

## Overall Rating: High

**This is a technical bulletin intended for technical audiences.**

### Summary

The Vulnerability and Risk Management (VRM) Team has been made aware of SAP published a security advisory to address vulnerabilities in multiple products. Included were updates for the following:

- SAP PDCE – multiple versions

### Technical Details

Elements of PDCE does not perform necessary authorization checks for an authenticated user, resulting in escalation of privileges. This allows an attacker to read sensitive information causing high impact on the confidentiality of the application.

This vulnerability is rated as a **HIGH** risk. A software update exists to address this risk.

### Action Required

- Locate the device or application and investigate.
- Notify business owner(s).
- Perform mitigating actions, as required.

Please notify [VRM](#) with any questions or concerns you may have  
[VulnerabilityandRiskManagement@gov.bc.ca](mailto:VulnerabilityandRiskManagement@gov.bc.ca)
