

EDRMS TRIM Tip Opening a Trim Reference

Primary Audience: All Users

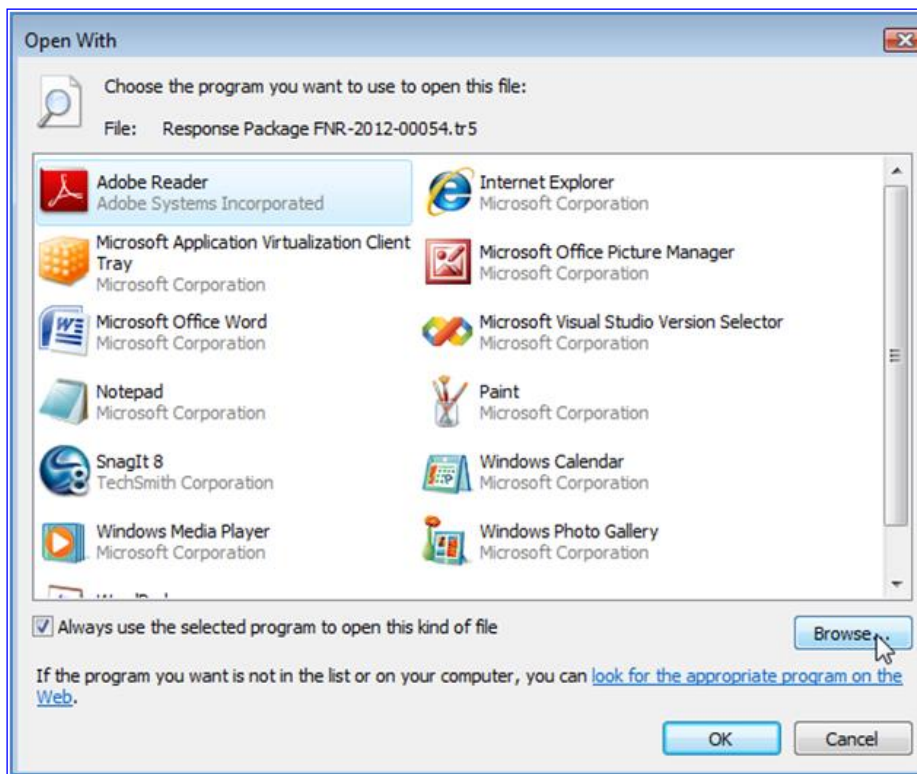

If you have some existing TRIM reference files on your LAN, the first time you open a reference after TRIM has been upgraded on your workstation you may have to designate which program to open them with. You will only need to do this process once

Your TRIM reference file icon will appear as below:

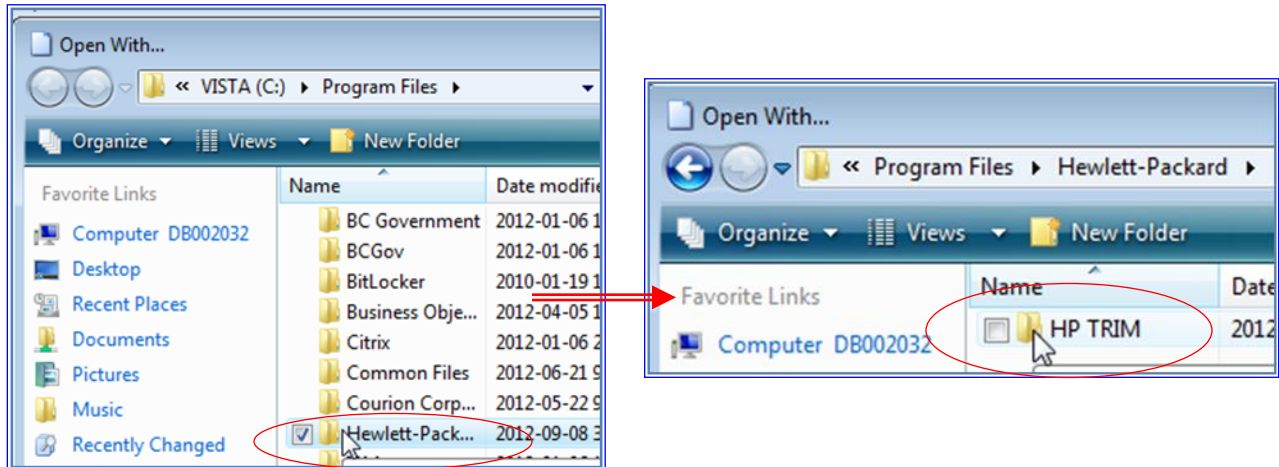

When you double click to open the reference you will get a message that Windows cannot open the file. Click on the button for 'Select a program from a list of installed programs' and then OK.

On the next screen, select 'Browse'.

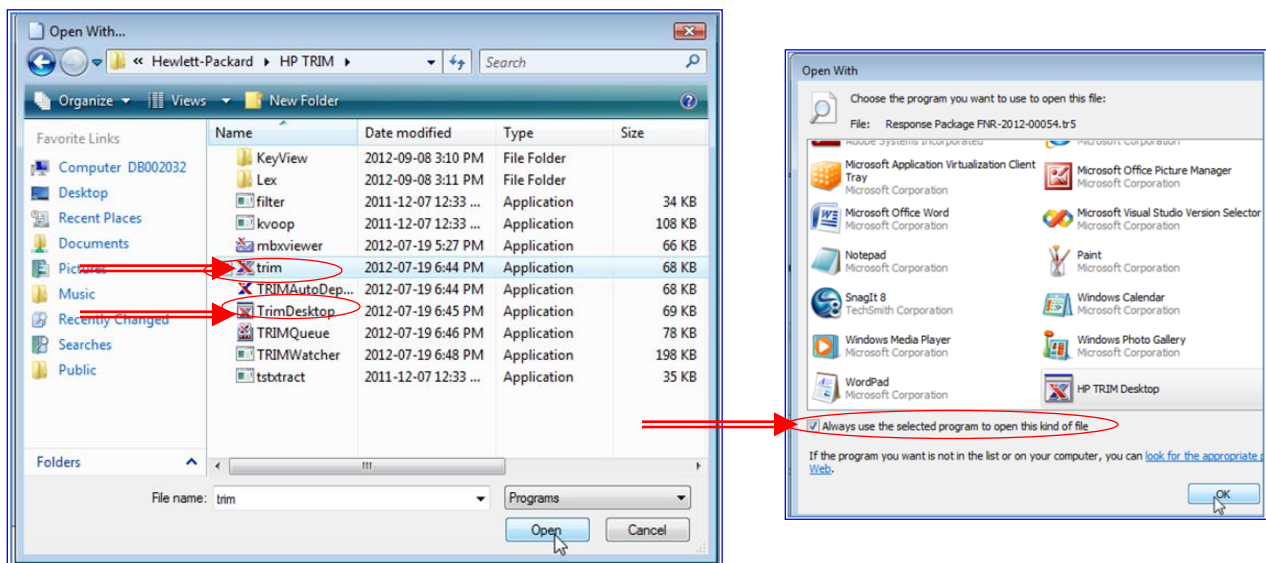

EDRMS TRIM Tip Opening a Trim Reference

Navigate to the C: Drive, then Program files. In the resulting list, select the Hewlett-Packard folder. Next, open the HP TRIM folder.

In the HP TRIM folder, select either TRIM or TRIM Desktop, depending on which version you use. Select Open. Finally, in the Open With window, select the checkbox for 'Always use the selected program to open this kind of file' then press OK. From now on your references will open in the TRIM 7.2.1 environment.
