CYBERSECURITY AWARENESS MONTH
CYBERSECURITY 101: WEEK 1 - DAY 1 - CHALLENGE 1

The CIA Triad represents the three main aspects of information that cybersecurity professionals work to protect: Confidentiality (ensuring private information stays private and is not disclosed), Integrity (ensuring information is not altered) and Availability (ensuring that information needed to perform certain functions is available).

If a cybercriminal breaks into a hospital's database system and access patients' information, what part of the CIA triad has been impacted?
a)   Confidentiality
b)   Integrity
c)   Availability
d)   Confidentiality and integrity
