

The Ministry of Transportation and Infrastructure is working to improve the connection between Highway 19 and North Courtenay to allow better access to key destinations in the region, including the new Comox Valley hospital. The proposed plan will create a number of benefits for residents, tourists, and commercial drivers including:

- » Enhanced East-West connectivity; Additional connection between Highway 19 and the Comox Peninsula
- » Increased route capacity by making the bridge across the Tsolum River two-lanes
- » Improved access and safety for people walking and biking as well as emergency services

COMMENT FORM

Public Information Session | March 15, 2016

1. Once complete, how will the new North Courtenay Connector impact the way you travel in/around this area?

2. Please provide any general comments you may have about the North Courtenay Connector Project.

3. What additional questions do you have about this project?

Please provide your contact information if you would like to receive additional information about this project.
