

BRITISH COLUMBIA FARM INDUSTRY REVIEW BOARD

Supervisory Review re
2016 Amendments to Schedule "B" Operating Agreement for Chicken

AFFIDAVIT #2 OF JEFF MCDOWELL

I, JEFF MCDOWELL, of 3340 Orlando Drive, Mississauga, Ontario, businessperson, SWEAR THAT:

1. I am the Vice President of the Poultry Value Chain at Sofina Foods Inc. and as such I have personal knowledge of the facts deposed to herein, except where stated to be based upon information and where so stated I verily believe those facts to be true.
2. I am the CPEPC Western Director for CFC and in that capacity was involved in the allocation decisions at CFC for A-139 and A-140.
3. In relation to the allocation for A-139, all directors voted in favour of a national allocation of 2% over base. However, I do not agree with the method used to distribute the national allocation across the regions and provinces. CFC continues to use the formula set out in the MOU (the "Formula"), to which the Western processors have expressed their objection. The Formula (the use of which will continue under the proposed amendments to the Operating Agreement) distributes the national allocation in a way that results in a significant disadvantage to BC.
4. The CFC vote for the national allocation of 3% in A-140 was not supported by the CPEPC Eastern Director or the FPPAC Director. I did support the allocation of 3% over base as a national allocation. However, I am opposed to using the Formula for the distribution of the allocation across the provinces, as set out above in paragraph 3.
5. I supported the 3% over base allocation in A-140 because the base allocation for A-140 will actually result in 3.1% more domestic production versus last year where A-139 at 2% over base allocation results in 4.2% versus last year. Although the over base allocation percentage was higher in A-140, the percentage growth versus prior year production is lower.
6. The experience in A-139 and A-140 demonstrates the significant negative impact of the Formula. The Western region will receive significantly less on a percentage basis than the Central region, and this is further reflected in the allocation to BC.
7. A-137 and A-138 were periods of unusually high allocations, which were not sustainable, and had the effect of skewing the true impact of the Formula on allocations to BC and the Western region. In A-139 the allocations are returning to more normal levels, and the negative impact of the Formula on BC is highlighted.
8. Attached and marked as **Exhibit "A"** to this affidavit is a true copy of the CFC Allocation Summary for A-138.
9. Attached and marked as **Exhibit "B"** to this affidavit is a true copy of the CFC Allocation Summary for A-139.

10. Attached and marked as **Exhibit "C"** to this affidavit is a true copy of the CFC Allocation Summary for A-140.

SWORN before me
at Markham, Ontario, on
10th June, 2016.

A Commissioner for taking affidavits
for Ontario
