

Overall rating: Critical

This is a technical bulletin intended for technical audiences.

Summary

The Vulnerability and Risk Management (VRM) Team has been made aware Microsoft has released the latest Microsoft Edge Stable Channel. The vulnerability affects versions prior to Microsoft Edge Stable Channel 121.0.2277.83 and Microsoft Edge Extended Stable Channel 120.0.2210.160.

Technical Details

A vulnerability, CVE-2024-21326 was classified as critical, and may allow an attacker elevation of privileges. It is assessed that the vulnerability requires user interaction. The technical details are unknown, and an exploit is not publicly available.

Exploitability Metrics

Attack Vector: Network
Attack Complexity: Low
Privileges Required: None
User Interaction: Required

This vulnerability is rated as a **CRITICAL** risk. A software update exists to address this risk.

Action Required

- Locate the device or application and investigate.
- Notify business owner(s).
- Perform mitigating actions, as required.

Please notify [VRM](#) with any questions or concerns you may have.
