

RISP 4.1

RISP 4.1 completed migration to production on April 11, 2013.

Support for Multiple Awards Opportunities

Prior to this release, if more than 1 contract is to be awarded with the same scope and criteria, the following process must be done:

1. Multiple RFEIs must be initiated
2. If an office would like to be considered for one of the contracts, they must respond to each of the associated RFEIs
3. The ministry evaluation team must evaluate multiple RFEIs

Prior to this release, there was significant duplication of work on both the part of the ministry and consultant offices. For this release, the RISP system has been updated to support multiple awards opportunities. A single RFEI can now be initiated with more than one contract awarded. With this enhanced RISP system, consulting firms will only need to respond to a single RFEI for multiple award opportunities and the ministry evaluation team will only need to evaluate one set of RFEI responses.
