Challenge yourself with our [Employment Scams Quiz!](#)

Cybersecurity theme of the week: **Mobile Device Security**

🌟 Check out our [Protect your Mobile Device Info Sheet](#) to learn more.

Wonder what you can do to protect your mobile devices?

All Users	Technical Users	Business Owners
Patch (update) your devices to the latest security update as soon as possible. This is an effective way to debug and protect your device from vulnerabilities.	Implement multi-factor authentication (MFA) on your devices and encourage other users to implement MFA, too.	Develop and implement a clear and secure Bring Your Own Device (BYOD) policy. Ensure that employees understand the policy and how they can use their own devices for work.

Popular phishing scams to be on the lookout for in Canada

Have you ever received a text for a package that you didn't order?

Canadian Centre for Cybersecurity's Director General Melanie Anderson says "smishing," a term for SMS-text based phishing scams, is now one of the common scams in Canada.

Cybersecurity program responds to rising threats facing individuals and organizations

Cybercrime is a real and growing problem globally, and Canada is certainly not exempt. Slightly fewer than one-fifth of Canadian businesses were impacted by cybersecurity incidents in 2021, and Canadian businesses reported spending more than \$10-billion on cybersecurity that year.

Deepfake Phishing Grew by 3,000% in 2023 — And It's Just Beginning

Phishing is perhaps the most persistent cybersecurity threat, and it's only getting worse. As long as people are people, they'll make mistakes, so targeting human weaknesses is a surefire strategy for any cybercriminal. While that hasn't changed over the years, new technology has led to a far more sinister version of these threats — deepfake phishing.
