BC Performance Standards

Reading

Revised 2009
Reading
REVISED 2009

Revised in 2009 to incorporate the learning outcomes from English Language Arts K-7 (2006) and English Language Arts 8-12 (2007) and some additional information on the use of the BC Performance Standards.
ACKNOWLEDGMENTS
These materials reflect the collective wisdom of teachers throughout the province. The Ministry of Education would like to acknowledge both the time and the expertise that hundreds of teachers contributed.

The Ministry of Education would also like to acknowledge the work of: Horizon Research and Evaluation Inc., for facilitation of the field activities; A. Toutant Consulting Group Ltd., for design and production; and DGB Typesetting for desktop publishing.

About the BC Performance Standards

The BC performance standards have been developed for voluntary use in BC schools. They describe the professional judgments of a significant number of BC educators about standards and expectations for the following key areas of learning:

- reading
- writing
- numeracy
- social responsibility

The BC performance standards are intended as a resource to support ongoing instruction and assessment. The standards focus exclusively on performance assessment, where students are asked to apply the skills and strategies they have developed to complete complex, realistic tasks. The performance standards do not address all aspects of learning or curriculum; they are focused only on performance in the key areas noted above. They emphasize criterion-referenced assessment in which students’ performance is compared to explicit criteria. The performance standards enable teachers, students, and parents to compare student performance to provincial standards.

The BC performance standards can be used for various assessment purposes:

- assessment for learning – formative assessment that supports and guides learning
- assessment as learning – formative assessment that involves students in guiding their own learning
- assessment of learning – summative assessment that documents student learning
Together, curriculum and performance standards describe what students are expected to know and the levels they should achieve.

Levels of Student Performance

The BC performance standards describe levels of achievement in key areas of learning. The performance standards answer the questions: “How good is good enough? What does it look like when a student’s work has met the expectations at this grade level?”

The BC performance standards describe student achievement in terms of prescribed learning outcomes in March-April of the school year and illustrate the following four levels of student performance:

**NOT YET WITHIN EXPECTATIONS**
- the work does not meet grade-level expectations
- there is little evidence of progress toward the relevant prescribed learning outcomes
- the situation needs intervention

**MEETS EXPECTATIONS (MINIMAL LEVEL)**
- the work may be inconsistent, but meets grade-level expectations at a minimal level
- there is evidence of progress toward relevant prescribed learning outcomes
- the student needs support in some areas

**FULLY MEETS EXPECTATIONS**
- the work meets grade-level expectations
- there is evidence that relevant prescribed learning outcomes have been accomplished

**EXCEEDS EXPECTATIONS**
- the work exceeds grade-level expectations in significant ways
- the student may benefit from extra challenges
The BC performance standards are intended to support instructional decision-making. Teachers use a variety of methods to gather the information they need to assess, evaluate, and report on student learning. Possible methods include observations, student work portfolios, conferences, self- and peer assessment, classroom and standardized tests and performance tasks.

The BC performance standards give teachers one way to assess students’ abilities to apply their learning in realistic performance tasks. Used with other methods, they can be an important part of a comprehensive assessment and evaluation system.

**Guidelines**

**The Standards:**
- should be used as part of regular classroom learning activities, within the context of ongoing classroom instruction.
- provide resources for assessing and evaluating the quality of a specific piece or a collection of student work from various subject areas. They can help to develop a profile of student achievement, typically based on three to seven pieces of work.
- assume that in most cases teachers are observing students as they work. Often, some evidence needed to make decisions comes from observations and conversations with students.
- allow for teachers to intervene where students are unable to complete a task independently. The level of assistance required is often one of the criteria for determining whether or not a student’s work falls within grade-level expectations.
- may be adapted as needed. For example, this might include creating class-developed rating scales in age-appropriate language, developing IEPs or other tailored evaluation, or adjusting expectations for different times of the year.
Adaptations

The BC Performance Standards reflect the participation and collective judgments of thousands of educators and thousands of students. They serve as a ‘base’ resource that educators are able to adapt and use to meet their needs for particular purposes. This ensures that BC educators continue to focus on a common set of standards and expectations, while at the same time, addressing specific needs. For example:

- Teachers frequently work with their students to develop ‘kid-friendly’ versions of the scales. This is most effective when students are involved in discussing the criteria and choosing the language.
- District assessments and other assessment tools often focus on selected criteria or aspects, and may involve re-wording or elaborating parts of a scale.
- Foundation Skills Assessment uses adaptations of the scales to suit the context of large-scale assessment.
- Districts and regions have created adaptations for summative end-of-grade assessments.
- Parts of the performance standard framework are often used in reporting.
- The criteria in various performance standards are used in commenting on student progress.
- Textbooks and accompanying teacher guides present adaptations focused on particular units of content or assignments.
- Educators have used the performance standards to create electronic templates that facilitate student self-assessment.

Groups of teachers across BC are using the performance standards in reading, writing, numeracy, and social responsibility as they engage in inquiry about learning. For example:

- The Network of Performance Based Schools is a province-wide action research community designed to improve student learning and to strengthen public education (www.npbs.ca).
- School-based learning teams often use BC PERFORMANCE STANDARDS as a focus for their inquiry.
- Districts sponsor action research groups where teachers from various schools focus on key aspects of learning.
## Purposes

How the BC performance standards are used depends on the purpose for which they will be used.

**Purpose:** Use BC Performance Standards (BCPS) to focus and monitor learning, provide feedback and, adjust instruction.

**Example uses/adaptations:**
- Design learning activities and assessment tasks to provide evidence of the aspects of learning and the criteria described in the BCPS.
- Develop a profile of a class or group of students to support instructional decision-making.
- Focus instruction around selected criteria or aspects from BCPS, based on ongoing assessments.
- Use criteria from BCPS to build shared understanding; make learning intentions explicit.
- Use BCPS criteria to give students feedback on specific aspects of their learning, and on specific learning tasks.

**Purpose:** Use BC Performance Standards (BCPS) to engage students in discussing, reflecting on, assessing and shaping their own learning.

**Example uses/adaptations:**
- Work with students to develop ‘kid-friendly’ versions of specific BCPS that are relevant to learning intentions.
- Provide copies of BCPS for student reference and self-assessment.
- Work with students to develop class criteria, based on the BCPS, for specific purposes.
- Use BCPS to guide conference and group discussions about learning intentions and evidence of learning.
- Use BCPS criteria to develop/ use various self-assessment prompts and formats.
- Have students use selected criteria from BCPS to guide peer feedback.

**Purpose:** Use BC Performance Standards (BCPS) to monitor and report on student learning.

**Example uses/adaptations:**
- Document individual student progress in key areas of learning.
- Use BCPS to identify students who will benefit from intervention.
- Adapt BCPS to guide reporting and discussions with parents.
- Use or adapt BCPS for use in school or district-wide assessments.
- Use or adapt BCPS to develop evidence for school and district plans.
- Focus on criteria in BCPS in school or district plans to improve achievement.
- Use or adapt BCPS to evaluate programs and resources.
Where Performance Standards Are Used

BC Performance Standards are used to support learning at all levels of the school system in the province.

**PROVINCIAL**
- Provide basis for rating scales used in provincial assessments (Foundation Skills Assessment and English 10)
- Used as foundation for several sections and illustrations in the BC English Language Arts curriculum
- Used as a central resource for teacher inquiry in the Network of Performance Based Schools

**DISTRICTS AND REGIONS**
- Used in district assessments
- Provide basis for reporting systems
- Facilitate communication with community
- Offer a framework for collecting evidence for district plans
- Used in program and resource evaluations
- Provide framework for developing instructional resources

**SCHOOLS**
- Used in school-wide assessments
- Facilitate communication and articulation across grade levels
- Offer a framework for collecting evidence for school plans
- Used as part of reporting to parents
- Used to support and monitor school-wide initiatives

**CLASSROOMS**
- Provide descriptive feedback to students
- Offer a frame for developing criteria
- Support self-evaluation
- Consistent use of language: among teachers; with students; with parents
- Compare student performance to provincial standards
- Document evidence of student growth
- Help in report writing
- Provide exemplars teachers and students can refer to
**SUPPORT SERVICES**

- Facilitate communication between classroom teacher and support teachers
- Support development of IEPs
- Help to identify students who may benefit from intervention or extra challenges
- Provide framework for planning intervention
- Assist in communication with parents
- Document student growth

---

**Factors for Success**

Schools and teachers who have worked with the standards often emphasize the importance of the following factors:

- The first priority is to improve learning
- Teachers take the initiative to use the standards
- In schools, the staff collaboratively chooses a focus and process
- Teachers work with their students to develop shared understanding
- Staff members have opportunities to collaborate, share experiences and results
The BC performance standards for reading describe student achievement in two types of reading: reading literature and reading information.

Reading is central to success in school and in life. Through reading, people access the ideas, information, and experiences that help them to understand themselves and their world. People read to experience enjoyment and personal satisfaction, and to learn and work more effectively.

Developing reading skills and strategies is a primary focus of English Language Arts; however, students extend and apply these skills across all curriculum areas. The BC performance standards help teachers assess the extent to which students are able to apply the skills and strategies in purposeful, age-appropriate reading tasks in all areas of the curriculum.
Aspects of Reading

The performance standards focus on three aspects of reading:

**STRATEGIES**
- using word skills and comprehension strategies
- evidence comes from conferences, observation, and listening to students read

**COMPREHENSION**
- identifying main ideas, events, characters, and supporting details
- predicting, making inferences, describing relationships
- making notes, answering questions accurately
- evidence comes from conferences, discussions, writing and representing activities, and oral presentations

**RESPONSE AND ANALYSIS**
- making connections between works read and other selections or own experiences
- offering opinions, critically analyzing the author's message and techniques
- evidence comes from conferences, discussions, writing and representing activities, and oral presentations

The specific criteria for each aspect vary depending on the type of reading and the grade level. These criteria are clearly described in the Rating Scales and Quick Scales.
The performance standards for reading also provide information about the materials students may be expected to read at each grade level. This includes a description of types of materials, some sample titles, and a chart describing key characteristics.

The sample titles reflect materials used by practising teachers in their classrooms. They may be ministry recommended or locally approved. These titles are not intended to be “required reading.” Actual reading materials need to be chosen by classroom teachers to reflect the experiences and needs of their students.
The four organizers of the English Language Arts curriculum relate to the three aspects of reading of the Reading Performance Standards. The performance standards are connected to the curriculum at a conceptual and holistic level, not at an outcome-by-outcome level.

Aspects of Reading

Curriculum Organizers

Strategies (Reading and Viewing): Use strategies before, during, and after reading and viewing to increase comprehension and fluency

Features (Reading and Viewing): Use the structures and features of text to derive meaning from texts

Purposes (Reading and Viewing): Read and view to comprehend and respond to a variety of grade appropriate texts

Thinking (Reading and Viewing): Use reading and viewing to make meaningful connections, and to improve and extend thinking

Reflect on, self-assess, and set goals for improvement in reading and viewing

Purposes (Reading and Viewing): Read and view to comprehend and respond to a variety of grade appropriate texts

Thinking (Reading and Viewing): Use reading and viewing to make meaningful connections, and to improve and extend thinking

Reflect on, self-assess, and set goals for improvement in reading and viewing

Strategies (Reading and Viewing): Use strategies before, during, and after reading and viewing to increase comprehension and fluency

Features (Reading and Viewing): Use the structures and features of text to derive meaning from texts

Purposes (Reading and Viewing): Read and view to comprehend and respond to a variety of grade appropriate texts

Thinking (Reading and Viewing): Use reading and viewing to make meaningful connections, and to improve and extend thinking

Reflect on, self-assess, and set goals for improvement in reading and viewing

Performance standards can be used to guide students’ reflections, self-assessments and goal setting. Students apply and extend their reading skills in other curriculum areas. In all areas, students need to use strategies to comprehend texts, identify the words in the texts, understand the meaning of these words, use information from texts to construct knowledge, and demonstrate their understanding.

- The Mathematics curriculum requires students to comprehend technical vocabulary, complex information, detailed directions and features such as graphs and charts.
- The Science curriculum requires students to develop the skills required for scientific and technological inquiry and for solving problems, many of which require reading.
- The Social Studies curriculum requires students to read and interpret features such as maps, legends, graphs, charts and info-graphics and to analyze primary sources.
**Key Components**

These key components are included for each type of reading at each grade level.

**Rating Scale.** This is the full version of the performance standards, with the four performance levels described in detail.

**Quick Scale.** This is a short-form summary of the Rating Scale. Quick Scales are intended for daily use. Teachers may also want to share them with students and parents.

**Sample Task.** This is a task developed by practising teachers to provide opportunities to assess student work in the skill area. Each sample task includes examples of student work. Teachers may use the tasks as given or as models. Any tasks used should first be reviewed for issues sensitive to the class or community.

Additional sample tasks, student work, and other support materials are available at the Ministry of Education’s web site.
Level of Work.

Teacher's Observations. These are additional comments by the teacher and key relevant criteria from the Rating Scale.

Rating Scale Icon. This is a generalized summary of the scale completed by the teacher. Here is how the actual scale looks for this sample:

Student Work. This shows either a reproduction of the student’s work or a portion of the student’s original and a transcript of the entire piece. (Names of students and teachers have been changed where this information could be used to identify individuals.)
