Overall rating: Critical

BRITISH COLUMBIA

This notification is intended as an informational bulletin for technical audiences.

Summary

The Vulnerability and Risk Management (VRM) Team is aware that Ivanti published a security advisory to address a critical vulnerability in the following product:

- Ivanti Connect Secure (ICS) gateway – versions 9.x and 22.x
- Ivanti Policy Secure (ICS) gateway – versions 9.x and 22.x

Technical Details

Upgrade to version 7.4.1 or higher. The vulnerability may also be eliminated in non-container deployments by deleting the InitialAccountSetup.xhtml file in the install directory and restarting the services. For container-deployed instances, replace the file with an empty file and restart. For additional information, see https://my.goanywhere.com/webclient/ViewSecurityAdvisories.xhtml (registration required).

These vulnerabilities are rated as an overall **Critical** Severity.

Recommended Action

- Investigate how your area of responsibility is affected.

- Notify business owner(s) as required.

- *Ensure mitigation is performed at your next change window.*

Please notify VRM with any questions or concerns you may have.
