

## GUIDELINES FOR VENDORS FOR SUBMISSIONS VIA EMAIL

**NOTE:** This document is specific to the Province's typical competitive solicitation processes, where submissions must arrive at the closing location on time. If this mandatory requirement does not apply, the information on what can be accepted after closing may be different.

### 1. Purpose of These Guidelines

Ministries of the Province of BC may post opportunities that allow vendors to submit their bids / proposals / responses (known as submissions) electronically via email. This document is intended to assist vendors in understanding:

- the risks associated with submitting an emailed submissions; and
- the pitfalls that should be avoided if emailing a submission.

**NOTE:** Vendors who deliver submissions via email do so at their own risk; the Province does not take any responsibility for any emailed submission that:

- does not arrive at the GEMS gateway on time;
- is rejected; or
- contains corrupted electronic files.

### 2. Risks

Although emails are sent every day without incident, there are a number of risks that could occur and delay the receipt of an email. An email submission is deemed to have been received once it arrives in the Province of BC's Government Electronic Mail System (GEMS) gateway. Emailed submissions that arrive late to the GEMS gateway will not be considered, regardless of the reason, and vendors will not have the option to resubmit after the closing date and time.

Following are some of the reasons that may delay an email, or cause an email to be rejected by the GEMS gateway:

- i. Delays can occur as an email moves from server to server between the sender and the recipient, meaning that the time when an email is received in the GEMS gateway can be later – and sometimes considerably later – than the time when it was sent. The Province will consider the time that an email was received in the GEMS gateway as the official time for any emailed submission.
- ii. The GEMS gateway has technical and security limitations on the size and type of files that will be accepted. Emails containing zip files, executable files or attachments that exceed 20 MB cannot be accepted.

- iii. The GEMS gateway has protocols whereby an email may be investigated as potential spam or containing a virus / malware. Such protocols may result in an email being sent to the recipient's inbox late.
- iv. The GEMS gateway is designed to reject any email that is considered spam or that contains a virus or malware. On occasion, an email may be falsely flagged and rejected. Copies of rejected emails are not kept in the Province's email system, and therefore no possibility exists to retrieve an emailed submission that has been rejected.

In addition, it is possible that one or more attachments to an email to become corrupted and therefore inaccessible to the Province. Vendors will not have the option to resubmit after closing if the attachments cannot be opened. Further, the Province cannot open any submission prior to closing to confirm whether or not the files have been corrupted.

### **3. Vendor Guidance for Emailed Submissions**

- 1. Never assume that a solicitation allows for emailed submissions. Emails should only be used as a delivery mechanism when the opportunity expressly allows for it.
- 2. Never assume which email address is being used for submissions, when emailed submissions are permitted. Carefully read the instructions and ask questions well in advance of closing if the email address for submissions is not clear. Note that it is possible for a solicitation to have multiple email addresses, with only one being designated for receiving submissions. Submissions that are emailed to any address other than the one expressly stated for the purpose may be rejected as missing a mandatory requirement of the solicitation.
- 3. Avoid using generic subject lines in the emailed submissions that do not clearly identify the solicitation name and / or number as well as the vendor organization name.
- 4. Avoid multiple emails from the same vendor for the same opportunity wherever possible. If multiple emails cannot be avoided (e.g. the collective size of the emails exceeds the GEMS gateway maximum), identify how many emails constitute the full submission and provide clear instructions on how to assemble the submission. Multiple submissions from the same vendor for the same opportunity may result in rejection if these instructions are unclear.
- 5. Vendors may update, change or withdraw their submission at any time prior to the closing date and time. If emailing updates or changes, do not submit only the changes that then require collation with the previous submission. Instead, a complete revised package with clear instructions that it replaces the earlier submission should be sent. This will help to avoid any confusion as to what constitutes the complete submission.

6. Avoid emailing submissions in the last 60 minutes that the solicitation is open. Sufficient time should be left prior to closing to ensure that the email was received, and to resubmit before closing if a problem occurs.
7. Do not assume that the email has been received. If a confirmation email is not received shortly after sending the email, contact the named Government Contact on the solicitation to confirm whether or not their submission was received. In addition, send the emailed submission with a delivery receipt request. If unsure how to send an email with a delivery receipt request, contact the vendor's own system support personnel or search online for instructions specific to the vendor's email system (e.g. Outlook, gmail, etc.)
8. If the confirmation email is not received, do not resubmit without first contacting the named Government Contact. Resending a submission should only occur once confirmation is received that the original email was not received, and enough time is left for receipt of the submission prior to the closing date and time.
9. Do not ignore any message from the Province regarding rejection of an emailed submission. If such a message is received prior to closing, contact the named Government Contact on the opportunity immediately. Note that this rejection email may come from a generic government email address rather than the named Government Contact.
10. If time permits prior to closing, possible remedies for a rejected or missing emailed submission include:
  - i. If the collective size of the emailed attachments exceeds 20 MB, resubmit t over multiple emails, clearly identify how many emails constitute the full submission and how to collate the files.
  - ii. If the emailed submission included zipped or executable files, unzip or remove the executable the files and resubmit over one or more emails (see previous bullet if the files collectively exceed 20 MB).
  - iii. Resend the submission from a different email account.
  - iv. If permitted in the opportunity, use an alternative method to deliver the submission (e.g. eBid on BC Bid, hard copy couriered to the closing location).

Note that if the solicitation includes a mandatory requirement for submissions to be received on time, none of these remedies are applicable after the closing date and time.
