

Project Objectives

- Increase safety, mobility and reliability by eliminating the current level crossing of the CN rail Line.
- Increase safety by improving horizontal alignment (straightening out of highway alignment).
- Improve sight lines.
- Improving snow storage to facilitate more efficient maintenance and snow clearing.
- Minimize project environmental impacts through thoughtful design, appropriate mitigation of impacts and compensation where impacts cannot be mitigated.
- Maintain regular communication, updates, and consultation with local First Nations. These being the Kitsumkalum, Metlakatla, and Lax Kw'alaams First Nations.
