Ministry of Education
Service Delivery Transformation
Shared Services Implementation

July 2014
Project Background, Approach and Anticipated Benefits
This project provides plans for implementing shared services for administrative functions in the K-12 sector

<table>
<thead>
<tr>
<th>Project Background and Context</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Fiscal pressures are creating a challenging financial environment for all public sector organizations in BC and around the world, including school districts</td>
</tr>
<tr>
<td>• The Ministry and school districts are exploring greater school district collaboration in an effort to reduce administration or non-instructional costs to increase services to the classroom</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Project Objectives</th>
</tr>
</thead>
<tbody>
<tr>
<td>25 opportunities have been identified related to shared services and the Ministry is seeking to develop:</td>
</tr>
<tr>
<td>• Criteria that assesses the identified opportunities in order to understand which to move forward within the near term</td>
</tr>
<tr>
<td>• High-level engagement principles to guide engagement with sector stakeholders in the implementation of shared services</td>
</tr>
<tr>
<td>• Development of potential implementation plans for near term opportunities (+3 years) that identify activities and timing for moving opportunities forward, effective management structures and process to track shared services performance</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Project Scope</th>
</tr>
</thead>
<tbody>
<tr>
<td>• The development of potential implementation plans for high priority opportunities for shared services in the areas of: Procurement, Transportation, Facilities Management, Information Technology, Human Resources, Finance, Legal and Capital with effective shared services management</td>
</tr>
</tbody>
</table>
The initial report, which was completed in 2012, identified 25 feasible shared services opportunities

- 120 opportunities were initially identified through:
  - A project Steering Committee
  - Interviews with Superintendents, Secretary-Treasurers and experts
  - Analysis of district- and provincial-level data
  - Public sector and education industry benchmarks
  - Jurisdictional research into governance and operating models in place across Canada and around the world

- 25 opportunities were ultimately presented to the sector for consideration, which ranged from relatively straight-forward to more complex and challenging to implement

- Benefit and cost information was estimated through sampling and extrapolation
  - An “order of magnitude” understanding of the potential size of each opportunity on a provincial scale was developed
  - Detailed business case development was out of scope
  - A conservative estimate was used in most cases to reflect that some districts were already operating in the future state model or implementing a solution
  - Initial implementation costs were developed based on published third-party estimates and Deloitte experience
The 25 opportunities spanned eight administrative functions and each was subsequently explored

- The 25 opportunities presented to the sector spanned eight administrative functions
- Further analysis was conducted to understand:
  - The potential benefits and costs associated with implementation
  - Implications of moving forward with the opportunity; and
  - Preliminary timing for implementation

### In 2014:
- **White Fleet Procurement** and **Fuel Procurement** have become part of **Strategic Sourcing**
- **SharePoint** has been deemed immaterial
- **Capital Management** opportunities have been merged into a single opportunity
- **Recruitment and Dispatch** have become part of **HR/Payroll System**

<table>

**In 2014:**
- **White Fleet Procurement** and **Fuel Procurement** have become part of **Strategic Sourcing**
- **SharePoint** has been deemed immaterial
- **Capital Management** opportunities have been merged into a single opportunity
- **Recruitment and Dispatch** have become part of **HR/Payroll System**
Readers of this report should review prior deliverables for context, additional information and key assumptions

- In 2012, Deloitte delivered a report to the BC Ministry of Education on the topic of service delivery transformation and shared services.
- The context for this current report must be considered with an understanding of the prior work completed.
- Reviewing the reports in tandem is critical to understanding the underlying assumptions, analysis and limitations of this report.

The Ministry engaged Deloitte to identify potential administrative shared services opportunities. The purpose of the service delivery transformation project was to identify opportunities that could be further explored by the sector and the Ministry in an effort to reduce costs and enhance service delivery.

The Ministry re-engaged Deloitte to revisit the 2012 report in light of the work that had been achieved within the sector.

The objective of this work was to:
- Identify optimal operating models for managing continued shared services implementation in the K-12 sector;
- Refresh opportunity benefits and costs; and
- Provide a potential implementation roadmap outlining key implementation stages and milestones;
- Provide options for implementing shared services management foundations and opportunities.
In this report we recommend that the sector validate opportunities, identify suitable operating models and refresh select benefits.
Following implementation, the anticipated net benefits could range from $67M to $160M for the sector

- Net benefits have been calculated for the set of opportunities with recurring costs deducted from recurring benefits
  - **Net benefits do not include one-time implementation costs**
  - These are high level estimates and a comprehensive business case should be completed to determine more precise benefits and costs

<table>
<thead>
<tr>

<td></td>
<td>~$52</td>
</tr>
</tbody>
</table>

<sup>1</sup> Removed Microsoft SharePoint from opportunity

<sup>2</sup> Estimated net benefits from capital opportunities and business systems have not been included

<sup>3</sup> Transportation costs reflect different service delivery models with the low end estimate a reflection of benefits from a CoE and the high end estimate based off a full outsourced model

<sup>4</sup> HR/Payroll benefits have not been calculated and therefore a net benefit figure largely under estimated – this figure has not been included in total net benefits

<sup>5</sup> Estimated financial benefits and implementation cost ranges have been rounded and may not add
Initial estimates of costs range from $12M to $35M in one-time investments and $33M to $57M in recurring costs

- These costs reflect those from the 2012 Deloitte report and are based on assumptions that likely, and could, be significantly higher based on implementation approach chosen.
- It is recommended that a more comprehensive business case be completed for each opportunity to determine if additional costs are required (i.e. new infrastructure or workforce adjustments).

</table>

¹These one-time cost figures do not include the ongoing Ministry costs associated with the upgrade to the Provincial Learning Network, which are projected to be $5M in 2014/15, $15M in 2015/16, and $13M in 2016/17, $15M in 2017/18, $16M in 2018/19, $20M in 2012/20, and $22M in 2020/21 and beyond.
²Removal of Microsoft SharePoint from opportunity.
³Business System Finance Shared Services recurring costs provided by the sector and not validated by Deloitte.
⁴Estimated costs from Capital opportunities not included and represent from $400K to $600K in recurring costs depending on implementation model selected.
⁵Estimated financial benefits and implementation cost ranges have been rounded and may not foot.

OT = one-time implementation costs or benefits, R = recurring costs or benefits.
Foundations for Implementation
A number of foundational pieces need to be established in order to realize the anticipated benefits

- To effectively manage the shared services program, a number of foundational pieces need to be put in place to efficiently realize benefits

  - **Management Model**
    - Effective and efficient bodies to provide oversight and management of the shared services program

  - **Resourcing**
    - Adequate resource to deliver on the implementation and ongoing operations behind each shared services opportunity

  - **Engagement Plan**
    - A plan for and tools to effectively engage with the sector and stakeholders throughout the implementation of shared services

  - **Benefits Tracking**
    - An approach for and tools to track the benefits realized by school districts and the Ministry as a whole, from shared services

  - **Legislative Amendments**
    - Understanding and implementation of legislative amendments required to support shared services

  - **Financial Model**
    - Financial requirements to fund implementation and ongoing operations

    - Principles for deployment of savings
The proposed management models address both strategy & planning, as well as ongoing implementation

- The following depicts the highest level of the proposed management model
- Detailed processes, such as decision rights and flows, will need to be developed as part of detailed implementation planning
Each level of the management model has a defined set of decision rights and responsibilities

- Decision rights range from ensuring strategic direction to approving how to move forward on specific opportunities

<table>

• Definition for detailed shared service opportunity management model structures  
• Delivery of engagement activities across K-12 sector  
• Structure and strategic oversight of vendor agreements and relationships  
• Resolve escalated strategic delivery issues from Operational Councils  
• Actions to incorporate and resolve district feedback  
• Opportunity Council leader(ship) |
| Opportunity Councils | (specific to opportunity participants) | Operational management of Shared Service | • Opportunity Council membership  
• Vendor management  
• Resolve delivery issues and risk mitigation  
• Define participation protocols  
• Operational decisions  
• Decide on changes in scope, resources and budget  
• Manage benefits tracking and realization |
### Engagement Principles

- Responsive, inclusive and adaptive
- Open and transparent
- Timely, active outreach to sector to listen and support ideas
- Identify and work with key leaders
- Flexible and ongoing
- Shared ownership and decision making with sector
- Ministry role has visible presence and is accessible – clearly define the role of M/DM/ADM
- Shift from ‘If’ to ‘How’
- Multi-channel engagement
- Measurement of success

### Engagement and Communication Strategy

1. **Develop a full plan for engagement and communication**
   - Identify stakeholder groups
   - Determine engagement team and lead
   - Draft detailed engagement and communication activities

2. **Co-develop implementation plan with sector**
   - Engage key groups (e.g., BCSTA, BCASBO, BCSSA, BCTF, Support Staff Unions, EFMA, ASTSBC) for input

3. **Consider key business timelines**
   - Align plan to school year, budget cycle, election cycles (Prov. / Municipal / Union), labour bargaining (BCTF/CUPE), and financial statement preparation

4. **Leverage the work to date and build on momentum**
   - Identify existing work to date (e.g., SD project, sector buying groups/consortia)
   - Adopt and refine as needed

5. **By opportunity, engage relevant groups through use of existing structures in place**
   - Identify and engage key groups

6. **Encourage key sector staff to share information**
   - Identify staff external to the Ministry
   - Provide support material for communication
   - Engage regularly

7. **Develop Sector engagement `rolling` calendar**
   - Identify key roles incl. Ms/DMs/ADM
   - Include all major events & timing (e.g., regional round tables) for tracking

---

**Shared Services Implementation Planning**

© Deloitte LLP and affiliated entities.
Benefits tracking will be guided by a set of principles, while following a defined process

- Measuring, monitoring and tracking benefits is essential to determine the effectiveness of the shared services organization

- A number of principles will guide the benefits tracking process

<table>
<thead>
<tr>
<th>Benefits Tracking Principle</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Create Baseline</td>
<td>Historical district data will be collected in advance to determine a baseline</td>
</tr>
<tr>
<td>Agreement to Process</td>
<td>Districts will understand and agree to benefits tracking process</td>
</tr>
<tr>
<td>Sign-off on Baseline</td>
<td>Districts will sign off as to the validity and accuracy of baseline costs – sign-off on assumptions may be required where data is not available</td>
</tr>
<tr>
<td>Formal Reporting</td>
<td>Results will be reported on and shared throughout the sector</td>
</tr>
<tr>
<td>Focus on Value</td>
<td>Benefits tracking will focus on measures that indicate value creation</td>
</tr>
</tbody>
</table>

**Step 1 Define what constitutes “Benefit”**

- Define cost savings benefits
  - Cost reduction
  - Cost avoidance
- Define non savings benefits
  - Service quality
  - Risk avoidance
- Determine variables for metrics
  - Actual versus budget
  - Previous versus current
- Create and sign-off on baseline

**Step 2 Determine how savings will be tracked going forward**

- Frequency
  - Monthly
  - Quarterly
- Process for sharing
  - Tools
- Process for reporting

**Step 3 Determine who will calculate savings**

- Identify resource(s) responsible for calculating savings
  - Centralized calculation
  - District level savings calculations
- Determine inputs required

**Step 4 Assign responsibility for validating savings**

- Identify resource(s) responsible for validating savings
  - Centralized calculations
  - District level savings calculations
- Determine inputs required
- Sign-off data collection
- Sign-off on reports

**Measurability/Objectivity/Comparability**
Operating Model
Shared service opportunities can be aligned to one of six potential operating models each with pros and cons.

<table>
<thead>
<tr>
<th>Description</th>
<th>Decentralized</th>
<th>District-to-district</th>
<th>Centre-led</th>
<th>Regional Co-located</th>
<th>Centralized</th>
<th>External provided (incl. Inter-Ministry)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Geographically devolved service delivery – each district delivers own services</td>
<td>Geographically devolved service delivery – each district delivers own services</td>
<td>Select districts working together to deliver a common service for the other</td>
<td>Centre-led service delivery management with each district delivering service</td>
<td>Partially geographically centralized service delivery (regional level) – could include a regional Centre of Excellence (CoE)</td>
<td>Geographically centralized service delivery to all districts with a single reporting structure (could include Provincial CoE)</td>
<td>Delivery of services provided by an external provider (could include another ministry or government agency)</td>
</tr>
</tbody>
</table>

**Advantages**

- Service delivery management remains close to schools
- Districts retain operational control over service delivery
- Standardization somewhat possible with strong leadership
- Limited disruption to status quo

- Some efficiencies realized between districts through standardization
- Select improvements on service delivery quality
- Service delivery management remains close to districts
- Builds upon existing exploration and actions of districts

- Maintains high levels of customer intimacy
- Supports standardized processes
- Limited disruption in service delivery but different reporting structure

- Enables some benefit from economies of scale
- Increases process efficiency and standardization
- Districts have partial control over service delivery
- Can leverage existing geographical efficiencies and Communities of Practice

- Enables greatest benefit from economies of scale
- Offers greatest potential for standardizing processes
- Offers the greatest control over service delivery

- Potentially shorter implementation timeframe
- Leverage external parties existing infrastructure and capabilities districts
- Access to more cost-effective services
- Inter-ministry supports broader government efficiency goals
- Maximizes standardization

**Dis-advantages**

- Limited opportunities to leverage economies of scale and efficiencies
- High degree of duplication of tasks and staff
- Highest overall sector costs

- High degree of duplication remains across districts
- High cost service delivery

- Limited opportunities to leverage economies of scale and efficiencies
- High degree of duplication of tasks between functions
- High service delivery cost

- Some duplication between multiple service delivery and reporting structures
- Encumbered decision making in individual districts
- Requires formalized management model

- May represent significant resistance due to scope of change
- Requires new Shared Services Organization (SSO) be developed
- May represent significant resistance due to scope of change

- Potential reputational and people impacts
- Security and data concerns
- Limits direct interaction with customers
- Need to develop common criteria for goods or services
Initial concepts were considered when assessing the operating model to drive shared services going forward

- A central entity responsible for the creation of standard programs, processes and policies across the province will be required
  - This central entity should provide a single contracting vehicle for all shared services from sourcing/procurement through to ASDs (if pursued)
  - This central entity should consider the exploration and implementation of other shared services opportunities as warranted
- Regional service delivery entities will help to manage and roll out the programs across the province
  - Regional entities will be staffed with regional expertise and knowledge
- The central and regional structure would allow the sector to leverage depth of expertise in core areas and broadly share it to enhance quality of service while realizing benefits
- Resources may sit in a single district or region and report to the central entity
- Expertise in select districts could be more effectively shared across the sector
- In the event ASDs are pursued, the sector should maintain control over service delivery policies and governance
- Clarity of roles and responsibilities would be required between the central entity, the regional offices, the districts and the schools
The proposed shared services operating model combines internal and external service providers with a central SSC

- Envisioned Shared Service Centre (SSC) develops process and procedures and selects vendors
- Regional models with delivery support by districts
- Expansion of select district service delivery due to expertise

**Shared Services Centre**

- Develop common processes and policies
- Vendor selection / contract management with districts
  - ASDs (Transportation and Facilities)
  - Shared Procurement
- Management of common email and communications
- Health and Wellness Program Administration

**School Districts**

Region 1  Region 2  Region 3  Region 4  Region 5

SD23  VSB

**Shared System**

- WorkSafe Claims
- Capital Projects Office
- HR/Payroll/Finance
- Shared System

**Make A Future**

- Recruitment
- BCPSEA
- Litigation Risk Pool
- Transportation Provider(s)
- Facilities Maintenance Provider(s)

¹ The timing for implementation, and hence the implementation roadmap, is based on Deloitte’s experiences with similar types of projects
- Timing assumes the availability and competency of human resources to implement the projects
- Assume financial resources are available to support implementation
Activities to move forward should focus on building the Management Structures and implementing opportunities

- Activities to move forward with Shared Services (SS) include setting up the management infrastructure, establishing program enablers, engaging with the sector, implementing the shared service opportunities:

**Management Structures**

**A. Establishment of Sector Management Structure**
- Objectives:
  - To create a sector management model structure
  - To create a shared service legal entity / operating model
  - To create a SS program office

**B. Establishment of Program Enablers**
- Objectives:
  - To determine resourcing
  - To develop benefits tracking
  - To amend legislation
  - To develop SS financial model

**C. Engagement Planning**
- Objectives:
  - To develop an engagement and communications plan
  - To collect feedback and input from the sector

**Opportunity Implementation**

**D. Execute Implementation of Shared Services Opportunities**
- Objectives:
  - Collect baseline data
  - Develop a detailed implementation plan
  - Assign project leads and resources
  - Work with the sector to define targets
  - Execute opportunity activities
Management Structures
## Management Model/Steering Comm. – Strategy and Plan

### Design

**Objectives**

- Establish management model
- Establish shared services office charter and scope statements

**Activities**

- Establish management model terms of reference and scope
  - Develop program terms of reference
  - Determine composition of Steering / Advisory Committees, ensure representation from participating functional groups
  - Determine roles and accountabilities for the Ministry, school districts and BCASBO and additional stakeholders
- Facilitate meetings with Ministry, school districts and BCASBO
- Assess barriers to shared services program and develop risk mitigation approach
- Develop Management Tools

**Deliverables**

- Terms of Reference including
  - Management and organization chart
  - Roles and responsibilities
  - Membership and composition

### Implement and Manage

**Objectives**

- Project Kick Off
- Continue to provide oversight and decision making for the program
- Assure the goals of the shared services office are being met
- Monitor engagement and communications plan
- Program reporting and issue resolution
- Refine and socialize operating model
- Consolidated benefits tracking and reporting

**Activities**

- Ongoing
Management Model/Shared Serv. Office – Implementation

**Design**
- Establish risk and issue management framework and tracking mechanism
- Develop reporting approach
- Establish office tools and templates

**Activities**
- Establish Shared Services Office (SSO) charter and scope
  - Define the mandate of the Office
  - Identify needs, work to be done, and expected results
  - Define roles and responsibilities of office

- Establish risk and issue management
  - Define criteria for evaluating risks and issues
  - Establish methods to track and report risks and issues

- Establish project and status reporting process
  - Define status reporting process
  - Develop status report template
  - Define deliverable approval process

- Define quality management plan

- Establish office tools and templates

**Deliverables**
- Shared Services Office Charter
- Risk and issue management plan and logs
- Status report template
- Quality Management Plan
- Deliverable approval process

**Implement and Manage**
- Initiate office and project kick-off
- Continue to execute program reporting processes
- Continue to execute communication plans
- Revise program management tools and processes as appropriate
- Supporting the program management model
- Program reporting and issue resolution
- Refine roadmap plan
- Revisit stakeholder engagement throughout all opportunities
- Consolidated Benefit Tracking
- Track and manage issues and risks
- Engage stakeholders
### Operating Model/Legal Entity Creation

#### Design

**Objectives**
- Design effective operating model for shared services
- Develop legal entity profile and charter

**Activities**
- Evaluate Shared Services operating model options
  - Identify existing shared services structures in government
  - Identify options for operating models across the set of shared services opportunities
  - Assess operating models for suitability
- Design operating model for shared services
  - Identify structure for managing shared services
  - Identify resourcing requirements for operating model
  - Determine location for operating model
  - Determine legal entity options for operating model structure
  - Determine reporting structure
- Facilitate meetings with Ministry, school districts and BCASBO and sector to collect feedback on operating model and legal entity
- Assess barriers to creating operating model and legal entity and develop risk mitigation approach
- Develop legal entity charter
- Obtain legal advice on creation and operation of legal entity

**Deliverables**
- Draft operating model design
- Legal entity profile with location, roles and responsibilities
- Legal entity charter

#### Build

**Objectives**
- Create legal entity for shared services
- Engage stakeholders in utilizing operating model

**Activities**
- Stakeholder engagement
  - Ensure stakeholder engagement is considered throughout development of legal entity
  - Engage stakeholders on operating model usage
- Build legal entity
  - Finalize entity structure including roles and responsibilities of entity
  - Finalize reporting structure
- Engage in legislation amendments
  - Determine legislation change requirements and engage in legislation amendment drafting

**Deliverables**
- Shared Services Legal entity

#### Implement and Manage

**Objectives**
- Continue to provide oversight and decision making for the program
- Assure the goals of shared services are being met
- Coordinate the execution of shared services across the sector
- Refine and socialize operating model
- Ensure legal entity is updated as needed
- Staff legal entity
- Identify other shared services opportunities for inclusion

**Activities**
- **Ongoing**

---

<td>• Establish opportunity baselines</td>
<td>- Define key roles and responsibilities for benefits tracking</td>
<td>• Data request</td>
</tr>
<tr>
<td>• Initiate data requests</td>
<td>- Develop reporting templates for benefits tracking (including status and trending thresholds)</td>
<td>• Baseline calculations</td>
</tr>
</tbody>
</table>

### Implement and Manage

<table>
<thead>
<tr>
<th>Activities</th>
<th>Deliverables</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Develop benefit realization schedules and annual benefits summary</td>
<td>• Benefits tracking process</td>
</tr>
<tr>
<td>- Communicate benefits measurement approach</td>
<td></td>
</tr>
<tr>
<td>- Translate benefits into operational impact to measure performance</td>
<td></td>
</tr>
<tr>
<td>- Perform ongoing measurement and reporting of benefits progress (min = quarterly, max = annual)</td>
<td></td>
</tr>
<tr>
<td>- Annually revisit business case; update as key assumptions or performance changes</td>
<td></td>
</tr>
<tr>
<td>- Establish automated data gathering processes (where possible) to improve benefits tracking and reporting</td>
<td></td>
</tr>
<tr>
<td>- Integrate into executive dashboard</td>
<td></td>
</tr>
<tr>
<td>- Deliver plan for continued benefits measurement and tracking and corrective action plans for programs not realizing benefit expectations</td>
<td></td>
</tr>
<tr>
<td>- Update benefit predictions and convert to targets</td>
<td></td>
</tr>
</tbody>
</table>
## Engagement/Communications Plan

### Identify and Analyze Stakeholders

**Objectives**
- Identify stakeholder groups
- Conduct stakeholder interviews
- Complete stakeholder matrix

**Activities**
- Identify stakeholder groups characteristics: name, size of group, types of roles within group
- Conduct stakeholder interviews
  - Validate original Stakeholder Analysis findings
  - Identify future engagement activities per stakeholder group
  - Gain insights into best practices and lessons learned for engaging stakeholders
- Identify key themes in interviews

**Create the stakeholder matrix**
- Assess the change impact on stakeholder groups
- Identify the influence each stakeholder group has on the success of the project
- Group stakeholders into four quadrants using the stakeholder matrix: involve extensively, address concerns, consult as needed, keep informed

### Analyze communications

**Objectives**
- Perform communication channel analysis
- Create policies for communication approvals

**Activities**
- Perform communication channel analysis
  - Identify existing communication channels in use by the Ministry of Education
  - Establish recommended communication channels for face-to-face, electronic, and print
- Create communications approval process
  - Create detailed process for distributing internal and external communications
  - Identify key personnel to be responsible for approving communications. Expert resourcing may be needed

### Develop Plan

**Objectives**
- Develop engagement/communication plan
- Establish key messaging

**Activities**
- Develop engagement/communication plan
  - Define, at a high-level, how the engagement/communications plan will be executed
  - Appropriately engage stakeholder groups using the key themes and identified engagement activities
  - Consider required communications for all stakeholder engagement activities
  - Identify and engage united, visibly supportive leaders that can build enthusiasm and buy-in around the program
  - Create a time-line with frequencies of all stakeholder communications

**Deliverables**
- Stakeholder identification
- Key interview themes
- Stakeholder matrix
- Channel analysis
- Communication approval process
- Engagement/Communications plan
- Communications time-line
- Key messaging

### Execute, Monitor, Revise

**Objectives**
- Execute engagement/communication plan
- Distribute communications
- Track engagement plan activities
- Track level of stakeholder participation in engagement activities
- Leverage education “spokespeople” outside of the ministry

**Activities**
- Execute engagement/communication plan
- Distribute communications
- Track engagement plan activities
- Track level of stakeholder participation in engagement activities
- Leverage education “spokespeople” outside of the ministry

**Deliverables**
- Stakeholder identification
- Key interview themes
- Stakeholder matrix
- Channel analysis
- Communication approval process
- Engagement/Communications plan
- Communications time-line
- Key messaging
Opportunity Implementation
# Legal Services

## Validate Baseline

**Objectives**
- To collect historical labour litigation information to develop a better understanding of the provision of legal services by sector

**Activities**
- Collect Historical labour litigation information from districts
- Establish working relationship between Risk Management Branch (RBM) and BCPSEA
- Establish working relationship between districts and BCPSEA and RMB
- Create REQ from legal council
- Establish system requirements and licenses to database software
- Confirm legislative authority and inform districts

## Determine Management and Operating Model

**Objectives**
- To begin operation of the Pool as a transitional period

**Activities**
- Establish legal services operational manual and instructions
- Provide training to district staff
- Establish data base to collect litigation information and costs
- Utilization of existing general liability reserve to finance start up costs
- Revisions of Pool policies and procedures as per lessons learned from transition

## Planning and Rollout

**Objectives**
- To implement the Labour Relations Risk Pool and coordination of all Labour Litigation under BCPSEA

**Activities**
- Plan implementation of Pool to broader sector
- Implement coordination of litigation through BCPSEA
- Establishment of district premiums for 2015/16

## Benefits Tracking and Monitoring and Continuous Improvement

**Objectives**
- Formal benefits tracking and monitoring of legal services will occur as part of the pool

**Activities**
- Ongoing monitoring and testing of supplier performance including internal government service providers
- Actuarial review of pool premiums and tracking of investment returns
- Execute Stakeholder Engagement
- Collection of Pool premiums

**Deliverables**
- Establish the Pool fund
- Pool operating as part of transitional period
- Pool is fully operational
## Health and Wellness Support

### Determine Baseline

<table>

</tbody>
</table>
# P-Cards

## Determine Baseline
- **12 Weeks**
  - Collect baseline data on current use of P-cards
  - Review and analyze state of purchasing in sector
  - Collect p-card usage from BMO and Shared Services BC
  - Document advantages of use of the cards to share with districts not using the cards

## Onboard New Districts
- **12 Months**
  - To communicate the p-card program to districts including the benefits of the program
  - Onboard new districts
  - Set goals in partnership with districts
  - Execute onboarding of new districts as per implementation plan
  - Identify local P-card administer for districts
  - Deliver training to districts including:
    - P-card program parameters
    - Optimal purchasing processes
    - Policies and procedures

## Benefits Tracking and Monitoring and Continuous Improvement
- **Ongoing**
  - Formal benefits tracking and monitoring of p-card will occur as per shared services office established processes and tools
  - Ongoing monitoring for Policy Compliance
  - Continue to enroll new suppliers
  - Continue to collect feedback from districts on use of new policies, procedures and processes
  - Execute Stakeholder Engagement

<table>
<thead>
<tr>

<td>Document purchasing and p-card usage</td>
</tr>
<tr>
<td>Review and analyze state of purchasing in sector</td>
<td>Onboard new districts</td>
<td>Prepare documentation/communications to encourage use by remaining districts</td>
</tr>
<tr>
<td>Collect p-card usage from BMO and Shared Services BC</td>
<td>Document advantages of use of the cards to share with districts not using the cards</td>
<td></td>
</tr>
</tbody>
</table>
### Strategic Sourcing

<table>
<thead>
<tr>
<th>Objectives</th>
<th>Activities</th>
<th>Deliverables</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rev. Existing Agmts.</td>
<td>• Understand existing procurement agreements</td>
<td>• Procurement strategy for existing agreements</td>
</tr>
<tr>
<td>Validate Wave Categories</td>
<td>• Perform spend analysis • Develop category profiles including implementation plan to execute strategic sourcing</td>
<td>• Spend analysis • High-level implementation plan across all categories including onboarding existing categories in new districts (fuel and fleet)</td>
</tr>
<tr>
<td>Develop Management Model and Legal Entity</td>
<td>• Design and develop procurement shared service target management model including legal entity</td>
<td>• Procurement shared service target management model • Procurement processes and procedures • Creation of legal entity</td>
</tr>
<tr>
<td>Implement (Wave 1)</td>
<td>• Identification of vendors to provide services to sector • Plan and implement in regions in waves (5-8 categories per wave)</td>
<td>• Detailed sourcing strategies for Wave 1 and 2 categories • Analysis of vendor responses and preferred vendor selection • Category implementation plans • Sourcing policies</td>
</tr>
</tbody>
</table>
| Implement (Wave 2) | • Develop sourcing strategies • Communicate opportunities and confirm approvals • Develop supply management strategy(s) • Develop detailed implementation plan • Develop quote process and package and decision criteria | **Benefits Tracking and Monitoring**

**Implementation other wave categories as per sourcing implementation plan**

Formal benefits tracking and monitoring of sourcing program will occur as per shared services office established processes and tools.

Ongoing monitoring and testing of supplier performance.

Ongoing monitoring of district compliance with sourcing.

Execute Stakeholder Engagement
Transportation options analysis phase

Articulate Scope of Services

- Define scope of services for transportation management

Determine Operating Model

- Determine suitable operating model
- Explore viable operating models

Objectives

- Articulate Scope of Services
- Determine Operating Model

Activities

Develop transportation mgmt. services list
- Research services model/frameworks
- Document list of services
- Engage districts

Collect baseline Transportation data

Assess Core vs. Non-Core
- Assess list of service and whether core or non-core to sector
- Research how services bought/sold in marketplace

Research viable operating models for facilities management
- Staff augmentation vs. fully outsourced
- Assess other jurisdictions and case studies

Id. operating model assessment criteria
- Time to benefit
- Readiness

Define target operating and governance model
- Engage districts
- Asset ownership
- Vendors relationships

Deliverables

- Scope of services document
- Transportation Management Operating and Governance Model

8 Weeks

6 Weeks

Future operating model?

Status quo model?

Standardization and operational efficiency?

Alternative service delivery (ASD)?
# ASD is the most complex and longest duration option

<table>

# Managed Print Services

## Spend Analysis and Data Gathering

- **12 Weeks**

  - **Objectives**
    - Perform print spend analysis
    - Develop category profile for MPS
  
  - **Activities**
    - Analyze MP service levels and spend
    - Develop collection template to collect MP service levels and leading practices in districts
    - Analyze MP data
  
  - **Deliverables**
    - Review existing MP contracts and procurement processes
    - Summarize MP requirements by district
      - Conduct interviews with districts to supplement data collection template

## Assess Supply Market

- **4 Weeks**

  - **Objectives**
    - Understand supply market for MPS in districts
  
  - **Activities**
    - Analyze supply market for districts across the Province
    - Conduct cross province jurisdictional scan of MPS providers by district
    - Collate results of MPS service providers and analyze
  
  - **Deliverables**
    - Jurisdictional summary of MPS supply market

## Develop Sourcing Strategy

- **8 Weeks**

  - **Objectives**
    - Develop plan for MPS implementation across districts
  
  - **Activities**
    - Develop sourcing strategies
      - Communicate opportunity and confirm approvals
      - Develop detailed implementation plan
      - Develop quote process, package and decision criteria
  
  - **Deliverables**
    - Detailed Implementation plan and execution

## Execution Sourcing Strategy

- **16 Weeks**

  - **Objectives**
    - Identification of vendors to provide services to sector
    - Plan and execution for implementation in regions
  
  - **Activities**
    - Work with districts to identify MPS targets
      - Engage in MPS sourcing
      - Compile and analyze responses
      - Prepare for and conduct negotiations
      - Evaluate suppliers against criteria
      - Identify recommended supplier(s)
      - Develop transition plans
      - Develop specifications
  
  - **Deliverables**
    - Analysis of vendor responses
    - Preferred vendor/supplier
    - MPS policies and procedures

## Benefits Tracking and Monitoring

- **Ongoing**

  - **Activities**
    - Formal benefits tracking and monitoring of MPS program will occur as per shared services PMO established processes and tools
    - Ongoing monitoring and testing of supplier performance
    - Ongoing monitoring of district compliance with MPS service provider
    - Execute Stakeholder Engagement

## Benefits Tracking and Monitoring

- **Ongoing**

  - **Activities**
    - Formal benefits tracking and monitoring of MPS program will occur as per shared services PMO established processes and tools
    - Ongoing monitoring and testing of supplier performance
    - Ongoing monitoring of district compliance with MPS service provider
    - Execute Stakeholder Engagement
Email and Unified Communications

Data Gathering and Strategy Development
- Objectives:
  - Alignment with sector strategy
  - Gather requirements and usage data
- Activities:
  - Review existing sector IT strategy
  - Understand sector IT strategy and goals
  - Collect data on district email and communication uses and requirements
  - Understand existing email and communications platforms
  - Collect district email and communications costs
  - Document leading practices in districts
- Deliverables:
  - Baseline and leading practices data
  - Requirements
  - Email and communications strategy

Solution Selection
- Objectives:
  - Issue RFP
  - Select vendor
- Activities:
  - Issue RFP
  - Develop procurement strategy
  - Engage vendors
  - Draft RFP
  - Issue RFP
- Deliverables:
  - Email and communications requirements
  - RFP
  - Selected vendor

Configure and Test
- Objectives:
  - Configure Email and Communications solution
- Activities:
  - Configure email and communications solution
  - Engage service provider to configure
  - Identify testing users
  - Revise configurations
- Deliverables:
  - Email and communications requirements
  - RFP
  - Selected vendor

Plan Rollout and Pilot
- Objectives:
  - Pilot solution
  - Plan cross sector rollout
- Activities:
  - Develop pilot strategy
  - Determine and implement pilots
  - Collect feedback on pilot
  - Revise requirements and make solution enhancements
  - Plan sector rollout and migration plan
  - Develop plan of key activities for remaining district rollout
  - Develop training tools
- Deliverables:
  - Pilot solution
  - Cross sector implementation plan
  - Training tools

Rollout
- Objectives:
  - Rollout of solution across sector
- Activities:
  - Continue to execute communication plans
  - Formal benefits tracking and monitoring of service providers will occur as per shared services office established processes and tools and as per contracted agreement with vendors
  - Feedback and ongoing vendor management
  - Execute Stakeholder Engagement
- Deliverables:
  - Implemented email and communications solution

Benefits Tracking and Monitoring
- Objectives:
  - Formal benefits tracking and monitoring of service providers will occur as per shared services office established processes and tools and as per contracted agreement with vendors
  - Feedback and ongoing vendor management
  - Execute Stakeholder Engagement
- Activities:
  - Continue to execute communication plans
  - Formal benefits tracking and monitoring of service providers will occur as per shared services office established processes and tools and as per contracted agreement with vendors
  - Feedback and ongoing vendor management
  - Execute Stakeholder Engagement
- Deliverables:
  - Implemented email and communications solution
HR/Payroll/Finance Shared Services System

**Data Collection**
- Develop understanding of HR/Payroll/Finance related processes across sector
- Validate sector requirements for system

**Business Req. Validation**
- Develop HR/Payroll/Finance shared services system business case

**Strategy Development**
- Rollout of pilot to key districts
- Develop the implementation plan to support rolling out system to remaining 60 districts

**Pilot Implementation**
- Collect feedback from districts on system and revise as per program governance
- The full implementation of the system will occur after pilot is completed
- Formal benefits tracking and monitoring of system will occur as per shared services office established processes and tools

**Implementation (other districts)**
- Collect feedback from districts on system and revise as per program governance
- The full implementation of the system will occur after pilot is completed
- Formal benefits tracking and monitoring of system will occur as per shared services office established processes and tools

**Objectives**
- Develop understanding of HR/Payroll/Finance related processes across sector
- Validate sector requirements for system

**Activities**
- Data collection
  - Develop data collect template to understand sector wide HR/Payroll/Finance processes and resources
  - Analyze HR/Payroll/Finance data
  - Validate Requirements
    - Conduct cross sector working sessions to understand and validate HR/Payroll/Finance business requirements
- Business Case Development
  - Determine business case content and methodology
  - Identify and quantify key business benefits and drivers
  - Identify and quantify implementation costs and ongoing system maintenance costs
  - Draft business case
  - Seek business case approvals
  - Socialize business case as per engagement plan including validation with sector
- Solution selection
  - PeopleSoft (Tier one) vs. SRB/SIDS solution
  - Implement system pilot to core set of districts
    - Implement per project plan including system build, test, and training
    - Collect feedback from districts on pilot
- Develop management model (ownership, district involvement, ministry)

**Deliverables**
- Validated and expanded set of business requirements for system
- System development strategy
- Formal HR/Payroll/Finance shared services business case
- Implementation of pilot system
- Implementation plan for remaining districts
