

Technical Circular, T-1/95
January 30, 1994/5

To: All Regional Directors
All Branch Directors
All District Highways Managers

SUBJECT: **HIRING OF PREQUALIFIED CONTRACTORS AND DAY LABOUR
FOR ALL BRIDGE WORK**

SCOPE:

The intent of the prequalification program is to ensure that all contractors tendering on bridge work have a Ministry-approved safety program and safety record. This requirement also applies to day labour hired to perform bridge work.

BACKGROUND:

The construction and painting of highway bridges involves considerable risk to both the on-site workforce and the travelling public. Since March, 1993, the Ministry has administered a prequalification program to ensure that this risk is properly managed and that workers and the public are adequately protected.

PROCEDURE:

Contractors who wish to perform bridge work must apply for prequalification by submitting an application, along with their safety program and details relating to their safety performance. These documents are reviewed by the Prequalification Committee, and, if accepted, the contractor is placed on the Ministry's list of prequalified contractors. Only these contractors, including day labour, may perform Ministry bridge construction or painting work. Contractors are required to renew their applications every twelve months. The prequalification list (see attached current list) is issued to Ministry staff, by e-mail, and is updated on a continuing basis.
