What you can do to improve your mobile device security:

All Users	Technical Users	Business Owners
Back up your information before you travel. You can't always avoid the loss of your equipment, but you can avoid losing your information.	Regularly review and revise Mobile Device Management (MDM) system to ensure assets and owners are properly identified.	Ensure that your organization has a Mobile Device Management (MDM) system to securely deploy mobile devices with up-to-date operating systems and software.

Check out [**Protect Your Mobile Devices Info Sheet**](#) to learn more about mobile device security.

#Infosec2024: Why human risk management is cybersecurity's next step for awareness

Amid frequent warnings about the advanced capabilities of cyber threat actors, targeting human frailties remains the primary initial access method for attackers. This reality has led to the development of human risk management (HRM), a concept that places a focus on targeted, intelligence led interventions to improve security behaviors.
