PART 1
ECONOMIC REVIEW¹

¹ Reflects information available as of June 26, 2025.

**This page
intentionally left blank**

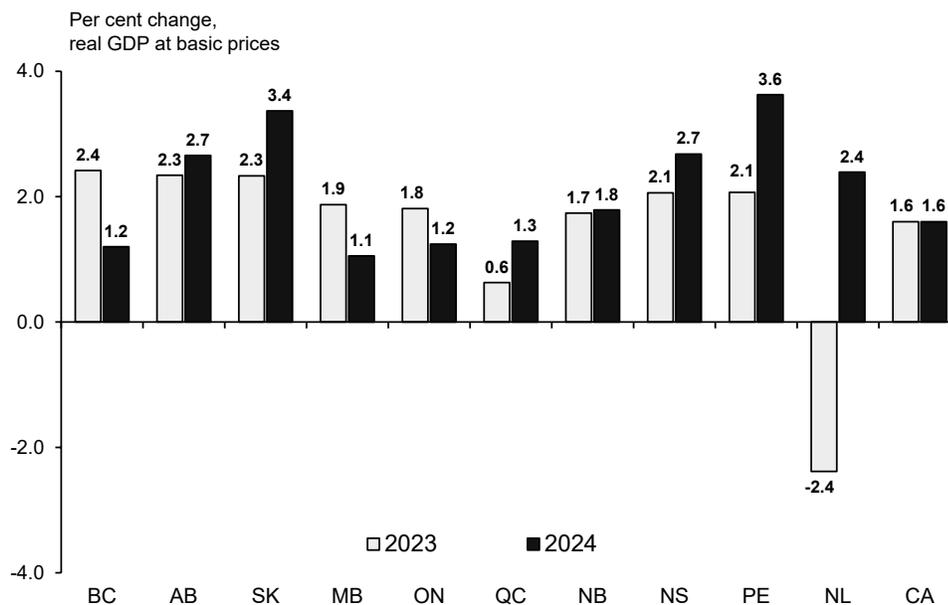

2024 Overview

After several years of strong growth that outpaced most other provinces, including a robust post-pandemic rebound, economic activity in British Columbia expanded at a more moderate pace in 2024. Last year, the B.C. economy faced relatively high interest rates, persistent price pressures, and ongoing global economic uncertainty, which weighed on growth.

Statistics Canada published 2024 real dollar GDP by industry at basic prices in the preliminary release of its Provincial Economic Accounts in May 2025. The following analysis refers to these real GDP figures, as opposed to the commonly reported income and expenditure market prices data released late in the year.²

In 2024, B.C.'s real GDP growth of 1.2 per cent ranked eighth (tied with Ontario) among the provinces and below the national average. The province's economy expanded at a slower pace last year than the 2.4 per cent increase in 2023, which ranked first in Canada.

Chart 1.1 Provincial Economic Growth

Sources: Statistics Canada (Tables 36-10-0402-01 and 36-10-0434-03 – May 2025 Preliminary Industry Accounts)

Employment in B.C. rose by 2.3 per cent in 2024, and wages and salaries increased by 6.3 per cent. While home construction activity in 2024 was lower than the record levels in 2023, it remained above the ten-year historical average. Elevated interest rates, rising construction costs, and ongoing labour shortages weighed on the homebuilding sector. Meanwhile, home sales increased by 2.1 per cent, and the average home sale price rose by 1.0 per cent, despite ongoing affordability challenges and elevated interest rates.

² Provincial and national real GDP by industry estimates are based on Statistics Canada's preliminary industry accounts, released in May 2025. Further information on British Columbia's economic performance is expected to be available in November 2025, when Statistics Canada releases revised GDP by industry data for 2024 and previous years, together with the full income and expenditure accounts for 2024.

Consumer spending on goods increased by just 0.6 per cent in 2024 amid elevated interest rates. Meanwhile, inflation in B.C. continued to broadly moderate, though shelter price growth remained elevated. Overall, B.C.'s inflation rate averaged 2.6 per cent last year, down from 3.9 per cent in 2023. At the same time, weaker global demand and lower commodity prices contributed to a 2.7 per cent decline in B.C.'s goods exports relative to 2023.

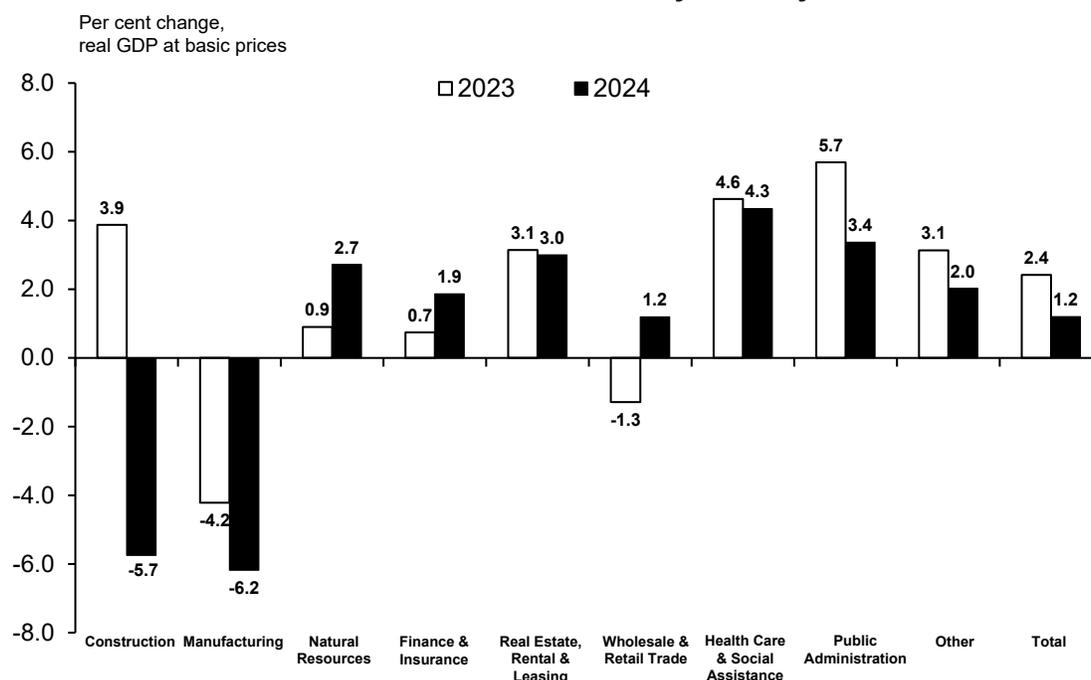

British Columbia Economy

B.C.'s real GDP grew by 1.2 per cent in 2024 following growth of 2.4 per cent in 2023. The growth in 2024 was driven by B.C.'s service-producing industries while activity in goods-producing industries decreased compared to the previous year.

Service-producing industries grew by 2.5 per cent in 2024, supported by strong population growth. The service sector saw broad-based annual gains, led by real estate, rental and leasing (+3.0 per cent) and health care and social assistance services (+4.3 per cent). Transportation and warehousing (+4.1 per cent), public administration (+3.4 per cent), and educational services (+3.3 per cent) sectors also contributed to overall growth. In contrast, accommodation and food services declined slightly (-0.3 per cent), reflecting ongoing pressures from subdued consumer demand and elevated costs.

B.C.'s goods-producing industries declined by 2.9 per cent in 2024, following a modest 0.4 per cent increase in 2023. In 2024, activity declined in B.C.'s construction industry (-5.7 per cent), while manufacturing output contracted (-6.2 per cent) for the third consecutive year. Meanwhile, mining, quarrying and oil and gas extraction (+3.9 per cent); utilities (+3.9 per cent); and agriculture, forestry, fishing and hunting (+0.3 per cent) sectors contributed to annual economic growth.

Chart 1.2 British Columbia Real GDP Growth by Industry

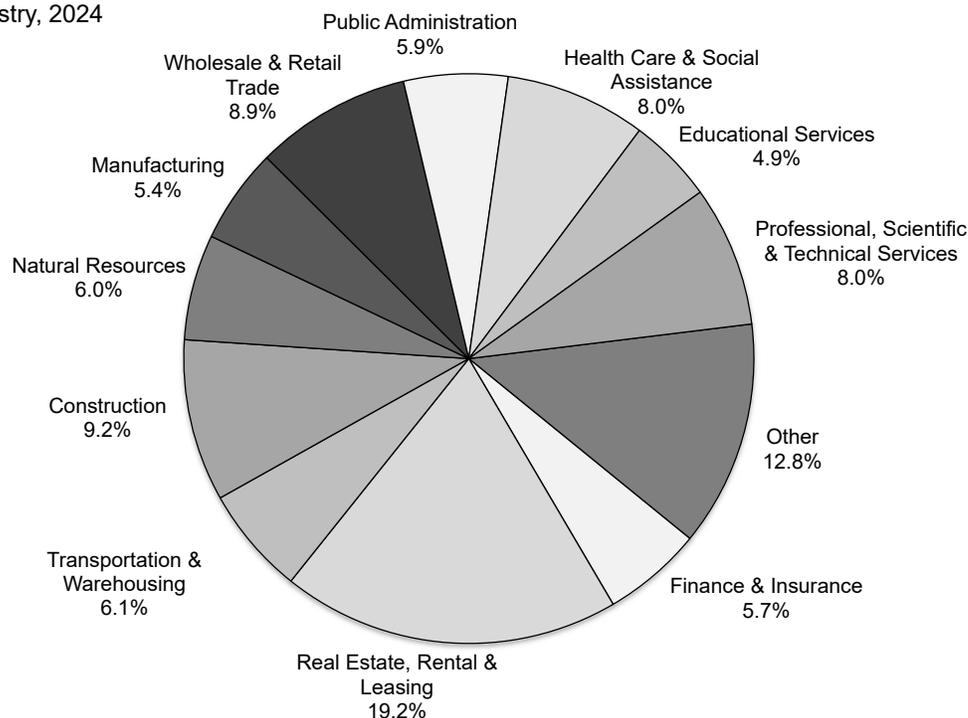

Source: Statistics Canada (Table 36-10-0402-01 – May 2025 Preliminary Industry Accounts)

Note: Other includes industries such as transportation and warehousing, educational services, and professional, scientific and technical services

In 2024, service-producing industries accounted for 77.7 per cent of B.C.'s economy, while goods-producing industries represented 22.3 per cent. Within the service-producing industries, the real estate and rental and leasing sector remained the largest contributor, followed by wholesale and retail trade. In the goods-producing industries, the construction industry continued to make up the largest share, followed by the manufacturing sector.

Chart 1.3 Composition of British Columbia GDP by Industry

Shares of B.C. GDP at basic prices by major industry, 2024

External Trade and Commodity Prices

Exports by destination:

Subdued global demand and lower energy prices in 2024 contributed to a decline in the value of B.C.'s merchandise exports. B.C. merchandise exports to the U.S. (B.C.'s largest international trading partner) continued to decline, while exports to China, South Korea, and Australia saw increases. Overall, B.C. goods exports declined by 2.7 per cent last year compared to 2023.

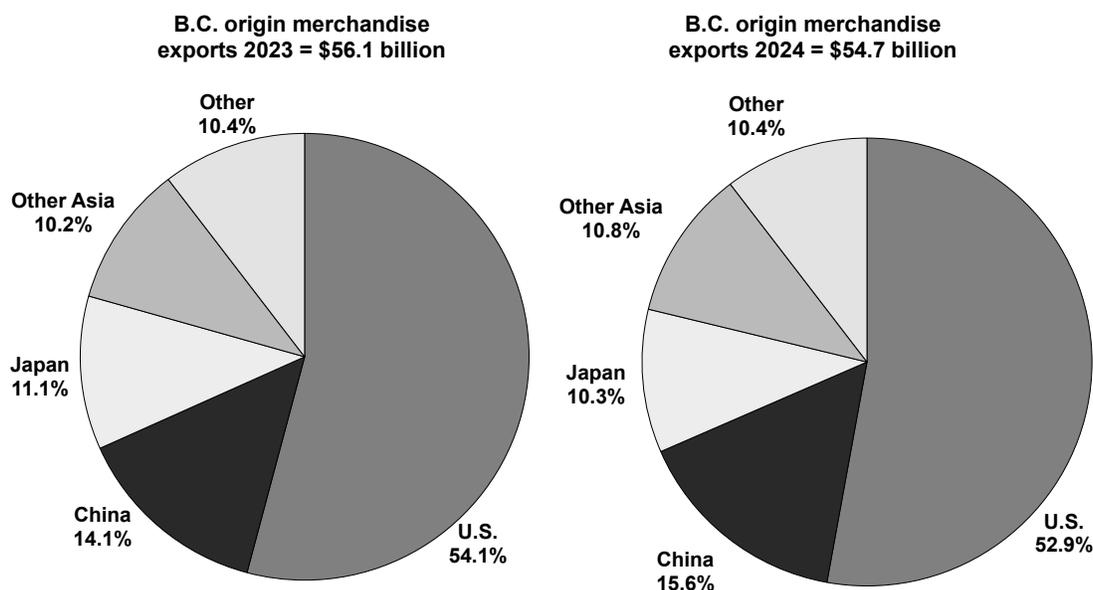

B.C.'s merchandise exports to the U.S. fell by 5.0 per cent in 2024 compared to 2023, marking the second consecutive decline. The annual decline largely reflected a 30.2 per cent decrease in energy products, mainly from natural gas. Meanwhile, exports of machinery and equipment to the U.S. increased for a fourth consecutive year, up 11.8 per cent in 2024 compared to 2023.

B.C.'s goods exports to China increased by 7.4 per cent in 2024, largely due to a rise in exports of energy products (+12.6 per cent) and metallic mineral products (+13.4 per cent). Meanwhile, B.C.'s goods exports to Japan decreased by 9.4 per cent following three years of consecutive growth. The decline in goods exports to Japan was concentrated in energy products (-15.4 per cent), while exports of machinery and equipment increased by 26.5 per cent. Exports to South Korea rose by 8.8 per cent in 2024, driven by a surge in copper exports (+67.7 per cent).

Appendix Tables A1.7 and A1.8 provide further detail on exports by major market and commodity groups.

In 2024, the share of B.C.'s international merchandise exports destined to the U.S. averaged 52.9 per cent, down from 54.1 per cent in 2023. Exports to China accounted for 15.6 per cent in 2024, up from 14.1 per cent in 2023, while exports to Japan represented 10.3 per cent, down from 11.1 per cent in 2023.

Chart 1.4 International Export Shares by Market

Source: BC Stats – accessed June 2025

Note: Other Asia includes Hong Kong, Taiwan, South Korea and India (numbers may not add to 100 per cent due to rounding)

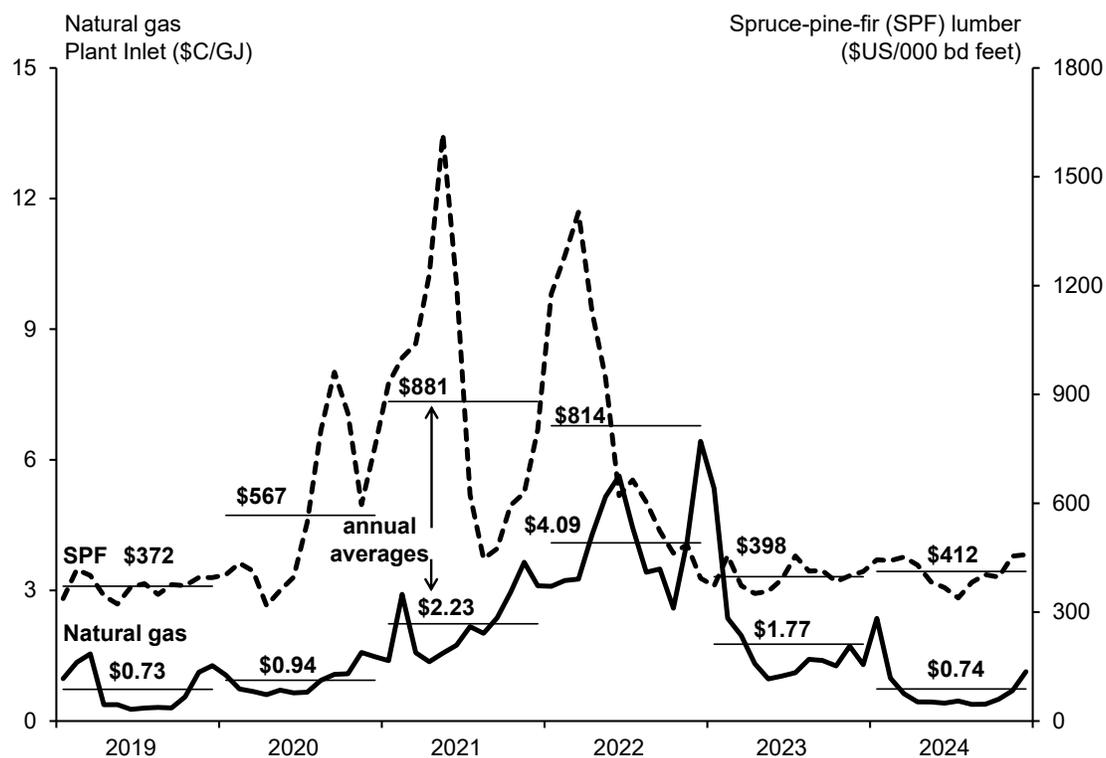

Exports by commodity and prices:

In 2024, the decline in B.C. merchandise exports largely reflected a 17.0 per cent decrease in exports of energy products, primarily natural gas and coal, which experienced substantial declines of 48.1 per cent and 16.5 per cent, respectively. Exports of wood products saw a small decline of 0.9 per cent, following a 30.9 per cent drop in 2023. Meanwhile, increases in exports of metallic mineral products (+11.2 per cent), machinery and equipment (+8.2 per cent) and pulp and paper products (+9.2 per cent) partly offset the decline in B.C. merchandise exports.

Oil prices declined in 2024 for the second consecutive year as subdued domestic and global demand combined with rising global supplies, particularly from North American production, continued to put downward pressure on prices. The West Texas Intermediate (WTI) price averaged \$76.55 US per barrel in 2024, down 1.4 per cent from 2023. Meanwhile, the plant inlet price of natural gas averaged \$0.74 C/GJ in 2024, down 58.4 per cent from 2023, reflecting excess supply from lower domestic demand and increased drilling activity in anticipation of LNG Canada coming online.

The price of Western spruce-pine-fir (SPF) 2x4 lumber continued to trend near its historical average in 2024, increasing 3.7 per cent compared to 2023 and averaging \$412 US/000 board feet.

Chart 1.5 Lumber and Natural Gas Prices

Sources: Ministry of Forests; Ministry of Energy and Climate Solutions.

The effects of slower global economic activity on industrial metal and mineral prices were mixed. In 2024, the annual average price for metallurgical coal declined compared to 2023, along with prices for molybdenum and lead. Meanwhile, prices rose for gold, silver, copper, and zinc.

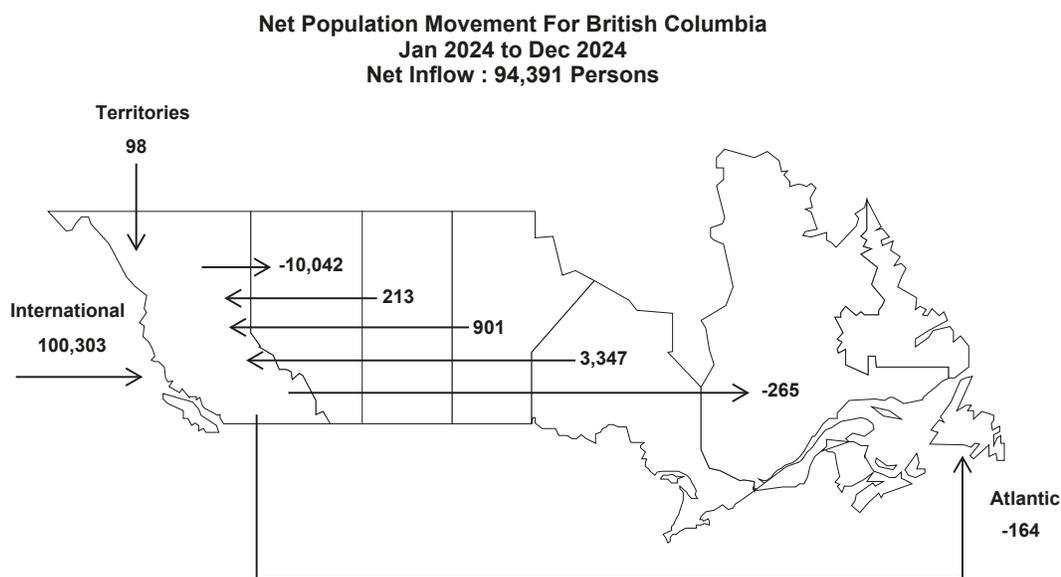

Manufacturing shipments:

Like merchandise exports, B.C.'s manufacturing sector was affected by lower commodity prices and weaker global demand. Overall in 2024, the nominal value of B.C.'s manufacturing shipments fell by 1.3 per cent compared to 2023, largely due to declines in fabricated metal products (-10.7 per cent) and shipments of computer and electronic products (-19.4 per cent), which outweighed relatively broad-based gains across other industries.

Population

Despite slowing international migration over the course of the year, B.C. saw strong population growth in 2024. The population reached 5.698 million people on July 1, 2024, an increase of 3.0 per cent from the same date in 2023. This was the province's second-fastest population increase since 1994, supported by still-elevated levels of international migration. In 2024, net international migration rose by 100,303 persons, down 47.1 per cent from 2023, reflecting the phasing out of federal policies implemented during the COVID-19 pandemic, more restrictions on work permits for non-permanent residents and caps on international students. Meanwhile, net interprovincial migration to B.C. was negative (-5,912 persons) for the second consecutive year. Overall, B.C. welcomed a total of 94,391 net migrants in 2024, down from a record-high in 2023. Population growth was entirely due to international migration, as B.C. saw a slight natural decline (where total deaths outnumbered total births), consistent with an aging population.

Map 1.1 Net Interprovincial and International Migration in B.C., 2024

Source: BC Stats

Labour Market

B.C.'s labour market continued to experience gains in 2024, supported by strong population growth. Employment grew by 66,100 jobs (+2.3 per cent) in 2024, following growth of 2.6 per cent in 2023. Employment gains consisted of 55,200 full-time jobs and 11,000 part-time jobs. The number of jobs created was concentrated in the private sector (+35,800 jobs), along with gains in the public sector (+24,900 jobs) and self-employment (+5,300 jobs).

Employment gains in 2024 were mainly driven by growth in the services-producing sector (+59,500 jobs), led by health care and social assistance (+27,000 jobs); professional, scientific and technical services (+11,000 jobs); as well as public administration (+10,300 jobs). Wholesale and retail trade (-12,900 jobs) and accommodation and food services (-10,800 jobs) partly offset employment gains. Meanwhile, employment in the goods-producing sector increased by 6,600 jobs

compared to 2023, primarily driven by an increase in construction (+9,300 jobs), while a decline in agriculture (-7,300 jobs) offset some of the gains.

B.C.'s labour force expanded by 2.7 per cent in 2024, down from 3.2 per cent growth in 2023. Labour force expansion was driven by more landed immigrants looking for jobs last year (+4.8 per cent), while the number of those born in Canada declined (-0.5 per cent). B.C.'s labour force participation rate averaged 65.2 per cent in 2024, declining from 65.8 per cent in 2023. The overall decline in the labour force participation rate in 2024 was driven by lower participation among both prime-age workers and youth aged 15 to 24. The participation rate for the prime-age group declined to 87.7 per cent in 2024 from 88.4 per cent in 2023, while participation among youth fell to 62.6 per cent from 65.6 per cent over the same period. In contrast, the rate among those aged 55 and over held steady at around 36.4 per cent for the third consecutive year.

B.C.'s unemployment rate rose in 2024 as strong population and labour force growth outpaced job gains. B.C.'s unemployment rate averaged 5.6 per cent in 2024, up from 5.2 per cent in 2023. Nationally, the unemployment rate was higher, averaging 6.3 per cent in 2024. Meanwhile, job vacancies in the province have continued to ease. The province's job vacancy rate reached 3.5 per cent in December 2024, lower than recent years, but still above the national average of 3.0 per cent.

Appendix Table A1.5 provides more details on employment by sector and subsectors.

Sources: Statistics Canada (Tables 17-10-0005-01, 17-10-0040-01, 17-10-0020-01, 14-10-0023-01 – accessed June 2025)

Consumer Spending, Inflation and Wages

Despite strong population growth, consumer spending on goods increased by just 0.6 per cent in 2024, following a 0.1 per cent decline in 2023. Retail sales were higher in six of nine subsectors driven by purchases at health and personal care retailers (+8.4 per cent), building material and garden supply stores (+9.3 per cent) and motor vehicles and parts dealers (+1.9 per cent). Gains were partly offset by lower sales at gasoline stations and fuel vendors (-7.8 per cent) and furniture, home furnishings, electronics and appliances retailers (-8.4 per cent). Elevated interest rates continued to hold back spending and reduce purchasing power for B.C. consumers in 2024. Subdued growth in nominal sales, combined with elevated prices, suggests an even lower volume of sales.

While retail trade data offers detailed information on consumer spending on goods, there is a lack of timely comprehensive data for consumer spending on services at the provincial level. National data shows that household spending on services grew by 3.2 per cent on a real basis and by 7.2 per cent on a nominal basis in 2024. In B.C., nominal sales at food services and drinking places, a component of the service sector, continued to increase in 2024, up 4.0 per cent compared to 2023, supported by higher prices.

In 2024, inflation in B.C. continued to moderate as the price growth of goods eased, while inflation for services remained elevated. B.C.'s Consumer Price Index (CPI) inflation rate averaged 2.6 per cent in 2024, down from 3.9 per cent in 2023. The slower rate of inflation was mainly due to lower price growth for food (+3.0 per cent) and recreation, education and reading (+0.6 per cent). Meanwhile, health and personal care (+2.6 per cent) and shelter (+6.1 per cent) contributed the most to annual price growth. Despite some easing in recent quarters, elevated mortgage costs continued to contribute to shelter inflation in 2024. The annual CPI inflation rate excluding shelter was 1.1 per cent in 2024. Food price inflation eased in 2024 compared to the previous year, with grocery prices rising by 2.9 per cent (down from 7.5 per cent in 2023) and prices for food purchased from restaurants increasing by 3.4 per cent (down from 6.0 per cent in 2023).

In 2024, wage growth in B.C. moderated compared to the previous year, which reflected a lower job vacancy rate and softened labour demand. Employee compensation (aggregate wages, salaries, and employers' social contributions) still increased by 6.3 per cent in 2024 following 7.5 per cent growth in 2023, reflecting gains in both jobs and wages. The average weekly wage rate increased by 5.2 per cent in 2024 compared to 2023, rising faster than the consumer price index for B.C.

¹ As of November 2024 Provincial Economic Accounts

² Component of income-based GDP, including wages, salaries and employers' social contributions earned in B.C. by residents and non-residents of the province. 2024 value for compensation of employees is from Statistics Canada Table 36-10-0205-01.

Sources: Statistics Canada (Tables 18-10-0005-01, 14-10-0064-01, 36-10-0221-01, 36-10-0205-01, 36-10-0224-01 – accessed June 2025)

Housing

In 2024, B.C. home construction activity remained resilient but saw decreases in housing starts from the record high in 2023 due to elevated interest rates, skilled-labour shortages, and increasing construction costs. Housing starts totaled 45,828 units in 2024, a 9.2 per cent decrease compared to 2023, but remained above the ten-year historical average of 41,431 units. Among segments, multi-family housing starts declined by 7.5 per cent, while single-family housing starts fell by 20.3 per cent.

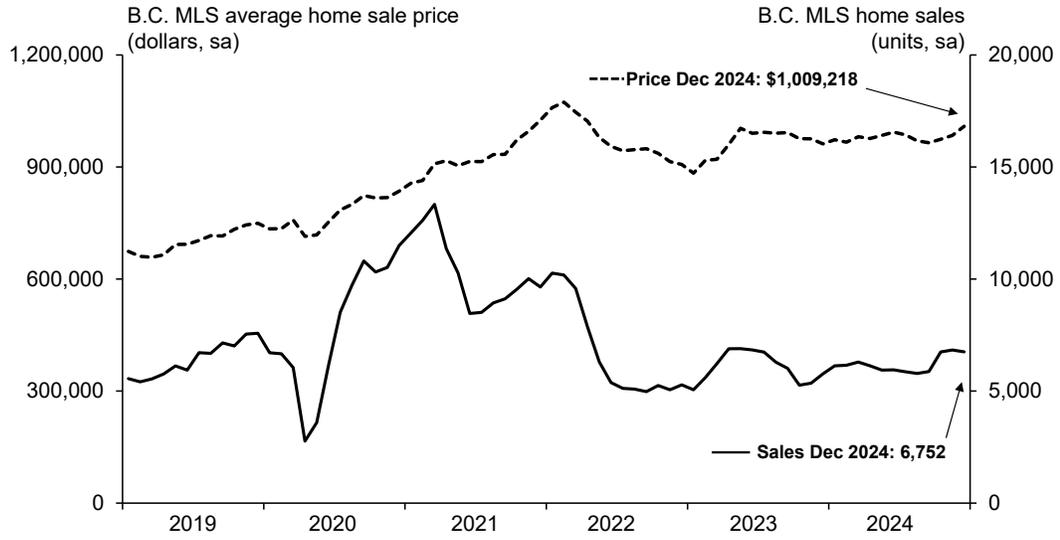

Chart 1.6 Housing Starts

Most major Census Metropolitan Areas (CMA) in B.C. saw growth in the number of homes under construction in 2024, with the exception of Victoria, which experienced a decline. However, home completions were mixed, with annual gains reported in Vancouver and Victoria while declines occurred in the Abbotsford and Kelowna CMAs compared to 2023. Meanwhile, the value of B.C. residential building permits (a leading indicator of potential new housing activity) fell by 4.2 per cent compared to 2023, extending a decline from the previous year.

In 2024, MLS home sales increased by 2.1 per cent compared to 2023, following a 9.3 per cent decline the year prior, which marked the lowest level in a decade. The increase was primarily driven by key markets such as Victoria (+10.9 per cent) and Greater Vancouver (+1.2 per cent). Meanwhile, declines in Okanagan-Mainline (-2.4 per cent) and the Fraser Valley (-1.0 per cent) provided some offset to the rise in sales. Despite muted demand throughout most of 2024, paired with affordability challenges, the MLS average home sale price in B.C. increased by 1.0 per cent compared to 2023.

In 2024, MLS composite benchmark house prices (which incorporates benchmark attributes by dwelling type in each region) increased in Vancouver Island (+2.5 per cent) and Greater Vancouver (+1.2 per cent), while prices decreased in the Okanagan Valley (-2.1 per cent), the Fraser Valley (-0.4 per cent) and Victoria (-0.1 per cent).

Chart 1.7 Home Sales and Price

Tourism

While B.C.’s tourism sector moderated through the spring and summer of 2024, activity increased sharply at the end of the year, supported by a weaker Canadian dollar and a likely short-term boost from Taylor Swift’s concerts in December. Overall, the number of international travellers to B.C. rose by 8.2 per cent compared to 2023. In 2024, the number of U.S. travellers increased by 8.6 per cent and the number of non-U.S. travellers increased by 6.7 per cent compared to the previous year. The ongoing recovery in visitor numbers has brought the level of international travellers entering B.C. close to pre-pandemic levels.

Chart 1.8 Visitor Entries to British Columbia

Sources: Statistics Canada; Haver Analytics

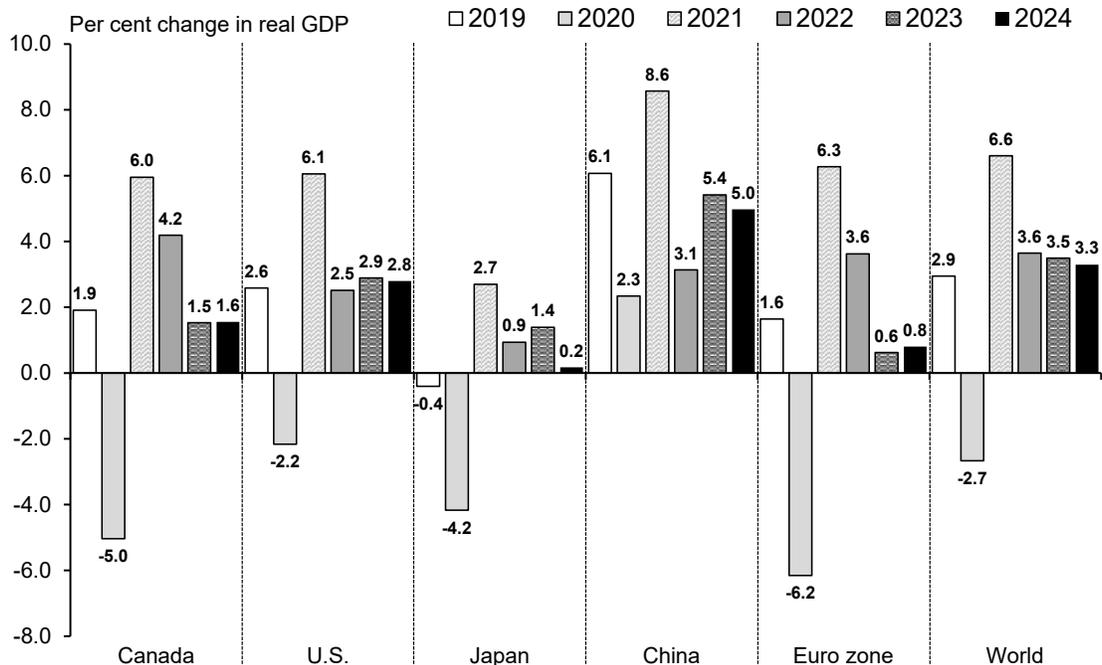

Global Economy

Global economic growth was relatively steady in 2024, but slightly slower than in 2023. The International Monetary Fund estimates that global real GDP advanced by 3.3 per cent in 2024, down from 3.5 per cent growth in the previous year. While inflation came down from prior years, interest rates remained elevated for much of 2024. Some central banks, including the Bank of Canada, the U.S. Federal Reserve, and the European Central Bank began to ease interest rates at different trajectories. Meanwhile, the Bank of Japan increased interest rates due to a weak yen and inflation concerns. Despite a recovery in trade and easing inflation, the global economy faced challenges from geopolitical tensions and weaker than expected growth in some emerging market and developing economies.

In 2024, the U.S. economy was strong despite an elevated interest rate environment, driven by robust consumer and government spending. U.S. real GDP grew by 2.8 per cent last year, a slight decrease from 2.9 per cent growth in 2023. Meanwhile, Canadian economic growth was steady at 1.6 per cent in 2024, a small increase from 2023.

Overseas, China's economic growth moderated to 5.0 per cent last year, below the 5.4 per cent recorded in 2023 and the slowest rate in over 30 years, outside of pandemic years. Japan's economy slowed to 0.2 per cent growth last year, down from 1.4 per cent in 2023. Meanwhile, euro zone real GDP growth increased to 0.8 per cent in 2024 from 0.6 per cent growth in 2023.

Chart 1.9 Global Economic Growth

Sources: International Monetary Fund (May 2025); Haver Analytics

United States

The U.S. economy steadily expanded throughout 2024, with real GDP growing by 2.8 per cent, down slightly from 2.9 per cent in 2023, despite an elevated interest rate environment. Growth was driven by strong consumer spending, particularly for services, and government spending. Business investment also contributed positively, while the only decline came from lower net exports. However, some signs of moderation emerged late in the year as labour market conditions began to ease, contributing to a decline in consumer sentiment.

The U.S. labour market continued to grow in 2024, but at a slower pace than prior years. U.S. employment was 1.3 per cent higher in 2024 compared to 2023 and the unemployment rate averaged 4.0 per cent, in line with pre-pandemic historical averages but higher than the prior year rate of 3.6 per cent. Meanwhile, the annual labour force participation rate was unchanged in 2024, with 62.6 per cent of Americans participating in the labour market last year.

High interest rates continued to weigh on U.S. housing market activity in 2024. New housing construction fell for a third consecutive year, down 3.7 per cent compared to 2023, and totalled 1.37 million units for the year. Sales of existing homes declined by 0.6 per cent in 2024 compared to 2023, while sales of new single-family homes were 3.0 per cent higher. The median price for existing homes rose 4.5 per cent over the year, but declined 1.9 per cent for new single-family homes.

Canada

On a GDP by expenditure basis, the Canadian economy expanded by 1.6 per cent in 2024, slightly higher than the growth rate recorded in 2023. The increase in Canadian real GDP was led by gains in household consumption (primarily services) and government spending, while exports of goods and services grew moderately. Gains were partly offset by a decline in inventory investment, continued weakness in business investment (mostly from lower investment in machinery and equipment), and higher imports of services.

Canada's labour market continued to grow throughout 2024, driven by strong population growth. Employment increased by 1.9 per cent last year, adding 395,700 jobs compared to 2023. Employment gains in 2024 were mainly driven by health care and social assistance (+122,800 jobs); professional, scientific and technical services (+81,100 jobs); as well as educational services (+53,900 jobs), while a decline in wholesale and retail trade (-49,100 jobs); agriculture (-26,300 jobs); and utilities (-6,200 jobs) offset some of the gains. Meanwhile, the national unemployment rate averaged 6.3 per cent in 2024, rising by 0.9 percentage points from the previous year, reflecting the labour force growing faster than employment, due to high levels of international migration.

In 2024, total MLS home sales in Canada rose 7.1 per cent, rebounding from a decline of 11.2 per cent in 2023. Despite the annual increase, home sales were subdued for most of the year compared to historical averages. Soft demand and an increase in listings have limited price growth, resulting in the national average home sale price rising just 0.9 per cent in 2024. Meanwhile, Canadian housing starts increased modestly in 2024, rising 2.1 per cent following a decline of 8.2 per cent in 2023. Among housing categories, multi-family starts increased by 2.8 per cent, while single-family starts

were down 0.2 per cent. In addition, the value of residential building permits was up 9.9 per cent in 2024, following an annual decline of 7.9 per cent in 2023.

Consumer price inflation in Canada continued to ease in 2024, reflecting a slow but steady return to historical norms. On an annual basis, Canadian consumer prices rose by 2.4 per cent in 2024, down from 3.9 per cent growth in 2023. Despite easing price growth, persistent price pressures remained in 2024, particularly for shelter prices (+5.7 per cent). Meanwhile, nominal retail sales grew 1.6 per cent in 2024 following 1.9 per cent annual sales growth in 2023. Sales at motor vehicles and parts dealers (+3.3 per cent) and general merchandise retailers (+3.9 per cent) were the primary contributors to annual growth in 2024. The largest decline occurred in sales at gas stations (-2.9 per cent), partly reflecting lower prices compared to 2023. In real terms (which exclude price effects), retail sales were up 0.9 per cent.

Canadian nominal goods exports saw a small increase in 2024, following a decline in 2023, with performance mixed among product categories. Overall, nominal goods exports increased by 1.3 per cent compared to 2023, mainly due to growth in exports of metal and non-metallic minerals exports, followed by energy products and consumer goods exports. Meanwhile, a decline in motor vehicle and parts exports was the biggest drag on growth, and metal ores and non-metallic minerals exports also fell. In contrast, service exports growth was solid in 2024, growing by 4.5 per cent compared to 2023, primarily due to a rise in travel and commercial services.

Asia

China's economy expanded by 5.0 per cent in 2024, meeting the government's official target, ending the year with a strong fourth quarter. Growth was supported by fiscal stimulus measures introduced in the fall and front-loaded exports ahead of anticipated U.S. tariff hikes. However, despite achieving its growth target, underlying momentum remained weak for most of the year. Retail sales were subdued, weighed down by persistent weak consumer confidence, a soft labour market, and a prolonged housing downturn. While strength in exports and industrial production (driven by manufacturing) helped boost economic growth, structural imbalances (such as weak domestic demand and high local government debt) continued to weigh on the economy.

Japan's GDP growth was relatively flat at 0.2 per cent in 2024, a sharp slowdown from 1.4 per cent growth in 2023. Economic growth was dampened by temporary supply disruptions in the auto sector, weak industrial output, and limited recovery in consumption despite rising wages. Meanwhile, net trade contributed positively, boosted by frontloading of exports ahead of U.S. tariffs. In response to sustained inflation and rising wages, the Bank of Japan raised its policy interest rate twice in 2024, reaching 0.25 per cent by July 2024. This move continued the gradual tightening that began in March 2024 amid a weak yen and mounting price pressures.

Europe

In 2024, economic growth in the euro zone remained subdued, with geopolitical tensions and heightened policy uncertainty continuing to weigh on business sentiment. A recovery in real incomes supported consumption, but persistent weakness in manufacturing and exports, particularly in Germany, kept overall momentum weak. Overall, the euro zone economy grew by 0.8 per cent in 2024, improving from the 0.6 per cent expansion recorded in 2023. Performance across major economies was mixed. Spain was the euro zone's strongest performing major economy with 3.2 per cent real GDP growth in 2024, supported by strong consumption and tourism. Meanwhile, Germany (the euro zone's largest economy) experienced a contraction for the second year in a row, with real GDP declining by 0.2 per cent, due to weak exports and consumer spending, as well as low investment in housing construction.

Financial Markets

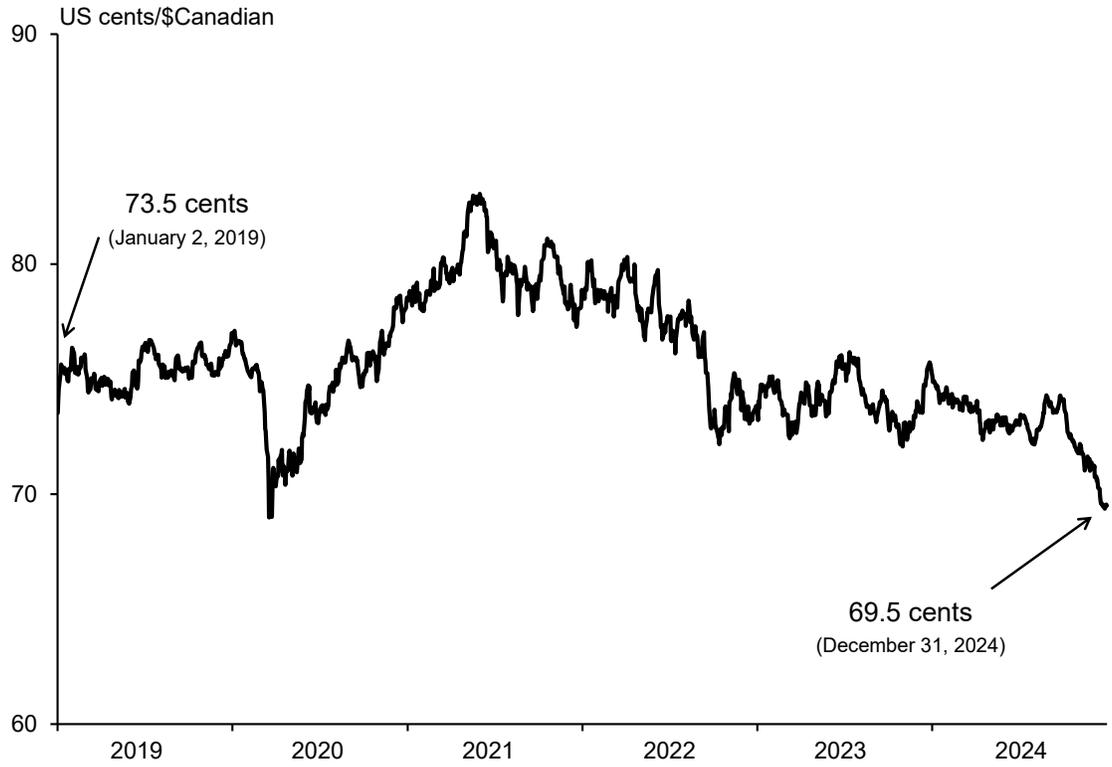

The U.S. Federal Reserve (the Fed) and the Bank of Canada (BoC) along with other central banks, began cutting interest rates in 2024 in response to declining inflation. The BoC started cutting rates earlier in the year than the Fed, reflecting lower inflation levels and weaker relative economic conditions.

On December 18, 2024, the Fed reduced the federal funds rate by 25 basis points to a target range of 4.25 to 4.50 per cent. This was the third interest rate cut of 2024, primarily reflecting the Fed's view that U.S. inflation has moved substantially toward its 2 per cent target. The Fed began lowering interest rates in the second half of last year, cutting the federal funds rate by a total of 100 basis points (bp). The Fed emphasized its commitment to support maximum employment and a 2 per cent inflation rate over the long-term. It also stated that it would adjust its policy stance if risks emerge that could interfere with achieving its goals.

In comparison, the BoC ended the year by reducing its overnight rate by 50 bp to 3.25 per cent in its December 11, 2024 interest rate announcement. This marked the fifth consecutive reduction since June 2024, cumulatively reducing the overnight rate by 175 bp, from 5.00 per cent to 3.25 per cent. According to the BoC, the earlier interest rate cuts were substantial and had started to support the Canadian economy. At the time, the BoC noted that further rate cuts could be considered if the Canadian economy evolves in line with their expectations. However, in their December rate announcement, the BoC noted increased uncertainty in Canada's economic outlook due to possible U.S. tariffs.

In 2024, the Canadian dollar edged lower against the US dollar, averaging 73.0 US cents compared with an average of 74.1 US cents in 2023. The Canadian dollar experienced a modest decline during the first seven months of last year, followed by some moderate appreciation in late summer. However, later in the year, the Canadian dollar saw a notable depreciation, falling from 73.8 US cents in September 2024 to 70.2 US cents in December 2024, the lowest monthly exchange rate since January 2016. This decline reflected growing uncertainty facing the Canadian economy, particularly due to U.S. tariffs, as well as interest rate differentials.

Historical Data Volatility

Individual economic variables have unique characteristics. An important characteristic from a budgeting and planning perspective is the historical data volatility of a variable. Typically, variables that are more volatile over history are more difficult to forecast than variables that are more stable. This topic box summarizes the volatility of historical data from 1981 to 2023. Economic variables were relatively more volatile in 2020 and 2021, reflecting the impact of the COVID-19 pandemic.

One of the most common measurements of data volatility is the standard deviation, which is frequently reported by agencies such as Statistics Canada and the Bank of Canada. Generally, the standard deviation of a variable measures how far the individual data points are from the average (mean) of all the data points in the series on an absolute basis (that is, without regard to whether each data point is above or below the average).

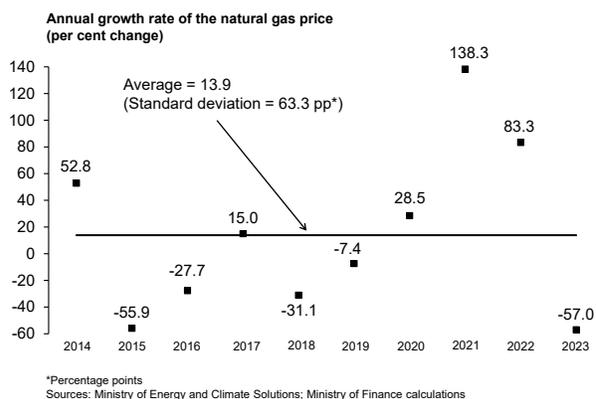

If a variable’s data points are generally close to the average, then the standard deviation will be relatively low (meaning that the variable is relatively stable). An example of a relatively stable variable is presented in Chart 1, which displays the annual growth rate of B.C.’s population.

Chart 1 – An Example of Historical Data Stability

Conversely, if a variable’s data points are generally spread out from the average, then the variable will have a relatively high standard deviation (meaning that the variable is relatively volatile). The annual growth rate of the natural gas price in Chart 2 is an example of a relatively volatile variable.

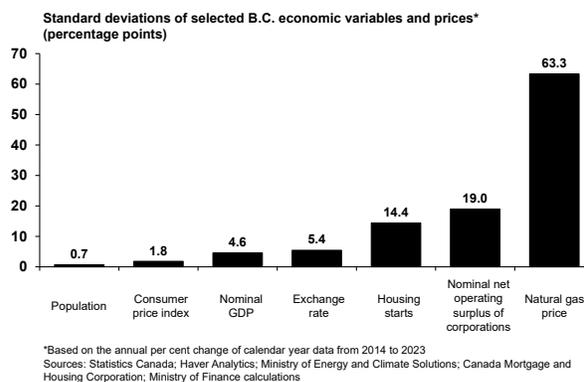

Chart 2 – An Example of Historical Data Volatility

The standard deviations and averages of selected key economic variables’ growth rates over different time periods are presented in Table 1. For instance, B.C. real GDP growth had a standard deviation of 2.6 percentage points and an average of 2.9 per cent from 2014 to 2023. This means that growth rates between 0.3 and 5.5 per cent are within one standard deviation of the average annual real GDP growth rate of 2.9 per cent over this period.

Standard deviations can vary widely across indicators and time. Variables such as the natural gas price and net operating surplus of corporations were relatively volatile from 2014 to 2023, while variables such as population and the consumer price index were relatively stable (see Chart 3). Meanwhile, some variables like the price of natural gas have become more volatile over time, whereas other variables like population have become more stable (see Table 1).

Chart 3 – Recent Data Volatility

The Ministry of Finance manages the uncertainty associated with data volatility by incorporating prudence in the Province’s budget and fiscal plan.

Key debt affordability metrics:				
Taxpayer-supported debt-to-GDP ratio	21.0%	23.2%	2.2%	18.4%
Taxpayer-supported debt-to-revenue	111.8%	122.7%	10.9%	97.9%

¹ Figures have been restated to reflect government accounting policies in effect at March 31, 2025, and the impact of Statistics Canada's historical data revisions of economic growth.

The provincial government ended the 2024/25 fiscal year with a deficit of \$7.3 billion, \$564 million lower than *Budget 2024*. (See Table 2.5 for detailed quarterly changes to the forecast.)

Revenue totalled \$84.0 billion in 2024/25, \$2.5 billion higher than the *Budget 2024* projection. Higher revenues were recorded in taxation, investment earnings, miscellaneous sources and commercial Crown corporations' net incomes, partly offset by lower natural resources revenues and federal government transfers. (See Revenue section for further details.)

Total government expenses of \$91.4 billion were \$2.0 billion higher than *Budget 2024* due mainly to fire and emergency management costs, funding for various housing and shelter initiatives using statutory spending authorization, and higher spending funded by increased recoveries from third parties. (See Expense section for further details.)

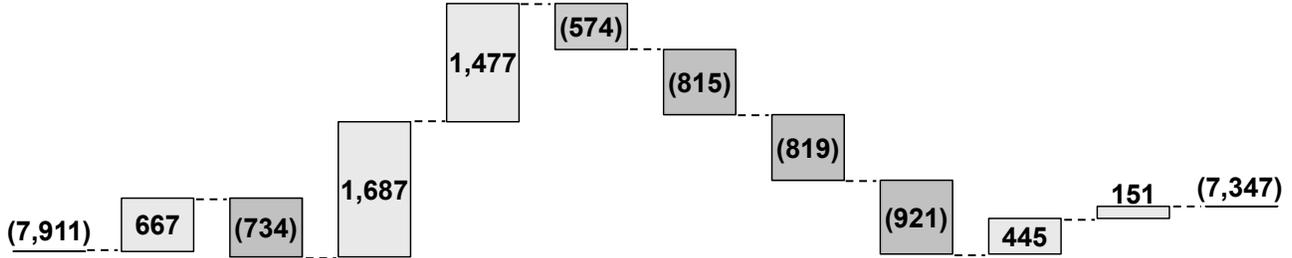

Taxpayer-supported capital spending on hospitals, schools, post-secondary institutions, transportation infrastructure, social housing and other projects totalled \$10.4 billion, \$3.7 billion less than *Budget 2024* due to changes in the timing of projects across the sectors.

Self-supported capital spending of \$4.4 billion was \$250 million lower than budget mainly in power generation and transmission projects. (See Capital section for further details.)

Chart 2.1 2024/25 Deficit – Major Changes from *Budget 2024*

\$564 million decrease in deficit

\$ millions

Budget 2024	Higher income tax & EHT revenue	Lower natural resource revenue	Higher fees and miscellaneous revenue	Higher commercial Crown net income	Other revenue changes	Fire management & EDMA	Housing & shelter related initiatives	Spending funded by external parties	Lower refundable tax credits	Other expense changes	2024/25 Public Accounts
-------------	---------------------------------	--------------------------------	---------------------------------------	------------------------------------	-----------------------	------------------------	---------------------------------------	-------------------------------------	------------------------------	-----------------------	-------------------------

Taxpayer-supported debt ended the year at \$99.1 billion, which is \$10.4 billion higher than forecast in *Budget 2024*. This increase was mainly due to impacts of a higher opening balance and pre-funding fiscal 2025/26 requirements to meet liquidity needs. Self-supported debt was \$34.8 billion, \$160 million higher than budget mainly reflecting higher opening balance from the preceding fiscal year. (See Provincial Debt section for further details.)

Financial information in this publication, including this chapter and Appendix 2, is sourced from the government’s 2024/25 *Public Accounts*.

Revenue

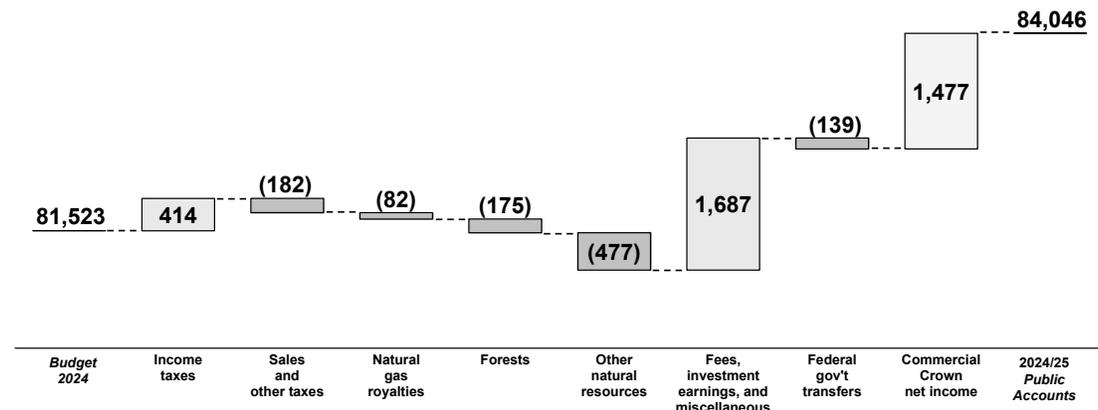

Revenue totaled \$84 billion in 2024/25, \$2.5 billion higher than the *Budget 2024* projection and up 5.6 per cent from 2023/24. Compared to budget, higher revenues were recorded in taxation, investment earnings, miscellaneous sources, and commercial Crown corporations' net incomes, partly offset by lower natural resources revenues and federal government transfers.

Changes of the major revenue components from *Budget 2024* are outlined as follows.

Chart 2.2 Revenue Changes from *Budget 2024*

\$ millions

Total revenue increased by \$2.52 billion

Income Tax Revenue

Personal income tax revenue was up \$388 million from budget. The increase is mainly due to \$402 million resulting from higher 2024/25 base revenue, reflecting improved household income, the effects of federal tax measures, and improved financial markets. The improvement was partially offset by a \$14 million decrease relating to prior year mainly due to weaker final 2023 tax assessments, reflecting lower earnings from higher income individuals despite improvement in overall taxable income.

Table 2.2.1 Personal Income Tax Revenue Changes from *Budget 2024*

Revenue changes (\$ millions)	Indicators (annual percent change)		Budget	Public	Public
			2024	Accounts 2023/24	Accounts 2024/25
Carry-forward impacts reflecting improved household and taxable income compared to budget assumptions.....	Household income	2023	6.9%	6.9%	9.5%
		2024	4.4%	4.4%	6.8% ¹
		2025	4.3%	4.3%	4.1% ¹
Prior year adjustment - mainly weaker 2023 tax returns compared to what was recorded in 2023/24 <i>Public Accounts</i>	B.C. taxable income	2023	6.0%	6.0%	8.0%
		2024	4.7%	4.7%	7.4%
		2025	4.5%	4.5%	3.2%
388					

¹ Budget 2025 forecast

Corporate income tax revenue was up \$26 million mainly due to higher final settlement payments relating to prior year partially offset by lower 2024 instalment payments from the federal government. The prior year's final settlement payment relating to 2023 tax year resulted in a \$895 million increase. This increase is due to stronger than expected final 2023 taxes assessed in late 2024 resulting in an increase in B.C. taxable income of 1.4 per cent in 2023. This increase was partly offset by a \$870 million decrease in 2024 instalments, mainly reflecting lower B.C. payment share of the national corporate taxable income.

Table 2.2.2 Corporate Income Tax Revenue Changes from Budget 2024

	Revenue changes (\$ millions)	Indicators (\$ billions)	Public	
			Budget 2024	Accounts 2024/25
Prior years' settlement payment				
2023 tax year	895	Payment Share	15.03%	13.10%
Advance instalments (2024/25).....	(869)	2024 national corporate tax base	520.8	553.7
	<u>26</u>	2023 national corporate tax base	456.2	537.0
		2023 B.C. corporate tax base	68.6	75.3

Other Tax Revenue

Consumptions taxes were \$497 million lower than budget.

Sales tax revenues were \$399 million lower than budget due to lower retail sales activity as well as nominal expenditure on consumption of semi, non-durable, and durable goods, which accounts for 40 per cent of total taxable expenditure.

Table 2.2.3 Consumption Tax Revenue Changes from Budget 2024

	Revenue changes (\$ millions)	Indicators (annual percent change for the 2024 calendar year)	Public	
			Budget 2024	Accounts ¹ 2024/25
		Nominal consumer expenditures		
		on goods and services	5.2%	4.4%
		on semi-durable goods	1.9%	-3.2%
		on services	7.1%	7.5%
Provincial sales	(399)	Nominal business investment	1.2%	2.7%
Tobacco	(98)	Consumer price index	2.7%	2.6%
Fuel	(41)	Real GDP	0.8%	1.2%
Carbon	41	Nominal GDP	3.3%	4.1%
	<u>(497)</u>	Retail sales	2.3%	0.6%

¹ Budget 2025 forecast for most variables, except retail sales and consumer price index which are actuals.

Tobacco tax revenue was down \$98 million from budget reflecting a decline in consumption volumes.

Fuel tax revenue was down \$41 million from budget mainly due to lower gasoline sales volumes.

Carbon tax revenue was up \$41 million from budget mainly due to higher than expected purchased volumes in other liquid fuels. 2024/25 revenue includes the carbon tax rate increase from \$65 to \$80 per tonne of carbon dioxide equivalent emissions on April 1, 2024 and output base pricing system revenue estimated at \$199 million.

Property tax revenue was \$58 million higher than budget due to higher revenues from business property taxes and BC Transit property levies. The speculation tax revenue at \$86 million in 2024/25 was \$4 million lower than the budget estimate, based on declarations by property owners for 2024.

Table 2.2.4 Property Tax Revenue Changes from Budget 2024

	Revenue changes (\$ millions)
Residential tax	(30)
Non-residential tax	59
Speculation and vacancy tax	(4)
Other	33
Total changes	58

Property transfer tax revenue was \$50 million lower than budget due to lower than expected residential sales value, reflecting reduced home sales activity as well as lower net in-migration.

Employer health tax revenue was \$253 million higher than budget mainly due to increases in employer payrolls, reflecting improved compensation of employee growth as well as increased reassessments relating to prior tax years.

Insurance premium tax revenue was \$65 million higher than budget mainly due to higher activity and premiums reflecting increased assessments of risks including climate change and inflationary increases, and increased prior year taxable premiums, partially offset by impacts of ICBC rebates.

Table 2.2.5 Other Tax Revenue Changes from Budget 2024

	Revenue changes (\$ millions)	Indicators (annual percent change for the 2024 calendar year)	Budget 2024	2024/25 Public Accounts ¹
Employer health	253	Compensation of employees	5.5%	6.7%
Insurance premium	65			
	<u>318</u>			

¹ Budget 2025 forecast.

Natural Resources Revenue

Total natural resource revenues are \$734 million below budget.

Natural gas royalties were \$82 million lower than budget due to lower natural gas liquids royalties reflecting reduced royalty rates applied to new wells. In addition, the revenue was reduced mainly reflecting lower prices for natural gas due to higher than average storage inventories in North America. These revenue was partly offset by a corresponding decrease in utilization of credits under the royalty programs. In 2024/25, natural gas prices averaged \$0.74 (\$Cdn/gigajoule, plant inlet), a 41.3 per cent decrease from the *Budget 2024* assumption. Payments of \$65 million were made through the Ministry of Indigenous Relations and Reconciliation (MIRR) to First Nations in support of natural gas royalties revenue sharing agreements.

Table 2.2.6 Energy and Mineral Revenue Changes from Budget 2024

	Revenue changes (\$ millions)	Indicators	Budget 2024	Actual 2024/25
Natural gas royalties	(82)	Natural gas price (\$Cdn/GJ, plant inlet)	\$1.26	\$0.74
		Natural gas production (annual change)	3.2%	4.7%
		Pentane price (\$C/bbl)	\$87.50	\$90.81
		Condensates price (\$C/bbl)	\$79.40	\$86.71
Coal, metals and other minerals	(259)	Metallurgical coal price (\$US/tonne)	\$243	\$247
		Copper price (\$US/lb)	\$3.88	\$4.25
Electricity sales under the Columbia River Treaty	(187)	Electricity price (\$US/Mwh)	\$93.37	\$61.27
Petroleum royalties	17	Oil price (\$US/bbl)	\$77.34	\$75.12
Fees and levies collected by the BC Energy Regulator	17			
Bonus bids and Crown land drilling licences and leases	2			
	<u>(492)</u>			

Coal, metals and other minerals revenue was \$259 million lower than budget mainly due to labour and shipment disruptions following the summer 2024 rail stoppage and fall 2024 port strike, as well as higher mining costs, partly offset by higher coal and metal prices. Metallurgical coal prices averaged \$247 (US/tonne) in 2024/25, up 1.7 per cent from the budget assumption. Copper prices were \$4.25 (US/lb) in 2024/25, up 9.5 per cent from the budget assumption. Payments of \$81 million were made through MIRR to First Nations in support of coal, metals and other minerals revenue sharing and other agreements.

Revenue from electricity sales under the Columbia River Treaty was \$187 million lower than budget mainly due to an overall decrease in volume resulting from the new Agreement-in-Principle (AIP) for the Columbia River Treaty and lower Mid-C electricity prices, partly offset by a separate annual cash payment for Flood Risk Management included in the AIP. Mid-C electricity prices averaged \$61.27 (\$US per mega-watt hour), down 34.4 per cent from the budget assumption (\$93.37). Lower average Mid-C electricity prices reflect mild weather, moderate natural gas prices and growth in wind and solar generation. Payments of \$39 million were made through MIRR to First Nations in support of electricity sales under the Columbia River Treaty revenue sharing and other agreements.

Revenue from other energy sources was \$36 million higher than budget mainly due to higher petroleum production and fees and levies collected by the BC Energy Regulator.

Forests revenue was \$175 million lower than budget mainly due to lower than expected stumpage and logging tax revenues, reflecting regular updates to the market pricing system, decreased average stumpage rate and lumber prices. Logging tax revenue was \$85 million lower than budget due to prior-year losses. The total Crown harvest volumes for 2024/25 were 32.2 million cubic metres, relatively unchanged from budget. Lumber prices for spruce, pine and fir (SPF) 2x4 averaged \$412 (\$US/1000 bf) in 2024, 3.0 per cent lower than the budget assumption (\$425). Payments of \$179 million were made through MIRR to First Nations in support of Forest Consultation and Revenue Sharing Agreements.

Table 2.2.7 Forest Revenue Changes from Budget 2024

	Revenue changes (\$ millions)	Indicators	Budget 2024	Actual 2024/25
Stumpage from timber tenures	(126)	SPF 2x4 (\$US/1000 bf, calendar year)	\$425	\$412
BC Timber Sales	26	Total stumpage rate (\$/m ³)	\$18.06	\$14.78
Logging Tax	(85)	Harvest volumes (million m ³)	32.0	32.2
Recoveries relating to revenue sharing payments to First Nations	(2)			
Other receipts	12			
	<u>(175)</u>			

Other natural resource revenues, comprised of revenue from water rentals and hunting and fishing licenses, were \$67 million lower than budget mainly due to lower water rentals revenue reflecting significantly reduced inflows to reservoirs due to near record low snowpack and drought conditions, resulting in reduced power generation by BC Hydro and independent power producers.

Other Taxpayer-Supported Sources

Revenue from fees, investment earnings and other miscellaneous sources totalled \$13.1 billion, up \$1.7 billion from budget.

Fee revenues totalled \$5.5 billion, unchanged from budget. Higher fees earned by health authorities and other fees were offset by lower revenues from post-secondary institutions, K-12 school districts and recoveries related to nominal rent tenures.

Investment earnings was \$2.2 billion, up \$735 million from budget due in part to higher cash balances held by government to meet liquidity requirements, as well as higher investment returns from post-secondary institutions and health authorities.

Table 2.2.8 Other Revenue Changes from Budget 2024

	Revenue changes (\$ millions)	
Fees	-	Mainly higher revenues from health authorities and other fees offset by lower revenues from post-secondary institutions, K-12 school districts and recoveries related to nominal rent tenures
Investment earnings	735	Mainly higher cash balances and investment returns from post-secondary institutions and health authorities, partly offset by lower recoveries through the fiscal agency loan program
Miscellaneous sources	952	Higher revenues in taxpayer-supported SUCH sector agencies, higher PharmaCare and other vote recoveries
	<u>1,687</u>	

Miscellaneous revenue totalled \$5.5 billion, up \$952 million from budget mainly due to higher revenue collected by core government and taxpayer-supported crowns and SUCH¹ sector entities (\$537 million) and higher external recoveries received to fund ministry programs, mainly in the health sector (\$415 million).

Federal Government Transfers

Contributions from the federal government totalled \$14.3 billion, \$139 million below budget. Canada Health Transfer and Canada Social Transfer entitlements were up \$67 million mainly due to higher than assumed B.C. share of the national population (13.80 per cent compared to 13.73 per cent forecast at budget), partly offset by *Canada Health Act* deductions.

Table 2.2.9 Federal Government Transfer Changes from Budget 2024

	Revenue changes (\$ millions)	
B.C. health and social transfers revenue	67	Higher than assumed B.C. share of the national population partly offset by <i>Canada Health Act</i> deductions
Disaster Financial Assistance Arrangements ..	(541)	Mainly lower funding in support of Disaster Financial Assistance Arrangements (DFAA) reflecting refined costs and DFAA events reprofiled to future years
Vote recoveries	339	Mainly higher health and natural resource funding partly offset by lower local government transfers and public transit funding
SUCH sector	53	Higher transfers to taxpayer-supported SUCH sector agencies (mainly post-secondary institutions)
Crown corporations and agencies	(69)	Lower transfers to taxpayer-supported Crown entities mainly BC Housing
Other receipts	12	Mainly higher receipts from B.C.'s share of federal cannabis excise tax entitlement
	<u>(139)</u>	

¹ SUCH: School districts, universities, colleges and institutes, and health organizations.

Other federal government contributions were down \$206 million from budget. The decrease mainly reflects a \$541 million decrease in transfers under the Disaster Financial Assistance Arrangements (DFAA), partly offset by higher vote recoveries. The decrease in DFAA revenue reflects refined costs and delays in timing of eligible expenses to future years. Ministries received \$339 million higher vote recovery mainly due to increased funding in support of health programs, partly offset by lower local government transfers and public transit funding. The higher revenues reported as vote recoveries have an equal and offsetting expense increase. Other ministry receipts were \$12 million higher than budget mainly due to B.C.'s share of federal cannabis excise tax reflecting increased consumption. SUCH sector entities (mainly post-secondary institutions) received \$53 million more in federal contributions. Contributions received by taxpayer supported Crown corporations were down \$69 million (mainly BC Housing).

Commercial Crown Corporations

The net income of commercial Crown corporations (government business enterprises) totalled \$4.8 billion in 2024/25, \$1.5 billion higher than *Budget 2024*, and \$313 million higher than 2023/24. The variance from budget in overall earnings is mainly due to an improvement in operating results of ICBC.

British Columbia Hydro and Power Authority

BC Hydro's net income was \$587 million, \$125 million lower than the forecast in *Budget 2024* primarily due to higher operating costs as a result of inflation and expanded operational requirements.

Many variances, including those related to revenues, cost of energy, amortization, finance charges and others are deferred to regulatory accounts, as approved by the British Columbia Utilities Commission, and do not impact net income.

British Columbia Liquor Distribution Branch

BC Liquor Distribution Branch's net income of \$1.1 billion was \$4 million higher than the forecast in *Budget 2024* and \$54 million lower than 2023/24 due to lower sales volumes over the year.

British Columbia Lottery Corporation

BC Lottery Corporation's net income of \$1.3 billion² was \$134 million lower than the prior year and \$28 million lower than *Budget 2024*. The decrease in net income was primarily due to lower revenues attributed to reduced discretionary spending by patrons.

² Net of payments to the federal government and payments to the BC First Nations Gaming Revenue Sharing Limited Partnership in accordance with section 14.3 of the *Gaming Control Act (B.C.)*.

Insurance Corporation of British Columbia

The Insurance Corporation of British Columbia's reported net income was approximately \$1.7 billion (net of the \$406 million in rebate payments to customers), compared to \$nil net income projected in *Budget 2024*, and \$254 million higher than the previous year. The improvement over budget was mainly due to unanticipated higher investment earnings and lower claims costs.

More information about commercial Crown corporations' financial results and performance measures is provided in each corporation's Annual Service Plan Report available at its respective website.

¹ Detailed descriptions of changes are provided in the revenue and expense sections of this report.

² Includes BC Transportation Financing Authority, BC Transit, BC Housing Management Commission, Community Living BC, and other entities.

Expense

In 2024/25, government expenses totalled \$91.4 billion, \$2.0 billion higher than *Budget 2024* and \$6.7 billion (8.0 per cent) higher than the previous year.

Chart 2.3 Expense Changes from *Budget 2024*

Consolidated Revenue Fund Spending

Statutory spending by the government during the year totalled \$2.3 billion in the following areas:

- \$537 million in wildfire costs over the voted appropriation, for a total spending of \$769 million (Ministry of Forests);
- \$819 million to fund various housing and shelter related initiatives, under the *Housing Priority Initiatives Special Account* (Ministry of Finance);
- \$213 million for signed agreements under the *Shared Recovery Mandate* (Ministry of Finance);
- \$278 million mainly for prior year wildfires and flooding events (Ministry of Emergency Management and Climate Readiness);
- \$367 million for increased debt servicing costs; and
- \$134 million in other areas.

Other CRF spending was \$1.23 billion lower than *Budget 2024* due to an unused portion of the Contingencies Vote (\$459 million), ministry and other savings (\$119 million), lower refundable tax credits (\$445 million) and other expense changes (\$211 million), mainly prior period adjustments.

Contingencies

Government uses the Contingencies Vote as a prudent budgeting tool to fund priority initiatives and manage budget pressures. *Budget 2024* included a Contingencies Vote of \$3.9 billion of which \$3.4 billion was spent on a number of priority initiatives and pressures, including:

- \$585 million to increase access to healthcare and clinical services as part of the primary care strategy. This funding also supported various mental health and addictions initiatives including treatment and recovery programs and community based supports (Ministry of Health);
- \$453 million mainly to support various CleanBC initiatives, transition of carbon pricing to an Output-based Pricing Model, and to fulfil provincial funding commitments to Cedar LNG. (Ministry of Energy and Climate Solutions);
- \$422 million for initiatives related to the Investing in Canada Infrastructure Program and Northwest BC Resource Benefits Alliance (Ministry of Housing and Municipal Affairs);
- \$329 million mainly for additional funding to TransLink (Ministry of Transportation and Transit);
- \$294 million to fund Children in Care and Children and Youth with Support Needs services (Ministry of Children and Family Development);
- \$263 million for signed agreements under the *Shared Recovery Mandate* (various ministries);
- \$149 million to fund increased enrolment in K-12 schools and various initiatives including the Student and Family Affordability Fund and Classroom Enhancement Fund (Ministry of Education and Child Care);
- \$138 million for various treaty and non-treaty agreements with First Nations (Ministry of Indigenous Relations and Reconciliation);
- \$134 million to fund various land and natural resource management initiatives including Blueberry River Restoration Society, BC Salmon Restoration and Innovation Fund, and to increase funding for potential future liabilities for contaminated Crown land (Ministry of Water, Land and Resource Stewardship);
- \$106 million to fund various initiatives to provide relief to businesses affected by wildfire, drought, and floods (Ministry of Agriculture and Food);
- \$104 million to fund various economic development initiatives including the BC Manufacturing Jobs Fund, the Rural Economic Diversification and Infrastructure Program, Stronger BC Investment Framework, and InBC (Ministry of Jobs, Economic Development and Innovation);
- \$60 million to fund various public safety costs related to Surrey Police transition, BC Corrections recruitment and retention and other core policing services (Ministry of Public Safety and Solicitor General);
- \$52 million for cyber security, IM/IT enterprise services, storage, and enterprise software services (Ministry of Citizens' Services);
- \$52 million to fund initiatives related to the Future Ready Action Plan (Ministry of Post-Secondary Education and Future Skills);

- \$51 million to fund digital storage of evidence, additional resources to support court operations and various priorities including repeat offending program implementation and increased access to legal aid for people leaving family violence (Ministry of the Attorney General); and
- \$235 million to fund various operating pressures and initiatives such as the replacement of Merritt dikes, Neucel Pulp Mill site stabilization, reforestation, Old Growth support, 2025 Invictus Games and FIFA World Cup 2026.

Spending Recovered from External Parties

Spending recovered from external parties relates to program spending funded or co-funded by parties outside of government. Cost-recovered spending was \$921 million higher than *Budget 2024* due to:

- \$538 million in more recoveries from the federal government to support of health care, highway infrastructure under the Disaster Financial Assistance Arrangements, natural resource sector and other program areas;
- \$415 million more in miscellaneous recoverable costs mainly related to PharmaCare; offset by
- \$32 million lower recoveries in various other programs.

The recovered spending changes are offset by an equal net increase in revenue and as a result have no net impact on government's financial results.

Operating Transfers to Service Delivery Agencies

Operating transfers paid to service delivery agencies may change during the fiscal year as ministries make budget allocations, Contingencies Vote access is approved, and funding is provided under statutory authority provisions. In 2024/25, operating grants to agencies increased by \$2.7 billion, compared to *Budget 2024*, primarily due to higher grants to health authorities (\$2.0 billion) for increased staffing costs and primary care strategy, the education sector mainly to fund wage mandate increases (\$440 million), and higher grants to various other service delivery agencies (\$259 million).

Operating transfers provided to service delivery agencies are eliminated on consolidation, for accounting purposes. These funding increases are largely related to spending changes noted below.

Service Delivery Agency Spending

Service delivery agency spending was \$2.6 billion higher than *Budget 2024*, made up of the following:

- School districts' spending was \$158 million higher than *Budget 2024* due primarily to salary increases under the *Shared Recovery Mandate*, and inflationary pressures on operating costs.
- Post-secondary institutions' spending was \$167 million higher than *Budget 2024* mainly due to salary increases under the *Shared Recovery Mandate* and inflationary pressures on operating costs.
- Health authority and hospital society spending was \$2.5 billion higher than *Budget 2024* due to increased costs to address health system priorities as well as salaries and operating costs associated with growing demand for healthcare services.
- Spending in other service delivery agencies was \$186 million lower than *Budget 2024* reflecting lower spending mainly by the BC Transportation Financing Authority (\$458 million) offset by higher spending by Community Living BC (\$64 million) and net higher spending by various agencies (\$208 million).

Higher service delivery agency spending is funded primarily by increased operating transfers provided by government as noted above.

A detailed review of the above changes by quarter is available in Table 2.5. Further information on 2024/25 spending by function is provided in Appendix Table A2.6.

Provincial Capital Spending

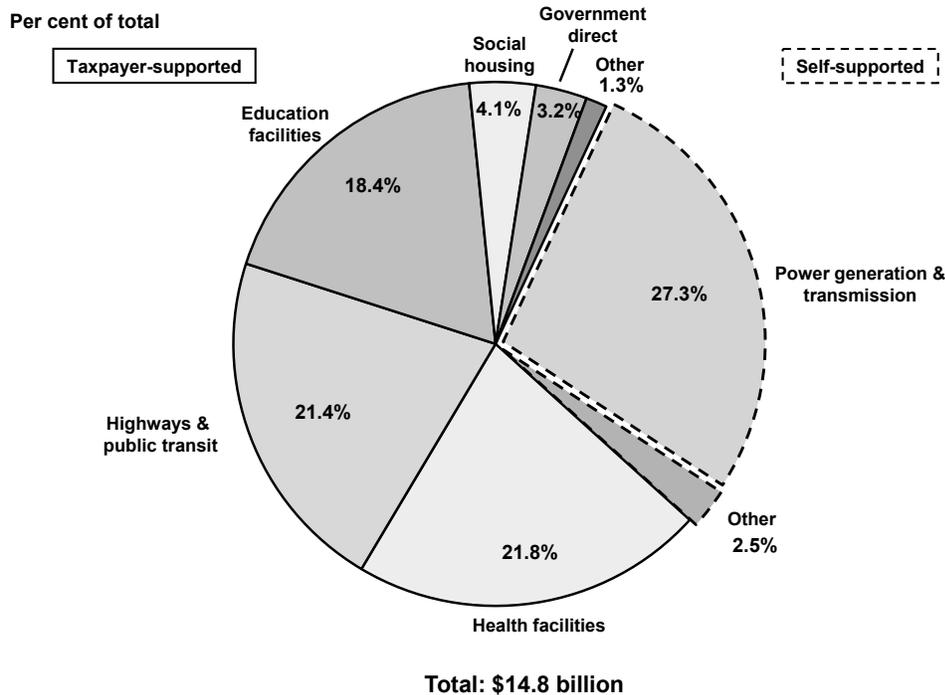

In 2024/25, capital spending totaled \$14.8 billion, which was comprised of \$10.4 billion for taxpayer-supported infrastructure and \$4.4 billion for the self-supported infrastructure of commercial Crown corporations and agencies.

Direct spending on health and education facilities, social housing, and government capital projects (i.e. government ministry infrastructure, including IT systems and correctional institutions) represented 48 per cent of total capital spending in 2024/25.

Spending on highways and public transportation reflects government’s transportation and transit investments, comprising approximately 21 per cent of total capital spending in 2024/25. While this spending is predominantly taxpayer financed, a portion is funded from the federal government and other external sources.

Spending on power generation and transmission projects is the largest single category of capital spending and is entirely self-supported. The spending primarily reflects BC Hydro’s refurbishment and expansion of its generating and transmission assets.

Chart 2.4 Total Capital Spending by Sector

Taxpayer-Supported Capital Spending

In 2024/25, government spending on taxpayer-supported infrastructure was \$3.7 billion lower than forecast in *Budget 2024*.

Education facilities spending, which includes both the K-12 and post-secondary sector, was \$657 million lower than budget, primarily due to timing changes of the self-funded projects by post-secondary institutions and projects under construction, including the Centre for Clean Energy & Automotive Innovation.

Health facilities spending was \$1.2 billion lower than budget, primarily due to timing of expenditures associated with major projects under construction, including the Royal Columbian Hospital Redevelopment, Burnaby Hospital Redevelopment – Phase 1, and the Cowichan District Hospital Redevelopment.

Highways and public transit spending was \$1.4 billion lower than budget, primarily due to timing changes for the construction of the Broadway Subway and Pattullo Bridge Replacement projects, as well as project scheduling changes for ongoing highway and side-road upgrade projects.

Social Housing, Ministry and Other spending was \$485 million lower than budget, primarily due to timing changes for the development of housing projects, construction of the Provincial Archives, Research and Collections Campus (formerly Royal BC Museum Collections and Research Building), and upgrades and maintenance of core government assets.

The above scheduling and cash flow changes do not represent a reduction in capital spending; rather the spending has been shifted to future years within the provincial capital plan.

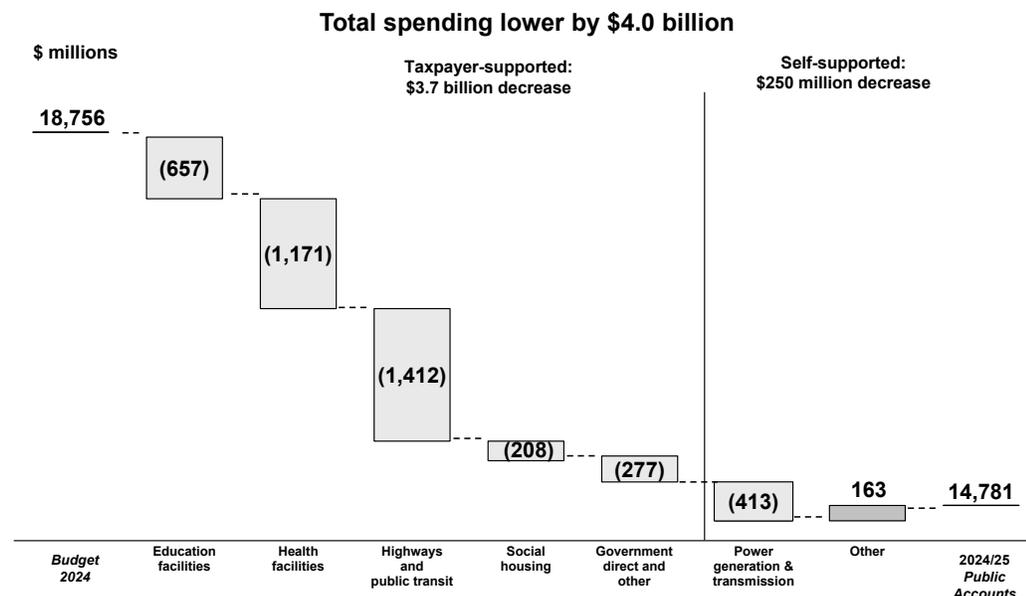

Table 2.6 Capital Spending

(\$ millions)	<i>Budget</i> 2024	Actual 2024/25	Actual 2023/24
Taxpayer-supported

Self-Supported Capital Spending

Self-supported commercial Crown corporation and agency spending on capital projects in 2024/25 was \$250 million lower than *Budget 2024* primarily due to changes in the timing of BC Hydro capital expenditures.

Further details on capital spending are provided in Appendix Table A2.9.

Chart 2.5 Capital Spending Changes from Budget 2024

Major Capital Projects

Significant capital projects (those with multi-year budgets totalling \$50 million or more) are shown in Table 2.7. Investments in these larger projects will provide long-term social and economic benefits for the province.

As projects are completed, or new ones receive approval, the projects are removed from or added to the \$50 million table.

Since the *2024 Fiscal and Economic Review*, the following projects were removed:

- Grandview Heights Secondary School;
- Handsworth Secondary School;
- Pexsisen Elementary and Centre Mountain Lellum Middle School;
- Peace Arch Hospital Renewal;
- Highway 91 Alex Fraser Bridge Capacity Improvements;
- BC Hydro – 5L063 Telkwa relocation project;
- BC Hydro – LNG Canada load interconnection project; and
- BC Hydro – Street light replacement program.

The following projects were added to the \$50 million table since the *2024 Fiscal and Economic Review*:

- Smith Middle and Secondary Schools (\$306 million);
- The University of British Columbia – Canada’s Immuno-Engineering and Biomanufacturing Hub: Advanced Therapeutics Manufacturing Facility (\$70 million);
- East Kootenay Regional Hospital – Oncology and Renal Redevelopment (\$59 million);
- Fort St. John Long-Term Care (\$155 million);

- Highway 1 Corridor – Tank Hill (\$293 million);
- Quesnel-Hydraulic Road Slide (\$80 million);
- FIFA World Cup 2026 - Stadium Capital Improvements (\$109 million);
- BC Hydro – 2L143 - cable replacement project (\$100 million);
- BC Hydro – Comox - Puntledge flow control improvements project (\$53 million);
- BC Hydro – Fleetwood - Distribution load interconnection (SLS Servicing) project (\$158 million);
- BC Hydro – Kimberley to Marysville - substation relocation project (\$73 million);
- BC Hydro – Ladore spillway seismic upgrade project (\$373 million);
- BC Hydro – Long Lake terminal station - transmission load interconnection project (\$80 million);
- BC Hydro – Materials classification facility project (\$76 million);
- BC Hydro – Mica - U1 - U4 circuit breaker and iso-phase bus replacement project (\$176 million);
- BC Hydro – Northwest - substations outage mitigation project (\$89 million); and
- BC Hydro – Various Sites - EV charging infrastructure implementation program (\$73 million).

Financing Capital Spending

Provincial capital infrastructure spending is financed through a combination of sources:

- borrowing (debt financing);
- operating cash flows (i.e. cash derived from the operating surplus and management of operating accounts);
- partnerships with the private sector (public-private partnerships or P3s); and
- cost-sharing with partners.

Chart 2.6 shows that 76 per cent of 2024/25 taxpayer-supported capital spending was financed from direct net borrowing, 11 per cent from operating cash flows, seven per cent from federal contributions, and six per cent from other contributions.

Self-supported commercial Crown and agency capital spending of \$4.4 billion was financed 62 per cent from direct net borrowing (\$2.7 billion), and 38 per cent from operating cash flows (\$1.7 billion).

Chart 2.6 Financing Taxpayer-Supported Capital Spending

Total taxpayer-supported capital spending: \$10.4 billion

Total power generation and transmission		16,181	4,649	20,830	20,519	-	107	204	
Other self-supported									
ICBC Head Office Relocation	2028	-	162	162	162	-	-	-	-
Total self-supported		16,181	4,811	20,992	20,681	-	107	204	
Total projects over \$50 million		37,221	43,280	80,501	69,067	303	4,178	6,953	

¹ Only projects that receive provincial funding and have been approved by Treasury Board and/or Crown corporation boards are included in this table. Ministry service plans may highlight projects that still require final approval. Capital costs reflect current government accounting policy.

² Assets have been put into service and only trailing costs remain.

³ The Seismic Mitigation Program consists of spending to date on Phase 2 of the program and may include spending on projects greater than \$50 million included in the table.

⁴ Project is delivered in two segments, the Chase Creek Road to Chase West reached substantial completion in 2023 and the Chase West to Chase Creek Bridge is expected to complete in 2025.

⁵ Project is delivered in two segments, the Salmon Arm West 1st Ave to 10th Ave reached substantial completion in 2023 and the Salmon Arm West 10th Ave to 10th St. is expected to complete in 2026.

⁶ The Broadway Subway Project forecast and value of costs incurred to date include the City of Vancouver in-kind contribution of land rights, in keeping with the approved project budget. Under current government accounting, purchased intangible assets are given accounting recognition, and contributed intangible assets, such as land use rights or licenses are not.

⁷ The Fraser River Tunnel is forecasted to open to the public in 2030 with the removal of the existing tunnel to follow.

⁸ The approved project cost estimate (June 2021) is \$16 billion, with an approved project in-service date of 2025. The first, second, third, and fourth generating units are in-service, in October 2024, December 2024, February 2025, and March 2025, respectively, with all four units ahead of their approved schedule in-service dates. The anticipated project cost and costs to date include capital costs, charges subject to regulatory deferral and certain operating expenditures.

Provincial Debt

As at March 31, 2025, total provincial debt was \$133.9 billion, an increase of \$26.4 billion over the fiscal year, amounting to 31.4 per cent of B.C.'s nominal GDP. Approximately 26 per cent of total debt is self-supported through the activities of commercial Crown corporations.

The taxpayer-supported debt-to-GDP ratio, a measure often used by investors and credit rating agencies to analyze a government's ability to manage its debt load, stood at 23.2 per cent. This is higher by 4.8 percentage points from 2023/24 and is 2.2 percentage points higher than forecast in *Budget 2024*. The taxpayer-supported debt-to-revenue ratio was 122.7 per cent, 10.9 percentage points higher than the *Budget 2024* forecast, and an increase of 24.8 percentage points from 2023/24.

Table 2.8 Provincial Debt Summary ¹

(\$ millions)	<i>Budget 2024</i>	Opening Balance Adjustment ²	Updated <i>Budget 2024</i>	Actual 2024/25	Actual 2023/24

Total provincial debt	123,267	3,679	126,946	133,877	107,462
Debt to GDP ratios:					
Taxpayer-supported debt	21.0%		21.9% ⁴	23.2%	18.4%
Total provincial debt	29.2%		30.1%	31.4%	26.2%

¹ Provincial debt is prepared in accordance with Generally Accepted Accounting Principles and presented consistent with the Debt Summary Report included in the Public Accounts. Debt is shown net of sinking funds and unamortized discounts, excludes accrued interest and foreign exchange adjustments, and includes non-guaranteed debt directly incurred by commercial Crown corporations and debt guaranteed by the Province.

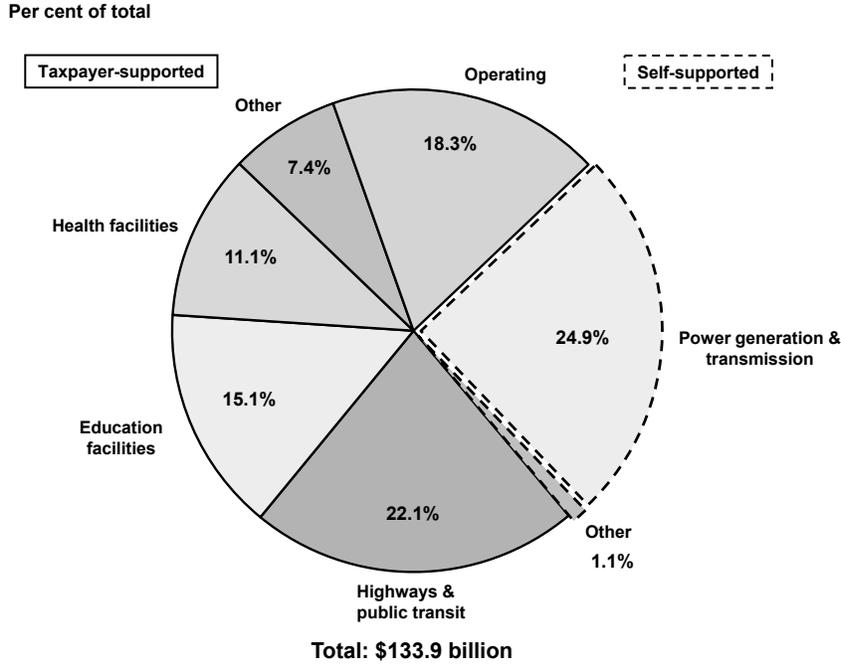

² The opening balance adjustment reflects actual balances at March 31, 2024 (the *Budget 2024* projection was based on a forecast for 2023/24).

³ Includes debt incurred by the government to fund the building of capital assets in the education, health, social housing and other sectors.

⁴ Revised to reflect Statistics Canada's Provincial Economic Accounts update released on November 7, 2024.

Taxpayer-supported debt includes provincial government borrowings for operating and capital needs, and borrowings by taxpayer-supported entities. The government issues capital grants to organizations for funding their infrastructure, including schools, post-secondary institutions, health facilities, and social housing. Taxpayer-supported entities' debt is mainly the debt of the BC Transportation Financing Authority that was incurred to fund highways and public transit projects.

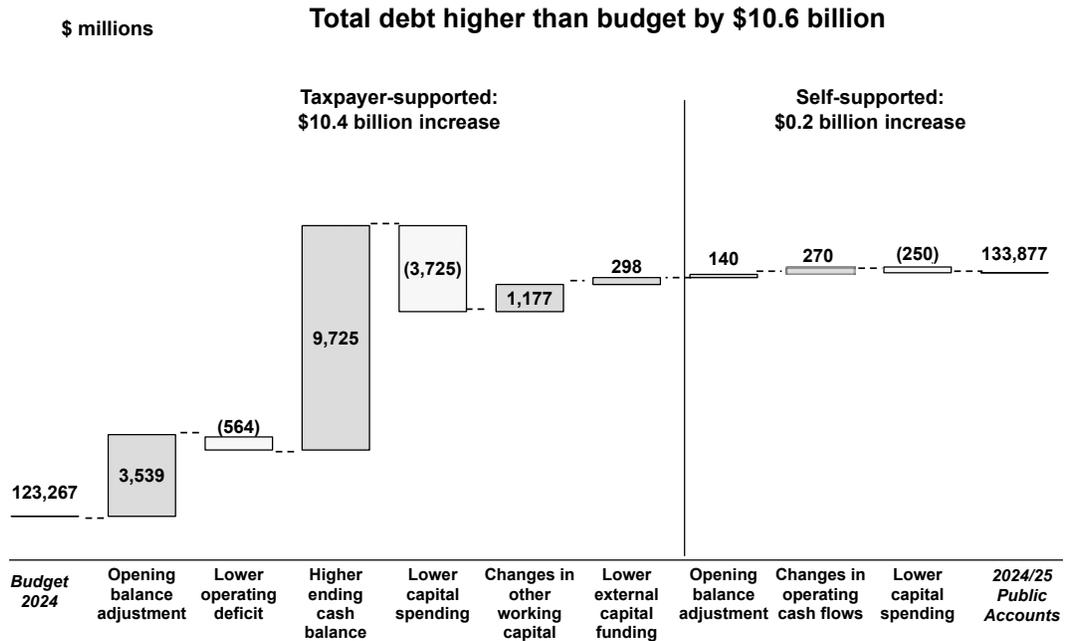

Chart 2.7 Total Provincial Debt by Sector

Self-supported debt includes power generation and transmission debt which is entirely commercial in nature and is predominantly the debt of BC Hydro. A portion of this debt reflects borrowing for the Columbia Basin power projects managed by Columbia Power Corporation and Columbia Basin Trust. Self-supported borrowing from the BC Lottery Corporation for gaming equipment and gaming management software, the debt of post-secondary institutions' commercial subsidiaries, and lease liabilities related to right-of-use assets are also included in this debt category.

Total provincial debt was higher by \$10.6 billion at year-end compared to *Budget 2024* (see Chart 2.8).

Chart 2.8 Change in Ending Debt Level from *Budget 2024*

This variance consists of:

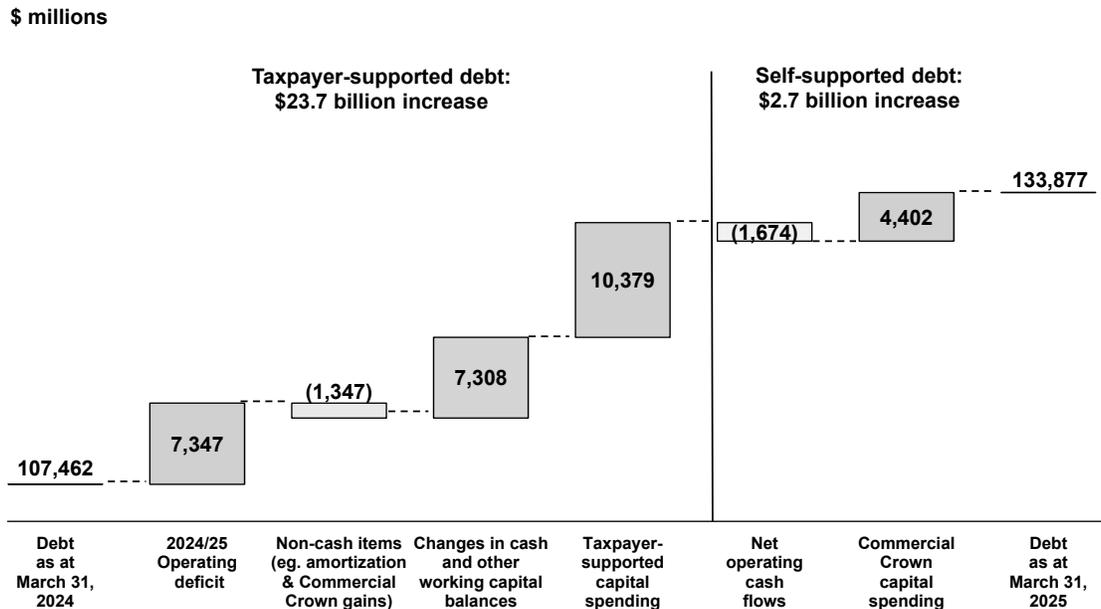

- \$10.4 billion higher taxpayer-supported debt, primarily due to \$3.5 billion higher opening balance from 2023/24, changes in other working capital balances and external capital funding of \$1.5 billion, and higher cash balances of \$9.7 billion as a result of timing of spending and pre-borrowing to meet operating and capital requirements in early 2025/26, offset by \$3.7 billion lower capital spending and \$0.6 billion improved operating deficit.
- \$160 million increase in self-supported debt due to changes in opening balance and operating cash flows, partly offset by lower capital spending.

Surplus/Deficit Versus Change In Debt

For the 2024/25 fiscal year, government posted a deficit of \$7.3 billion, which included net non-cash items of \$1.3 billion (primarily amortization and an adjustment for commercial Crown corporations net income and dividends). Working capital balances increased by \$7.3 billion, including higher cash balances at year end to ensure increased liquidity. Taxpayer-supported capital spending was \$10.4 billion. As a result, taxpayer-supported debt increased by \$23.7 billion during the fiscal year.

The \$2.7 billion increase in self-supported debt primarily reflects \$4.4 billion of capital spending mainly by BC Hydro, offset by \$1.7 billion in net operating cash flows.

Chart 2.9 Reconciliation of Surplus/Deficit to Change In Debt
Year over year increase in debt: \$26.4 billion

Debt Indicators

Table 2.9 provides a summary of financial indicators depicting the Province's debt position, recent borrowing trends and related interest cost burden.

Further details on provincial debt are provided in Appendix Tables A2.10 to A2.12.

Table 2.9 Key Debt Indicators¹

	<i>Budget 2024</i>	<i>Actual 2024/25</i>	<i>Actual 2023/24</i>
Debt-to-revenue (per cent)			
Total provincial	125.6	134.8	113.4

Total provincial	4.3	4.6	3.8
Taxpayer-supported	3.8	4.1	3.2
Interest costs (\$ millions)			
Total provincial	4,264	4,600	3,647
Taxpayer-supported	3,000	3,278	2,444
Interest rate (per cent) ⁵			
Taxpayer-supported	3.7	3.8	3.6
Revenue Factor for Key Indicators (\$ millions)			
Total provincial ⁶	98,110	99,315	94,769
Taxpayer-supported ⁷	79,253	80,729	77,043
Total debt (\$ millions)			
Total provincial	123,267	133,877	107,462
Taxpayer-supported ⁸	88,639	99,089	75,402
Provincial GDP (\$ millions) ⁹	421,449	426,791	409,881
Population (thousands at July 1) ¹⁰	5,674	5,698	5,532

¹ Figures for prior year have been restated to conform with the presentation used for 2024/25 and to include the effects of changes in underlying data and statistics.

² The ratio of debt to population (e.g. debt at March 31, 2025 divided by population at July 1, 2024).

³ The ratio of debt outstanding at fiscal year end to provincial nominal gross domestic product (GDP) for the calendar year ending in the fiscal year (e.g. debt at March 31, 2025 divided by 2024 GDP).

⁴ The ratio of interest costs (less sinking fund interest) to revenue. Figures include capitalized interest expense in order to provide a more comparable measure to outstanding debt.

⁵ Weighted average of all outstanding debt issues.

⁶ Includes revenue less earnings related to enterprises (sinking fund earnings, loan interest and net earnings), plus revenue of all enterprises.

⁷ Excludes revenues of commercial Crown corporations, but includes dividends paid to the Consolidated Revenue Fund.

⁸ Excludes debt of commercial Crown corporations.

⁹ Nominal GDP for the calendar year ending in the fiscal year (e.g. GDP for 2024 is used for the fiscal year ended March 31, 2025). As nominal GDP for the calendar year ending in 2024 is not available, the 2024 GDP projected in the March 2025 budget has been used for the fiscal year ended March 31, 2025.

¹⁰ Population at July 1st within the fiscal year (e.g. population at July 1, 2024 is used for the fiscal year ended March 31, 2025).

Credit Rating

A credit rating is an evaluation of the credit risk of a prospective borrower, predicting their ability to pay interest and to repay the debt principal. It impacts the borrower's debt servicing costs and the investor's rate of return since an investor will demand a higher interest rate on a higher-risk, lower-rated security. Table 2.10 provides an interprovincial comparison of credit ratings.

As of July 2025, B.C. has a Aa1 rating from Moody's, A+ rating from Standard & Poor's, and AA (High) rating from DBRS.

Table 2.10 Interprovincial Comparison of Credit Ratings, July 2025

Province	Rating Agency ¹		
	Moody's Investors Service	Standard & Poor's	DBRS
British Columbia	Aa1	A+	AA(High)
Saskatchewan	Aa1	AA	AA (Low)
Alberta	Aa2	AA-	AA
Manitoba	Aa2	A+	A (High)
Quebec	Aa2	A+	AA (Low)
Ontario	Aa3	AA-	AA
Nova Scotia	Aa2	AA-	A (High)
New Brunswick	Aa1	A+	A (High)
Prince Edward Island	Aa2	A	A
Newfoundland/Labrador	A1	A	A

¹ The rating agencies assign letter ratings to borrowers. The major categories, in descending order of credit quality are: AAA/Aaa; AA/Aa; A; BBB/Baa; BB/Ba; and B. The "1", "2", "3", "high", "low", "+", and "-" modifiers show relative standing within the major categories. For example, AA+ exceeds AA and Aa2 exceeds Aa3.

Pension Plans

The province contributes to four defined benefit pension plans (Public Service, Municipal, Teachers' and College) for many of its employees. These pension plans are managed under joint trusteeship arrangements with the plan members. Under joint trusteeship, the provincial government has no formal claim on plan surpluses or assets; however, government is responsible for 50 per cent of any unfunded liabilities in the Public Service, Teachers' and College plans, and 35 per cent of any unfunded liability in the Municipal plan since the province's interest in that plan is only 70 per cent.

As a result, government's balance sheet will only include its share of any unfunded pension liabilities incurred by the four pension plans, as well as the entire liability for the MLA Superannuation Account, which is not part of a joint trusteeship arrangement, if any. As at March 31, 2025, all pension plans under joint trusteeship were fully funded and, as a result, government does not have any pension liabilities.

In the event that a plan is determined to be in a deficit position, the pension boards, by agreement, are required to address the deficit through contribution adjustments or other measures. As a result, it is expected that any unfunded pension liability in the future would be short-term in nature.

The pension valuations do not include future indexing of pensions, as this is a non-guaranteed supplemental benefit to the plans that is determined by the amount of available assets in separate inflation accounts. The estimated financial positions of each plan (based on extrapolations of the most recent actuarial valuations) as at March 31, 2025 are shown in Table 2.11.

Table 2.11 Pension Plan Balances

(\$ millions)	Pension Plan					Total	
	Public Service	Municipal	Teachers	College	Other ¹	2024/25	2023/24
Accrued benefit obligation	(29,268)	(41,895)	(27,802)	(6,020)	(901)	(105,886)	(99,538)
Pension fund assets	36,991	49,530	35,202	6,549	1,100	129,372	118,667
Subtotal	7,723	7,635	7,400	529	199	23,486	19,129
Unamortized actuarial (gain) loss	(3,478)	(2,697)	(5,213)	(16)	(27)	(11,431)	(9,386)
Accrued net asset (obligation)	4,245	4,938	2,187	513	172	12,055	9,743

¹ Represents other defined benefit plans, outside of the four main pension plans, which are funded by entities within the government reporting entity. Includes Simon Fraser University's Academic Pension Plan and Administrative/Union Pension Plan, the University of Victoria's pension plan for employees other than faculty and professional staff, and the province's 14.67% interest in the Canadian Blood Services pension plan.

Actuarial valuations are performed on the pension plans every three years with the resulting reports released nine months after the valuation date. The pension plans and the dates of their last actuarial valuation are:

- Public Service Pension Plan, March 31, 2023;
- Municipal Pension Plan, December 31, 2021;
- Teachers' Pension Plan, December 31, 2023; and
- College Pension Plan, August 31, 2024.

Key actuarial assumptions used for valuation purposes include a long-term annual rate of return on fund assets (currently 6.00 per cent for the Public Service Pension Plan, College Pension Plan and the Municipal Pension Plan and 5.75 per cent for the Teachers' Pension Plan) and the rate of annual salary increases (currently at 3.25 per cent).

The pension plans are administered by the BC Pension Corporation in accordance with direction received from the various pension boards. The audited financial statements of each pension plan, along with full descriptions, benefit formulas, inflation assumptions and funding policies may be found on the corporation's website at www.pensionsbc.ca.

Contractual Rights

Contractual rights represent the annual nominal future cash receipts for multi-year contracts. As at March 31, 2025, taxpayer-supported entities have \$8.9 billion in contractual rights, and self-supported Crown corporations and subsidiaries have \$5.5 billion in contractual rights, for a total of \$14.4 billion in contract receipts over the future years, depending on the terms of the contract. In addition, taxpayer-supported entities have \$11.0 billion in multi-year government transfer agreements that may be authorized by the federal government in the future.

Contractual rights represent future receipts where the projected revenue has been quantified in an agreement. They are not off-balance sheet assets, nor are they deferred revenues.

Contractual Obligations

Contractual obligations represent the annual nominal future cash payments for multi-year contracts for the delivery of services and construction of assets — except in the case of P3 contracts, where the obligations related to construction of assets are recognized as liabilities as the assets are constructed.

As at March 31, 2025, taxpayer-supported entities have incurred \$46.1 billion in contractual obligations, and self-supported Crown corporations and subsidiaries have incurred \$64.6 billion in contractual obligations, for a total of \$110.7 billion in contract payments that will be made over the future years, depending on the terms of the contract.

Contractual obligations represent ongoing program costs where the projected expense has been quantified in an agreement. They are not off-balance sheet debt, nor are they unfunded costs. Rather, these annual costs have been incorporated into the overall program budgets of the contracting ministries and other entities similar to other future-oriented government program costs such as legislated entitlements and capital asset amortization. In the case of self-supported Crown corporations and subsidiaries, the payments will be made from future revenue streams.

The 2024/25 *Public Accounts* Contractual Obligations schedule presents a detailed listing of obligations by function. Taxpayer-supported contractual obligations can also be grouped into six categories (see Table 2.12) as follows:

- Coastal ferry services agreement – annual operating subsidy provided by the Ministry of Transportation and Transit to BC Ferry Services Inc. in support of its smaller routes.
- Capital construction and maintenance P3s – reflect the annual service payments that will be made to maintain the asset and retire the liabilities.
- Program delivery agreements – annual operating cost of agreements with third-party entities that provide services to the public on behalf of government, such as care homes. Some agreements are for one year only.
- Operating and maintenance agreements – annual operating cost of agreements with third-party entities that operate and maintain government infrastructure on behalf of government. A majority of these agreements relate to health sector facilities.
- Service delivery agreements – annual operating cost of agreements with third-party entities that provide services directly to government, such as the Telecommunications Service Master Agreement with Telus.
- Capital and economic development agreements – annual cost of agreements to build infrastructure, such as health authorities, school districts, universities, and the BC Transportation Financing Authority’s commitments for future projects.

In addition to the contractual obligations, taxpayer-supported entities have \$15.5 billion in multiple-year government transfer agreements that may be authorized by government in the future, although there is no current obligation for these government transfers.

Table 2.12 Taxpayer-Supported Contractual Obligations

(\$ millions)	2025/26	2026/27	2027/28	2028/29	2029/30	2030/31+	Total
Coastal ferry services agreement	253	253	253	253	253	8,341	9,606
Capital construction and maintenance P3s	585	364	275	203	250	2,430	4,107
Program delivery agreements	2,726	519	452	275	218	2,124	6,314
Operating and maintenance agreements	1,578	1,127	938	709	664	1,163	6,179
Service delivery agreements	1,196	1,216	1,180	1,100	518	1,183	6,393
Capital and economic development agreements	<u>6,780</u>	<u>3,704</u>	<u>1,725</u>	<u>673</u>	<u>197</u>	<u>452</u>	<u>13,531</u>
	<u>13,118</u>	<u>7,183</u>	<u>4,823</u>	<u>3,213</u>	<u>2,100</u>	<u>15,693</u>	<u>46,130</u>

Of the total \$64.6 billion contractual obligations for self-supported Crown corporations and subsidiaries, 94.9 per cent or \$61.4 billion is for BC Hydro's power purchase agreements with independent power producers (IPPs). This ongoing cost of energy is factored into BC Hydro's financial statement projections in the fiscal plan, although any contractual increases to the tariffs paid to the IPPs will have to be recovered from future electricity rate increases.

The remaining contractual obligations for self-supported Crown corporations and subsidiaries relate to maintenance and service agreements, whose costs also are factored into government fiscal plan projections.

2024/25 *Public Accounts* Audit Qualification

The Audit Opinion on the 2024/25 *Public Accounts* includes the following three qualifications.

Deferral of Revenues

The Auditor General recommends reporting restricted contributions as revenue in the period the transfers are received, unless the transfer establishes a financial liability on the part of the recipient. In accordance with accounting standards and Treasury Board regulations, the government has maintained its longstanding recognition of deferring restricted contributions and recognizing revenue in the same period that programs and services are provided to the public. The impact of the Auditor General's recommendation in the current year would be to increase revenue by \$9.85 billion and decrease the deficit and liabilities by \$9.85 billion.

Incomplete Contractual Obligations Disclosure

Contractual obligations that commit Government to make certain expenditures, for a considerable period into the future, are required to be disclosed in the financial statements. In the Auditor General's opinion, the summary financial statements do not provide the required disclosures in relation to certain contracts, such as contracts below the \$50 million threshold and for payments not under contract for the First Nations Gaming Revenue Sharing Arrangement. The Auditor General's recommendation would increase the disclosure of contractual obligations by \$6.733 billion.

Tobacco Settlement Accounting Treatment

Government has been engaged in litigation against tobacco companies to recover the costs incurred for tobacco-related diseases. In March 2025, Plans of Compromise and Arrangement (the Plans) were agreed to by all parties and approved by the Ontario Superior Court of Justice. The Auditor General recommends recognizing the asset and revenue in 2024/25 because the Plans can no longer be appealed. The auditor has not quantified the amount to be recognized. Government has disclosed the tobacco litigation as a contingent asset because there are outstanding conditions before the Plans can become binding. Once the conditions are satisfied and the Plans have been implemented, the Government will recognize the asset and revenue based on the best information known at that time. The Province's share of the settlement is estimated at \$3.578 billion to be paid over approximately 20 years.

The full text of the Auditor General's opinion and the comments of the Comptroller General of British Columbia can be found in the 2024/25 *Public Accounts*.

PART 3

SUPPLEMENTARY INFORMATION

- General Description of the Province
- Constitutional Framework
- Provincial Government
- Annual Financial Cycle
- Government's Financial Statements
- Provincial Taxes

General Description of the Province

British Columbia is located on Canada's Pacific coast, and has a land and freshwater area of 95 million hectares. It is Canada's third largest province and comprises 9.5 per cent of the country's total land area.

Geography

The province is nearly four times the size of Great Britain, 2.5 times larger than Japan and larger than any American state except Alaska. B.C.'s 7,022-kilometre coastline supports a large shipping industry through ice-free, deep-water ports. The province has about 8.5 million hectares of grazing land, 1.8 million hectares of lakes and rivers, and 950,000 hectares of agricultural land that is capable of supporting a wide range of crops.

Physiography

B.C. is characterized by mountainous topography, but also has substantial areas of lowland and plateau country. The province has four basic regions, a northwesterly trending mountain system on the coast, a similar mountain system on the east, and an extensive area of plateau country between the two. The northeastern corner of the province is lowland, a segment of the continent's Great Plains.

The western system of mountains averages about 300 kilometres in width and extends along the entire B.C. coast and the Alaska panhandle. The Coast Mountains contain some of the tallest peaks in the province. The western system includes the Insular Mountains that form the basis of Vancouver Island and Haida Gwaii (previously known as the Queen Charlotte Islands). These islands help to shelter the waters off the mainland coast of B.C., which form an important transportation route for people and products.

The Interior of the province is a plateau of rolling forest and grassland, 600 to 1,200 metres in average elevation, incised deeply by rivers. North of Prince George the interior becomes mountainous, but plateau terrain returns just south of the Yukon boundary in the area drained by the Liard River. The southern Interior's water system is dominated by the Fraser River, which has a drainage area covering about one-quarter of the province. The Rocky Mountains, in the eastern mountain system, rise abruptly on the southern B.C.-Alberta boundary and are cut by passes that provide dramatic overland transportation routes into the province. The Rocky Mountain Trench lies immediately to the west of the Rockies. This extensive valley, the longest in North America, is a geological fault zone separating different earth plates. It is the source of many of B.C.'s major rivers, including the Peace, Columbia and Fraser.

Climate and Vegetation

Coastal B.C. has abundant rainfall and mild temperatures associated with a maritime climate. The Pacific coast has an average annual rainfall of between 155 and 440 centimetres, while the more sheltered coasts of eastern Vancouver Island and the mainland along the Strait of Georgia average between 65 and 150 centimetres. Canada's longest frost-free periods of over 180 days per year are enjoyed along the edges of the coastal zone and inland along the Fraser River valley. Temperatures fall quickly up the steep slopes of the Coast Mountains. The predominant trees in this coastal region are the western hemlock, western red cedar and balsam in the wetter parts, and Douglas fir and grand fir in the drier areas.

B.C.'s Interior region has a mainly continental type of climate, although not as severe as that of the Canadian Prairies. Considerable variation in climate occurs, especially in winter and across the Coast Mountains, as mild Pacific storms bring relief from cold spells. The southern Interior has the driest and warmest climate of the province. In the valleys, annual precipitation ranges from less than 30 centimetres to 50 centimetres, while daily temperatures can average over 20°C in July and just under freezing in January. The climate becomes more extreme further north and precipitation increases. The frost-free period in the North is short and variable. Spruce and lodgepole pine are the dominant trees of commercial value in the Interior.

The northeast region of the province is an extension of the western prairie region of Alberta. It has a continental climate that is more extreme than that of the northern interior region. However, it does have long hot summers and a frost-free period long enough to grow grain, forage and other crops.

Population

B.C. is the third largest province in terms of population, which was estimated at 5.698 million people, accounting for 13.8 per cent of Canada's population on July 1, 2024. B.C.'s population grew at an average annual rate of 1.9 per cent between 2014 and 2024, faster than the growth rate of the overall Canadian population for the same period.

The Vancouver census metropolitan area, a major Canadian shipping, manufacturing and services centre, had the largest urban population in B.C. with nearly 3.109 million people in 2024. Meanwhile, the census metropolitan area for Victoria, the provincial capital, had a population of 441 thousand people in 2024.

Constitutional Framework

The structure of the British Columbia government is based on British parliamentary tradition and precedent. Prior to 1866, B.C. was composed of two British-controlled colonies — the Colony of Vancouver Island was established in 1849, and the Colony of British Columbia was established in 1858 on the mainland. In the *Union Proclamation* of 1866, the two colonies were joined to form the single united Crown Colony of British Columbia. On July 20, 1871, B.C. entered into Confederation with Canada. Although the Colony of Vancouver Island had a parliamentary form of government as far back as 1856, the first fully elected government was not instituted in B.C. until the autumn after Confederation with Canada. Responsible government was achieved in late 1872, when the lieutenant governor acquiesced to an executive council that was responsible to the legislative assembly.

Upon entering Confederation, B.C. came under the authority of the *British North America Act, 1867 (BNA Act)*, a statute of the British parliament. Until 1982, the *BNA Act* defined the major national institutions and established the division of authority between the federal and provincial governments. In 1982, the British Parliament ended its legal right to legislate for Canada with the passage of the *Canada Act, 1982* and its companion legislation, the *Constitution Act, 1982*, which also includes the Canadian Charter of Rights and Freedoms. The *BNA Act* was renamed the *Constitution Act, 1867*, which continues to be the foundation for the division of legislative powers between Canada, as a federal state, and provincial governments.

Indigenous Peoples

British Columbia is home to more than 290,000 Indigenous peoples¹, representing one in six Indigenous people in Canada. There are more than 200 First Nations in B.C. (of 600 in Canada), and they represent 35 distinct languages. At more than 98,000, the Métis population in B.C. is the third-largest in Canada.

Each Indigenous community has a unique history and experience and different ways of life, social organization, governance systems, and approaches to economic development.

As the original occupants of the land, Indigenous peoples have a special constitutional relationship with the Crown. This relationship, including existing Aboriginal² and treaty rights, is recognized and affirmed in section 35 of the *Constitution Act, 1982*, and includes recognizing that Indigenous self-government is part of Canada's evolving system of cooperative federalism and distinct orders of government.

Provincial Government

B.C.'s government is modeled after the British system. Functionally there are three main branches: the legislature, the executive and the judiciary.

Legislature

Legislative powers in British Columbia are exercised by a single legislative chamber, which is elected for a term of four years. B.C. was the first jurisdiction in Canada to establish set general election dates, in 2001. Provincial general elections are scheduled to take place on the third Saturday in October every four years.

The legislature consists of the lieutenant governor and 93 elected members of the legislative assembly. The legislative assembly represents the people of B.C. in the conduct of the province's affairs. The assembly is required by law to meet at least once a year with a normal session lasting several months. However, special sessions can last just a few days or many months, depending on the nature of the government's business.

The legislature operates on a fixed schedule — the second Tuesday in February each year is usually reserved for the Throne Speech and the fourth Tuesday in February each year is reserved for the Budget Speech. In an election year, the Throne Speech and Budget Speech may occur on or before April 30th of the following year.

Executive

The executive is composed of the lieutenant governor and the executive council. The executive council, or cabinet, is headed by the premier and is composed of selected members of the ruling party. The lieutenant governor, the King's representative in British Columbia, holds a largely ceremonial place in the modern provincial government. By constitutional custom, the lieutenant governor is appointed by the Governor General of Canada for a term usually lasting five years.

Following a general election, the lieutenant governor calls upon the leader of the political party with the majority of elected members to serve as premier and to form the provincial government.

¹ The term 'Indigenous' includes all people of Indigenous ancestry, including First Nations (status and non-status), Métis and Inuit.

² The federal *Constitution Act, 1982*, and provincial *Declaration on the Rights of Indigenous Peoples Act* define the term 'Indigenous peoples' to include First Nations, Métis and Inuit Peoples in Canada.

Where the general election does not result in a single political party having the majority of elected members, a minority government may be formed by the party that is able to form a coalition or enter into a confidence and supply agreement with another party, to ensure it has the majority required for all confidence motions and budgetary legislation.

The lieutenant governor, on the advice of the premier, appoints members of the executive council and is guided by the executive council's advice as long as it holds the confidence of the legislative assembly.

The lieutenant governor, on recommendation of the premier, convenes, prorogues and dissolves the legislative assembly and gives Royal Assent to all measures and bills passed by the assembly before they become law.

Ministers are the executives responsible for government ministries, and are usually members of cabinet. Cabinet determines government policy and is held responsible by the legislative assembly for the operation of the provincial government.

Deputy ministers are the senior civil servants in their ministries and have responsibility for all operational matters including budget, human resources and program development. Deputy ministers are required to manage a complex set of multiple accountabilities which arise out of various powers, authorities and responsibilities attached to the position. The deputy minister is the principal source of support for a minister in fulfilling minister's collective and individual responsibilities and accountability. In providing this support, the deputy minister is responsible for:

- sound public service advice on policy development and implementation, both within the minister's portfolio and with respect to the government's overall policy and legislative agenda;
- effective ministry management, as well as advice on management of the minister's entire portfolio; and
- fulfillment of authorities that have been assigned to the deputy minister or other officials either by the minister directly or by virtue of legislation.

Judiciary

The judiciary performs functions that are central to the orderly operation of society. Judges hear and give judgment in criminal prosecutions and in actions arising from disputes between private citizens or between the government and private citizens. Judges apply both judge-made law, known as "common law," and laws made by the Parliament of Canada and provincial legislatures. The judiciary is sometimes called on to determine whether laws passed by governments conform to the values expressed in the Canadian Charter of Rights and Freedoms.

B.C.'s judicial system is made up of the Provincial Court of British Columbia, the Supreme Court of British Columbia and the Court of Appeal of British Columbia. The Provincial Court hears cases that fall into five main categories: criminal cases, family cases, youth court cases, small claims, and traffic & bylaw cases. The provincial government appoints Provincial Court judges, and the federal government appoints Court of Appeal and Supreme Court judges.

The federal judicial system includes the Tax Court of Canada, the Federal Court of Canada (Appeals division and Trial division) and the Supreme Court of Canada. The Federal Court of Canada hears cases in limited areas of exclusively federal jurisdiction — for example, reviewing decisions made by federal tribunals such as the Canada Labour Relations Board. The Supreme Court of Canada is the court of final resort and hears selected appeals from the Federal Court of Appeal and provincial Courts of Appeal.

Provincial Government Jurisdiction

Under Canada’s constitutional framework, B.C. has ownership and jurisdiction over natural resources and is responsible for education, health and social services, municipal institutions, property and civil rights, the administration of justice and other matters of purely provincial or local concern.

Annual Financial Cycle

British Columbia’s *Budget Transparency and Accountability Act* (BTAA) outlines the Province’s reporting requirements during the financial cycle and imposes specific reporting deadlines or release dates for these publications. In particular, fixed dates for presentation of the budget, as well as dates for quarterly and annual reports, are set by law.

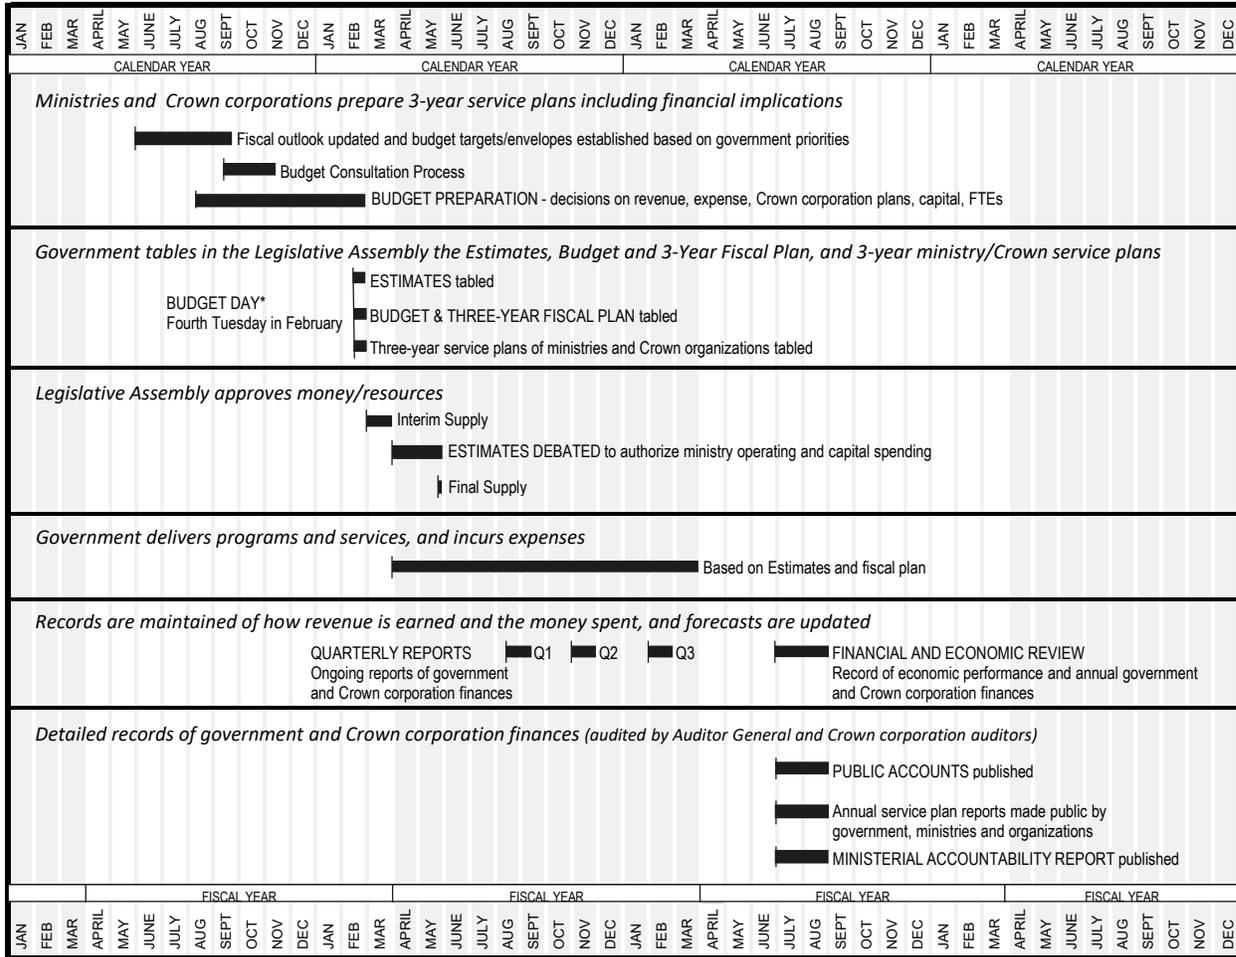

Under the BTAA, the provincial government focuses its budgeting and reporting on a summary accounts basis. The BTAA requirements include reporting on the advice of the Economic Forecast Council; presentation of the annual *Estimates, Budget and Fiscal Plan, Quarterly Reports*, and *Public Accounts*; publication of *Quarterly Reports* with revised forecasts; annual three-year service plans and service plan reports for each ministry and government organization; and an annual three-year government strategic plan and report.

Chart 3.1 summarizes the annual financial process of the Province. This process consists of four main stages.

Planning and Budget Preparation

Treasury Board, a committee of the executive council, reviews longer-term estimates of revenue, expense, capital and debt, and establishes a preliminary fiscal plan within the framework of the government’s overall strategic plan. Ministries, service delivery agencies, and Crown corporations prepare three-year service plans, including performance measures and targets, and operating and capital budgets, for review by government. Treasury Board makes budget allocations for ministries and agencies, and assesses commercial Crown corporation net income benchmarks, within the context of the fiscal plan. Included as inputs into this process are a consultation paper published by September 15th that invites public comment on issues for consideration as government develops its fiscal and service plans, and provincewide public hearings held by a committee of the legislature. A report outlining the results of the budget consultation process is made public by November 15th of each year.

Chart 3.1 Financial Planning and Reporting Cycle Overview

*In an election year the budget day may be delayed, in accordance with the *Budget Transparency and Accountability Act*.

Implementation and Reporting

The government’s revenue, expense and capital plans for the next three fiscal years, as well as other information on the government’s finances, are presented to the legislative assembly by the Minister of Finance in a budget document called the *Budget and Fiscal Plan*. The financial plan for the next fiscal year is also included in the document called the *Estimates*, which describes the individual appropriations to be voted on by the legislative assembly. Government’s strategic plan, service plans, and a report on major capital projects (those where the government contribution exceeds \$50 million) must also be tabled in the legislature. Throughout the year, the authorized funding as specified in the *Estimates* and ministry service plans is spent on programs and services. Crown corporations follow approved service plans under the direction of their own boards of directors. *Quarterly Reports*, including full-year forecasts, are published by legislated dates, thereby providing regular updates to the public on the government’s finances.

Evaluation

At the end of the fiscal year, the *Public Accounts* are prepared by the Office of the Comptroller General and examined by the Office of the Auditor General to ensure that the financial statements fairly present the government's financial position. The *Public Accounts* are augmented by the *British Columbia Financial and Economic Review*, which provides an overview of annual and historical financial and economic results. In addition, annual service plan reports are made public that compare actual results with ministry and Crown corporation performance targets.

Accountability

The *Public Accounts* are presented to the legislative assembly and are reviewed by two committees of the legislative assembly (the Select Standing Committee on Public Accounts, and the Select Standing Committee on Crown Corporations). At the same time, the *Ministerial Accountability Report* is published detailing the individual financial performance of cabinet ministers, and the performance achieved by the Ministers of State on non-financial targets.

Government's Financial Statements

Government Reporting Entity

The provincial government conducts its activities through:

- ministries;
- the SUCH sector (school districts, universities, colleges, institutes, and health organizations);
- other taxpayer-supported service delivery agencies; and
- commercial Crown corporations.

The accounts relating to the ministries and other direct activities of government are contained in the Consolidated Revenue Fund (CRF), whose financial results are reported as a separate entity in the Public Accounts. The CRF comprises all money over which the legislature has direct power of appropriation. The operations of public sector organizations, including the SUCH sector entities, service delivery agencies, and Crown corporations, are recorded in their own financial statements, which are subject to audit by the Auditor General or by private-sector auditors.

The relationships between the legislature and government's public sector organizations are guided by legislation, governance agreements, and/or mandate letters to ensure effective oversight, alignment with government's priorities, and preservation of public confidence in the management of public-sector programs and services for the citizens of British Columbia.

The Province consolidates the financial results of all these entities into a single set of financial statements, published annually in the *Public Accounts*.

Compliance with GAAP

British Columbia's *Budget Transparency and Accountability Act* (BTAA) requires government's financial statements to conform to generally accepted accounting principles (GAAP) for senior governments in Canada. In practice this means compliance with the Public Sector Accounting Standards (PSAS), which are set by the Canadian Public Sector Accounting Board (PSAB).

Under PSAS, service delivery agencies are consolidated with the CRF on a line-by-line basis. Commercial Crown corporations³ (government business enterprises) and commercial subsidiaries owned by service delivery agencies are consolidated on a modified equity basis — i.e. their net income is reported as revenue of the Province and their retained earnings as an investment.

Where the accounting policies of service delivery agencies differ from those used by the central government, the service delivery agency financial statements are adjusted to conform to government's accounting policies. No adjustments for accounting differences are made for commercial Crown corporations, which prepare their statements in accordance with International Financial Reporting Standards (IFRS).

The BTAA authorizes Treasury Board to adopt different standards than those promoted by PSAB in order to ensure that British Columbia's financial reporting reflects the policy framework within which the Crown corporations and agencies operate. Any alternative standard adopted by Treasury Board must come from other areas of Canadian GAAP or from a recognized standard setting body in another jurisdiction (e.g. the US Financial Accounting Standards Board). Treasury Board has issued one such regulation, mandating BC Hydro to follow the US FASB standard for rate-regulated accounting.

The full text of government's significant accounting policies can be found in Note 1 to the Consolidated Summary Financial Statements in the 2024/25 *Public Accounts*.

³ Crown corporations are considered commercial if the majority of their operating revenue comes from non-government sources, and their operating revenue is sufficient to cover operating and debt service costs without the need for government grants or other forms of assistance. Otherwise they are included with the service delivery agencies.

Table 3.1 Provincial Taxes (as of July 2025)

Type and Statute Reference	Tax Base	Tax Rate	Characteristics and Exemptions
Income — <i>Income Tax Act</i>	Taxable Income: <ul style="list-style-type: none"> Corporate Personal 	<p>General rate: 12% Small business rate: 2%.</p> <p>Tax rates of 5.06%, 7.70%, 10.50%, 12.29%, 14.70%, 16.80% and 20.50% corresponding to the following tax brackets:</p> <p>\$0 to \$49,279 \$49,279.01 to \$98,560 \$98,560.01 to \$113,158 \$113,158.01 to \$137,407 \$137,407.01 to \$186,306 \$186,306.01 to \$259,829 Over \$259,829</p>	<p>The Canada Revenue Agency administers B.C.'s personal and corporate income taxes under the Tax Collection Agreement between the province and the federal government.</p> <p>Corporate tax credits include the BC scientific research and experimental development tax credit, the book publishing tax credit, the interactive digital media tax credit and the film and television tax credits. In addition, the clean buildings tax credit, farmers' food donation tax credit, mining exploration tax credit, logging tax credit, training tax credits and small business venture capital tax credits are available to both individuals and corporations.</p> <p>B.C. provides a set of non-refundable credits similar to most federal non-refundable credits.</p> <p>Refundable personal tax credits include the renter's tax credit, the sales tax credit, the BC Family Benefit (previously known as the BC Child Opportunity Benefit) and other credits available to individuals who meet specific eligibility criteria.</p>
Payroll — <i>Employer Health Tax Act</i>	B.C. remuneration	<p>1.95%.</p> <p>Rate is phased in if annual B.C. remuneration is between \$1 million and \$1.5 million.</p> <p>Tax does not apply if B.C. remuneration is less than \$1 million.</p>	<p>Employers with annual B.C. remuneration less than \$1 million are exempt from the tax. The exemption amount is shared by all associated employers.</p> <p>The tax is phased in for employers with annual B.C. remuneration between \$1 million and \$1.5 million.</p> <p>Special rules exist for charities and non-profits. Charities and non-profits receive an exemption of \$1.5 million per qualifying location. Charities and non-profits with B.C. remuneration between \$1.5 million and \$4.5 million per qualifying location pay a reduced rate. Employers associated with charities and non-profits do not have to share the exemption with the charity.</p>
Real property transfers — <i>Property Transfer Tax Act</i>	Fair market value of property based on the percentage of interest in the property.	<p>1% on the first \$200,000 of the fair market value transferred, 2% of the fair market value that exceeds \$200,000 but does not exceed \$2,000,000 and 3% of the fair market value that exceeds \$2,000,000.</p> <p>For residential class property and farm land associated with a farmers' dwelling, the 3% rate becomes 5% for the fair market value above \$3,000,000.</p> <p>Foreign nationals and foreign corporations purchasing residential class property in certain areas pay an additional 20% of fair market value. These areas are Metro Vancouver Regional District except Tsawwassen Lands, and Capital, Central Okanagan, Fraser Valley and Nanaimo Regional Districts.</p>	<p>Eligible first time home-buyers who purchase a home with a fair market value up to \$835,000 are exempt from tax on the first \$500,000 of the property's value. Similarly, eligible purchasers of newly constructed homes are fully exempt from tax if the fair market value is \$1,100,000 or less.</p> <p>Other exemptions include: qualifying purpose-built rental buildings, some intergenerational transfers or transfers to a spouse of principal residences, recreational residences and family farms; transfers of property between spouses pursuant to written separation agreements or court orders; transfers of property to local governments, registered charities and educational institutions; transfers of property to veterans under the <i>Veterans' Land Act</i> (Canada); transfers of land to be protected, preserved, conserved or kept in a natural state; and transfers of leases 30 years or less in duration. A number of technical exemptions are also provided.</p> <p>Foreign nationals who become citizens or permanent residents of Canada within a year of purchase may be eligible for a refund of the additional 20% tax.</p> <p>Foreign nationals who are in the Provincial Nominee Program process for immigration to Canada may be exempt from the additional 20% tax.</p>

Table 3.1 Provincial Taxes (as of July 2025) – Continued

Type and Statute Reference	Tax Base	Tax Rate	Characteristics and Exemptions
Retail sales tax — <i>Provincial Sales Tax Act</i>	Purchase and lease of tangible personal property. Purchase of software, accommodation, related services, telecommunication services, online marketplace services, and legal services. Gifts of vehicles, boats, and aircraft.	General rate: 7% Liquor: 10% Vapour products: 20% Accommodation: 8% Vehicles: 7% to 20% Boats and aircraft: 7% or 12% Fossil fuel combustion systems: 12% Manufactured buildings: reduced rate of tax.	Paid by purchasers and lessees and primarily collected through businesses required to be registered under the Act. Major consumer exemptions include, but are not limited to: <ul style="list-style-type: none"> • food for human consumption (including prepared food, but not including soda beverages), • residential energy, • children’s clothing and footwear (child-sized clothing and adult-sized clothing for children under 15 years of age), • basic cable and residential land-line telephone services, and • vitamins, drugs, and household medical aids. Major business exemptions include, but are not limited to: <ul style="list-style-type: none"> • goods acquired solely for re-sale or re-lease, • goods purchased to be incorporated into goods for sale or lease, • certain production machinery and equipment purchased by major industries (manufacturers, logging, mining, oil and gas) for qualifying activities at qualifying locations, and • electricity.
Tobacco — <i>Tobacco Tax Act</i>	By cigarette, heated tobacco product, cigar retail price, and weight on other tobacco products.	32.5 cents per cigarette, tobacco stick, or heated tobacco product unit, and 65 cents per gram of loose tobacco; 90.5% of taxable price on cigars to a maximum tax of \$7 per cigar.	Tax is payable on tobacco by purchasers at the time of retail purchase. Tobacco is subject to a security scheme. Security is payable by wholesale dealers registered under the Act when tobacco is delivered to them.

Table 3.1 Provincial Taxes (as of July 2025) – Continued

Type and Statute Reference	Tax Base	Tax Rate	Characteristics and Exemptions
Motor fuel — <i>Motor Fuel Tax Act</i>	Purchase, use, or in certain circumstances, transfer or importation of fuels:		<p>Tax generally applies to all fuels purchased for use, or used in, internal combustion engines. Tax is payable on fuels by purchasers at the time of retail purchase. Most fuels are subject to a security scheme. Security is payable by collectors registered under the Act when fuel is sold in British Columbia for the first time after manufacture or importation. The additional tax collected in the South Coast BC Transportation Service Region, on behalf of TransLink, helps fund regional transportation costs. The additional tax collected in the Victoria Regional Transit Service Area, on behalf of BC Transit, helps fund the public transit system.</p>
	<ul style="list-style-type: none"> Clear gasoline 	<p>General rate: 14.5 cents per litre (includes 6.75 cents per litre collected on behalf of the BC Transportation Financing Authority).</p> <p>South Coast BC Transportation Service Region: 27 cents per litre (includes 6.75 cents per litre collected on behalf of the BC Transportation Financing Authority and 18.5 cents per litre collected on behalf of TransLink).</p> <p>Victoria Regional Transit Service Area: 20 cents per litre (includes 6.75 cents per litre collected on behalf of the BC Transportation Financing Authority and 5.5 cents per litre collected on behalf of BC Transit).</p>	
	<ul style="list-style-type: none"> Motive fuel 	<p>General rate: 15 cents per litre (includes 6.75 cents per litre collected on behalf of the BC Transportation Financing Authority).</p> <p>South Coast BC Transportation Service Region: 27.5 cents per litre (includes 6.75 cents per litre collected on behalf of the BC Transportation Financing Authority and 18.5 cents per litre collected on behalf of TransLink).</p> <p>Victoria Regional Transit Service Area: 20.5 cents per litre (includes 6.75 cents per litre collected on behalf of the BC Transportation Financing Authority and 5.5 cents per litre collected on behalf of BC Transit).</p>	
	<ul style="list-style-type: none"> Alternative motor fuels (natural gas, hydrogen, and methanol (M85+)) 	Exempt.	<p>Natural gas, when used as a motor fuel, is exempt from tax. Certain hydrogen is exempt from tax. Fuels comprised of at least 85% methanol are also exempt from tax.</p>

Table 3.1 Provincial Taxes (as of July 2025) – Continued

Type and Statute Reference	Tax Base	Tax Rate	Characteristics and Exemptions
Motor fuel — <i>Motor Fuel Tax Act</i> (continued)	<ul style="list-style-type: none"> Coloured fuel, marine diesel fuel 	3 cents per litre.	Coloured fuel may be used in all vehicles not licensed to operate on a highway and in specific industrial vehicles. Farmers are exempt from paying the tax when fuel is used solely for listed farm purposes. Farm trucks are allowed to use tax-exempt coloured fuel for farming purposes on a highway. Marine diesel fuel used in interjurisdictional cruise ships and ships prohibited from coasting trade under the <i>Coasting Trade Act</i> is exempt from tax.
	<ul style="list-style-type: none"> Locomotive fuel 	3 cents per litre.	Tax applies to fuel specifically for use in locomotives.
	<ul style="list-style-type: none"> Propane 	2.7 cents per litre.	Propane tax applies to all uses of propane. There are exemptions for propane used as residential energy in a residential dwelling, for propane used by qualifying farmers solely for a farm purpose, and for small containers of propane.
	<ul style="list-style-type: none"> Aviation fuel 	2 cents per litre.	Aviation fuel tax applies to fuel produced specifically for use in a non-turbine aircraft engine.
	<ul style="list-style-type: none"> Jet fuel 	2 cents per litre.	Jet fuel tax applies to fuel produced specifically for use in a turbine aircraft engine. Jet fuel used for international flights is exempt.
	<ul style="list-style-type: none"> Natural gas used in stationary engines, other than listed below. 	1.1 cents per 810.32 litres.	
	<ul style="list-style-type: none"> Natural gas used in pipeline compressors to transmit marketable gas. 	1.9 cents per 810.32 litres.	
	<ul style="list-style-type: none"> Natural gas used in pipeline compressors to extract and transmit raw gas from wells to processing plants. 	Exempt.	
	<ul style="list-style-type: none"> Natural gas used in compressors to re-inject sour gas into depleted wells. 	Exempt.	
	<ul style="list-style-type: none"> Marine bunker fuel 	Exempt.	Exemption applies to bunker fuel used as fuel in a ship.
<ul style="list-style-type: none"> Marine gas oil 	Exempt.	Exemption applies to marine gas oil when used in primary gas turbine engines to propel passenger and cargo vessels.	
Natural resources — <i>Logging Tax Act</i>	Net income from logging in B.C.	10% (fully recoverable against federal and provincial corporation and personal income tax).	Tax is calculated as net income from logging after deducting a processing allowance.
— <i>Mineral Land Tax Act</i>	Assessed value of freehold mineral land and production areas.	Undesignated mineral land — \$1.25 to \$4.94 per hectare. Designated production areas — \$4.94 per hectare.	Rates of tax set on sliding scale, dependent on size and designation of land. No tax is payable if the mineral land is less than 16.2 hectares, owned by a registered charity or if the administrator has classified the mineral lands as agricultural.
— <i>Mineral Tax Act</i>	Cash flow from individual metal and coal mines (other than placer gold mines).	2% of net current proceeds (NCP). 13% of net revenue (NR).	Tax calculated for each operator on a mine-by-mine basis. NCP tax paid on current operating cash flow until all current and capital costs, plus any investment allowance, are recovered. Then NR tax paid on cumulative cash flow. NCP tax creditable against NR tax.
	Volume of production of limestone, dolomite, marble, shale, clay, volcanic ash, diatomaceous earth, sandstone, quartzite and dimension stone.	\$0.15 per tonne removed from all quarries operated.	An operator may deduct 25,000 tonnes from the total number of tonnes removed from all quarries operated by that operator. However, the amount deducted from any one quarry by all operators of that quarry must not exceed 25,000 tonnes.
	Value of minerals sold by placer gold mines.	0.5% of value of minerals sold.	

Table 3.1 Provincial Taxes (as of July 2025) – Continued

Type and Statute Reference	Tax Base	Tax Rate	Characteristics and Exemptions
Insurance — <i>Insurance Premium Tax Act</i>	B.C. premiums.	4.4% for vehicle and property insurance, 2% for life, sickness, personal accident and loss of salary and wages insurance, 4% for other insurance and 7% for all contracts with unlicensed insurers.	Exemptions: Licensed insurers that are fraternal benefit societies and purely mutual corporations that earn 100% of net premium income from the insurance of religious institutions, schools or charitable organizations, or at least 50% of the BC net premium income from insurance of farm property are exempt. Premiums received or receivable as consideration for an annuity contract, for medical services or health care under a plan approved by regulation, from another taxable insurer under a contract of reinsurance, or under a contract of marine insurance that is not a pleasure craft are also exempt from taxation. For unlicensed insurers, the premiums paid to enter into a contract of marine insurance or reciprocal marine insurance that is not a pleasure craft insurance, by licensees under the <i>Real Estate Services Act</i> that enter into a contract with the Real Estate Errors and Omissions Insurance Corporation or are levied an assessment for the Real Estate Special Compensation Fund, by members of the Law Society of British Columbia, and by farmers that have insurance under the <i>Farm Income Insurance Act</i> or the <i>Insurance for Crops Act</i> .
Real property — <i>Taxation (Rural Area) Act</i>	Assessed value of land and improvements in rural areas (outside municipalities). Assessment determined under the <i>Assessment Act</i> .	Rates are set annually expressed as \$/1000 of taxable assessed value. For residential properties the rates are set to increase average residential rural taxes by the rate of inflation. For non-residential property classes, the rates are set so that total non-residential rural tax revenues increase by inflation plus tax on new construction. Class Rate \$/1000 1 residential: 0.37 2 utilities: 3.47 3 supportive housing: 0.10 4 major industry: 7.46 5 light industry: 2.47 6 business and other: 2.47 7 managed forest land: 0.49 8 recreation/non-profit: 0.78 9 farm land: 0.56 In Peace River Regional District, tax rates are the same as above except 2 utilities: 3.74 4 major industry: 7.73 5 light industry: 2.74	Some exemptions apply under various statutes.
Basic residential class school property tax — <i>School Act</i> section 119	Assessed value of class 1 residential land and improvements. Assessment determined under the <i>Assessment Act</i> .	Rates are set annually to increase average residential taxes by the rate of inflation. The rates vary by school district. For 2025, rates range from about \$0.75/\$1000 to \$4.16/\$1000.	Basic rates are calculated using a formula to moderate effects of varying average assessments on school district taxes. Amendments to the <i>School Act</i> in 2002 allow the Minister of Finance to apply different tax rates within a school district. Tofino is the only municipality with a rate that differs from the rest of the school district. School districts may levy additional tax on residential class property if authorized by local referendum. None do. The Home Owner Grant Program and the Land Tax Deferment Program can reduce or postpone the tax liability for Canadian citizens and permanent residents of Canada who live in their own home as a principal residence.
Additional school tax on homes over \$3 million. — <i>School Act</i> section 120.1	Assessed value of “dwelling property”.	Tax is 0.2% on the value of the dwelling property between \$3,000,000 and \$4,000,000 and 0.4% on the value above \$4,000,000.	Dwelling property for the additional school tax is most residential class property where there is between one and three dwelling units. Properties with four or more units, such as apartment buildings, are not taxed. Vacant land in residential class is taxed unless it is in the Agricultural Land Reserve.

Table 3.1 Provincial Taxes (as of July 2025) – Continued

Type and Statute Reference	Tax Base	Tax Rate	Characteristics and Exemptions
Non-residential class school property tax — <i>School Act</i> section 119	Assessed value of non-residential land and improvements. Assessment determined under the <i>Assessment Act</i> .	Rates are set annually and expressed as \$/1000 of taxable assessed value. For 2025 the rates are: Class Rate \$/1000 2 utilities: 11.74 3 supportive housing: 0.10 4 major industry: 1.42 5 light industry: 3.56 6 business and other: 3.56 7 managed forest land: 2.04 8 recreation/non-profit: 2.13 9 farm land: 7.05	Some exemptions apply under various statutes. Tax rates for 2025 were set according to the usual policy, so that revenues would grow from 2024 by inflation and by the tax on new building since 2024. Starting in 2023, the 60% credit on major industrial (class 4) properties is eliminated. The class 4 property tax rate is reduced by an equivalent amount, resulting in no effective change from the removal of the credit. A 50% provincial farm land property tax credit reduces the provincial school property tax on farm land (class 9).
Police tax — <i>Police Act</i>	Assessed value of land and improvements in municipalities under 5,000 population and in rural areas. Assessment determined under the <i>Assessment Act</i> .	Rates are set annually to raise up to 50% of the provincial cost of rural and small community policing. Rates are set for each of the nine property classes in each municipality under 5,000 population, in each electoral area of the province, in Treaty Settlement Lands subject to the tax, and in the area of the province outside a regional district.	As announced in the <i>Budget 2024</i> , police tax revenue is set to target 33% of the cost estimate after all the tax reduction. Basic rates are calculated using a formula that includes assessed value and population. Tax rate reductions are embedded in the rates to reflect the contribution taxpayers in the rural areas make to policing costs through the provincial rural area property tax and payments of grants in lieu of police tax by exempt taxpayers. Rates are further reduced to deliver traffic fine revenue sharing amounts to taxpayers: in municipalities over 5,000 where police tax does not apply the traffic fine revenue sharing amounts are paid to municipalities.
Speculation and vacancy tax — <i>Speculation and Vacancy Tax Act</i>	Tax is based on the assessed value of the residential property. Assessment determined under the <i>Assessment Act</i> .	The tax rate is 2% for foreign owners and untaxed worldwide earners (satellite families). The tax rate for other owners is 0.5%. Budget 2025 includes amendments to increase SVT rates from two per cent to three per cent for foreign owners and untaxed worldwide earners and from 0.5 per cent to one per cent for Canadian citizens and permanent residents to help ensure residential properties are used as homes rather than investments. The new rates take effect on January 1, 2026, and will apply to the SVT payable by property owners based on the use of their residential properties during the 2026 calendar year and onward. In conjunction with these tax rate increases, Budget 2025 increases the tax credit for BC residents from \$2,000 to \$4,000 to reflect the higher tax rate, effective for calendar year 2026 and subsequent years. The increase to the tax credit ensures it will continue to offset the SVT liability on the first \$400,000 in assessed value for properties owned by BC residents who are not otherwise exempt. The tax credit for non-BC residents is based on formulas in the legislation that automatically reflect the rate changes.	The tax is intended to capture foreign and domestic speculators who own residential property in designated taxable areas. Different exemptions and credits are available depending on owner type. The principal residence of a resident of British Columbia is exempt from tax. Residential property that is rented out is exempt. Property that is under construction or development is exempt. There are also a variety of hardship exemptions available. Residents of B.C. are entitled to an up to \$2,000 tax credit. Other categories of owners are entitled to a tax credit based on reported B.C. income and the use of the property.

Table 3.2 Interprovincial Comparisons of Tax Rates – 2025
(Rates known and in effect as of July 1, 2025)

Tax	British Columbia	Alberta	Saskatchewan	Manitoba	Ontario	Quebec	New Brunswick	Nova Scotia	Prince Edward Island	Newfoundland and Labrador
Corporate income tax										
(per cent of taxable income)

	77.37	60.00	68.18	72.02	48.84	41.80	67.31	76.411	76.11	82.67

¹ In British Columbia (and some other provinces), the general rate applies to income from manufacturing and processing. Prince Edward Island reduced its general rate to 15% effective July 1, 2025.

² Saskatchewan canceled its previously announced increase to its small business rate from 1% to 2%. Nova Scotia's small business rate was decreased from 2.5% to 1.5% effective April 1, 2025 and the business limit was increased to \$700,000 on the same day. Prince Edward Island increased its business limit to \$600,000 effective July 1, 2025.

³ Saskatchewan provides a lower rate for small financial corporations, while Manitoba exempts small financial corporations from taxation. The tax in Ontario and Quebec tax only applies to life insurance companies. New Brunswick generally applies a 4 per cent tax on financial institutions with a 5 per cent tax on banks specifically. Saskatchewan, New Brunswick, Nova Scotia, Prince Edward Island, and Newfoundland and Labrador each provide capital tax deductions.

⁴ Provinces with payroll taxes provide payroll tax relief for small businesses. Quebec levies a compensation tax of up to 2.8 per cent on salaries and wages paid by financial institutions other than insurance corporations which are taxed at a rate of 0.3 per cent.

⁵ Lower rates apply to premiums for life, sickness, and accident insurance; higher rates apply to premiums for property insurance including automobile insurance. In British Columbia, the highest rate applies to unlicensed insurance. Quebec's rate includes the 0.3 per cent rate of compensation tax levied on insurance corporations. In Saskatchewan, Manitoba, Ontario, Quebec, and Newfoundland and Labrador, sales taxes also apply to certain insurance premiums except, generally, those related to individual life and health.

⁶ Tax rates are for regular fuel used on highways and include all provincial taxes payable by consumers at the pump. The British Columbia rates include 6.75 cents per litre dedicated to the BC Transportation Financing Authority. The British Columbia rates do not include regional taxes that increase the gasoline and diesel rates by 18.5 cents per litre in the South Coast British Columbia Transportation Authority service region and by 5.5 cents per litre in the Capital Regional District. The rates for Ontario, Quebec, New Brunswick, Nova Scotia, Prince Edward Island, and Newfoundland and Labrador include provincial sales tax based on average pump prices as of July 2025. In Alberta, fuel tax rates, including gas and diesel, are adjusted quarterly based on an average West Texas Intermediate price within a given period. Quebec's rates do not include increased or reduced regional tax rates, such as an additional 3 cents per litre on gasoline in the Montreal area.

⁷ Tax rates shown are statutory rates. Ontario, Quebec, New Brunswick, Nova Scotia, Prince Edward Island and Newfoundland and Labrador have harmonized their sales taxes with the federal GST. Alberta imposes a 4 per cent tax on short-term rental accommodation.

⁸ Includes estimated provincial sales tax / provincial portion of the harmonized sales tax in all provinces except Alberta and Quebec.

Per cent of revenue:													
Surplus (deficit)	-0.7	2.6	0.1	4.4	0.4	2.3	-0.9	-9.0	1.7	1.2	-6.3	-8.7	
Per capita (\$): ³													
Surplus (deficit)	(63)	253	10	457	40	262	(104)	(1,085)	241	178	(910)	(1,289)	

¹ Figures have been restated to reflect government accounting policies in effect at March 31, 2025.

² Revenue and expense as a per cent of GDP is calculated using GDP for the calendar year ending in the fiscal year (e.g. 2024/25 amounts divided by GDP for the 2024 calendar year). As nominal GDP for the calendar year ending 2024 is not yet available, the 2024 GDP projected in the March 2025 budget has been used for the fiscal year ended March 31, 2025.

³ Per capita revenue and expense is calculated using July 1 population (e.g. 2024/25 amounts divided by population on July 1, 2024).

¹ Figures have been restated to reflect government accounting policies in effect at March 31, 2025.

² Net liabilities as a per cent of GDP is calculated using GDP for the calendar year ending in the fiscal year (e.g. 2024/25 amount divided by GDP for the 2024 calendar year). As nominal GDP for the calendar year ending 2024 is not available, the 2024 GDP projected in the March 2025 budget has been used for the fiscal year ended March 31, 2025.

³ Per capita net liabilities is calculated using July 1 population (e.g. 2024/25 amount divided by population on July 1, 2024).

¹ Figures have been restated to reflect government accounting policies in effect at March 31, 2025.

The accounting treatment is revised from deferred accrual to cash basis for Crown land tenures, motor vehicle and other fees for all historical years.

² Includes social service tax, hotel room tax, provincial sales tax, tax on designated properties and housing transition tax.

³ BC Hydro's loss in 2018/19 includes a write-off of a regulatory account. At the summary level, the Province recognized a \$950 million adjustment in fiscal 2017/18 with respect to BC Hydro's deferred regulatory accounts.

⁴ Net of payments to the federal government and starting in 2021/22, is also net of payments to the BC First Nations Gaming Revenue Sharing Limited Partnership in accordance with section 14.3 of the *Gaming Control Act (B.C.)*.

¹ Revenue as a per cent of GDP is calculated using GDP for the calendar year ending in the fiscal year (e.g. 2024/25 revenue divided by GDP for the 2024 calendar year). As nominal GDP for the calendar year ending 2024 is not available, the 2024 GDP projected in the March 2025 budget has been used for the fiscal year ended March 31, 2025 for demonstration purposes. Totals may not add due to rounding.

² Per capita revenue is calculated using July 1 population (e.g. 2024/25 revenue divided by population on July 1, 2024). Totals may not add due to rounding.

³ Revenue is converted to real (inflation-adjusted) terms using the consumer price index (CPI) for the corresponding calendar year (e.g. 2024 CPI for 2024/25 revenue).

¹ Capital spending as a per cent of GDP is calculated using GDP for the calendar year ending in the fiscal year (e.g. 2024/25 amounts divided by GDP for the 2024 calendar year). As nominal GDP for the calendar year ending 2024 is not available, the 2024 GDP projected in the March 2025 budget has been used for the fiscal year ended March 31, 2025. Totals may not add due to rounding.

² Per capita capital spending is calculated using July 1 population (e.g. 2024/25 amounts divided by population on July 1, 2024). Totals may not add due to rounding.

³ Capital spending is converted to real (inflation-adjusted) terms using the consumer price index (CPI) for the corresponding calendar year (e.g. 2024 CPI for 2024/25 capital spending).

¹ Debt as a per cent of GDP is calculated using GDP for the calendar year ending in the fiscal year (e.g. 2024/25 debt divided by GDP for the 2024 calendar year). As nominal GDP for the calendar year ending in 2024 is not available, the 2024 GDP projected in the March 2025 budget has been used for the fiscal year ended March 31, 2025. Totals may not add due to rounding.

² Per capita debt is calculated using July 1 population (e.g. 2024/25 debt divided by population on July 1, 2024). Totals may not add due to rounding.

³ Debt is converted to real (inflation-adjusted) terms using the consumer price index (CPI) for the corresponding calendar year (e.g. 2024 CPI for 2024/25 debt).

Population (thousands at July 1) ¹⁰	4,635	4,713	4,765	4,861	4,934	5,021	5,111	5,176	5,227	5,357	5,532	5,698	1.9

¹ Figures for prior years have been restated to conform with the presentation used for 2024/25 and to include the effects of changes in underlying data and statistics.

² The ratio of debt to population (e.g. 2024/25 debt divided by population at July 1, 2024).

³ The ratio of debt outstanding at fiscal year end to provincial nominal gross domestic product (GDP) for the calendar year ending in the fiscal year (e.g. 2024/25 debt divided by 2024 nominal GDP). As nominal GDP for the calendar year ending is not available, the 2024 GDP projected in the March 2025 budget has been used for the fiscal year ended March 31, 2025.

⁴ The ratio of interest costs (less sinking fund interest) to revenue. Figures include capitalized interest expense in order to provide a more comparable measure to outstanding debt.

⁵ Weighted average of all outstanding debt issues.

⁶ Includes revenue of the consolidated revenue fund (excluding dividends from enterprises) plus revenue of all government organizations and enterprises.

⁷ Excludes revenue of government enterprises, but includes dividends from enterprises paid to the consolidated revenue fund.

⁸ Excludes debt of commercial Crown corporations and agencies and funds held under the province's warehouse borrowing program.

⁹ Nominal GDP for the calendar year ending in the fiscal year (e.g. Nominal GDP for 2024 is used for the fiscal year ended March 31, 2025). As nominal GDP for the calendar year ending 2024 is not available, the 2024 GDP projected in the March 2025 budget has been used for the fiscal year ended March 31, 2025.

¹⁰ Population at July 1st within the fiscal year (e.g. population at July 1, 2024 is used for the fiscal year ended March 31, 2025).

¹ The provincial government began publishing summary financial statements in 1979/80. Figures for prior years are unavailable. For 1970/71 to 1978/79, the CRF balance is used in place of the summary accounts surplus/(deficit). Figures have been restated to reflect government accounting policies in effect at March 31, 2025.

² Does not include the \$256 million transfer to the CRF for the wind-up of Forest Renewal BC and Fisheries Renewal BC.

³ Impact of move to joint trusteeship for public service pension plans.

⁴ Negotiating framework incentive payments.

⁵ Climate Action Dividend.

⁶ One-time HST transition repayment.

¹ Provincial debt is prepared in accordance with Generally Accepted Accounting Principles and presented consistent with the Debt Summary Report included in the Public Accounts. Debt is shown net of sinking funds and unamortized discounts, excludes accrued interest and foreign exchange adjustments, and includes non-guaranteed debt directly incurred by commercial Crown corporations and debt guaranteed by the Province.

² Includes BC Buildings, BC Housing Management Commission, other taxpayer-supported Crown agencies, and loan guarantee provisions.

³ Includes commercial Crown corporations and agencies and funds held under the province's warehouse borrowing program.
