

What's New in ILRR release 9.2?

The latest update to the ILRR contains a series of improvements to the ILRR Reporter (as of May 04, 2023).

Updates below are specific to the **ILRR Reporter** component and include:

- Added ability to save AOI's for future analysis.
- A new report that includes the percentage of overlap (i.e., how much of the AOI is comprised of a specific interest).
- ILRR Reporter can now process and mail out batch report requests.
- The colours in the FCBC report categories have been changed.
- The Search/Report pane (right side) of the Reporter can now be resized.
- A mouseover function now describes the report types.
- After a location search a pin is now dropped on the resultant location.
