About This Service

The Integrated Land and Resource Registry (ILRR) is a spatially enabled, comprehensive register of legal interests, rights, designations, and administrative boundaries on Crown land. It also has information on land and resource restrictions and reservations (e.g. Parks) and locations of private land.

This service provides:
- Web based single legal register of all rights and interests on crown land
- Information on private land and related use and basemap information.

Finding ILRR Information

Users can find information on the ILRR at the ILRR homepage: [www.Ilrr.ca](http://www.Ilrr.ca)

The following reference guides provide an overview of information found in the ILRR and its functionality including:
- Accessing ILRR Functions Quick Reference Guide
- Map Viewer Quick Reference Guide
- Conflicting Interests Quick Reference Guide
- Survey Parcel Quick Reference Guide
- Public Report/Mineral Tenure Notification
- Forest Data Quick Reference Guide
- Land Act Quick Reference Guide
- Mineral, Placer and Coal Quick Reference Guide
- Environment Data Quick Reference Guide

These guides can be found at [https://www2.gov.bc.ca/gov/content/data/geographic-data-services/land-use/integrated-land-resource-registry/y/registered-interests](https://www2.gov.bc.ca/gov/content/data/geographic-data-services/land-use/integrated-land-resource-registry/y/registered-interests)

Caution: Pop-up blockers should be turned off when using the ILRR as many ILRR functions open in new browser windows.

Logging Onto the ILRR

The ILRR is now available to government users (with their IDIR account), to industry (with business BCeID accounts) and the general public (with their IDIR account), to industry (with their IDIR account), to government users (with their IDIR account), to industry (with their IDIR account), to government users (with their IDIR account), to industry (with their IDIR account), to government users (with their IDIR account), to industry (with their IDIR account), to government users (with their IDIR account), to industry (with their IDIR account), to government users (with their IDIR account), to industry (with their IDIR account), to government users (with their IDIR account), to industry (with their IDIR account), to government users (with their IDIR account), to industry (with their IDIR account), to government users (with their IDIR account), to industry (with their IDIR account), to government users (with their IDIR account), to industry (with their IDIR account)

1. You can access the ILRR site by navigating to [www.Ilrr.ca](http://www.Ilrr.ca).
2. Click the Launch Application button on the right part of the screen.

Accessing ILRR Functions

1. Map Inquiry

The Map Inquiry function utilizes the Map Viewer to determine existing rights and interests for a specific location. Using the Map Viewer you can spatially query interests, produce maps, or select an area of interest for a land status query.

2. Query Interest Record

The Query Interest Record function allows the user to quickly locate a specific interest, record, or group of records, based on a known ILRR Interest Identifier or Agency Record Identifier.

3. Survey Parcel Search

The Survey Parcel Search function allows a user to quickly locate a Survey Parcel Type based on a private land Parcel Identifier (PID), a Crown Land Parcel ID Number (PIN), a Title Number (URJROL or BC Assessment Roll Number), or based on the legal description.

The only difference between the Survey Parcel Search and the Legal Description Search within the Custom Status option is the Survey Parcel Search only allows the user to view the results of the search, where the Legal Description Search allows you to view the results AND select a survey parcel to be used as the AOI or location parameter in a Custom Status Query.

To avoid confusion and to help you identify where you are in the ILRR system, the Survey Parcel Search screens are labeled: Survey Parcel Search, whereas the same screens in a Custom Status are labeled: Custom Status.

Custom Status

Users can create a custom status query by selecting parameters to be defined from the left navigation menu, completing the parameter screen(s), and submitting the results. This query allows you to run a report using seven different parameters. You can define one or more of the parameters to refine your query and result set. The results of a successful query provide statusers, decision makers, and land planners with information to conduct preliminary status, identify potential conflicts and to make decisions on where rights can be issued or identify where restrictions are needed.

To create a custom status query:
1. Select Custom Status from the ILRR Menu on the left.
2. From the left navigation menu, select the applicable parameters for your custom status by clicking the parameter. The user can select as many or as few parameters for their custom search. Each of these parameters, are describe on the below.

**Interest Type**
- Allows the user to choose which interest type(s) to be included in the query. These are categorized by the layer’s folder shown in the map viewer.

**Interest Agency**
- Allows the user to choose which interest responsible Ministry to be included in the query. These are the Ministries responsible for the interest which host the interest granting agencies.

**Location**
- Allows the user to choose which location(s) you want included in the query. This can be a known feature, such as using the Legal Description Search which allows the user to search by parcel type (Primary, Crown Subdivision, Land Title subdivision or right-of-way), or to use the map viewer to create an AOI.

**Term or Other Dates**
- Allows the user to choose the term or date(s) to be included in the query. This can be the Requested Date, the Term Start Date, the Term End Date, and/or the Interest Date.

**Interest Holder**
- Allows the user to choose which interest holder(s) to be included in the query.

**Interest Status**
- Allows the user to choose the interest status (request, active, inactive, obsolete or suspended) to be included in the query.

**Interest Size**
- Allows the user to choose which interest type(s) to be included in the query.

If you wish to reset one or any of the parameters, select the Reset button beside the parameter name(s). You can also reset all of the parameters by selecting the Reset All button at the bottom of the screen.

**Notify**
- The selected query must not query too many records or the query will fail.
- The query cannot have an existing notification (no check mark in Notify Column).
- The selected query must have a run date (Run Date Column is not blank).
- You must be the creator of the query (or if the query was sent to you by another user, you must make a copy of it).

The Query Validation Criteria can be found at https://www2.gov.bc.ca/gov/content/data/geographic-data-services/land-use/integrated-land-resource-registry/custom-queries. The Query Validation Criteria Table can be found at https://www2.gov.bc.ca/gov/content/data/geographic-data-services/land-use/integrated-land-resource-registry/custom-queries.

**Query Options**

**Run Query**
- Allows the user to run the selected query which must be done prior to establishing a notification.

**Modify Query**
- Allows the user to modify the selected query. You can only modify queries that you have created. If you wish to modify a query that was created by another user, you must copy it first, then modify it.

**Copy Query**
- Allows the user to copy the parameters of a saved query. When you copy a saved query, the Query Users listed with the original query will not be carried over to the new copied query.

**Delete Query**
- Allows the user to delete any query from the selection list.
  - If this query was created by you, a confirmation screen will display, asking you if you wish to delete the query. If you choose Yes, you will permanently delete this query from both your query list, and from the query list of other users that had access to this query. A confirmation note will be displayed.
  - If this query was created by another user, a confirmation screen will display asking you if you wish to remove this query from your list permanently. When you choose Yes, you will not affect other users of this query. A confirmation note will be displayed.

**Create Notification**
- Allows the user to identify saved queries that ILRR will monitor for any changes that occur within the defined parameters of the query. When a change occurs, ILRR will automatically inform you via email for each change that has occurred. Before a notification can be created, 4 conditions must be met.
  - You must be the creator of the query (or if the query was sent to you by another user, you must make a copy of it). - The selected query must have a run date (Run Date Column is not blank).
  - The query cannot have an existing notification (no check mark in Notify Column).
  - The selected query must not query too many records or the query will fail.

**Modify Notification**
- Allows the user to make updates to existing query notification parameters.

**Cancel Notification**
- Allows the user to cancel a notification for a saved query.
  - If you are receiving notifications for queries you did not create, and wish to be removed from the notification list, you must contact the owner of the query to be removed from the list.

A Notification will occur if:
1. An area of an existing interest changes by greater than 5% or greater than 1 ha.
2. New interest intersects the notification AOI.
3. Change in existing interest attributes (eg. Status is changed from Requested to Active).
