

Overall Rating: High

This is a technical bulletin intended for technical audiences.

Summary

The Vulnerability and Risk Management (VRM) Team has been made aware 2024, Atlassian published a security bulletin to address vulnerabilities in the following products:

- Bamboo Data Center and Server – multiple versions
- Confluence Data Center and Server – multiple versions
- Crowd Data Center and Server – multiple versions
- Jira Data Center and Server – multiple versions
- Jira Service Management Data Center and Server – multiple versions

Technical Details

The vulnerabilities reported in this Security Bulletin include 9 high-severity vulnerabilities which have been fixed in new versions of our products, released in the last month. These vulnerabilities are discovered via our Bug Bounty program, pen-testing processes, and third-party library scans.

To fix all the vulnerabilities impacting your product(s), Atlassian recommends patching your instances to the latest version or one of the Fixed Versions for each product below. The listed Fixed Versions for each product are current as of August 20, 2024 (date of publication); visit the linked product Release Notes for the most up-to-date versions.

This vulnerability is rated as a **HIGH** risk. A software update exists to address this risk.

Action Required

- Locate the device or application and investigate.
- Notify business owner(s).
- Perform mitigating actions, as required.

Please notify [VRM](#) with any questions or concerns you may have at vulnerabilityandriskmanagement@gov.bc.ca
