INDEPENDENT AUDITORS' REPORT

To: The Members of the Marie Esther Society

Report on Financial Statements

We have audited the statement of financial position of Mount St. Mary Hospital (the "Hospital") as at March 31, 2016 and the statements of operations, changes in net financial debt, remeasurement gains and losses and cash flows for the year then ended.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with Canadian public sector accounting standards, and for such internal controls as management determines is necessary to enable the preparation of financial statement that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Canadian auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Mount St. Mary Hospital as at March 31, 2016 and the results of its operations, changes in net financial debt, remeasurement gains and losses and cash flows for the year then ended in accordance with Canadian public sector accounting standards.

MOUNT ST. MARY HOSPITAL

(Owned and Operated by the Marie Esther Society)

Notes to the Financial Statements
(Tabular amounts are expressed in thousands of dollars)

Year-ended March 31, 2016, with comparative figures for 2015

1. Purpose

Mount St. Mary Hospital (the "Hospital") is a residential care facility providing complex care. Founded by the Sisters of St. Ann, the Hospital is owned and operated by the Marie Esther Society, and is directed by a Board of Directors appointed by the Marie Esther Society. The Hospital was incorporated under the Society Act of British Columbia October 19, 1990 as a not-for-profit organization and is a registered charity exempt from tax under the Income Tax Act.

2. Significant Accounting Policies

(a) Basis of accounting:

The financial statements are prepared by management in accordance with Canadian public sector accounting standards ("PSAS") issued by the Public Sector Accounting Board ("PSAB") as required by Section 23.1 of the *Budget Transparency and Accountability Act* of the Province of British Columbia, except in regard to the accounting for restricted contributions which is based on the Restricted Contributions Regulation 198/2011 and as advised by the Office of the Comptroller General of British Columbia ("OCG").

(b) Employee benefits:

(i) Defined benefit obligations, including multiple employer benefit plans:

Liabilities, net of plan assets, are recorded for employee retirement allowance benefits and multiple employer defined long-term disability benefits plans as employees render services to earn the benefits.

The actuarial determination of the accrued benefit obligations uses the projected benefit method prorated on service (which incorporates management's best estimate of future salary levels, other cost escalation, retirement ages of employees and other actuarial factors). Plan assets are measured at fair value.

The discount rate used to measure obligation is based on the cost of borrowing. The cost of a plan amendment or the crediting of past service is accounted for entirely in the year that the plan change is implemented.

(ii) Defined contribution plans and multi-employer benefit plans:

Defined contribution plan accounting is applied to multi-employer defined benefit plans and, accordingly, contributions are expensed when due and payable.

(iii) Accumulating, non-vesting benefit plans:

Benefits that accrue to employees, which do not vest, such as sick leave banks for certain employee groups, are accrued as the employees render services to earn the benefits, based on estimates of the expected future settlements.

MOUNT ST. MARY HOSPITAL
(Owned and Operated by the Marie Esther Society)

Notes to the Financial Statements
(Tabular amounts are expressed in thousands of dollars)

Year-ended March 31, 2016, with comparative figures for 2015

2. Significant Accounting Policies (continued)

(iv) Non-accumulating, non-vesting benefit plans:

For benefits that do not vest or accumulate, a liability is recognized when an event that obligates the Hospital to pay benefits occurs.

(c) Non-financial assets:

(i) Tangible capital assets:

Tangible capital assets are recorded at cost, which includes amounts that are directly attributable to acquisition, construction, development or betterment of the asset. Costs include overhead directly attributable to construction and development.

The cost, less residual value, of the tangible capital assets, excluding land, is amortized on a straight line basis over their estimated useful lives as follows:

Buildings	20 - 35 years
Furniture and equipment	5 – 10 years

Tangible capital assets are written down when conditions indicate that they no longer contribute to the Hospital's ability to provide services, or when the value of future economic benefits associated with the tangible capital assets are less than their net book value. The write-downs of tangible capital assets are recorded in the statement of operations. Write downs are not subsequently reversed.

Contributed tangible capital assets are recorded at their fair value on the date of contribution. When fair value of a contributed asset cannot be reliably determined, the asset is recorded at nominal value.

(d) Revenue recognition:

Under the *Hospital Insurance Act and Regulation* thereto, the Hospital is funded by the Island Health Authority in accordance with the service provider agreement established and approved by the Health Authority.

Revenues are recognized on an accrual basis in the period in which the transactions or events occurred that gave rise to the revenues, the amounts are considered to be collectible and can be reasonably estimated.

Revenue related to fees or services received in advance of the fee being earned or the service being performed is deferred and recognized when the fee is earned or service performed.

MOUNT ST. MARY HOSPITAL
(Owned and Operated by the Marie Esther Society)

Notes to the Financial Statements
(Tabular amounts are expressed in thousands of dollars)

Year-ended March 31, 2016, with comparative figures for 2015

2. Significant Accounting Policies (continued)

(d) Revenue recognition:

Under the framework described in note 2(a), externally restricted contributions are recognized as revenue depending on the nature of the restrictions on the use of the funds by the contributors as follows:

- (i) Contributions for the purpose of acquiring or developing a depreciable tangible capital asset or in the form of a depreciable tangible capital asset, in each case for use in providing services, are considered to be deferred capital contributions and are amortized to revenue at the same rate as the amortization of the associated tangible capital asset. The amortization of the deferred capital contributions is recognized over the period in which the tangible capital asset is providing services. If the depreciable tangible capital asset funded by a deferred contribution is written down, a proportionate share of the deferred capital contribution is recognized as revenue during the same period.
- (ii) Contributions externally restricted for specific purposes other than for the acquisition or development of a depreciable tangible capital asset are recorded as deferred operating contributions, or deferred research and designated contributions, and recognized in revenue in the year in which the stipulation or restriction on the contribution have been met by the Hospital.
- (iii) Contributions restricted to be retained in perpetuity, allowing only the investment income earned thereon to be spent are recorded as restricted endowment contributions in the statement of operations for the portion to be held in perpetuity and as deferred contributions for any restricted investment income earned thereon.

Investment income includes interest recorded on an accrual basis and dividends recorded as declared, realized gains and losses on the sale of investments, and writedowns on investments where the loss in value is determined to be other-than-temporary.

Volunteers contribute a significant amount of their time each year to assist the Hospital in carrying out its programs and services. Because of the difficulty of determining their fair value, contributed services are not recognized in these financial statements. Contributions of assets, supplies and services that would otherwise have been purchased are recorded at fair value at the date of contribution, provided a fair value can be reasonably determined.

Contributions for the acquisition of land, or the contribution of land, are recorded as revenue in the period of acquisition or transfer of title.

(e) Measurement uncertainty:

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period.

MOUNT ST. MARY HOSPITAL
(Owned and Operated by the Marie Esther Society)

Notes to the Financial Statements
(Tabular amounts are expressed in thousands of dollars)

Year-ended March 31, 2016, with comparative figures for 2015

2. Significant Accounting Policies (continued)

(e) Measurement uncertainty (continued):

Significant areas requiring the use of estimates include the estimated useful lives of tangible capital assets, contingent liabilities, fair value of designated financial instruments, and the future costs to settle employee benefit obligations.

Estimates are based on the best information available at the time of preparation of the financial statements and are reviewed annually to reflect new information as it becomes available. Actual results could differ from the estimates.

(f) Financial instruments:

Upon inception and subsequent to initial recognition equity instruments quoted in an active market and any designated financial instruments are measured at fair value. All other financial assets and financial liabilities are measured at cost or amortized cost upon their inception and subsequent to initial recognition. Financial instrument classification is determined upon inception and financial instruments are not reclassified into another measurement category for the duration of the period they are held.

Financial instruments measured at fair value are classified as level 1, 2 or 3 for the purposes of describing the basis of the inputs used to measure the fair values of financial instruments in the fair value measurement category, as described below:

Level 1	Quoted prices (unadjusted) in active markets for identical assets or liabilities
Level 2	Market-based inputs other than quoted prices that are observable for the asset or liability either directly or indirectly
Level 3	Inputs for the asset or liability that are not based on observable market data; assumptions are based on the best internal and external information available and are most suitable and appropriate based on the type of financial instrument being valued in order to establish what the transaction price would have been on the measurement date in an arm's length transaction

Unrealized gains and losses from changes in the fair value of financial instruments are recognized in the statement of remeasurement gains and losses. Upon settlement, the cumulative gain or loss is reclassified from the statement of re-measurement gains and losses and recognized in the statement of operations.

Interest and dividends attributable to financial instruments are reported in the statement of operations.

All financial assets recorded at amortized cost are tested annually for impairment. When financial assets are impaired, impairment losses are recorded in the consolidated statement of operations. A write-down to reflect a loss in value is not reversed for a subsequent increase in value.

MOUNT ST. MARY HOSPITAL
(Owned and Operated by the Marie Esther Society)

Notes to the Financial Statements
(Tabular amounts are expressed in thousands of dollars)

Year-ended March 31, 2016, with comparative figures for 2015

2. Significant Accounting Policies (continued)

(f) Financial instruments (continued):

For financial instruments measured using amortized cost, the effective interest rate method is used to determine interest revenue or expense. Transaction costs for financial instruments measured using cost or amortized cost are added to the carrying value of the financial instrument. Transaction costs for financial instruments measured at fair value are expensed. A financial liability or its part is derecognized when it is extinguished.

i. Cash and cash equivalents

Cash and cash equivalents include cash on hand, demand deposits and short-term highly liquid investments that are readily convertible to known amounts of cash and that are subject to an insignificant risk of change in value. These short-term investments generally have a maturity of three months or less at acquisition and are held for the purpose of meeting short-term cash commitments rather than for investing.

ii. Portfolio investments

Portfolio investments include banker's acceptances, treasury bills, equities and bonds and are recorded at fair value. Transaction costs are recorded using the effective interest rate method.

iii. Other financial liabilities

The estimated fair market value of accrued vacation pay approximates its carrying value. The estimated fair value of accrued sick and severance pay approximates its carrying value as determined by actuarial valuation.

(g) Budget figures:

Budget figures have been provided for comparative purposes and have been derived from the Hospital's Fiscal 2015/2016 Budget approved by the Board of Directors on June 25, 2015 and published in the Hospital's Service Plan. The budget is reflected in the statement of operations and accumulated operating surplus and the statement of changes in net financial assets (net debt).

3. Cash and Cash Equivalents

Cash and cash equivalents is comprised of the following:

	2016 \$	2015 \$
Cash	1,258	1,373
Short-term investments	632	819
	1,890	2,192

MOUNT ST. MARY HOSPITAL
(Owned and Operated by the Marie Esther Society)

Notes to the Financial Statements
 (Tabular amounts are expressed in thousands of dollars)

Year-ended March 31, 2016, with comparative figures for 2015

4. Investments

Investments are comprised of the following:

	2016	2015
	\$	\$
Equities	1,062	868
	1,062	868

5. Loans Receivable

In 2005, the Hospital Board of Directors approved a loan of up to \$200,000, to the Mount St. Mary Foundation. The loan was fully repaid in August 2015.

6. Employee Future Benefits

(a) Accrued sick and severance pay

Under the terms of the employer's union contracts, employees with ten years of service and having reached a certain age are entitled to receive special payments upon retirement (or other circumstances specified in the collective agreement). These payments are based upon accumulated sick leave credits and entitlements for each year of service. The liability for amounts which may become payable to retiring employees has been estimated by independent actuarial valuation as at March 31, 2016, using an early measurement date of December 31, 2015.

The accumulated benefit obligation for sick leave and severance benefits as at March 31, 2016 are as follows:

	2016	2015
	\$	\$
Accrued benefit obligation:		
Sick leave benefits	641	506
Severance benefits	709	589
Total unfunded obligation	1,350	1,095

MOUNT ST. MARY HOSPITAL
(Owned and Operated by the Marie Esther Society)

Notes to the Financial Statements
 (Tabular amounts are expressed in thousands of dollars)

Year-ended March 31, 2016, with comparative figures for 2015

6. Employee Future Benefits (continued)

The accrued benefit obligation for the retirement allowance reported on the statement of financial position is as follows:

	2016	2015
	\$	\$
Balance, beginning of year	1,388	1,341
Current service cost	93	97
Amortization	(33)	(24)
Interest expense	44	49
Net benefit expense	104	122
Benefits paid	(170)	(75)
Balance, end of year	1,322	1,388

The significant actuarial assumptions adopted in measuring the Hospital's accrued sick and severance liabilities are as follows:

	2016	2015
Accrued benefit obligation as at March 31:		
Discount rate	3.93%	3.98%
Rate of compensation increase	2.50%	2.50%
Benefit costs for the years ended March 31		
Discount rate	3.93%	3.98%
Rate of compensation increase	2.50%	2.50%
Expected future inflationary increase	2.00%	2.00%

(b) Employee pension benefits

The Hospital and its employees contribute to the Municipal Pension Plan, a multi-employer defined benefit pension plan governed by the BC Public Sector Pension Plans Act. Employer contributions to the Municipal Pension Plan of \$836,985 (2015 - \$817,402) were expensed during the year.

(c) Employee healthcare benefits

The Hospital contributes to the Healthcare Benefit Trust and BC Health Services multi-employer plans for group life insurance, accidental death and dismemberment, extended health and dental, and long-term disability benefits for employees. Employer contributions to the Healthcare Benefit Trust of \$989,390 (2015 - \$961,614) and to BC Health Services of \$64,118 (2015 - \$53,974) were expensed during the year.

MOUNT ST. MARY HOSPITAL
(Owned and Operated by the Marie Esther Society)

Notes to the Financial Statements
 (Tabular amounts are expressed in thousands of dollars)

Year-ended March 31, 2016, with comparative figures for 2015

7. Deferred Operating Contributions

Deferred contributions represent unspent resources externally restricted for special programs. These programs include additional staff training to enhance resident care, pet therapy, gardens, pastoral care, resident activities, and one-time operating funding from the Health Authority deferred from the prior fiscal year. Changes in deferred contributions balance are as follows:

	2016 \$	2015 \$
Balance, beginning of year	244	122
Donations received	205	302
Amounts recognized as revenue in the year	(328)	(180)
Balance, end of year	121	244

8. Deferred Capital Contributions

Deferred capital contributions related to property and equipment represent the unamortized amount and unspent amount of grants and donations received for the purchase of property and equipment. The amortization of capital contributions is recorded as revenue in the statement of operations.

	2016 \$	2015 \$
Balance, beginning of year	22,623	23,602
Capital funding	206	147
Amounts recognized as revenue in the year	(1,112)	(1,126)
Balance, end of year	21,717	22,623

The balance of unamortized capital contributions related to property and equipment consists of the following:

	2016 \$	2015 \$
Unamortized capital contribution used to purchase property and equipment	20,940	21,935
Unspent contributions	777	688
Balance, end of year	21,717	22,623

MOUNT ST. MARY HOSPITAL
(Owned and Operated by the Marie Esther Society)

Utilities	256	241
Premises	250	222
Sundry	133	114
Special Programs	89	150
	17,439	17,206

12. Risk Management

The Hospital has a comprehensive risk management framework to monitor, evaluate and manage the principal risks assumed with financial instruments. The risks that arise from transacting financial instruments include credit risk, currency risk, interest rate risk, liquidity risk and other price risk. There have been no significant changes in the Hospital's risk exposure from the prior year.

Credit risk

Credit risk is the risk that one party to a financial instrument will cause financial loss for the other party by failing to discharge an obligation. Financial instruments that potentially subject the Hospital to credit risk consist primarily of accounts receivable. Accounts receivable are not concentrated with any single party, and therefore the Hospital is not subject to any significant concentration of credit risk.

MOUNT ST. MARY HOSPITAL

(Owned and Operated by the Marie Esther Society)

Notes to the Financial Statements
(Tabular amounts are expressed in thousands of dollars)

Year-ended March 31, 2016, with comparative figures for 2015

12. Risk Management (continued)

Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Hospital is not exposed to significant currency risks arising from its financial instruments.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Hospital is not exposed to significant interest rate risks arising from its financial instruments.

Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. Cash flow from operations provides a substantial portion of the Hospital's cash requirements. The Hospital is not exposed to significant liquidity risks arising from its financial instruments.

Other price risk

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate or foreign currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market. The Hospital is not exposed to significant other price risk.

13. Contingent Liability

The nature of the Hospital's activities is such that there may be litigation pending or in progress at any time. Any outstanding claims at March 31, 2016 are not expected to have a material effect on the Hospital's financial position. Outstanding contingencies are reviewed on an ongoing basis and are provided for in the financial statements based on management's best estimate of the ultimate settlement. No contingencies have been recorded in the year (2015: \$0).

14. Impact of Accounting for Restricted Contributions in Accordance with Section 23.1 of the Budget Transparency and Accountability Act:

As disclosed in the significant accounting policies note 2, Restricted Contributions Regulation 198/2011 requires the Hospital to recognize revenue from restricted contributions for the purpose of acquiring or developing a depreciable tangible capital asset on the same basis as the related amortization expense of the tangible capital asset. As these transfers do not contain stipulations or restrictions creating a liability over the term of the expected useful life of a related capital tangible assets, PSAS would require these contributions to be recognized in revenue as a tangible capital asset is acquired or developed and construction of a tangible capital asset is complete.

MOUNT ST. MARY HOSPITAL
(Owned and Operated by the Marie Esther Society)

Notes to the Financial Statements
 (Tabular amounts are expressed in thousands of dollars)

Year-ended March 31, 2016, with comparative figures for 2015
