**Federal government launches cybersecurity certification program for SMBs **

<https://www.itworldcanada.com/article/federal-government-launches-cybersecurity-certification-program-for-smbs/420823>

The federal government on Monday launched the long-awaited cybersecurity certification for small and mid-sized businesses in hopes of increasing the attention SMBs pay to cybersecurity as well as increasing the confidence of online shoppers who buy from Canadian sites.

The CyberSecure Canada program allows organizations to prove to a certification body approved by the Standards Council of Canada that they meet certain minimum standards. Those that pass are entitled to use a logo on websites and promotional material attesting that they have met the standard. They will also be listed in a searchable registry available for consumers and partners.

**Ottawa's cybersecurity action plan includes \$10M for special projects **

<https://www.itworldcanada.com/article/ottawas-cybersecurity-action-plan-includes-10m-for-special-projects/420740>

Just over a year after announcing an updated federal cybersecurity strategy, Ottawa has revealed how it will be implemented.

The action plan for improving the resilience of the federal and critical infrastructure includes \$10.3 million over five years for special projects created by provincial, territorial and municipal governments, researchers, commercial companies and not for profits. Of that total, \$2.3 million has been set aside for the next 12 months.

## **Theft of trade secrets and technology a threat to Canada's economic security, spy agency warns**

<https://www.thestar.com/news/canada/2019/08/06/theft-of-trade-secrets-and-technology-a-threat-to-canadas-economic-security-spy-agency-warns.html>

OTTAWA—Canada faces “growing threats” to its economic security from a small group of hostile actors bent on stealing trade secrets and technology, according to a 2018 briefing by the Canadian Security Intelligence Service.

In a briefing to unnamed “stakeholders” in Ontario last year, CSIS said that in addition to traditional spying and cyber security threats, an increasingly complex global environment has increased the threats to Canadian “economic and strategic interests.”

## **Revealed: Microsoft Contractors Are Listening to Some Skype Calls**

[https://www.vice.com/en\\_us/article/xweqbq/microsoft-contractors-listen-to-skype-calls](https://www.vice.com/en_us/article/xweqbq/microsoft-contractors-listen-to-skype-calls)

Contractors working for Microsoft are listening to personal conversations of Skype users conducted through the app's translation service, according to a cache of internal documents, screenshots, and audio recordings obtained by Motherboard. Although Skype's website says that the company may analyze audio of phone calls that a user wants to translate in order to improve the chat platform's services, it does not say some of this analysis will be done by humans.

## **Twitter says bugs in ad system led to data leaks**

<https://www.itworldcanada.com/article/twitter-reveals-bugs-in-ad-system-led-to-data-leaks/420702>

After revealing that a bug in its advertising system led to users' location data being inadvertently leaked to advertisers back in May, Twitter has revealed further leaks in its system.

Twitter is blaming them on issues with its advertisement settings. According to a blog post, Twitter said that there were two elements to this newest issue.

Firstly, Twitter said that users who clicked or viewed an ad for a mobile application and then subsequently interacted with that application had personal certain data, such as country codes and other data related to their interactions with the app, shared with the advertiser despite having settings in place to prevent this.

## **Russia 'turns a blind eye' to its hackers going after Western organizations: Report**

<https://www.itworldcanada.com/article/russia-turns-a-blind-eye-to-its-hackers-going-after-western-organizations-report/420726>

Allegations that sophisticated Chinese and North Korean based criminal groups are targeting Western governments and corporations aren't new. But a report out today says the leading threat actors come from Russia.

“There is no other hacking community that can boast such a breadth of knowledge, resources, and manpower,” says the report from New York-based IntSights Cyber Intelligence.

### **Customer Information Exposed In Air New Zealand Phishing Attack**

<https://www.bleepingcomputer.com/news/security/customer-information-exposed-in-air-new-zealand-phishing-attack/>

Air New Zealand sent e-mails to customers enrolled in its Airpoints loyalty program to warn them of a phishing attack that successfully compromised the email accounts of two staff members which potentially led to personal information being accessed by the attackers.

According to its website, Air New Zealand has carried roughly 17 million passengers every year to 51 destinations around the world.

### **Foreign Power Was Behind Cyber Attack on Czech Ministry: Senate**

<https://www.usnews.com/news/world/articles/2019-08-13/foreign-power-was-behind-cyber-attack-on-czech-ministry-senate>

A foreign state staged the latest cyber attack targeting the Czech Foreign Ministry, the Senate's security committee said on Tuesday, though it did not identify the nation concerned or provide any details on the incident.

Earlier, the Czech daily Denik N reported that the cyber attack on the Foreign Ministry had taken place in June but that no confidential data was compromised. Citing three sources, the paper also said the attack had originated in Russia.
