**This notification is intended as an informational bulletin for technical audiences.**

## Summary

The Vulnerability and Risk Management (VRM) Team is aware FortiNet FortiOS is prone to a remote code execution vulnerability in SSL VPN devices.

## Technical Details

Exploitation may. The flaw could allow a hostile agent to interfere via the VPN, even if the MFA is activated.

This vulnerability is rated as a **Critical** Severity.

## Recommended Action

- Investigate how your area of responsibility is affected.
- Notify business owner(s) as required.
- Ensure mitigation is performed as soon as possible.

Please notify VRM with any questions or concerns you may have.
