Section 1: Sector Performance Targets

Section 1: Sector Performance Targets

1.1 Sector Performance Targets Template

***All commodity boards and commissions** are to identify between 3-5 board targets/goals that you think best demonstrate the strategic priorities and future direction of your sector.

*Some or all targets/goals may already be part of your strategic plan.

*Include an update on the targets set in the previous reporting period, unless those targets are met.

*Target status: Completed; In Progress; To be started

*Use hyperlinks to provide supporting references where appropriate

For further information or examples of how to fill out the tables, refer to the [PARP Templates and Reporting Guide](#) document BCFIRB has provided

Target	Target description	Target status	Timeline
<i>Certification and retain annual certification in CFC's Animal Care (ACP) and On Farm Safety Assurance Programs (OFFSP).</i>	<i>Chicken Farmers of Canada require all Canadian provinces to participate in the CFC Animal Care Program and CFC On Farm Food Safety Programs. Through our Field Services staff, the BCCMB performs annual on farm audits on all BC registered chicken farms</i>	100% certification under ACP and OFFSP achieved for 2020 despite challenges of COVID restrictions. Where possible, on-farm inspections were undertaken and the remainder were completed through records audits as provided for under the CFC regulations.	<i>OFFSP developed in 1998; ACP in effect since July 15, 2012 (A-112).</i>
Certification and retain annual certification in BC Bio Security Program	The BC Bio Security Program is unique to the province of BC and was developed in response to the 2004 Avian Influenza outbreak.	Program certification postponed due to COVID restrictions as unable to do on-farm in-person audits as required by program.	2007 to date
100% utilization of BC's share of the CFC allocation on a cycle by cycle basis	BCCMB works to ensure its regulations and policies enable BC chicken growers to produce 100% of our share of the national chicken allocation; allows the BC chicken value chain to produce its share of the annual market for Canadian chicken	Achieved at 101.7% which represents a 0.62% periodic allocation decrease from last year. Achieved despite dealing with multiple plant closures due to COVID 19 outbreaks.	A-161 to A-167
Establish a long-term pricing formula for mainstream chicken through the BCFIRB Pricing Review	As first instance regulator, make a decision on a long-term pricing formula after through stakeholder engagement for recommendation to the BCFIRB Review Panel by the end of February 2021.	In progress. Managing and responding to COVID related issues, in particular ordered processing plant closures have resulted in delays and the concurrence of parties to extend the target for submission to the Review Panel.	Revised target end of second quarter, 2021.

Production Type Definitions	
Production Type	Explanation
Mainstream Quota	is a class of quota expressed in kilograms of live weight for the production and marketing of chicken allotted by the Board. Mainstream quota is for the production of regular broilers, roasters, Cornish, or certified organic, and is derived from a commercially available broiler chick stock, such as, but not limited to, Hubbard ISA, Cobb Vantress, or Ross Breeders;

Specialty quota is designated by the Board for the production of specialty chicken including Asian chicken, such as Silkies and Taiwanese Chicken. The Board may designate specialty quota for the production of innovative new products that do not currently exist in the marketplace including those derived from a traditional or heritage breed. Effective with the commencement of quota period A-126 (September 7, 2014) Redbro is no longer classified as Specialty chicken;
Taiwanese	“Asian chicken” is chicken of a distinct genetic strain
Silkie	designated by the Board and includes Silkies and Taiwanese
