Canada-British Columbia
Investing in Canada Infrastructure Program

Rural and Northern Communities

Program Guide
Intake 2
Foreword

This Program Guide provides an overview of the Investing in Canada Infrastructure Program (ICIP) - Rural and Northern Communities (RNC) requirements for British Columbia. The guide has been developed to provide information to assist in preparing an application to the Program.

The goals of ICIP are to create long-term economic growth, build inclusive, sustainable communities and support a low carbon, green economy. Under ICIP, the RNC Program is focused on improving the quality of life in rural communities by responding to the specific needs of these communities. Investments in rural infrastructure will help build stronger, more inclusive communities, help safeguard the environment and the health of residents, and help support local, low-carbon green economies, as well as work towards reconciliation with Indigenous communities, both on and off-reserve.

The ICIP - RNC program targets capital infrastructure projects in communities with a population of 25,000 or less and provides additional funding towards projects in communities with populations of 5,000 or less. Eligible applicants are Local Governments, Indigenous Ultimate Recipients (both on and off-reserve), Not-for-Profit organizations and For-Profit organizations (when partnered with a local government or Indigenous government).

The ICIP - RNC program is focused on infrastructure that will support a variety of areas including food security; reliable road, air or marine infrastructure; broadband connectivity; efficient and reliable energy; Indigenous health and educational facilities; community, culture and recreation; local public transit; improved resilience to natural disaster events; and, environmental quality.

The Program supports projects that can be completed in five years following approval. Design work can be included as part of the capital grant and the program supports projects that are medium-term priorities (detailed design will be ready to begin one-year from application submission; projects are required to be at an advanced stage of planning but not “shovel-ready”).

Projects must meet related federal outcomes to be eligible. Eligible projects will support public infrastructure, defined as tangible capital assets primarily for public use and benefit.

*The Program Guide has been revised for the second application intake and published on June 25, 2020.*

APPENDIX A - DEFINITIONS ............................................................................................................. 46
1. INTRODUCTION

1.1 ABOUT THE PROGRAM

The Rural and Northern Communities (RNC) Program will fund infrastructure projects that support the unique challenges faced by rural communities. Along with outcomes specific to the RNC Program, eligible outcomes under the Environmental Quality (EQ) and Community, Culture and Recreation (CCR), as well as the outcomes related to Public Transit and Adaptation, Resilience and Disaster Mitigation, will be eligible under the RNC Program. Allowing these alternative outcomes will enable smaller, rural communities to access funding for a variety of project types and receive a larger proportion of funding from senior governments.

The RNC Program is a component of the over-arching Investing in Canada Infrastructure Program (ICIP) which provides funding through an Integrated Bilateral Agreement (IBA) between Canada and British Columbia (BC) for capital projects.

The governments of Canada and British Columbia are investing in the second intake of the ICIP - RNC Program to support infrastructure projects in communities* across the province that have populations of 25,000 or less (2016 Census). Funding under the first intake, which represented a commitment of up to $95 million by the Canadian and BC governments, has been fully allocated.

*For the purpose of this program A community is defined as a settlement area within a regional district electoral area or an established or proposed service area.

In communities with populations of 25,000 or less, Local Governments, Indigenous Ultimate Recipients, Not-for-profit and For-Profit applicants are eligible to apply for this merit-based funding**.

** See Section 2.1 on Eligible Applicants for details.

Eligible projects will improve or create infrastructure, specifically tangible capital assets, as defined by the General Accepted Accounting Principles (GAAP), that are primarily for public use and benefit.

In order to be eligible to apply for the RNC program, a project must meet one of the following core federal outcomes or one of the alternative federal outcomes from other streams listed below.
CORE OUTCOMES:

Rural and Northern Communities (RNC) Outcomes
- Improved food security
- Improved and/or more reliable road, air and/or marine infrastructure
- Improved broadband connectivity
- More efficient and/or reliable energy
- Improved education and/or health facilities (specific to the Truth and Reconciliation Commission of Canada’s Calls to Action)

ALTERNATIVE OUTCOMES:

Community, Culture and Recreation (CCR) Outcome
- Improved access to and/or increased quality of cultural, recreational and/or community infrastructure for Canadians, including Indigenous peoples and vulnerable populations

Green Infrastructure – Environmental Quality (EQ) Outcomes
- Increased capacity to treat and/or manage wastewater
- Increased capacity to treat and/or manage stormwater
- Increased access to potable water
- Increased capacity to reduce and/or remediate soil pollutants
- Increased capacity to reduce and/or remediate air pollutants (through solid waste diversion)

Green Infrastructure - Adaptation, Resilience and Disaster Mitigation Outcome
- Increased structural capacity and/or increased natural capacity to adapt to climate change impacts, natural disasters and/or extreme weather events

Public Transit Outcomes
- Improved capacity of public transit infrastructure
- Improved quality and/or safety of existing or future transit systems
- Improved access to a public transit system

Applications that address one of these alternative outcomes are subject to different eligibility criteria than for core outcomes. Projects aligned with one of the alternative outcomes will be subject to the criteria from the originating program, with the exception of population criteria and funding splits which will be taken from the RNC program. To
view the criteria for the alternative outcomes, please refer to section 2 and 3 of this Program Guide.

The Program Guides for the CCR and EQ programs can also serve as a reference and are available at: http://www.gov.bc.ca/Investing-in-Canada-Infrastructure-Program.

Funding is competitive and it is anticipated that there will be more projects that qualify for funding than there are program funds available. Eligible projects will be subject to technical evaluation and ranked according to the extent to which they meet the program’s objectives and the eligibility criteria.

The size of funding requests should be reasonable as compared to the funding envelope. Project applications under ICIP should ideally represent a standalone project funded solely under the program (scope distinctly separate from projects approved under other senior government programs) to avoid stacking and other program conflicts. Applicants are encouraged to phase projects where possible to achieve this where the program outcome can still be strongly met on completion of the phase.

Projects with total estimated eligible expenditures of $10 million or more will be subject to climate lens assessments (including a greenhouse gas emissions assessment that requires a cost-per-tonne calculation and a climate change resilience assessment) to be completed to British Columbia and Canada’s satisfaction prior to Canada’s approval of a project for funding. A climate change resilience assessment must be completed for all projects that seek funding under the Adaptation, Resilience and Disaster Mitigation outcome.

Approved projects will be subject to reporting requirements as the projects progress. Applicants are encouraged to familiarize themselves with the requirements described in this guide.

The Program supports projects that can be completed in five years following approval. Design work can be included as part of the capital grant and the program supports projects that are medium-term priorities (detailed design will be ready to begin one-year from application submission; projects are required to be at an advanced stage of planning but not “shovel-ready”).

An Oversight Committee consisting of representatives from the federal and provincial governments will be responsible for administration of the Agreement.

1.2 PURPOSE

The RNC Program will develop funding partnerships between the Federal Government, Provincial Government and ultimate recipients including: Local Governments, Indigenous Ultimate Recipients (both on and off-reserve), Not-for-Profits, and For-Profits (when partnered with a local government or Indigenous government).
The Program is focused on improving the quality of life in rural communities through investment in infrastructure. Investments in rural infrastructure will help build stronger, more inclusive communities, help safeguard the environment and the health of residents, and help support local, low-carbon green economies, as well as work towards reconciliation with Indigenous communities, both on and off-reserve.

Not all applicant types are eligible to apply for the alternative outcomes. Please refer to Section 2 for eligible applicant information.

1.3 APPLICATION INTAKE TIMELINE

The deadline for the second intake application is October 22, 2020 (11:59pm PDT).

Application materials for the Rural and Northern Communities Program second intake are now available. Staff are pleased to discuss potential applications.

A business BCeID credential and password are required to access the online application system and we encourage you to set this up now. See Accessing the Online Application on the website for details. BCeID requests are required to have been submitted at least 3 weeks prior to the program intake closing date. After receiving your BCeID credentials, you must request access to the online application system (the Local Government Information System).

1.4 LIMIT ON NUMBER OF APPLICATIONS

1.4.1 Application Limits

Municipalities may submit one application per intake.

Regional Districts may submit one application for each community. A community is defined as a settlement area within a regional district electoral area or an established or proposed service area.

Indigenous Ultimate Recipients may submit one application per intake. Please see Section 2.1.4 for the definition of Indigenous Ultimate recipients.

Not-for-Profit entities may submit one application per intake. Please see section 2.1.2 for the definition of Not-for-Profit organization.

For Profit organizations may submit one application per intake. The application must be supported by a local government or Indigenous governing body by way of a resolution from the appropriate council or board. This will not count as an application for the Local Government/Indigenous government. Please see section 2.1.3 for the definition of an eligible For-Profit organization and section 5.4 regarding application requirements prior to approval by Canada.
1.4.2 Application Parameters

Applications not approved from an earlier intake may be revised and a new application regarding the same project submitted to a subsequent intake. This will count towards the limit on the number of applications submitted.

An applicant may apply to more than one ICIP program for the same project, however, the project will only be funded through one program. If an application submitted to more than one program (for the same project) is successful, it will be funded under the program as determined by the Ministry. This decision is final and not subject to appeal.

If a project is approved under one ICIP Program, it becomes ineligible for funding under another ICIP Program. For example, if a project is approved for funding under the Environmental Quality (EQ) Program, the same project will become ineligible for funding in the RNC Program.

ICIP programs have different funding shares and eligibility considerations. Applicants are welcome to seek advice from program staff on where to best target application efforts according to community needs and alignment with program criteria.

All applications still count towards the application limits for the program.

1.5 COST-SHARING, STACKING AND LIMITS TO FUNDING AWARD

The funding provided towards infrastructure projects is cost shared by other partners that include the local governments, not-for-profit and Indigenous Ultimate Recipients. Applicants must be prepared to finance project construction and their cost-share of the project, as well as cover any cost over-runs. The program is claims based. Please see Section 9.7 Claims for additional details. The levels of federal and provincial contributions towards eligible program costs are:

<table>
<thead>
<tr>
<th>Ultimate Recipient</th>
<th>Government of Canada Contribution (up to)</th>
<th>Province of British Columbia Contribution (up to)</th>
<th>Total Senior Government Contribution (up to)</th>
<th>Ultimate Recipient Contribution (up to)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local government with a population between 5,000 - 25,000</td>
<td>50%</td>
<td>40%</td>
<td>90%</td>
<td>10%</td>
</tr>
<tr>
<td>Local government with a population &lt; 5,000</td>

<td>0%</td>
<td>75%</td>
<td>25%</td>
</tr>
</tbody>
</table>
Census 2016 population will be used to determine applicant eligibility and funding splits. Funding splits apply to costs eligible under the program only (not total or ineligible costs).

The remaining eligible project costs, ineligible project costs and cost overruns are the responsibility of the applicant. Where applicants plan to use or have applied for funds from other federal or provincial programs, the source of these funds must be indicated within the application and in the Confirmation of Funds document. The disclosure of other grant funding sources must be provided by the successful recipient up to the completion of the project.

Applicants who have confirmed or potential sources of other senior government funding for their project should note that this program is subject to federal stacking rules*:

- **Federal** funding towards the project is limited to the Government of Canada contribution in Table 1, from all federal sources. However, there is an exception for Indigenous Ultimate Recipient applicants who may, with approval from Infrastructure Canada, use other sources of federal funding up to 100% of eligible project costs.
  - Gas Tax Community Works Funds count towards the federal contribution for these purposes and will not be able to be utilized for the ultimate recipient’s funding contribution to the project.
- Applicants should familiarize themselves with stacking rules under other senior government programs, which funding under ICIP may affect.
- Applicants may utilize smaller provincial funding contributions towards their share of project costs. The preference is to separate project scope under multiple funding programs to have separate and clearly distinct projects under each.
- In all cases, no more than 100% of project costs will be funded (it is the responsibility of ultimate recipients to declare any overlapping funding).
- Project applications under ICIP should ideally represent a standalone project funded solely under the program (scope distinctly separate from projects approved under other senior government programs) to avoid stacking and other program conflicts. Applicants are encouraged to phase projects where possible to achieve this where the program outcome can still be strongly met on completion of the phase.

*Federal rules and policy are subject to Canada’s interpretation; this presents a summary only.

| For-Profit / private sector projects (including For-profit Indigenous applicants when applicable) | 25% | 15% | 40% | 60% |

*A local government is defined as the council of a municipality or the board of a regional district

**must demonstrate benefits and provide services extending beyond the reserve community, for First Nations projects located partially or entirely on reserve.

For Local Governments, the applicant’s Census 2016 population will be used to determine applicant eligibility and funding splits. For Indigenous Ultimate Recipients, Not-for-Profit and For-Profit organizations, the population (Census 2016) of the community where the project is being constructed will determine eligibility. The Program is designed to support communities that are in rural areas.

Applications from improvement districts or water utilities must be made by the sponsoring regional district or municipality. If the application is successful in obtaining program funding, the ownership of the infrastructure and associated assets must be transferred to the sponsoring regional district or municipality. An Improvement District Conversion Guide can be found here: https://www2.gov.bc.ca/assets/gov/british-columbians-our-governments/local-governments/governance-powers/improvement_district_conversion_guide.pdf
Eligible applicants are:

- submitting projects located outside the boundaries of Metro Vancouver (with the exception of Bowen Island) and the Capital Regional District (with the exceptions of communities within the Juan de Fuca Electoral Area, Salt Spring Island Electoral Area and Southern Gulf Islands Electoral Areas as defined on the Capital Regional District website).
- Applying for projects located in communities with a population under 25,000

2.1.1 Local Governments
A local government established by or under British Columbia statute that is:

- An incorporated municipality that has a population of 25,000 persons or less.
- A regional district submitting an application for a community that has a population of 25,000 persons or less. A community, for the purpose of application to the program, is considered to be a settlement area within a regional district electoral area. A community’s boundaries may also coincide with a service area boundary (existing or proposed).

2.1.2 Not-for-Profit
To be considered a Not-for-Profit organization, the applicant must be:

- An organization incorporated as a Not-for-Profit corporation or society formed under an Act of Canada or a province or territory of Canada and in good standing under the relevant Act.
- An organization that operates and provides programs for the benefit of the community and not solely the interests of its members.
- An organization with a location in British Columbia and be active within the province.

2.1.3 For-Profit
To be considered a For-Profit organization, the applicant must:

- Work in collaboration with one or more local government as defined above or an Indigenous government as defined below.
- Be an organization located within British Columbia.
- Submit a project with broad community benefits and the completed project will not affect other businesses.

2.1.4 Indigenous Ultimate Recipient
To be considered an Indigenous Ultimate Recipient, the applicant must be:

- A band council within the meaning of section 2 of the Indian Act.
• A First Nation, Inuit or Métis government or authority established pursuant to a self-government agreement or a comprehensive land claim agreement between Her Majesty the Queen in Right of Canada and an Indigenous people of Canada, that has been approved, given effect and declared valid by federal legislation.

• A First Nation, Inuit or Métis government that is established by or under legislation whether federal or provincial that incorporates a governance structure.

• A Not-for-Profit organization whose central mandate is to improve Indigenous outcomes, working in collaboration with one or more of the Indigenous entities referred to above, a local government, or British Columbia.

2.2 INELIGIBLE APPLICANTS

Ineligible applicants are:

• Federal entities, including federal Crown Corporations.

• Applicants not defined in Section 2.1.

• Applicants not operating within the Province of British Columbia.

3. PROJECTS

3.1 ELIGIBLE OUTCOMES

The Program reflects an outcome-based approach rather than a project category approach. In addition to clearly demonstrating public use and benefit, project eligibility is based on its ability to meet the following outcomes set out by Canada. A project must meet at least one of the following core or alternative outcomes to be considered eligible.

The core outcomes specific to the RNC program are:

• Improved food security

• Improved and/or more reliable road, air and/or marine infrastructure

• Improved broadband connectivity

• More efficient and/or reliable energy

• Improved education and/or health facilities (specific to Truth and Reconciliation Commission of Canada’s Calls to Action)

Alternative outcomes eligible under the RNC Program (drawn from other ICIP funding streams) are:
Community, Culture and Recreation (CCR) Outcome
• Improved access to and/or increased quality of cultural, recreational and/or community infrastructure for Canadians, including Indigenous peoples and vulnerable populations.

Green Infrastructure – Environmental Quality Outcomes (EQ)
• The project will increase the capacity to treat and/or manage wastewater
• The project will increase the capacity to treat and/or manage stormwater
• The project will increase access to potable water
• The project will increase capacity to reduce and/or remediate air pollutants (through solid waste diversion)
• The project will increase capacity to reduce and/or remediate soil pollutants

Green Infrastructure - Adaptation, Resilience and Disaster Mitigation Outcome
• Increased structural capacity and/or increased natural capacity to adapt to climate change impacts, natural disasters and/or extreme weather events.

Public Transit Outcomes
• Improved capacity of public transit infrastructure.
• Improved quality and/or safety of existing or future transit systems.
• Improved access to a public transit system.

Below is an example of a project type that would meet an alternative outcome under the RNC Program:

An application for a cultural centre project that would select the CCR outcome must be for a community with a population under 25,000 and the eligible applicant must be one of a Local Government, Indigenous Ultimate Recipient or Not-for-Profit organization, and the project must also meet the additional CCR criteria. A For-Profit applicant would be ineligible as per the CCR program.

3.2 ELIGIBLE PROJECTS

3.2.1 All Projects

The RNC Program must support public infrastructure, which is defined as “tangible capital assets in British Columbia primarily for public use or benefit”. To be eligible for funding under all outcomes, a project must:

a) be situated within, and for the direct benefit of, rural communities with a population of 25,000 or less based on 2016 Statistics Canada Census data
b) be located outside the boundaries of Metro Vancouver (with the exception of Bowen Island) and the Capital Regional District (with the exceptions of communities within the Juan de Fuca Electoral Area, Salt Spring Island Electoral Area and Southern Gulf Islands Electoral Areas as defined on the Capital Regional District website)

c) be put forward by an applicant who demonstrates that they will be able to operate and maintain the resulting infrastructure over the long term

d) meet one or more of the Program outcomes (see Section 3.1)

e) be for the construction, renewal, rehabilitation or material enhancement of infrastructure, excluding normal maintenance or operation

f) be supported by all requirements outlined in Section 5 – General Requirements

g) include an application and supporting documents that are comprehensive, credible, and feasible

h) stipulate a construction completion date of no later than March 31, 2026

i) be duly authorized or endorsed by a resolution from the appropriate governing body of the applicant’s organization, including but not limited to:

• in the case of a local government applicant, a resolution from its council/board.
• in the case of an Indigenous Ultimate Recipient, a resolution from its appropriate council/board or band council.
• in the case of a for-profit organization a resolution from its board of directors and an approved Memorandum of Understanding with the Local Government/Indigenous Government where the proposed project is to be located.
• in the case of a not for profit organization, a resolution from its board of directors.

j) be for broad public use or benefit and clearly demonstrate this within the application;

k) meet or exceed any applicable energy efficiency standards for buildings outlined in the Pan-Canadian Framework on Clean Growth and Climate Change where a building is constructed and exceed by 25% the energy efficiency requirements of the National Energy Code of Canada for Buildings 2017 (or the building will rank in the equivalent of the top 25% of its building type under ENERGY STAR [certification not required]);

l) for publicly accessible building(s), meet or exceed the requirement of the highest published accessibility standard in a jurisdiction, defined as the requirements in the Canadian Standards Association Technical Standard Accessible Design for the Built Environment (CAN/CSA B651-12), in addition to applicable provincial building codes and relevant local government bylaws;

m) if it is a health facility or education facility, have specific benefit to Indigenous peoples by advancing the Truth and Reconciliation Commission of Canada’s Calls to Action;

n) be in the Province of British Columbia; and,

o) meet all the Program criteria identified in this Guide.
3.2.2 Community, Culture and Recreation (CCR) Outcomes under the RNC Program

In addition to the criteria in section 3.2.1, in order to be eligible for funding under CCR outcomes, a project must:

- be community-oriented, non-commercial in nature and open for use to the public and not limited to a private membership;
- not serve as a home facility for professional or semi-professional sports teams; and,
- if a CCR project that provides dedicated space for healthcare or education, have specific benefit to Indigenous peoples by advancing the Truth and Reconciliation Commission of Canada’s Calls to Action (note that projects that solely construct health or education facilities that advance TRC should apply under RNC core outcome).

3.2.3 Environmental Quality (EQ) Outcomes under the RNC Program

In addition to the criteria in section 3.2.1, in order to be eligible for funding under EQ outcomes, a project must:

- demonstrate benefits and supply services extending beyond the reserve boundaries, for First Nations projects, located partially or entirely on reserve;
- wastewater projects must result in wastewater effluent that meets the Wastewater Systems Effluent Regulations, or provincial regulations where there is a federal equivalency agreement in place;
- drinking water quality following completion of a drinking water project must meet or exceed provincial standards;
- solid waste diversion projects must result in a measurable increase in the quantity of material diverted from disposal as measured against a baseline using the Generally Accepted Principles for Calculating Municipal Solid Waste System Flow;
- projects that reduce or remediate soil pollutants must be undertaken on properties that are contaminated, as confirmed by a Phase II Environmental Site Assessment.

A project utilizing the Environmental Quality outcomes will be required to meet the stipulation below in order to be considered eligible:

- Applications from improvement districts, water utilities, societies or private water systems must be made by a sponsoring regional district or municipality. If the application is successful in obtaining program funding, the ownership of the infrastructure and associated assets must be transferred to the sponsoring local government.

3.2.4 Adaptation, Resilience and Disaster Mitigation Outcomes under the RNC Program

No additional requirements to section 3.2.1.
3.2.5 Public Transit Outcomes under the RNC Program

In addition to the criteria in section 3.2.1, in order to be eligible for funding under Public Transit outcomes, a project must:

- ensure that public transit projects and active transportation projects that connect citizens to a public transit system are consistent with a land-use or transportation plan or strategy, and where applicable, that projects are consistent with the approved plans of regional transportation bodies.

3.3 INELIGIBLE PROJECTS

3.3.1 All core and alternative outcomes

A project will be deemed ineligible for all outcomes submitted under the Rural and Northern Communities Program if:

- the construction began or a tender has been awarded prior to the date of approval into the Program;
- the estimated project start date is more than 2 years after the date of application;
- the project will be completed after March 31, 2026;
- the project deals with assets owned by the Government of Canada including federal Crown Corporations;
- it does not meet the program outcomes outlined in Section 3.1;
- it involves relocation of whole communities;
- it is housing;
- it is an early learning and childcare facility;
- it is a health facility, or a primary or secondary education facility, except to benefit Indigenous peoples by advancing the Truth and Reconciliation Commission of Canada’s Calls to Action;
- it is a highway or trade corridor infrastructure, except for portions that connect communities that do not already have year-round road access;
- it is resource development infrastructure, notably industrial resource development access roads;
- it is an administrative building including Municipal Halls, Band Offices and Not-for-Profit Offices;
- it is located within the boundaries of Metro Vancouver (with the exception of Bowen Island) and the Capital Regional District (with the exceptions of communities within the Juan de Fuca Electoral Area, Salt Spring Island Electoral Area and Southern Gulf Islands Electoral Areas as defined on the Capital Regional District website).

The government endeavors to support projects through the program which are well planned, support local and provincial priorities, and will continue to provide community benefits over the long term supported by sustainable infrastructure management.
Projects may not be funded if they present risks to program funders, for example if any of the following are deemed likely:

- a high probability of the project not being able to be completed within the program timeline;
- potential for the project to not proceed due to applicant funding difficulties;
- a high probability that the project will require a significant change in scope to proceed due to limited planning being undertaken prior to application;
- the project may not provide the level of service identified;
- the project does not have public support;
- the project has the potential to cause environmental or social issues; or,
- the applicant does not demonstrate they are able to manage, maintain and finance the project over the long term.

The applicant should clearly demonstrate within the application that risks related to the project have been considered and include mitigation measures for these.

Note: that this does not preclude the consideration of innovative concepts and technology, and inclusion of these will be viewed positively where they are suitable for the purpose.

3.3.2 Community Culture and Recreation (CCR) Outcomes under the RNC Program

In addition to Section 3.3.1, a project utilizing the CCR outcomes will be deemed ineligible if it is:

- submitted by a private sector, for-profit Ultimate Recipient;
- a stand-alone daycare facility, for-profit daycare facility, daycare facility associated with a school board, or a daycare facility funded under Canada’s Early Learning and Child Care Initiative;
- a religious site that serves as a place of assembly for religious purposes, which includes among others a site, church, mosque, synagogue, temple, chapel (e.g., within a convent or seminary), shrine or meeting house;
- a professional or semi-professional sport facility that is primarily a commercial operation, such as those that serve major junior hockey leagues;

Elements of the project that include dedicated spaces for healthcare, education or tourism purposes, provincial or local government services, or for-profit uses are ineligible for contribution funding, except for dedicated healthcare or education spaces that benefit Indigenous people by advancing the Truth and Reconciliation Commission of Canada’s Calls to Action; as approved by Canada.
3.3.3 Environmental Quality Outcomes under the RNC Program*

In addition to Section 3.3.1, a project utilizing the EQ outcomes will be deemed ineligible if it:

- is submitted by a private sector, For-Profit or a Not-for-Profit Ultimate Recipient.

*A project utilizing the Environmental Quality outcomes will be required to meet the following stipulation in order to be considered eligible: Applications from improvement districts, water utilities, societies or private water systems must be made by a sponsoring regional district or municipality. If the application is successful in obtaining program funding, the ownership of the infrastructure and associated assets must be transferred to the sponsoring local government.

3.3.4 Adaptation, Resilience and Disaster Mitigation Outcomes under the RNC Program

In addition to Section 3.3.1, a project utilizing the Adaptation Resilience and Disaster Mitigation outcomes will be deemed ineligible if it:

- it includes investment in emergency services infrastructure;
- it involves relocation of whole communities;
- it relates to seismic risks;
- is submitted by a private sector, For-Profit or a Not-for-Profit Ultimate Recipient.

3.3.5 Public Transit Outcomes under the RNC Program

In addition to Section 3.3.1, a project utilizing the Public Transit outcomes will be deemed ineligible if it:

- is submitted by a For-Profit Ultimate Recipient;
- involves inter-city bus, rail, port or ferry infrastructure that is not part of a public transit system. Public transit is considered to be a distinct mode of transportation conveyance that generally refers to the movement of passengers within a community.

3.4 PROJECT EXAMPLES

Examples of projects which may meet the outcomes in Section 3.1 will be made available on the Rural and Northern Communities Program website. This is not an exhaustive list and is intended as a sampling only. The Program utilizes an outcome-based approach rather than defined categories to allow for innovation and flexibility. Projects that support outcomes and align with other eligibility criteria will be considered for funding.
3.5 PROJECT SIZE

Projects should provide the best value for the estimated project expenditures and be sized appropriately to their location and the community directly benefitting.

The ICIP-RNC funding decision takes into consideration multiple factors including alignment with program criteria, funding distribution, and program oversubscription. As such, a grant funding request representing less than the 10% of the program funding has a higher possibility of success as it provides more communities access to funding. Applicants should be guided by the project size from applications that were shortlisted in the previous ICIP-RNC intake:

- An average grant request of $2.07M; and
- One single largest grant of $7.4M.

Appropriately sized and scoped project applications are strongly encouraged.

When applying, consider whether phasing as an option for larger projects. Where a phase is submitted for funding consideration, each phase should independently result in outcomes which align with the ICIP-RNC program objectives.

If you have a project that you are considering applying for with a phased approach, need to discuss a smaller scope for a larger scale capital investment project for your community, or are seeking a grant to cover a portion of the project budget (with the remaining funds confirmed from other sources), we encourage you to call program staff to discuss prior to applying.

Applicants are also advised that projects with total estimated eligible expenditures of $10 million or more will be subject to climate lens assessments (including a greenhouse gas emissions assessment that includes a cost-per-tonne calculation and a climate change resilience assessment) to be completed to British Columbia and Canada’s satisfaction prior to Canada’s approval of a project for funding.

4. COSTS

See Appendix C for examples of eligible and ineligible costs.

4.1 ELIGIBLE COSTS

Eligible costs will include the following:

a) costs considered to be direct and necessary for the successful implementation of an eligible project, in the opinion of Canada and British Columbia, excluding those identified under Section 4.2 (Ineligible Costs);
b) the capital costs of constructing or renovating a tangible asset, as defined and determined according to generally accepted accounting principles in Canada;

c) all planning (including plans and specifications), assessment and design costs specified in the agreement such as the costs of environmental planning, surveying, engineering, architectural supervision, testing and management consulting services, to a maximum of 15% of total funding award;

d) costs related to meeting specific Program requirements, including completing climate lens assessments (as outlined in Section 6) and creating community employment benefit plans (costs for climate lens assessments can be incurred prior to project approval, but can only be paid if and when a project is approved by both the Province and Canada for contribution funding);

e) the costs of engineering and environmental reviews, including environmental assessments and follow-up, as defined in the Impact Assessment Act, 2019 and the costs of remedial activities, mitigation measures and follow-up identified in any environmental assessment;

f) the costs of Indigenous consultation, and where appropriate, accommodation;

g) the costs directly associated with joint federal and provincial communication activities (press releases, press conferences, translation, etc.) and with federal and provincial project signage;

h) the incremental costs of the eligible recipient’s employees related to construction of the project may be included as eligible costs under the following conditions:
   i. The recipient is able to demonstrate that it is not economically feasible to tender a contract;
   ii. The employee or equipment is engaged directly in respect of the work that would have been the subject of the contract; and
   iii. The arrangement is approved in advance and in writing by the Province and by Canada.

Note: Requests for the use of own labour and equipment will be subject to both provincial and federal approval and will only be allowed in certain circumstances. Approval must be sought prior to work being carried out.

Eligible costs are limited to the following:

a) costs incurred between the project approval date and the project completion date set out in the Shared Cost Agreement, except for costs associated with completing climate lens assessments and creating community employment benefit plans, which are eligible before project approval, but can only be paid if and when a project is approved by the Province and Canada and a signed Shared Cost Agreement is in place.

4.2 INELIGIBLE COSTS

The following are deemed ineligible costs:
a) costs incurred prior to the approval of the project, except for expenditures associated with completing climate lens assessments and creating community employment benefit plans as required (but can only be paid if and when a project is approved by the Province and Canada and a signed Shared Cost Agreement is in place);
b) costs incurred after the project completion date set out in the Shared Cost Agreement with the exception of expenditures related to audit and evaluation requirements pursuant to the agreement;
c) costs related to developing a funding application and application supporting documentation;
d) costs incurred for cancelled projects;
e) costs of relocating entire communities;
f) costs related to dedicated space for emergency services;
g) land acquisition;
h) real estate and other fees related to purchasing land and buildings;
i) financing charges, legal fees and interest payments on loans, including those related to easements (e.g. associated surveys);
j) costs associated with operating expenses and regularly scheduled maintenance work;
k) leasing land, buildings and other facilities;
l) leasing of equipment other than equipment directly related to the construction of the project;
m) overhead costs, including salaries and other employments benefits, direct or indirect costs associated with operating expenses, administration and regularly scheduled maintenance work, and more specifically any costs related to planning, engineering, architecture, supervision, management and other activities normally carried out by staff, except those indicated in Eligible Expenditures;
n) costs related to furnishing and non-fixed assets which are not essential for the operation of the asset/project;
o) any goods and services costs which are received through donations or in kind;
p) taxes for which the ultimate recipient is eligible for a tax rebate and all other costs eligible for rebates;
q) all capital costs, including site preparation, vegetation removal and construction costs, until Canada has been satisfied that the federal requirements under the Impact Assessment Act, 2019, other applicable federal environmental assessment legislation that is or may come into force during the term of the Agreement, and other applicable agreements between Canada and Indigenous groups have been met to the extent possible and continue to be met; and
r) all capital costs, including site preparation, vegetation removal and construction costs, until Canada is satisfied that any legal duty to consult, and where appropriate, to accommodate Indigenous groups or other federal consultation requirement, has been met and continues to be met.
5. GENERAL REQUIREMENTS

5.1 REQUIRED INFORMATION

Please ensure that your application addresses the following:

- Application form and mandatory documents have been filled out in full and submitted online using the Local Government Information System (LGIS).
- Application must be submitted by an "eligible applicant" (defined in Section 2).
- Application must be for an "eligible project" (defined in Section 3).
- Application includes an authorization to proceed with the project from all appropriate approval authorities.
- Application includes a commitment to pay the applicant share of the eligible costs and ongoing (operating and other) costs associated with the project.
- Project is consistent with applicable provincial, regional, municipal, or band plans (e.g., land-use, integrated watershed management plan, municipal official plans, Integrated Community Sustainability Plans).
- Major risks with a potential impact on the project during construction or once completed have been considered, and, where applicable, a mitigation plan developed.
- All applicable legislative or regulatory requirements have been or will be met. This includes requirements for a Federal Environmental Assessment (FEA) process, provincial Environmental Assessment process and requirements for Indigenous Consultation. Where a project is excluded from a review under Impact Assessment Act, 2019 it may require permits or approvals from local, regional or provincial government agencies. It is the applicant’s responsibility to ensure that any additional approvals and permits are identified and/or obtained.
- Where a building is constructed or material rehabilitated, the energy efficiency requirements of the National Energy Code of Canada for Buildings 2017 will be exceeded by 25% or the building will rank in the equivalent of the top 25% of its building type under ENERGY STAR (certification not required), as well as meeting or exceeding any applicable energy efficiency standards for buildings outlined in the Pan-Canadian Framework on Clean Growth and Climate Change.
  - Additional resources include:
    - BC Energy Efficiency https://www2.gov.bc.ca/gov/content/industry/construction-industry/building-codes-standards/energy-efficiency
- For newly constructed or materially rehabilitated infrastructure intended for use by the public, the project will provide appropriate access for persons with disabilities, including meeting or exceeding the requirements of the Canadian Standards
Association Technical Standard Accessible Design for the Built Environment (CAN/CAS B651-04) or any acceptable highest published accessibility standard, in addition to applicable provincial building codes and relevant local government by-laws.

- BC Building Access Handbook

- Accessible design for the built environment

Projects that are selected for funding will be required to provide additional information as outlined in Section 5.4 to British Columbia and Canada’s satisfaction prior to Canada’s approval of a project.

5.2 FUNDING

The applicant must demonstrate that their share of funding has been, or is being secured, and that a plan is in place to cover any cost overruns beyond budgeted contingencies. Further, they must demonstrate that funds have been committed to operate, maintain and plan for replacement within the application. Also see the “Evidence of Secured Funds”, “Confirmation of Funds” and “Council/Board Resolution” sub-sections under Section 6.

Applicants must be prepared to finance project construction. Please see Section 9.7 for additional details.

5.2.1 Local Government Recipients (Population between 5,000 and 25,000)

If a local government has accumulated funds in a statutory reserve to utilize as their share of project costs, please submit evidence of these funds at the time of application and by filling out the confirmation of funds form.

If a local government intends to borrow a share of its costs, a bylaw to authorize the borrowing of funds should receive third reading by a local government prior to applying to the program. A copy of that bylaw should accompany the application. Municipalities that intend to borrow should also submit a Liability Servicing Limit Certificate for the amount authorized in the bylaw. Please also submit information about any sources of applicant share of project costs other than reserves or borrowing. Providing the evidence of the loan authorization submission and supporting information under the Program is separate from the submission for approval by the Inspector of Municipalities. That is a separate process that must be completed when approval by the Inspector is desired. A preference may be given to funding projects that demonstrate secured funding.

A financial analysis will be completed as part of the application review. This will include a review of information submitted within the application and in addition, for local governments, a review of the periodic financial information submitted to the Ministry of
Municipal Affairs and Housing (the Ministry). This required periodic financial reporting information is available on Ministry files, and thus does not need to be submitted with an application. However, local government applicants should recognize that the ranking of applications may reflect the extent to which applicants have met financial criteria such as having:

- met the deadlines for legislated financial reporting, including the financial plan, audited financial statements, Local Government Data Entry (LGDE) forms and Statement of Financial Information (SOFI);
- submitted the financial plan to the Ministry to meet requirements of s 165 of the Community Charter for municipalities and Section 374 of the Local Government Act for regional districts; and
- measures of financial stability and sustainability which include property tax structures and development costs charge structure.

5.2.2 Local Governments (population less than 5,000)

Local governments with populations less than 5,000 are eligible to receive 100% funding towards eligible costs. Proof of ability to fund ineligible costs and cost overruns will still be required. Also see the “Evidence of Secured Funds”, “Confirmation of Funds” and “Council/Board Resolution” sections under Section 6.

5.2.3 Indigenous Ultimate Recipients (on – reserve)

The applicant must demonstrate that their share of funding has been secured, and that a plan is in place to cover any cost overruns beyond budgeted contingencies. Further, they must demonstrate that funds have been committed to operate, maintain and plan for replacement within the application. Also see the “Evidence of Secured Funds”, “Confirmation of Funds” and “Council/Board Resolution” sections under Section 6.

In addition, if using other senior government funding towards the project, the applicant must supply the funding source/program name, amount of funding and a contact name/number from the program.

5.2.4 Indigenous Ultimate Recipients (off – reserve)

The applicant must demonstrate that a plan is in place to cover any ineligible costs and cost overruns beyond budgeted contingencies. Further, they must demonstrate that funds have been committed to operate, maintain and plan for replacement within the application. Also see the “Evidence of Secured Funds”, “Confirmation of Funds” and “Council/Board Resolution” sections under Section 6.

5.2.5 Not-For-Profit Recipients and For-Profit Recipients

The applicant must demonstrate that their share of funding has been secured and that a plan is in place to cover any ineligible costs and cost overruns beyond budgeted
contingencies. Further, they must demonstrate that funds have been committed to operate, maintain and plan for replacement within the application. Also see the “Evidence of Secured Funds”, “Confirmation of Funds” and “Council/Board Resolution” sections under Section 6.

5.3 SELECTION PROCESS AND CRITERIA

The Program is merit based and projects are subject to a comprehensive technical ranking assessment and internal provincial review, with a list provided to the Oversight Committee and recommendations submitted to Canada for final approval. Previous intakes have been oversubscribed, and not all good applications have been able to be awarded funding.

Applicants must ensure that their application demonstrates how the project will be eligible for funding (Section 3.2), how the project benefits align with one or more of the outcomes (Section 3.1), how the project aligns with program criteria described in the application form and in this guide, and how the project is supported by sustainable management and planning.

In addition to consideration of the required information in Section 5.1 and 5.2, projects will be evaluated with regard to the degree to which they meet the following:

- represent good value for money;
- contribute to community objectives and is based on community need for services;
- enhance and protect public health;
- enhance and protect environmental health;
- support sustainability principles;
- are consistent with integrated long-term planning and management;
- demonstrate efficient use of resources throughout the life of the assets created;
- are situated within, and advances, the organization’s capital works and financial plans;
- exhibit long-term sustainability, including operational viability, asset management for sustainable service delivery, and environmental sensitivity;
- will be able to be financially supported by the organization over the life of assets created including lifecycle and renewal costs;
- are supported by a high level of planning including identifying appropriate levels of service and demand;
- contribute towards reduction in demand for natural resources;
- consider adaptation and mitigation to climate change; and
- use the best available economically feasible technology, if applicable.

Projects that support the key actions identified as part of British Columbia’s commitments
under the *Pan-Canadian Framework on Clean Growth and Climate Change* may also be given additional priority.

The internal provincial review may include consideration of factors such as regional distribution of funding, previous funding, communities in need, and unmitigated project risks.

### 5.4 REQUIREMENTS PRIOR TO APPROVAL BY CANADA

Shortlisted projects will be given initial ‘approval in principle’ by the Province. Additional requirements must be met prior to the project being formally accepted into the program. The following will be required to be completed to the Province’s and Canada’s satisfaction prior to Canada’s approval of a project into the program:

- A federal form to determine if there are any federal environmental assessment requirements that could apply to the project and if there is a requirement to consult with Indigenous Groups.
- For all projects with total estimated eligible expenditures of $10 million or more, a climate lens - greenhouse gas emissions assessment that includes a cost-per-tonne calculation as required by Canada**
- For all projects with total estimated eligible expenditures of $10 million or more, a climate lens - climate change resilience assessment**
- For all projects that seek funding under the Adaptation, Resilience and Disaster Mitigation Outcome, a climate change resilience assessment.**
- For all projects with total estimated eligible expenditures of $25 million or more, the expected results for community employment benefits as required by Canada, unless waived at the discretion of the Province (see section 9.5 for additional information)***

The following may be required on a case by case basis at the discretion of British Columbia:

- For projects with total estimated eligible expenditures of $15 million or more and a sufficiently complex nature, a Value Engineering assessment.

The intent of the Provincial “approval in principle” is to give applicants some assurance that funding will be received prior to having to complete these additional requirements.

Shortlisted projects that include sole sourced contracts, that involve federal assets, or that are submitted by a for-profit applicant may require additional federal approval requirements and requests for information. A federal Treasury Board submission process, which can add 6 months to the approval process, will be triggered where a project involves federal assets, is submitted by a for-profit applicant, or includes sole sourcing, unless contracts:
• have an estimated value below $40,000 for construction, or $100,000 for architectural and/or engineering services; or
• are with a public sector entity; or
• can only be performed by one person or entity; or
• are with an Indigenous organization and/or governing body and there is a benefit to an Indigenous community.

*Note that costs associated with greenhouse gas emissions and climate change resilience climate lens assessments will be considered as eligible as part of the funding.

**Information on the requirements for climate lens assessments can be found at: [https://www.infrastructure.gc.ca/pub/other-autre/cl-occ-eng.html](https://www.infrastructure.gc.ca/pub/other-autre/cl-occ-eng.html).

***Information on the requirements for community employment benefits reporting can be found at: [http://www.infrastructure.gc.ca/pub/other-autre/ceb-ace-eng.html](http://www.infrastructure.gc.ca/pub/other-autre/ceb-ace-eng.html).

6. APPLICATION PROCESS

All proponents must complete and submit an online application form via the LGIS. A Business BCeID is required to set up access in LGIS; this can take up to 15 business days. New users are encouraged to start the process of requesting a BCeID as early as possible. See the [Accessing the Online Application](https://www.infrastructure.gc.ca/pub/other-autre/ceb-ace-eng.html) document on the [ICIP RNC website](https://www.infrastructure.gc.ca/pub/other-autre/ceb-ace-eng.html) for more details.

A statement by a Financial Approver and Project Manager certifying that the information contained in the application is correct and complete will be required as part of the online application submission.

The following examples of mandatory documents (15 MB limit per document) must be clearly labeled and will be required to be uploaded at time of submission to LGIS as part of your online application. Types of mandatory documentation may vary by applicant type. The documents include, but are not limited to:

• Council/Board/Band Council Resolution
• Project Location: .KML file (see directions on the ICIP RNC website)
• Detailed Cost Estimate (Must use the template on the ICIP RNC website)
• Evidence of Secured Funds (when applicable)
• Confirmation of Funds (Must use the template on the ICIP RNC website)
• Site Plan/Map
• Project Study or Plan
• List and status of required licenses, permits and approvals (or indicate if not applicable)
• Hazardous Risk Vulnerability Assessment or Risk Study (for Adaptation, Resilience and Disaster Mitigation projects)

• For all Indigenous Ultimate Recipient Applicants that are a Not-for Profit entities with a central mandate that improves Indigenous outcomes:
  ▪ A letter from the benefitting Indigenous community/nation supporting the project

• Community Energy Plan (for all Efficient and/or Reliable Energy projects)

• Water Conservation Plan (for all Drinking Water and Wastewater projects)

• Council/Board/Band Council endorsement for the Water Conservation Plan (for all Drinking Water and Wastewater projects)

• For all Education and/or Health facilities (specific to the Truth and Reconciliation Commission of Canada's Calls to Action)
  o a letter of support from the Indigenous Community where the project is located.

• For all Public Transit outcome projects:
  o a Land-use or Transportation Plan or Strategy

Attached supporting documents should be clearly labelled, succinct and submitted in a searchable format where possible. Where attachments are large, for the document to be included in the Ministry review, specific sections of each document should be referenced in application fields or highlighted.

Applicants are responsible for ensuring full and accurate information is submitted. Applications will not be reviewed unless all necessary information has been submitted, including mandatory documents.

The following documents may be used to support the application; however, the relevant information should be referenced within the application:

• Partnership agreement/Letter of Support/Memorandum of Understanding (MOU) between project partners (if applicable)

• Options Assessment

• Business Plan

• Cost Benefit Analysis or Other Study

• Design Drawings or Details

• Letters of Support

• Asset Management Plan

Letters of support, partnership agreements, or MOUs from the other partners are recommended for projects done in partnership with others or that will have joint
ownership. Letters from health officers are useful for projects that support public health objectives.

6.1 PROJECT LOCATION - .KML FILE

The project location must be submitted in the form of a .KML file. Please see the instructions for creating a .KML file on the ICIP RNC website.

6.2 COUNCIL/BOARD/BAND COUNCIL RESOLUTION

A resolution or bylaw endorsing the project must be approved by the appropriate authorized governing body such as a council, board or band/tribal council and must be submitted within one month of the program closing date. The resolution or bylaw will commit the proponent to contributing its share of the eligible costs, ineligible costs and potential over-runs related to the project. An example of the resolution can be found on the ICIP RNC website.

The resolution/bylaw must identify the source of the proponent’s share of the project costs. The resolution should show support for the project from a municipality’s Council, a regional district Board, or an Indigenous applicant’s band council (or other appropriate authorized body).

Where possible, the resolution should be submitted as part of the application package. Where the applicant is unable to submit the resolution with the application (e.g. due to timing considerations with when the Council, Board or band council meets), it must be submitted within one month after the submission deadline. Please indicate on the application form when submission of the resolution will be expected to occur.

Projects not supported by an appropriate resolution will not be reviewed.

6.3 DETAILED COST ESTIMATE

A Detailed Cost Estimate Template has been provided on the ICIP RNC website and submission of a completed cost estimate is mandatory. Detailed costs estimates must include but are not limited to: an itemized description, cost per unit of measure, number of units, as well as design, engineering, contingency costs, and tax rebate breakdowns. Applicants are to identify which costs are eligible and which are ineligible and to state what class or confidence level the estimates are (e.g., class B or the level of confidence of the proposed cost). Cost estimates must be dated.

The preference is that submitted projects are planned to the degree that required works are identified, generally represented by a cost estimate of Class C (representing +/- 25 to 40% variability in costs) or better (Class A or B). This creates more certainty of the estimated costs involved and allows for these costs to be included as part of the proportional grant amount, as opposed to unexpected costs needing to be addressed.
by a successful applicant outside of the grant as they arise. Applicants are advised to consider the potential cost variability of their cost estimate based on the current level of design that has been completed when assigning contingencies.

Projects where design remains preliminary in nature should ensure that plans are in place to cover potential cost overruns and that adequate contingencies are included within the cost estimate. Otherwise, there may be additional risk linked to the proposed project given the potential cost uncertainties.

If the project as submitted in the application is a phase or part of a wider initiative, the detailed cost estimate should only include the costs for the project being applied for.

If a project can be broken into phases, while still meeting a program outcome, and the applicant would be willing to accept funding for an independent phase(s), each distinct phase should be clearly described. This should be demonstrated in the accompanying Detailed Cost Estimate template on the ICIP RNC website by completing a separate tab within the cost breakdown for each phase in addition to the full project cost breakdown in the original tab. The project description must be organized to easily understand each of the distinct phases of the project.

It is important to note that projects will be reviewed in the context of the Impact Assessment Act (IAA), 2019 and regulations as discussed in Section 7. Where applicable, project cost estimates should include costs to conduct an Impact Assessment study.

Projects requiring climate lens assessments as outlined in Section 5.5 should include costs to complete these and have them attested to by a qualified assessor.

**IMPORTANT:** It is necessary to provide up-to-date, detailed, and complete cost estimates and identify and account for inflation, increasing construction costs and possible delays in start and completion dates. Factors that may delay construction include: the timing of the grant announcement date, fisheries window, public consent, weather and construction seasons, delays in the IAA process, right of way negotiations, regulatory applications, indigenous consultation, etc. It is important to plan your project to start following final project approvals. The second intake is designed to target projects which will be initiated starting in 2021 or 2022. The Program supports projects that can be completed in five years following approval. Design work can be included as part of the capital grant and the program supports projects that are medium-term priorities (detailed design will be ready to begin one-year from application submission; projects are required to be at an advanced stage of planning but not “shovel-ready”).

### 6.4 Evidence of Secured Funds

Evidence that the applicant’s full share of funding has been or will be secured is required. This evidence may be in the form of recent bank statements showing that the amount is on hand, a line of credit letter of approval (for non-local government entities), staff reports
and/or resolutions of board/council directing the use of reserve funds, and for local governments who are recovering their share of funding through borrowing, a Liability Servicing Limit Certificate indicating that borrowing is within a local government’s assent free borrowing limit, a loan authorization bylaw that has received third reading, and/or a date that borrowing has been approved through a formal public approval process and a copy of the related bylaw. Other evidence may be accepted at the discretion of the Ministry.

Not-for-Profit and For-Profit entities must provide a financial statement, please. Please upload:

- An internally prepared financial statement for projects with eligible costs up to $500,000 or,
- A statement reviewed by an independent public accountant for projects with eligible costs $500,001 and above.

The applicant will be prompted for required documents through the LGIS online application process.

6.5 CONFIRMATION OF FUNDS

A Confirmation of Funds template has been provided on the ICIP RNC website and submission of the completed form is mandatory. This form will assist the applicant and the Ministry with ensuring that all sources of funds are confirmed for applicant portions and that there are sufficient funds for cost overruns, if they occur.

6.6 SITE PLAN/MAP

A site plan should include the location and the general layout of the works to be included in the proposed project.

6.7 FEASIBILITY STUDY OR PLAN

This study should be completed to report initial planning work and should identify what the project works will include, and why the project is being considered. It should also address capital and lifecycle expenditures, annual operating costs, emerging technologies, environmental considerations and societal impacts. This study should include more information than will be supplied in the brief project description and list of works.

This study can be completed by the organization itself or an external consultant, and existing work can be submitted in order to fulfill this requirement; a new study doesn’t need to be commissioned in support of the grant application. Where no study exists, a summary of planning actions to date can be submitted.
6.8 LIST OF REQUIRED LICENSES, PERMITS AND APPROVALS

All applicants are required to investigate and submit a list of licenses, permits and approvals which are required for the project to proceed and they must advise on the status of any that have been applied for. This demonstrates that a project is on track and/or that the proponent has considered and commenced applications for these required items.

For projects with Environmental Quality outcomes, there is now a requirement under the Water Sustainability Act for a water license for all users who divert and use groundwater from a well or dugout for non-domestic purposes.

The Ministry of Environment & Climate Change’s brochure provides information: https://www2.gov.bc.ca/assets/gov/environment/air-land-water/water/laws-rules/gw_licensing_brochure.pdf.

6.9 WATER CONSERVATION PLAN FOR GREEN - EQ OUTCOMES

A current Council, Board, or Band Council endorsed Water Conservation Plan will be required for any project application related to Drinking Water or Wastewater. To meet the requirement, the plan will need to have been updated within the last five years. Please attach or provide a link to the plan and provide a copy of the Council or Board endorsement of the plan. The plan should be relevant to the area which will be served by the project.

Where a water or wastewater system is being transferred to a local government, a commitment should be included to extend the water conservation activities to the transferred system.

It is expected that Drinking Water or Wastewater projects which create new infrastructure will consider how water can be used efficiently or reduced as part of the project design. Advice on creating a water conservation plan can be found here: http://www.obwb.ca/water-conservation-guide-for-bc-now-available/. An additional tool for exploring water conservation options is: http://waterconservationcalculator.ca

6.10 HAZARDOUS RISK VULNERABILITY ASSESSMENT (FOR ADAPTATION, RESILIENCE AND DISASTER MITIGATION PROJECTS)

Projects that are submitted to the Adaptation, Resilience and Disaster outcome require that a Hazardous Risk Vulnerability Assessment (HVRA) be completed. If you do not have one completed prior to the intake closure, please contact the Ministry. The purpose of the HVRA is to identify potential hazards to the community through an evaluation of the likelihood and severity of the potential hazard including impacts on residents,
infrastructure and environment. The assessment provides information on the resiliency of the community and provides mitigation and response strategies.

For an example of a Hazardous Risk Vulnerability Assessment please see: https://www2.gov.bc.ca/gov/content/safety/emergency-preparedness-response-recovery/local-emergency-programs/hazard-risk-and-vulnerability-analysis

6.11 COMMUNITY ENERGY PLAN/ DEMAND-SIDE MANAGEMENT PLAN (FOR EFFICIENT AND/OR RELIABLE ENERGY PROJECTS)

Projects that are submitted under the More Efficient and/or Reliable Energy outcome require a Demand-side Management Plan or Community Energy Plan* be completed. If you haven’t completed one of these plans, please call the Ministry to discuss.

A Demand-side management plan studies both energy conservation (behavioural) and energy efficiency (technology) measures. For the purpose of the program, demand side management initiatives could be included and are defined as reducing citizens’ demand for electricity by providing incentives, education, etc.

A Community Energy and Emissions plan is a long-term plan that includes strategies to improve energy efficiency and reduce greenhouse gas emissions within a community. The plan will help to create goals and objectives for the community through the use of green energy solutions.

*For an example of a Community Energy and Emissions Plan, please refer to: https://www.bchydro.com/powersmart/business/programs/sustainable-communities/ceep.html

6.12 CONTACT INFORMATION

Applications and mandatory documents will be submitted through the LGIS online application. Questions can be directed to:

Ministry Municipal Affairs and Housing
Phone: 250-387-4060
Email: infra@gov.bc.ca

7. IMPACT ASSESSMENT ACT, 2019 Requirements

The Impact Assessment Act, 2019 (the Act) and its regulations are the legislative basis for the federal practice of environmental assessment. A Federal Environmental Assessment (FEA) is a process to evaluate the environmental effects and identify measures to mitigate potential adverse effects of a proposed project. The Act ensures that the environmental effects of a project are carefully reviewed before a federal department/agency decides to allow the proposed project to proceed.

All projects that receive funding through the Agreement must comply with the Act. However, since not all projects are on federal lands or affect the environment in a significant way, many projects may not require an environmental assessment under the Act. It is the responsibility of the Proponent to determine the FEA requirements and contact the relevant Federal departments, as indicated below.

### 7.1 **HOW TO DETERMINE IF AN IMPACT ASSESSMENT/FEDERAL ENVIRONMENTAL ASSESSMENT (FEA) IS REQUIRED**

A FEA will be required under **Impact Assessment Act, 2019** if the project meets the definition of a designated project and or it is located on federal lands.

#### 7.1.1 Is it a designated project?

The Project List (Also known as the *Physical Activities Regulation*) identifies types of projects that may require an assessment under the Act: [http://laws-lois.justice.gc.ca/eng/regulations/SOR-2012-147/page-1.html#docCont](http://laws-lois.justice.gc.ca/eng/regulations/SOR-2012-147/page-1.html#docCont).

Only projects on the designated project list require FEA or projects designated by the Minister due to potential for environmental effects or public concerns. Should the Project meet the definition of a designated project, proponents must provide to the Impact Assessment Agency of Canada a description of their proposed project to initiate the process.

#### 7.1.2 Is the project on federal lands?

Projects on federal lands are subject to an assessment of environmental effects. Information must be provided to program staff on whether the project will be located on federal lands. Proponents must engage with the federal lands’ owner to establish the process and requirements to meet the **Impact Assessment Act**, 2019. For more information refer to the Impact Assessment Process Overview available at: [https://www.canada.ca/en/impact-assessment-agency/services/policy-guidance/impact-assessment-process-overview.html](https://www.canada.ca/en/impact-assessment-agency/services/policy-guidance/impact-assessment-process-overview.html)

### 7.2 **TIME AND COST CONSIDERATIONS**

Time and Costs involved in completing the FEA and associated studies will depend on site accessibility and the availability of local expertise, the nature and complexity of the project, potential environmental implications and the level of public/Indigenous interest.
When developing the project cost estimates, please consider the potential expenses involved in preparing a FEA.

### 7.3 DIALOGUE WITH ENVIRONMENTAL AGENCIES

For projects that require a FEA, proponents are encouraged to contact relevant federal departments or provincial ministries (e.g., Fisheries & Oceans Canada, Environment Canada - Canadian Wildlife Service or BC Ministry of Environment). A proactive discussion with such agencies during the project-planning phase will assist in identifying potential environmental impacts and necessary mitigation measures.

**IMPORTANT NOTE:**

- Where necessary, ICIP funding is conditional upon completion of an environmental assessment review of the project under the Act with a satisfactory outcome.
- Starting BC and Canada environmental assessments early in the planning of a project will assist the British Columbia and the Government of Canada in discharging the legal duty to consult and, if appropriate, accommodate Indigenous peoples when the Crown contemplates conduct that might adversely impact established or potential Indigenous or Treaty rights.
- Successful applicants must agree to adhere to mitigation requirements as may be specified in the FEA and/or recommended by federal departments and agencies participating in the review process.
- Any changes to the scope of the project while it is underway could re-open the FEA review and cause the project to have construction delays. In addition, project scope changes need to be brought to the Ministry program staff immediately as they need the Province’s approval prior to going forward with any changes to the original approved scope.

### 7.4 OTHER REGULATORY CONSIDERATIONS

Projects must meet all applicable federal and provincial environmental legislation and standards. Even though a project is excluded from a review under the *Impact Assessment Act*, 2019 it may require permits or approvals from local, regional or provincial government agencies. It is the applicant’s responsibility to ensure that any additional approvals and permits are obtained.

### 7.5 B.C. ENVIRONMENTAL ASSESSMENT PROCESS

Proposed projects or modifications to existing projects that are subject to the *British Columbia Environmental Assessment Act* (BCEAA) are specified in the Environmental Assessment Reviewable Project Regulations by project type, design capacity, and diversion or extraction rate. All applicants should review a copy of the regulations for
information on projects that may be subject to the BCEAA. Information must be provided to Ministry of Municipal Affairs and Housing program staff on whether the project will be subject to BC Environmental Assessment.

Refer to BC Environmental Assessment Office’s website at www.eao.gov.bc.ca or contact their office at:

2nd Floor 836 Yates Street
PO Box 9426 Stn Prov Govt
Victoria, BC V8W 9V1
Email: eaoinfo@gov.bc.ca

8. INDIGENOUS CONSULTATION

Proponents may be required to consult with Indigenous groups if the project is in an area where Indigenous communities have potential or established Indigenous or Treaty rights. It is the responsibility of the Proponent to determine whether the project requires consultation with Indigenous groups. Information must be provided to program staff on whether the project will be subject to Indigenous Consultation.

If required, Canada must be satisfied that for each Project:

- Indigenous groups have been notified and, if applicable, consulted;
- If applicable, a summary of consultation or engagement activities has been provided, including a list of Indigenous groups consulted, concerns raised, and how each of the concerns have been addressed, or if not addressed, an explanation as to why not;
- Accommodation measures, where appropriate, are being carried out by British Columbia or Ultimate Recipient at their own cost; and
- Any other provided information that Canada may deem appropriate.

No site preparation, vegetation removal or construction will occur for a Project and Canada has no obligation to pay any Eligible Expenditures that are capital costs, as determined by Canada, until Canada is satisfied that any legal duty to consult, or other federal consultation requirement, and where appropriate, to accommodate Indigenous groups has been met and continues to be met.

For more information on British Columbia’s consultation resources and consultation policy:

https://www2.gov.bc.ca/gov/content/environment/natural-resource-stewardship/consulting-with-first-nations

http://www2.gov.bc.ca/gov/DownloadAsset?assetId=9779EDACB673486883560B59BEBE782E
9. **APPROVED APPLICATIONS**

Successful recipients will be notified in writing if their application is approved.

The Province of British Columbia will provide a Shared Cost Agreement* to those proponents approved for funding. The Shared Cost Agreement will outline the terms and conditions associated with the funding. Funding is conditional upon the recipient signing a Shared Cost Agreement with the Province.

Shared Cost Agreements will be prepared only after the requirements described in Section 5.4 have been deemed as met by Canada.

All projects will be expected to be substantially complete within the dates set out in their Shared Cost Agreement. The Program is designed to support projects that can be completed within five years of the approval. Where extenuating circumstances outside the proponent’s control cause project delays, an approval for extension may be considered (with projects ultimately having to be completed before March 31, 2026).

*Shared Cost Agreement or Ultimate Recipient Agreement* is an agreement between British Columbia and the Ultimate Recipient under the ICIP.

***“Ultimate Recipient” is an entity identified under sections A.1 a) of Schedule A in Canada – British Columbia ICIP Integrated Bilateral Agreement and identified within this guide as an eligible applicant.

9.1 **ASSETS**

9.1.1 **Disposal of Assets**

Within the Shared Cost Agreement, ultimate recipients will need to maintain ongoing operations and retain title to and ownership of an asset for at least five years after substantial completion, except when the asset is transferred to Canada, British Columbia or a municipal or regional government, and with Canada and the Province’s consent.

9.1.2 **Revenue from Assets**

Senior government contributions are meant to accrue to the public benefit. Within the Shared Cost Agreement, there will be a requirement that funded assets owned by a for-profit Ultimate Recipient will not generate revenues that exceed its operating expenses within the Fiscal Year during the asset disposal period. Where funding is used by a for-profit private sector body for the purpose of the ultimate recipient generating profits or increasing the value of its business, repayment of any contribution funding will be required.

9.2 SHARED COST AGREEMENT

“Shared Cost Agreement” means an agreement between the Province of British Columbia and a Recipient whereby the Province agrees to contribute financially to an approved project.

9.3 CONTRACT PROCEDURES AND PROVISIONS

“Contract” means a Contract between a Recipient and a Third Party whereby the latter agrees to contribute a product or service to a project in return for financial consideration which may be claimed as an Eligible Cost.

All contracts will be awarded in a way that is fair, transparent, competitive and consistent with value for money principles.

The following objectives for procurement activity for goods, services and construction are based on the principles of fair and open public sector procurement: competition, demand aggregation, value for money, transparency and accountability:

• proponents receive the best value for money spent on contracts;
• vendors have fair access to information on procurement opportunities, processes and results;
• acquisition opportunities are competed, wherever practical;
• proponents only engage in a competitive process with the full intent to award a contract at the end of that process;
• proponents are accountable for the results of their procurement decisions and the appropriateness of the processes followed;
• the cost of the procurement process, to both vendors and proponents, is appropriate in relation to the value and complexity of each procurement;
• contracts are awarded in accordance with the Canadian Free Trade Agreement and international trade agreements if applicable; and
• acquisitions are managed consistent with the policy of the Province of British Columbia. The Province of British Columbia’s Policies can be accessed at: https://www2.gov.bc.ca/gov/content/governments/policies-for-government/core-policy/policies/procurement
Proponents are responsible for:

- planning, managing and fully documenting the process to acquire goods, services and construction;
- managing solicitation and contract award processes in a prudent and unbiased manner that fairly treats all potential vendors and bidders;
- ensuring that contracts for goods, services and construction are designed to provide the best value; and
- ensuring that all acquisitions are consistent with policy and applicable legislation.

It is expected that all contracts for works associated with projects that are approved for funding will be publicly tendered. Where this is not feasible or practicable, recipients must inform, in writing, the Ministry for approval before proceeding with the project.

The Province reserves the right to review a Recipient’s procurement and tendering policies relating to contracts for works associated with projects funded through this program at any time from project approval to a date three years after project completion.

Two resources are available to help applicants to achieve excellence in the awarding of contracts in a way that is transparent, competitive, and consistent with value for money principles:

1) The Master Municipal Construction Documents Association (MMCD) provides its members with standardized contract documents and training programs to maximize the benefits of the documents. The Province of British Columbia encourages British Columbia Municipalities to use the Master Municipal Construction Documents for the construction of municipal services. Many B.C. local governments have been, and continue to, subscribe to the MMCD documents, certification, training and procedures. For further information about MMCD access its website at: https://www.mmcd.net/

2) BC Bid, the e-Procurement site of the Province of British Columbia can be accessed at: https://www.bcbid.gov.bc.ca/open.dll/welcome.

9.4 CHANGES OR VARIATIONS TO AN APPROVED PROJECT

Applicants need to advise the Ministry, in writing, of any variation from the approved project. Before any changes are implemented, they must be approved by the Ministry. Changes that require written approval are those that deviate from the Shared Cost Agreement, generally project description/scope or project completion date. Costs that are outside of the current terms of the contract may not be able to be reimbursed.

Program staff will adjust future claims and/or require the provincial government to be reimbursed if any costs that have been reimbursed are subsequently found to be ineligible.
9.5 **COST OVERRUNS**

The Program will be fully allocated and oversubscribed. Recipients of grant funding will be responsible for managing project risks, including cost increases, as the Program is not designed to deal with cost overruns. Any project cost increases will be the responsibility of the Ultimate Recipient.

9.6 **REPORTING**

A Periodic Progress Report will be required quarterly, and a Budget Forecast Report will be required monthly or upon request by the Province. These reports update the federal and provincial agencies regarding timelines, percentage completion, milestones, forecasting and other information regarding the project. Progress reports are required whether or not a claim is made, or whether or not construction has begun. The reports are required for the period between project approval and project completion.

These reports must be completed and submitted online using the LGIS.

Conditions will be included in the Shared Cost Agreement which will require the Ultimate Recipient of the grant to conduct activities or prepare documentation related to best practice and sustainable infrastructure management. These will be tied to the payment of interim and final claims.

Examples of condition requirements that have been included in past programs include*:

- confirmation that required permits have been received and/or that the design and construction meet associated regulatory requirements;
- a list of energy efficient features and equipment used in the project;
- for projects that develop a new groundwater source, use of best practices as detailed in the Province’s Well Head Protection Toolkit, including a Wellhead Protection Plan;
- a summary of the state of asset management practice within the organization in reference to the Asset Management BC Roadmap and/or AssetSMART 2.0;
- confirmation that the system and operators are or will be certified under the BC Environmental Operators Certification Program;
- completion of a council or board endorsed Water Conservation Plan;
- a plan demonstrating how the community is working towards and planning for sustainable wastewater management;
- confirmation that a new building exceeds the energy requirements under the National Energy Code for Buildings by at least 25%;
- confirmation that bylaws are in place regarding the decommissioning of on-site sewage on properties connected to the community sewage collection system and requiring community sewer for smaller properties or a Liquid Waste Management Plan that identifies decentralized wastewater management;
• a plan or strategy to manage stormwater/rainwater;
• an asset renewal profile for the asset group related to the project.

Applicants will be required to report on the following federal targets which are applicable to the project:

**For all Outcomes**

• Contribute to a national ten mega-tonne (10 mT) reduction of greenhouse gas emissions.
• Ensure one hundred percent (100%) of federally-funded public-facing infrastructure meets the highest published applicable accessibility standard in a respective jurisdiction.

**Rural and Northern Communities Core Outcomes**

• Increase by at least five percent (5%) the number of rural households that have access to the highest broadband speed range available in British Columbia based on 2015 Canadian Radio-Television and Telecommunications Commission data. For the purpose of this program, the highest speed will be 25+ mbps.

**Community, Culture and Recreation Outcomes**

• No additional targets.

**Green - Environmental Quality Outcomes**

• Reduce by forty percent (40%) the number of long-term drinking water advisories in non-reserve communities.
• Increase the number of wastewater systems achieving compliance with federal effluent regulations: from ninety-eight percent (98%) to one hundred percent (100%) for high-risk wastewater systems, and from ninety percent (90%) to one hundred percent (100%) for medium-risk wastewater systems.

**Adaptation, Resilience and Disaster Mitigation Outcomes**

• No additional targets.

**Public Transit Outcomes**

• Increase by at least twenty five percent (25%) the modal share for public transit and active transportation. This target will be reviewed by both parties and if necessary, adjusted, following the submission of British Columbia Investing in Canada Infrastructure Program Infrastructure Plan.
• Maintain 97% of people in a municipality with a public transit system live within the service area of their transit system.
Projects with total estimated eligible expenditures of $25 million or more will need to report on community employment benefits provided to at least three (3) federal target groups (apprentices, Indigenous peoples, women, persons with disabilities, veterans, youth, new Canadians, or small- medium-sized enterprises and social enterprises). This requirement may be waived at the discretion of British Columbia for applicants with lower capacity to capture this information with specific rationale.

Applicants must ensure that they collect and are able to provide data on the applicable performance indicators related to Outcomes and associated Targets (see Appendix B).

A Final Report detailing project performance must be completed and submitted with the final claim upon project completion.

* This is not a comprehensive list of all potential condition requirements and others may be added or substituted at the discretion of the Province.

9.7 CLAIMS

To receive both the federal and provincial governments’ contributions for approved projects, claims must be submitted for eligible costs to the Ministry. Only costs incurred, paid and consistent with and comparable to those identified in the signed shared cost agreement are eligible for reimbursement. Where multiple projects are ongoing (e.g. through different grant funding programs or through a phased approach), please ensure that claims are specific to the approved project only.

Claims must be completed and submitted online using the LGIS. The online claim form requires summary of expenditures information, including: name of payee, date paid, work rendered start/end dates, invoice number, invoice date, etc. Current progress reports must be submitted online to the Ministry via LGIS and technical conditions must be met for claim reimbursement. All projects are subject to site visits and audit at any time during the project and up to the later of: the end date of the IBA for ICIP between Canada and BC or up to three years after the final settlement of accounts.

9.8 ACCOUNTING RECORDS

Applicants must maintain acceptable accounting records that clearly disclose the nature and amounts of the different items of cost pertaining to the project. These records should include both the records of original entry and supporting documents of the applicant, divisions or related parties, and any third party, named in the application or contract, as appropriate to the project. Applicants must retain accounting records for a minimum of six years after the end date of the IBA for ICIP between Canada and BC.

Failure to keep acceptable accounting records and tender documents may result in a cessation or interruption in funding and impact future funding.
The Province can require applicants to provide details of the types and amounts of all fees for consultants and contractors.

9.9 COMMUNICATIONS

9.9.1 Procedures for Communications

An important aspect of the program is to communicate its impact in helping improve the quality of life in British Columbia communities. The purpose of joint communications activities is to provide information on the Program to the public in a well-planned, appropriate, timely and consistent manner that recognizes the benefits of the initiative and the contribution of all parties.

A communications protocol will be set out within the Shared Cost Agreement. Signage recognizing funding contributions will also be required.

9.9.2 Timeline for Public Events

Please contact the Ministry at least 15 working days prior to any scheduled public events. The federal and provincial Ministers, or their designated representatives, regularly participate in the events, thus need time to schedule for such an occasion.
APPENDIX A - DEFINITIONS

Indigenous – Refers to "Aboriginal" in the context of the meaning assigned by the definition aboriginal peoples of Canada in subsection 35(2) of the Constitution Act, 1982. An "Indigenous group" refers to a group, community or people that hold rights recognized and affirmed by section 35 of the Constitution Act, 1982.

Access – a geographical area that does not have year-round road, rail, or water connections, and relies entirely on bush aviation. If it does have access part of the year on ice roads, it can only be reached by gravel road.

Accessibility – Taking appropriate measures to ensure persons with disabilities have access, on an equal basis with others, to the physical environment, to transportation, and to other facilities and services open and provided to the public.

BCeID – An online user authentication service that makes it possible for you to use a single user ID and password to sign in securely to participate in BC Government Online Services. Applicants must register and obtain a BCeID in order to be able to log in to the Local Government Information System (LGIS) system.

Contract – a Contract between a Recipient and a Third Party whereby the latter agrees to contribute a product or service to a project in return for financial consideration which may be claimed as an Eligible Cost.

Food Security – exists when all people, at all times, have physical, social and economic access to sufficient, safe and nutritious food which meets their dietary needs and food preferences for an active and healthy life. Household food security is the application of this concept to the family level, with individuals within households as the focus of concern.

Impact assessment – means an assessment of the effects of a designated project that is conducted in accordance with the Impact Assessment Act, 2019.

Local Government Information System (LGIS) – online tool for applicants to apply, report and submit claims for infrastructure programs within the Investing in Canada Infrastructure Program.

Mitigation measures – means measures to eliminate, reduce, control or offset the adverse effects of a project or designated project, and includes restitution for any damage caused by those effects through replacement, restoration, compensation or any other means.

Nature of the Project:
- New Construction – new physical works
- Rehabilitation – does not alter the purpose of existing infrastructure
- Expansion – involves an increase e.g. raising, lengthening or widening to the exterior dimensions or the production capacity of the infrastructure
**Shared Cost Agreement** – an agreement between the Province of British Columbia and a Recipient whereby the Province agrees to contribute financially to an approved project.

**Third Party** – means any person or legal entity, other than a Party or Recipient, who participates in the implementation of a Project by means of a Contract.

**Vulnerable Populations** – Families or individuals who would likely have to spend a substantially larger share of their income than average on the necessities of food, shelter and clothing and thus would be living in a difficult circumstance.
APPENDIX B – Federal Program Outcomes & Targets

Ultimate recipients are required to report on outcomes and associated targets through the Province to Canada for the ICIP – RNC projects completed in BC. Below are the federal outcomes and targets that are associated with this program for ease of reference:

**RURAL AND NORTHERN COMMUNITIES (RNC) OUTCOMES AND TARGETS**

<table>
<thead>
<tr>
<th>RNC Core Outcomes:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Improved food security</td>
</tr>
<tr>
<td>Improved and/or more reliable road, air and/or marine infrastructure</td>
</tr>
<tr>
<td>Improved broadband connectivity</td>
</tr>
<tr>
<td>More efficient and/or reliable energy</td>
</tr>
<tr>
<td>Improved education and/or health facilities (specific to Truth and Reconciliation Commission of Canada’s Calls to Action)</td>
</tr>
</tbody>
</table>

**Targets Relevant to the RNC*:**

<table>
<thead>
<tr>
<th>Targets Relevant to the RNC*:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Increase by at least five percent (5%) the number of Rural Households that have access to the highest broadband speed range available in British Columbia based on 2015 Canadian Radio-Television and Telecommunications Commission data. For the purpose of this program, the highest speed will be 25+ mbps</td>
</tr>
<tr>
<td>Contribute to a national ten mega-tonne (10 mT) reduction of greenhouse gas emissions</td>
</tr>
<tr>
<td>Ensure one hundred percent (100%) of federally-funded public-facing infrastructure meets the highest published applicable accessibility standard in a respective jurisdiction</td>
</tr>
</tbody>
</table>

*Not all targets will be applicable to every project. Some projects that are eligible under the program outcomes may not have a corresponding target (i.e. food security).

**COMMUNITY CULTURE AND RECREATION (CCR) OUTCOMES AND TARGETS**

<table>
<thead>
<tr>
<th>CCR Outcomes for RNC applications</th>
</tr>
</thead>
<tbody>
<tr>
<td>Improved access to cultural, recreational, or community infrastructure for Canadians, including Indigenous peoples and vulnerable populations</td>
</tr>
</tbody>
</table>
Increased quality of cultural, recreational or community infrastructure for Canadians, including Indigenous peoples and vulnerable populations

**Targets Relevant to the CCR Outcomes for RNC Applications**

Contribute to a national ten mega-tonne (10 mT) reduction of greenhouse gas emissions

Ensure one hundred percent (100%) of federally-funded public-facing infrastructure meets the highest published applicable accessibility standard in a respective jurisdiction

**ENVIRONMENTAL QUALITY (EQ) OUTCOMES AND TARGETS**

**EQ Outcomes for RNC Applications**

- Increased capacity to treat and/or manage wastewater
- Increased capacity to treat and/or manage stormwater
- Increased access to potable water
- Increased capacity to reduce and/or remediate soil pollutants
- Increased capacity to reduce and/or remediate air pollutants (through solid waste diversion)

**Targets Relevant to the EQ Outcomes for RNC Applications**

- Reduce by forty percent (40%) the number of long-term drinking water advisories in non-reserve communities
- Increase the number of wastewater systems achieving compliance with federal effluent regulations: from ninety-eight percent (98%) to one hundred percent (100%) for high-risk wastewater systems, and from ninety percent (90%) to one hundred percent (100%) for medium-risk wastewater systems
- Contribute to a national ten mega-tonne (10 mT) reduction of greenhouse gas emissions
- Ensure one hundred percent (100%) of federally-funded public-facing infrastructure meets the highest published applicable accessibility standard in a respective jurisdiction
**ADAPTATION, RESILIENCE AND DISASTER MITIGATION OUTCOMES AND TARGETS**

<table>
<thead>
<tr>
<th>Adaptation, Resilience and Disaster Mitigation Outcomes for RNC Applications</th>
</tr>
</thead>
<tbody>
<tr>
<td>Increased structural capacity and/or increased natural capacity to adapt to climate change impacts, natural disasters and/or extreme weather events</td>
</tr>
</tbody>
</table>

<tr>
<td>Improved access to a public transit system</td>
</tr>
</tbody>
</table>

**Targets Relevant to Public Transit Outcomes for RNC Applications**

<p>| |</p>
<table>
<thead>
<tr>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Increase by at least twenty five percent (25%) the modal share for public transit and active transportation. This target will be reviewed by both parties and if necessary, adjusted, following the submission of British Columbia (BC) Investing in Canada Infrastructure Program (ICIP) Infrastructure Plan</td>
</tr>
<tr>
<td>Maintain 97% of people in a municipality with a public transit system live within the service area of their transit system</td>
</tr>
<tr>
<td>Contribute to a national ten mega-tonne (10 mT) reduction of greenhouse gas emissions</td>
</tr>
<tr>
<td>Ensure one hundred percent (100%) of federally-funded public-facing infrastructure meets the highest published applicable accessibility standard in a respective jurisdiction</td>
</tr>
</tbody>
</table>
APPENDIX C – Examples of Eligible Costs and Ineligible Costs

Please note: The following are examples only and are based on staff knowledge of past federal-provincial programs and program criteria. The determination of whether costs are eligible will ultimately rest with program staff. If a cost is not listed below, contact program staff prior to undertaking associated work. (See Section 6.12 for contact information)

General

<table>
<thead>
<tr>
<th>ELIGIBLE</th>
<th>INELIGIBLE</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Costs paid under contract for goods or services considered to be direct and necessary to implement the project</td>
<td>• Any unpaid costs including invoices or holdbacks</td>
</tr>
<tr>
<td>• Costs incurred after approval and on or before the project completion date stipulated in the Shared Cost Agreement and deemed properly and reasonably incurred</td>
<td>• Accrued costs</td>
</tr>
<tr>
<td>• Capital costs as defined by GAAP (except capital costs included in INELIGIBLE COSTS)</td>
<td>• Any goods or services costs which are received through donations or in kind</td>
</tr>
<tr>
<td>• Services or works normally provided by the Recipient, including:</td>
<td>• Costs incurred prior to approval date and after project completion date as stipulated in the Shared Cost Agreement (with the exception of costs to complete climate lens assessments which are eligible prior to grant award if the project is successful in obtaining funding through the program)</td>
</tr>
<tr>
<td>o overhead costs</td>
<td>o leasing of equipment except that directly related to the construction of the project</td>
</tr>
<tr>
<td>o salaries and other employment benefits of any employees of the Recipient unless pre-approved by the Ministry and specifically related to the project</td>
<td>o purchasing equipment</td>
</tr>
<tr>
<td>o auditing fees incurred in the normal course of operation</td>
