

VCC EXECUTIVE COMPENSATION REPORT

Statement of Compensation Philosophy, Practice and Process

The Board seeks to ensure that total compensation is competitive with comparable institutions within the post-secondary sector in British Columbia and other appropriate comparators subject to relevant statutes and public policy. Further, the Board recognizes the need to relate all incentive pay to the institution's service and performance plans, and has identified a set of objectives that are evaluated before variable compensation is paid.

The Board considers external market data provided by the Post-Secondary Employers Association and other appropriate sources, advice it may receive from independent compensation experts, and direction from the Government with respect to relevant statutes and public policy.

Executive compensation is determined with reference to the job evaluation plan and annual salary ranges for specific positions, and the benefit provisions established in the administrator's Terms of Employment as previously approved by the Government, and subject to change from time to time with the approval of Government.

For purposes of this report, total compensation includes: base salary, variable compensation (incentive pay), pension and other benefits, and perquisites. The total compensation package is designed to allow the organization to attract, retain and motivate qualified individuals.

Incentive pay refers to compensation that depends on achieving specific performance goals within a specified period. Payments made under an incentive plan are re-earnable and are not rolled into the base salary in future years. Each Executive develops a set of measurable objectives which are reviewed, and the attainment of such is taken into consideration with their overall performance in determining the percentage of incentive pay earned. The CEO is eligible for a maximum incentive of 15% of base salary. The NEOs are eligible for a maximum incentive of 10% of base salary. The Board reviews the CEO's objectives and determines the amount of incentive pay the CEO is eligible for in a given year up to the maximum agreed percentage. The CEO reviews the NEOs' objectives and determines the amount of incentive pay the NEOs are eligible for in a given year up to the maximum agreed percentage.
