as of July 2014) – Continued

Type and Statute Reference	Tax Base	Tax Rate	Characteristics and Exemptions	
Motor Fuel — <i>Motor Fuel Tax Act</i> (continued)	Clear gasoline	<p>General rate: 14.5 cents per litre (includes 6.75 cents per litre collected on behalf of the BC Transportation Financing Authority).</p> <p>South Coast BC Transportation Service Region: 25.5 cents per litre (includes 6.75 cents per litre collected on behalf of the BC Transportation Financing Authority and 17 cents per litre collected on behalf of <i>TransLink</i>).</p> <p>Victoria Regional Transit Service Area: 18 cents per litre (includes 6.75 cents per litre collected on behalf of the BC Transportation Financing Authority and 3.5 cents per litre collected on behalf of BC Transit).</p>	Tax applies to diesel fuel but does not include alternative motor fuels or coloured fuels. Refunds of 0.5 cents per litre are available for motive fuel used in private passenger vehicles.	
	Motive fuel.	<p>General rate: 15 cents per litre (includes 6.75 cents per litre collected on behalf of the BC Transportation Financing Authority).</p> <p>South Coast BC Transportation Service Region: 26 cents per litre (includes 6.75 cents per litre collected on behalf of the BC Transportation Financing Authority and 17 cents per litre collected on behalf of <i>TransLink</i>).</p> <p>Victoria Regional Transit Service Area: 18.5 cents per litre (includes 6.75 cents per litre collected on behalf of the BC Transportation Financing Authority and 3.5 cents per litre collected on behalf of BC Transit).</p>		
	Alternative motor fuels. (Natural Gas, , Hydrogen, Methanol (M85+)) Coloured fuel, marine diesel fuel.	<p>Exempt.</p> <p>3 cents per litre.</p>		<p>Natural gas, when used as a motor fuel, is exempt from tax. Certain hydrogen is exempt from tax. Fuels comprised of at least 85% methanol are also exempt from tax.</p> <p>Coloured fuel may be used in all vehicles not licensed to operate on a highway and in specific industrial vehicles. <i>Bona fide</i> farmers are exempt from paying the tax when fuel is used for farming purposes. Farm vehicles with A or G license plates are allowed to use tax-exempt coloured fuel for farming purposes on a highway.</p>
	Locomotive fuel.	3 cents per litre.		Tax applies to fuel specifically for use in locomotives.

Table 3.1 Provincial Taxes (as of July 2014) – Continued

Type and Statute Reference	Tax Base	Tax Rate	Characteristics and Exemptions
Motor Fuel — <i>Motor Fuel Tax Act</i> (continued)	Propane	2.7 cents per litre	Propane tax applies to all uses of propane. There are exemptions for propane used as residential energy in a residential dwelling or used by qualifying farmers solely for a farm purpose and for small containers of propane.
	Aviation fuel.	2 cents per litre.	Aviation fuel tax applies to fuel produced specifically for use in a non-turbine aircraft engine.
	Jet fuel.	2 cents per litre. Exempt for international flights.	Jet fuel tax applies to fuel produced specifically for use in a turbine aircraft engine. Jet fuel used for international flights is exempt.
	Natural gas used in stationary engines.	7% of price if purchased. 1.1 cents per 810.32 litres if used but not purchased.	Tax applies to natural gas used in stationary engines other than pipeline compressors.
	Natural gas used in pipeline compressors to transmit marketable gas.	1.9 cents per 810.32 litres.	Tax applies to natural gas used in a stationary engine at a pipeline compressor station.
	Natural gas used in pipeline compressors to extract and transmit raw gas from wells to processing plants.	Exempt	
	Natural gas used in compressors to re-inject sour gas into depleted wells.	Exempt.	
	Marine bunker.	Exempt	Exemption applies to bunker fuel, or a combination of bunker and other fuels used as fuel in a ship.
Marine gas oil.	Exempt	Exemption applies to marine gas oil when used in primary gas turbine engines to propel passenger and cargo vessels.	
Natural resources — <i>Logging Tax Act</i>	Net income from logging in BC.	10% (fully recoverable against federal and provincial corporation and personal income tax).	Net income from logging after deducting non-forestry income and a processing allowance.
— <i>Mineral Land Tax Act</i>	Assessed value of freehold mineral land and production areas.	Undesignated mineral land — \$1.25 to \$4.94 per hectare. Designated production areas — \$4.94 per hectare.	Rates of tax set on sliding scale, dependent on size and designation of land.
— <i>Mineral Tax Act</i>	Cash flow from individual metal and coal mines (other than placer gold mines).	2% of net current proceeds (NCP). 13% of net revenue (NR).	Tax calculated on a mine-by-mine basis. NCP tax paid on current operating cash flow until all current and capital costs, plus any investment allowance, are recovered. NR tax paid thereafter on cumulative cash flow. NCP tax creditable against NR tax.
	Volume of production of limestone, dolomite, marble, shale, clay, volcanic ash, diatomaceous earth, sandstone, quartzite and dimension stone.	\$0.15 per tonne removed from all quarries operated.	An operator may deduct 25,000 tonnes from the total number of tonnes removed from all quarries operated by that operator. However the amount deducted from any one quarry by all operators of that quarry must not exceed 25,000 tonnes.
	Value of minerals sold by placer gold mines.	0.5% of value of minerals sold.	
<i>Insurance — Insurance Premium Tax Act</i>	BC premiums.	4.4% for vehicle and property insurance; 2% for life, sickness, personal accident and loss of salary and wages insurance, 4% for other insurance, and 7% for all contracts with unlicensed insurers.	Exemptions — benefit societies; mutual corporations with 50% of income from farm or 100% from religious, educational or charitable institutions; marine, except pleasure craft; approved medical or hospitalization plans.

Table 3.1 Provincial Taxes (as of July 2014) – Continued

Type and Statute Reference	Tax Base	Tax Rate	Characteristics and Exemptions
Real property — <i>Taxation (Rural Area) Act</i>	Assessed value of land and improvements in rural areas (outside municipalities). Assessment determined under the <i>Assessment Act</i> .	Rates are set annually as a percentage of assessed value. For residential properties the rates are set to increase average residential rural taxes by the rate of inflation. For 2014, the rates were set so that total non-residential rural tax revenues increase by inflation plus new construction. For 2014, the rates are 0.052% for farms; 0.056% for managed forest lands; 0.056% for residential; 0.094% for recreational property/non-profit organizations; 0.291% for light industry, business and other property not contained in any other class; 0.382% for utilities; 0.534% for major industry and 0.01% for supportive housing.	Some exemptions apply under various statutes.
Residential school tax — <i>School Act</i>	Assessed value of residential land and improvements. Assessment determined under the <i>Assessment Act</i> .	Rates are set annually to increase average gross residential taxes by the rate of inflation. The rates vary by school district. For 2014 rates range from about 0.118% to 0.557%.	Basic rates are calculated using a formula to moderate effects of varying average assessments on school district taxes. School districts may levy additional tax on residential class property if authorized by local referendum. Amendments to the <i>School Act</i> in 2002 allow the Minister of Finance to apply different tax rates within a school district. Tofino is the only municipality with a rate that differs from the rest of the school district.
Non-residential school tax — <i>School Act</i>	Assessed value of non-residential land and improvements. Assessment determined under the <i>Assessment Act</i> .	Rates are set annually. For 2014, except for the major and light industry property classes, the rates are set so that total non-residential school tax revenues increase by inflation plus new construction. The major industry property class rate is set to be the same as the business property class rates. For 2014 the rates are 0.34% for recreational property/non-profit organizations; 0.24% for managed forest land; 0.69% for farms; 0.60% for light industry, major industry, business and other property not contained in any other class 1.36% for utilities and 0.01% for supportive housing.	Some exemptions apply under various statutes. Effective for the 2009 and subsequent taxation years, an Industrial Property Tax Credit was introduced to reduce provincial school property tax on major industrial (class 4) and light industrial (class 5) properties. The rate is 60% for 2011 and subsequent taxation years. The Industrial Property Tax Credit applies to British Columbia manufacturing, mining, forestry and other major and light industries. In Budget 2013, government announced its intention to phase out the Industrial Property Tax Credit for light industrial properties over two years. In 2013 the benefit of the credit for class 5 was halved through the setting of the class 5 school tax rate. The credit was completely phased out in Budget 2014. Effective in 2011, a 50% Provincial Farm Land Property Tax Credit reduces the provincial school property tax on farm land (class 9).
Police Tax — <i>Police Act</i>	Assessed value of land and improvements in municipalities under 5,000 population and in rural areas. Assessment determined under the <i>Assessment Act</i> .	Rates are set annually to raise up to 50% of the cost of rural and small community policing. Rates are set for each of the nine property classes in each municipality under 5,000 population, in each electoral area of the province and in the area of the province outside a regional district.	Basic rates are calculated using a formula that moderates the effect of variations in assessed value in the province by adjusting for population. Adjustments are made to the rates to reflect the contribution taxpayers in the rural areas make to policing costs through the rural area property tax. Adjustments are also made to account for traffic fine revenue sharing and for payments in lieu of taxes from the federal and provincial governments.

Table 3.2 Interprovincial Comparisons of Tax Rates – 2014

¹ In British Columbia (and some other provinces) the general rate applies to income from manufacturing and processing.

² British Columbia has a two-person rate of \$125.50; rates will increase effective January 1, 2015 to \$72.00 per month for single persons, \$130.50 for two-person families, and \$144.00 for families of three or more persons. British Columbia provides premium assistance in the form of lower rates or an exemption from premiums for lower income individuals and families. Quebec levies a health contribution that varies with income. Quebec's health contribution is capped at \$150 annually per adult for modest income earners and increases to a maximum of \$1,000 annually per adult for high income earners. Ontario levies a health premium as part of its provincial personal income tax system.

³ Provinces with payroll taxes provide payroll tax relief for small businesses. Quebec also levies a compensation tax of up to 2.8 per cent on salaries and wages paid by financial institutions.

⁴ The lower rate applies to premiums for life, sickness and accident insurance; the higher rate applies to premiums for property insurance including automobile insurance. In Ontario, Quebec and Newfoundland and Labrador specific sales taxes also apply to insurance premiums, except those related to individual life and health.

⁵ Tax rate is for regular fuel used on highways and includes all provincial taxes payable by consumers at the pump. The British Columbia rate includes 6.75 cents per litre dedicated to the BC Transportation Financing Authority and the carbon tax rates of 6.67 cents per litre for gasoline and 7.67 cents per litre for diesel. The British Columbia rates do not include regional taxes that effectively increase the gasoline and diesel tax rates by 11 cents per litre in the South Coast British Columbia transportation service region and by 3.5 cents per litre in the Capital Regional District. The tax rates for Ontario, Quebec, New Brunswick, Nova Scotia, Newfoundland and Labrador and Prince Edward Island include provincial sales tax based on average pump prices as of July 2014.

⁶ The rates shown are statutory rates. Ontario, Quebec, Nova Scotia, New Brunswick, Newfoundland and Labrador and Prince Edward Island have harmonized their sales taxes with the federal GST. Alberta imposes a 4 per cent tax on short-term rental accommodation. In its 2013/14 budget, Nova Scotia committed to reduce the provincial portion of their HST by one point in 2014 and a further point in 2015.

⁷ Includes estimated provincial sales tax in all provinces except Alberta, British Columbia and Quebec.

Financial Review

Supplementary Tables

Table A2.1 2013/14 Forecasts – Year in Review

	(\$ millions)				
2013/14 surplus – June Update 2013 (June 27, 2013)	<u>153</u>				<u>153</u>
2013/14 surplus – first Quarterly Report (September 10, 2013)	<u>136</u>				
2013/14 surplus – second Quarterly Report (November 27, 2013)	<u>165</u>				
2013/14 surplus – third Quarterly Report (February 18, 2014)	<u>175</u>				
	Q1	Q2	Q3	Q4	Total
	Update	Update	Update	Update	Changes
Revenue changes:					
Personal income tax – mainly weaker 2012 tax assessments	(116)	(284)	(39)	30	(409)
Corporate income tax – changes in federal government instalments and prior-year adjustment, reflecting 2012 tax assessments	165	272	(117)	(2)	318
Provincial sales tax – weaker year-to-date sales results	-	(100)	(95)	(203)	(398)
Harmonized sales tax – liability related to prior years	-	(24)	(134)	(68)	(226)
Property transfer tax – stronger year-to-date sales results	25	50	109	38	222
Other taxation sources	10	28	21	32	91
Natural gas royalties – changes in prices, increased volumes and higher utilization of royalty programs	(8)	(27)	6	77	48
Coal, metals and minerals – lower coal and copper prices	(41)	(31)	(9)	(16)	(97)
Forests – mainly changes in interior stumpage revenue	62	30	(11)	45	126
Other natural resources	10	(12)	20	14	32
Release of surplus assets – reprofiling to 2014/15	-	-	(57)	10	(47)
Fees, investment earnings and miscellaneous sources – mainly lower cost recoveries	(73)	1	(3)	(4)	(79)
Health and social transfers – mainly lower population share	(14)	(29)	-	29	(14)
Other federal government transfers – changes in direct program funding	25	20	(10)	1	36
Commercial Crown agencies operating results:					
ICBC – mainly change in discount rate for future care and wage loss claims, partially offset by improved investment income	18	87	6	(232)	(121)
Other commercial Crown agencies changes	6	4	(30)	27	7
Total revenue changes	<u>69</u>	<u>(15)</u>	<u>(343)</u>	<u>(222)</u>	<u>(511)</u>
Less: expense increases (decreases):					
Consolidated Revenue Fund changes:					
Statutory spending:					
Emergency program flood-related costs	27	(8)	-	2	21
Direct fire costs	71	(7)	-	(5)	59
Tax credit transfers	20	(25)	(110)	10	(105)
Elections BC	-	33	-	(2)	31
Teachers Pension Plan	-	-	-	49	49
Other	-	-	-	10	10
Ministry savings	(30)	-	(102)	(67)	(199)
Management of public debt (net) and other savings	-	-	-	(55)	(55)
Prior year liability adjustments	-	-	(84)	(75)	(159)
Spending funded by third party recoveries	(10)	12	(40)	(37)	(75)
(Increase) decrease in operating transfers to service delivery agencies	(61)	(36)	18	(121)	(200)
Changes in spending profile of service delivery agencies:					
School districts – higher operating expenses	(14)	2	27	48	63
Universities – lower operating costs and grants to third parties	-	(37)	5	3	(29)
Colleges – upward revision in staffing and other operating costs	-	26	(11)	7	22
Health authorities and hospital societies – increased demand for healthcare services	50	47	(3)	(63)	31
Other service delivery agencies	3	(1)	(53)	(4)	(55)
Allocation of further expenditure management target to ministries	30	-	-	-	30
Total expense increases (decreases)	<u>86</u>	<u>6</u>	<u>(353)</u>	<u>(300)</u>	<u>(561)</u>

Per capita (\$): ³													
Surplus (deficit)	(646)	(328)	646	708	939	640	17	(411)	(53)	(406)	(254)	77	

¹ Figures have been restated to reflect government accounting policies in effect at March 31, 2014.

² Revenue and expense as a per cent of GDP is calculated using GDP for the calendar year ending in the fiscal year (e.g. 2013/14 amounts divided by GDP for the 2013 calendar year). As nominal GDP for the calendar year ending 2013 is not available, the 2013 GDP projected in the February 2014 budget has been used for the fiscal year ended March 31, 2014 for demonstration purposes.

³ Per capita revenue and expense is calculated using July 1 population (e.g. 2013/14 amounts divided by population on July 1, 2013).

¹ Figures have been restated to reflect government accounting policies in effect at March 31, 2014.

² Revenue as a per cent of GDP is calculated using GDP for the calendar year ending in the fiscal year (e.g. 2013/14 revenue divided by GDP for the 2013 calendar year). As nominal GDP for the calendar year ending 2013 is not available, the 2013 GDP projected in the February 2014 budget has been used for the fiscal year ended March 31, 2014 for demonstration purposes. Totals may not add due to rounding.

³ Per capita revenue is calculated using July 1 population (e.g. 2013/14 revenue divided by population on July 1, 2013). Totals may not add due to rounding.

⁴ Revenue is converted to real (inflation-adjusted) terms using the consumer price index (CPI) for the corresponding calendar year (e.g. 2013 CPI for 2013/14 revenue).

¹ Figures have been restated to reflect government accounting policies in effect at March 31, 2014.

² Expense as a per cent of GDP is calculated using GDP for the calendar year ending in the fiscal year (e.g. 2013/14 expense divided by GDP for the 2013 calendar year). Totals may not add due to rounding. As nominal GDP for the calendar year ending 2013 is not available, the 2013 GDP projected in the February 2014 budget has been used for the fiscal year ended March 31, 2014 for demonstration purposes.

³ Per capita expense is calculated using July 1 population (e.g. 2013/14 expense divided by population on July 1, 2013). Totals may not add due to rounding.

⁴ Expense is converted to real (inflation-adjusted) terms using the consumer price index (CPI) for the corresponding calendar year (e.g. 2013 CPI for 2013/14 expense).

¹ Debt as a per cent of GDP is calculated using GDP for the calendar year ending in the fiscal year (e.g. 2013/14 debt divided by GDP for the 2013 calendar year). As nominal GDP for the calendar year ending in 2013 is not available, the 2013 GDP projected in the February 2014 budget has been used for the fiscal year ended March 31, 2014 for demonstration purposes. Totals may not add due to rounding.

² Per capita debt is calculated using July 1 population (e.g. 2013/14 debt divided by population on July 1, 2013). Totals may not add due to rounding.

³ Debt is converted to real (inflation-adjusted) terms using the consumer price index (CPI) for the corresponding calendar year (e.g. 2013 CPI for 2013/14 debt).

¹ Figures for prior years have been restated to conform with the presentation used for 2013/14 and to include the effects of changes in underlying data and statistics.

² The ratio of debt to population (e.g. 2013/14 debt divided by population at July 1, 2013).

³ The ratio of debt outstanding at fiscal year end to provincial nominal gross domestic product (GDP) for the calendar year ending in the fiscal year (e.g. 2013/14 debt divided by 2013 nominal GDP). As nominal GDP for the calendar year ending 2013 is not available, the 2013 GDP projected in the February 2014 budget has been used for the fiscal year ended March 31, 2014 for demonstration purposes.

⁴ The ratio of interest costs (less sinking fund interest) to revenue. Figures include capitalized interest expense in order to provide a more comparable measure to outstanding debt.

⁵ Weighted average of all outstanding debt issues.

⁶ Includes revenue of the consolidated revenue fund (excluding dividends from enterprises) plus revenue of all government organizations and enterprises.

⁷ Excludes revenue of government enterprises, but includes dividends from enterprises paid to the consolidated revenue fund.

⁸ Excludes debt of commercial Crown corporations and agencies and funds held under the province's warehouse borrowing program.

⁹ Nominal GDP for the calendar year ending in the fiscal year (e.g. Nominal GDP for 2013 is used for the fiscal year ended March 31, 2014). As nominal GDP for the calendar year ending 2013 is not available, the 2013 GDP projected in the February 2014 budget has been used for the fiscal year ended March 31, 2014 for demonstration purposes.

¹⁰ Population at July 1st within the fiscal year (e.g. population at July 1, 2013 is used for the fiscal year ended March 31, 2014).

¹ The provincial government began publishing summary financial statements in 1979/80. Figures for prior years are unavailable. For 1969/70 to 1978/79, the CRF balance is used in place of the summary accounts surplus/(deficit).

² Does not include the \$256 million transfer to the CRF for the wind-up of Forest Renewal BC and Fisheries Renewal BC.

³ Impact of move to joint trusteeship for public service pension plans.

⁴ Negotiating framework incentive payments.

⁵ Climate Action Dividend.

⁶ Onetime HST transition repayment
