1.0 SUMMARY OF CHANGES

- Further clarification on when CRS data is updated using REPLACE or APPEND mode

2.0 OVERVIEW

The TRAX system requires the three file formats for communication with schools' student information systems:

DEM Demographic data for students

XAM Any transaction dealing with a Graduation Assessment record to support registration of students for Numeracy and Literacy assessments.

The same file format is used by the Ministry to make assessment results available to the schools once released for an assessment session.

CRS Any transaction dealing with a course taken by a student. This includes initial registration, interim and final percentages, and interim and final letter grades.

3.0 SCHEDULED DATA TRANSFERS

The “Upload TRAX Data Files” function on the School Secure Web is open for schools to transfer data electronically to the Ministry from early October through mid-July.

NOTE: Beyond the core times listed below, schools are encouraged to upload TRAX files monthly where possible. This keeps transcript records up to date for students who complete courses outside standard timetables and supports students’ applications to post-secondary institutions.

<u>Name of Transfer</u>	<u>Approx. Date</u>	<u>Direction</u>	<u>Files</u>
First Data Submission	Oct/Nov	School to Ministry	DEM, XAM, CRS
November Assessment Records	Jan	Ministry to School	XAM
January Assessment Records	Mar	Ministry to School	XAM
April Assessment Records	Jun	Ministry to School	XAM
June/Final Submission of Grades	June/July	School to Ministry	DEM, XAM, CRS
June Assessment Records	July	Ministry to School	XAM

4.0 DATA SUBMISSIONS TO THE MINISTRY

4.1 Data Format

The file names used must be formed as follows:

Student demographic data	<school code>.DEM
Graduation Assessment records	<school code>.XAM
Non-provincially examinable courses	<school code>.CRS

<School code> refers to the school's eight-digit ministry facility code (e.g., 00101001.DEM).

4.2 Data Transfers

Schools send their TRAX data files using the “Upload TRAX Data Files (DEM, XAM and CRS)” function on the School Secure Web. For processing of student data for transcripts, all three files (DEM, XAM and CRS) must be uploaded.

5.0 DEM File – Student Demographic Data

5.1 Demographic Overview

The First Data Submission is used to add new students and update students already on the TRAX database. Subsequent Demographic files are used to update existing data. If the Ministry receives a "terminated" Demographic record, and the student is not re-activated by another school (or the same school), reports available to the schools on the School Secure Web will not include that student.

EVERY transfer should contain 1 record for each:

- Grade 10, 11 & 12 student on the 2023 Graduation Program (2023 GRAD_REQT_YEAR)
- Grade AN or Grade AD student registered in the Adult Graduation Program (1950 GRAD_REQT_YEAR), or
- student who is on a School Completion Certificate Program (SCCP), which does not lead to graduation but provides a School Completion Certificate, or
- **student who previously graduated on a BC graduation program and is returning to upgrade (i.e., GRAD_REQT_YEAR should be the original program at graduation).**

No other demographic records should be sent. The student's name should correspond to the LEGAL names as reported to the Ministry for the student's Personal Education Number (PEN). All student records must include the student's PEN. It is expected that the data sent by the schools is a COMPLETE SNAPSHOT of the student's demographic data.

After the initial upload in October, if a student withdraws, omitting the student's demographic record will not remove the student from any school reports. Instead, schools must wait until after January 1st and send the student's demographic record with a "T" for Terminated in the Status field. Once the demographic record with the termination status has been sent after January 1st, the student's DEM file does not need to be sent again in the school's the next data transfer.

TRAX cannot retain or accept a "T" status in the Oct-Dec collection period via upload.

6.0 XAM file – Graduation Assessment Records

6.1 Overview

If the student has been selected for the DEM file, then select the **Numeracy and Literacy Assessment registration** records scheduled for the student in the current school year.

NOTE: This file no longer includes provincially examinable courses, as they are not applicable to any current graduation program. Reporting errors in school percentages for past courses with provincial exams must be completed using a TRAX Change Form (available on the School Secure Web).

Adult Graduation Program (GRAD_REQT_YEAR = 1950): Graduation Assessments are NOT required for students on this program. Only include assessment registrations for Adult Grad Program students who opt to write them in the current school year. **Even if no Adult students opt to write assessments, a XAM file must still be submitted (content blank) to enable processing of the other TRAX data files.**

2023 Graduation Program (GRAD_REQT_YEAR = 2023). Graduation Assessments are required for students on this program and must be reported using applicable assessment codes (in parenthesis):

- **Grade 10 Literacy Assessment (LTE10)**
- **Évaluation de littératie de la 10e année – Français langue première (LTP10)**

- **Grade 10 Numeracy Assessment (NME10)**
- **Évaluation de numératie 10 (NMF10)**

- **Grade 12 Literacy Assessment (LTE12)**
- **Évaluation de littératie de la 12e année – Français langue première (LTP12)**
- **Évaluation de littératie de la 12e année – Français langue seconde-immersion (LTF12)**

For all assessments, the CRSE_CODE includes the grade level so the CRSE_LEVEL field should be blank. The NUM_CREDITS field should also be blank.

The session date (CRSE_YEAR plus CRSE_MONTH) on each XAM record must reflect a date when the assessment is offered in the current school year's Graduation Assessment Schedule. This will allow the Ministry to pick out the student's registration for a particular assessment session in the data transfer of each record. The vendor must provide a mechanism for the school to convert their internal "Course End" date to a "Session Date" as defined by the Ministry. Ministry session dates consist of a 4-digit year plus the 2-digit month. The Ministry currently offers graduation assessments (but not for all the assessments) in November, January, April, and June (**CRSE_MONTH = 11, 01, 04, or 06**).

6.2 XAM File – Assessment Data by Session

Schools can register students for all assessment sessions at the start of the school year, if they wish, in their first TRAX data submission.

6.3 Ministry-provided XAM Data File

The Ministry makes assessment results available to schools after each assessment session (if the school had students writing assessments in that session). **The XAM file contains the assessment proficiency score (at Final Percent offset).** It is the responsibility of the school to update their system with any or all the data items provided in the file.

7.0 CRS File - Non-provincially Examinable Courses

7.1 Courses Overview

Since provincial exams associated with courses are no longer offered, the CRS file will include all courses currently available for schools to report.

To simplify the extraction process, all extracts can use identical criteria, as follows:

- ONLY select Grade 10, 11 and 12 courses for students currently registered in Grades 10, 11, 12, or Grades AD or AN in the Adult Graduation Program. *
- For the courses selected, send final marks for all completed Grade 10, 11 and Grade 12 courses.
- For these same students, also send courses that the student is CURRENTLY taking or WILL take this school year. For the April data transfer, if available, send interim marks for Grade 10, 11 and 12 courses being completed in June of the current year.

*NOTE: Grade 10 courses are not required for students completing the Adult Graduation Program (GRAD_REQT_YEAR = 1950) but will appear on the student's official transcript if sent to TRAX.

The session dates on the CRS records can be ANY month of the year.

7.2 Replace or Append Course Status

TRAX defaults schools to REPLACE all school-reported, grades 10-12 course data for a not-yet graduated student that is stored in the TRAX database with each data transfer. This means the current school of record is responsible for working with students (and any schools in which they may be cross-enrolled or were previously enrolled) to obtain a complete record of their Grade 10, 11 and 12 non-provincially examinable course data.

Grades 10-12 course data submissions for graduated students are set to APPEND mode. And, in rare exceptions, a school can be set to APPEND course data. However, exceptions will only be made in select cases where regularly securing complete student records may present an unreasonable challenge to the school (e.g., schools that regularly serve adult students who have been absent from the system for a long period). Requests must be made by email to TRAX.Support@gov.bc.ca, and a TRAX Support team member will review the benefits and challenges of APPEND status with the school.

<u>File Name</u>	<u>Contents</u>
COUNTRY.DAT	Two-character country codes
COURSES.DAT	All course codes (no graduation assessment codes) *
ERRORS.DAT	Errors which are checked during data loading
GRADCRSE.DAT	Grad requirements fulfilled by each course

GRADREQ.DAT	Grad requirements by graduation program
PROGRAMS.DAT	Career Preparation program codes
RESTRICT.DAT	Restricted course combinations
SESSIONS.DAT	Valid exam sessions (past provincial exams – reference only) *
TTCODES.TXT	File layouts for each of the above files
