

Satisfaction Survey - 2014/15

084 - Vancouver Island West

USER NOTES

2011/2012

Survey report users should keep in mind that during the 2011/12 school year, due to labour disputes survey participation was optional.

Response rates for that one year fell far below typical levels, and so those responses may not be representative of the school populations.

Report users should carefully compare any results for 2011/12 against trends established in earlier and subsequent years, and consider discounting the 2011/12 results if they differ greatly from established trends.

2014/2015

In response to extensive feedback from educational administrators, the ministry conducted a review of core survey questions. To allow for more flexibility, questions seldom or never used by schools, districts and other organizations for planning and major initiatives were removed in 2014/2015 (indicated as grey cells).

Schools and districts can still opt to include these questions and receive their own results in web-based reports.

In response to extensive feedback from educational administrators, the ministry conducted a review of core survey questions. To allow for more flexibility, questions seldom or never used by schools, districts and other organizations for planning and major initiatives were removed in 2014/2015 (indicated as grey cells). Schools and districts can still opt to include these questions and receive their own results in web-based reports.
