

## Overall Rating - High

This notification is intended as an informational bulletin for technical audiences.

### Summary

The Vulnerability and Risk Management (VRM) Team is aware that HPE published a security advisory to address vulnerabilities in the following product:

- HPE Unified OSS Console (UOC) – versions prior to 3.1.3

### Technical Details

Potential security vulnerabilities have been identified in HPE Unified OSS Console Assurance Monitoring (UOCAM). These vulnerabilities could be exploited to allow remote arbitrary code execution, local denial of service and local stack overflow.

These vulnerabilities are rated as an overall **High** Severity.

### Recommended Action

- Investigate how your area of responsibility is affected.
- Notify business owner(s) as required.
- *Ensure mitigation is performed at your next change window.*

Please notify [VRM](#) with any questions or concerns you may have.
