

Overall Rating: High

This is a technical bulletin intended for technical audiences.

Summary

The Vulnerability and Risk Management (VRM) Team has been made aware On September 4, 2024; Drupal published security advisories to address vulnerabilities in multiple products. Included was a critical update for the following:

- Paragraphs table – versions prior to 8.x-1.23.0 and versions prior to 2.0.2

Technical Details

This module enables field collections to be displayed as tables. It supports display suite and field permissions and provides operations (modify, delete, duplicate).

This vulnerability is rated as a **HIGH** risk. A software update exists to address this risk.

Action Required

- Locate the device or application and investigate.
- Notify business owner(s).
- Perform mitigating actions, as required.

Please notify [VRM](#) with any questions or concerns you may have at vulnerabilityandriskmanagement@gov.bc.ca
