

Overall Rating: Critical

This is a technical bulletin intended for technical audiences.

Summary

The Vulnerability and Risk Management (VRM) Team is aware of HPE publishing a security advisory to address vulnerabilities in the following products:

- HPE Unified Console versions prior to v3.1.6

Technical Details

Potential security vulnerabilities have been identified in certain HPE Cray Servers using AMI MegaRac SPX Software. These vulnerabilities could be locally exploited to allow memory corruption, buffer overflow, and untrusted pointer dereference.

This vulnerability is rated as a **CRITICAL** risk. Software updates exist to address these risks.

Action Required

- Locate the device or application and investigate.
- Notify business owner(s).
- Perform mitigating actions, as required.

Please notify [VRM](#) with any questions or concerns you may have at vulnerabilityandriskmanagement@gov.bc.ca
