EDX: Graduation and Assessment Reports Archiving and Retention

Graduation and assessment summary reports and data are available on the EDX Graduation and Graduation Assessment modules. These reports are for operational purposes only and are intended to support schools in ensuring current year Grade 12 and AD students are on track to graduate.

The following include an inventory of currently available reports with important information about their retention schedules.

EDX Graduation Data Submission Reports

EDX Graduation Data Submission History and Error/Warning Reports

Reports are available after each upload event. An audit history of upload events, including reports, are available for the current reporting period and the previous reporting period (i.e., two years).

EDX Graduation Data Submission History by Student

Submission history by student (as made by the school) is available for the current reporting period and the previous reporting period (i.e., two years).

GRAD System Reports

Individual Student Reports

Individual Transcript Verification Reports (TVRs) and transcript previews are retrievable by student PEN. Transcripts are maintained on a continuing basis for current and past students. However, most archived students will not have a TVR.

Transcript Verification Packages

These are not reports, but dynamic amalgamations of TVRs for all current, Grade 12 or AD students on a graduation program. They are available for the current reporting period only.

Graduation Projections Summary Reports

The **Projected Non-Graduates Summary Report** is a dynamic list of all current students reported on a graduation program, and in grade 12 or AD, who are not projected to graduate based on missing required course or assessment registrations.

At the end of the reporting cycle (September), the current year Projected Non-Graduates Summary reports roll over into an **Archived Projected Non-Graduates – Summary Report**, and is no longer updated (e.g., data corrections made for students after the rollover will not be reflected in this report).

Important: Historical reports are archived for one year and then will be deleted. Schools wishing to retain the reports for any longer must download copies to their own secure files.

Graduation Status Summary Reports

The **Graduated Students** and **Not-Yet Graduated Students** reports are dynamic, cumulative lists of students in the current reporting cycle that have either graduated or not yet graduated, based on the latest information submitted by the school.

At the end of the reporting cycle (September), the current year reports roll over into static, archived versions of the reports. Any data corrections made for students after the rollover will not be reflected in these reports.

Important: Historical reports are archived for one year and then will be deleted. Schools wishing to retain the reports for any longer must download copies to their own secure files.

PSI Selections

PSI Selections Report

A **PSI Selections – Student Summary Report** lists currently enrolled, graduating students who have selected a post-secondary institution to receive their transcript using the StudentTranscripts Service (STS). Other types of ad hoc orders made by students in STS are not included in this report.

Reports are available for the current reporting cycle only. Schools wishing to retain the reports for any longer must download copies to their own secure files.

Graduation Assessments

Registrations

During each school year, schools can view and manage student registrations for upcoming Provincial Graduation Assessment sessions in the current school year. Registrations for a particular session can only be accessed up to the point where the results for that session have been released.

Reports and Results

Individual Student Reports can be retrieved by the current or last known school of record for a student. Records are maintained on a continuing basis for current and past students.

Session Results

These reports are available for schools to download for the current year, plus the two previous school years. Schools wishing to retain reports for any longer must download copies to their own secure files.

- Session Results (CSV file format)
- Session Results (XAM format)
- Session Results by Subject (PDF file format)
- Session Results by Assessment (PDF file format)

Distribution of Assessment Results (DOAR)

Reports produced prior to the 2025/2026 school year will not be available on EDX Graduation Assessments. If schools need to obtain an historical report from 2023/2024 or 2024/2025, please contact Student.Certification@gov.bc.ca. From 2025/2026 onwards, users will be able to retrieve reports for the current year and two more years afterwards.

- DOAR Summary (PDF file format)
- ___ Detailed DOAR (CSV file format, available by assessment type)
