

## NOTE

This is an early announcement of an upcoming release of CMS Lite, detailing new features and bug fixes, and may include information about other products. **This is a DRAFT document.** A final version of the release notes will be published, online, on the date of the upgrade.

**Product:** CMS Lite

**Release Number:** 2.8.5

**Release Date:** Jul 10, 2018

### What's New?

- Limited-release launch of Service Journey Builder, which enables authors to create service-specific content pages and service journey experiences on gov.bc.ca. As a part of our Journey Builder roll-out and evolution, this release is limited to a finite group of users
- The following changes have been implemented on gov.bc.ca and intranet.gov.bc.ca. They have been done based on UX research with citizens:
  - The header has been changed, making site navigation more streamlined
  - The font has been increased from 13px to 16px
- The top-level Themes are now listed (arranged) in alphabetical order
- Other front and back-end changes have been implemented to improve the application
