

Student Transitions to BC Public Post-Secondary Institutions - 2013/14

028 - Quesnel

Preface

This report includes data from the BC Ministry of Education (MED) K-12 system combined with BC post-secondary data compiled by the Student Transitions Project (STP).

Definitions used are in accordance with MED public reporting data definitions and consequently figures may differ from those stated within STP reports.

This report includes all graduates, using a definition that is more broad than the “eligible to graduate” definition used in many STP reports. It also includes all non-graduates, both those who transitioned to a BC public post-secondary institution (PSI) and those who did not.

In the 2010/11 and 2011/12 reports, students who leave the BC school system in Kindergarten or in Grades 1 to 7 are no longer included in the counts of non-graduates. This removes younger students who are more likely to have moved to a school in another jurisdiction than they are to have dropped out. The main effect of this change, compared to the 2009/10 report, is a drop in the counts of non-graduates who do not transition to a PSI, since very few of those last seen in these lower grades do transition to a PSI.

A problem was identified in previous STP data where some students in developmental program areas were mapped to post-secondary education (PSE) study levels. This means that the reported counts of students in developmental level programs were low while the counts of students in PSE level programs were inflated. The underlying definition has now been changed. The effect of this change, compared to the 2009/10 report, is an increase in the counts of students in developmental level programs and a decrease in the counts of students in PSE level programs (pages 8 and 13).

¹ In recent years, numerous BC post-secondary institutions have changed their name and sector designation. Because of these changes, and to ensure consistency over time, each institution is reported under its most recent name and sector designation.

² Over time, the number of non-graduates may decrease as these students complete graduation requirements and are counted as part of the graduate population.

Annual Outflow of Students, K-12

1 This allows for analysis of two complete academic years after students depart from the K-12 system. 'Departures' include grade 12 graduates, and non-graduates who left at some point during their grade 8 to grade 12 school years.

2 Non-graduates are identified by the last year they were seen in the K-12 system. Non-graduates may have been last seen in grades 8 to 12.

The numbers for non-graduates are unadjusted for outmigration - some may have moved to and graduated in other jurisdictions. Over time, the number of non-graduates may decrease as students complete graduation requirements and are counted as graduates.

3 In recent years, numerous BC post-secondary institutions have changed their name and sector designation. Because of these changes, and to ensure consistency over time, each institution is reported under its most recent name and sector designation.
