

B.C. Startup in Residence 2017

PROJECT PROFILE

The B.C. Startup in Residence (STIR) is an experiment in digital government. It brings together the ingenuity of startup tech companies with government to co-develop solutions to improve service delivery to citizens and stakeholders. The Province has partnered with six B.C. companies to take on the following five challenges.

 LATERO LABS	Latero Labs and the Ministry of Children and Family Development are creating a tool to help social workers match children in care with the best available housing options in real time.
 Arkit	Arkit is working with the Ministry of Forests, Lands, Natural Resource Operations and Rural Development (FLNR) to modernize the way people access information about land-use planning throughout British Columbia.
 big bang analytics	Big Bang Analytics and the Ministry of Education are helping school districts to access and analyze information more easily.
 DE  APP-SCOOP	Design + Environment and App-Scoop are teaming up with FLNR to deliver digital literacy training to public servants in an interactive and memorable way.
 PURPOSEFIVE	Purpose Five is teaming with government's Digital Experience Division to create a tool that will intuitively track all government services and guide internal decision-making on how to best deliver them.
