

BC Manufacturing Jobs Fund Funding Recipients

BUSINESS NAME	BRIEF PROJECT DESCRIPTION	FUNDING ALLOCATION	COMMUNITY
STREAM 2 CAPITAL PROJECTS			
MASSIVE CANADA BUILDING SYSTEMS INC.	Massive Canada is a new mass timber and prefabricated manufacturer. This project establishes a new 91,000 sq ft mass timber modular home manufacturing facility that will pre-fabricate laneway homes, apartment units, townhouses and commercial projects using mass-timber building products. This project will create 71 jobs.	\$10,000,000	Williams Lake (Cariboo)
A-1 TRUSSES LTD.	A1 Trusses builds wood trusses for residential and commercial building construction in B.C. This project supports the substantial expansion of their facility to begin producing prefabricated wall panels and floor cassettes. This project will create 125 jobs.	\$9,500,000	Surrey (Mainland/Southwest)
TOLKO INDUSTRIES LTD.	Tolko Industries is a forest products manufacturer. This project will help expand Tolko's Heffley Creek operation, including construction of a facility that will house a new Heffley Creek Engineered Wood Division. The capital project will diversify the mill's current production beyond commodity plywood to include specialty, industrial and engineered wood products. This project will create 20 new jobs and protect 250 existing jobs.	\$8,000,000	Heffley Creek (Thompson-Okanagan)
PUNJAB MILK FOODS INC.	Punjab Milk Foods is a processor of traditional dairy-based South Asian foods. This project consolidates its B.C. and Washington-based facilities through construction of a new 293,000 sq. ft. processing plant in Surrey. This project will create 50 new jobs.	\$7,500,000	Surrey (Mainland/Southwest)
OK LAMINATORS INC. (MERCER)	OK Laminators is a subsidiary of Mercer Mass Timber (MMT) and Mercer International and manufactures cross-laminated timber (CLT) and glulam. This project will support the purchase of new advanced manufacturing equipment and the completion of factory	\$7,000,000	Penticton (Thompson-Okanagan)

	upgrades that will modernize the facilities, improve production efficiencies, and scale manufacturing of a wide variety of mass timber products. This project will create 28 jobs.		
KALESNIKOFF MASS TIMBER INC.	Kalesnikoff manufactures and sells wood and mass timber products. This project will establish a new prefabricated mass-timber and cross-laminated timber modularized building facility and purchase new machinery to drive production of building components that will be used for rapid housing construction. This project will create 90 new jobs.	\$6,725,000	Castlegar (Kootenays)
KRUGER KAMLOOPS PULP MILL	Kruger Kamloops is a pulp and paper manufacturer. This project will support the commissioning of an innovative pressure diffusion washer with an AI-powered control system that will be the first technology of its kind in Canada, allowing the company to diversify their product offerings to include new, in-demand innovative products that will help to keep the business competitive while reducing production costs and removing bottlenecks to render a better-quality pulp product. This project will protect 340 existing positions and will create 4 new jobs.	\$5,000,000	Kamloops (Thompson-Okanagan)
AE CONCRETE PRODUCTS INC.	AE Concrete is a precast concrete manufacturer that specializes in civil infrastructure. This project help constructs a new facility located on Sq'éwqel First Nation territory and will be the first anchor tenant at the new Seabird Island Industrial Park new which will help create new products and will create 40 new jobs.	\$4,500,000	Agassiz (Mainland/Southwest)
S&R SAWMILLS LTD.	S&R Sawmills is a custom cut lumber manufacturer. This project supports the expansion, purchase and commissioning of a trimmer/sorter/stacker line that will improve efficiency, reduce waste, and enable S&R to process smaller dimension logs. This project will create 25 jobs and protect 100 jobs.	\$4,000,000	Langley (Mainland/Southwest)
POWER WOOD CORPORATION	Power Wood is an Agassiz-based specialty and value-added wood product manufacturer, primarily producing highly specified architectural finished products from coastal BC forest products. Power Wood, in partnership with Squiala First Nation, will receive funding to create a new state-of-the-art thermal modification manufacturing facility that will produce high value, thermally	\$3,400,000	Agassiz (Mainland/Southwest)

	modified wood products. This will help Power Wood decrease its reliance on old growth fibre and diversify their fibre sources to increase the use of under-utilized species, primarily from second growth forests. This project will create 10 full time jobs.		
VMAC GLOBAL TECHNOLOGY INC.	VMAC Global Technology manufactures rotary screw air compressors for commercial vehicles. The project will include building a manufacturing facility and purchasing equipment to manufacture air compressors for the heavy duty commercial electric vehicle (EV) market. This project will create 45 jobs.	\$3,400,000	Nanaimo (Vancouver Island/ Coast)
IDEAL GEAR AND MACHINE WORKS INC.	Ideal Gear and Machine Works Inc. produces custom-made gears used in machinery for forestry, marine, and mining equipment and transmission systems for hydro-electric power. This project upgrades advanced manufacturing equipment that will decrease reliance on manual processes and improve production time and precision. The increased capacity will allow the company to expand production to meet demand within industry and build a more resilient supply chain. This project creates 25 jobs.	\$2,400,000	Delta (Mainland/Southwest)
RICHMOND PLYWOOD CORPORATION LIMITED	Richmond Plywood manufactures and distributes plywood products. This project supports the acquisition and installation of new equipment to optimize their value-added manufacturing processes and improve quality and operational efficiency. This project will create 14 jobs.	\$2,300,000	Richmond (Mainland/Southwest)
CANOE FOREST PRODUCTS LTD.	Canoe Forest Products is a plywood and veneer manufacturer. This project replaces equipment to improve the long-term viability of the company, which manufactures softwood sheathing, veneer and specialty plywood. This project will protect 205 jobs.	\$2,250,000	Canoe (Thompson-Okanagan)
RON ANDERSON & SONS LTD.	Ron Anderson and Sons constructs and installs prefabricated wall panels for residential and commercial units. This project implements automation and advanced manufacturing to increase output and diversify its product offerings, including prefabricated floors, roof panels and stairs. This project will create 35 jobs.	\$2,000,000	Chemainus (Vancouver Island/Coast)
VANCOUVER DRYDOCK COMPANY LTD. (SEASpan)	Vancouver Drydock Company Ltd. is an integral part of the marine and port sector and provides maintenance, overhaul, and repair for both government and commercial customers. This project will	\$1,600,000	North Vancouver (Mainland/Southwest)

	repair and expand an existing drydock, purchase a new floating drydock, and construct an operations building. These upgrades will increase capacity to allow the servicing of larger or multiple ships, helping to support essential provincial services such as BC Ferries and Coast Guard operations. This project will create 75 manufacturing jobs in the marine industry.		
PH7 TECHNOLOGIES INC.	pH7 Technologies Inc. is a cleantech company that has developed an innovative process for extracting and refining critical metals, including Platinum Group Metals (PGMs), to support the transition to renewable energy in an environmentally and economically sustainable manner. This project will construct a full production plant and purchase new equipment to scale up to full commercialization and will create 20 jobs.	\$1,500,000	Burnaby (Mainland/Southwest)
WOODTONE SPECIALTIES INC.	Woodtone produces engineered wood building materials for residential and commercial purposes, including interior and exterior siding, trim, posts, corners and wood paneling. This project involves capital expansion to increase efficiency, improve fiber recovery and add a new product line from second-growth knotty wood. This project will create 50 jobs.	\$1,340,000	Spallumcheen (Thompson-Okanagan)
DR. MA'S LABORATORIES	Dr. Ma's Laboratories is a manufacturer of natural health products, such as supplements, vitamins, and food. This project includes infrastructure upgrades, scaling-up and automation of their manufacturing processes, and brings raw ingredient processing in-house. This project will create 75 jobs and protect 52 jobs.	\$1,250,000	Surrey (Mainland/Southwest)
COLUMBIA KITCHEN CABINETS LTD.	Columbia Kitchen Cabinets is a wood product manufacturer that creates custom cabinetry and kitchen products for the residential housing industry in B.C. and western North America. This project will support the scaling up of their facility and the purchase of new automated equipment that will double their production capacity and create four new product lines that will help them enter new markets, and will create 48 jobs.	\$1,100,000	Abbotsford (Mainland/Southwest)
DROP SPROCKETS INC.	Drop Sprockets Inc. manufactures, designs, and engineers sprockets with a primary focus on the forestry, agriculture, mining, and manufacturing industries. This project will support the construction	\$950,000	South Slocan (Kootenays)

	of a new 4,800 square foot facility, outfitted new equipment that will increase their production output by 50%, helping to meet current demand across North America and preparing them for expected growth. This project will create 52 jobs.		
COAST TSIMSHIAN RESOURCES LTD.	Coast Tsimshian Resources is a forestry company fully owned by the Lax Kw'alaams Band. Project activities include the acquisition of an industrial chipper and peripherals which will allow them to utilize residual wood, reduce logging waste, and ultimately create a new business stream for Lax Kw'alaams Band and create up to 108 jobs.	\$970,000	Lax Kw'alaams (North Coast)
AQUILA CEDAR PRODUCTS LTD.	Aquila is a wood products manufacturer servicing the construction industry with products such as siding, fence panels and decking. This project supports the purchase and commissioning of new equipment and retrofitting of the manufacturing site, enabling the production of higher-grade wood products and will create 20 jobs.	\$879,000	Parksville (Vancouver Island/Coast)
GARIBALDI GLASS INDUSTRIES INC.	Garibaldi Glass is a custom glass fabricator that creates glass used in the commercial, residential and industrial sectors. This project adds a new production line and supporting equipment that will enable Garibaldi to manufacture industry leading quality and oversized insulated glass units for commercial and residential developers, helping to broaden their market reach and stay competitive in the North American market. The project will create 32 full-time jobs.	\$865,000	Burnaby (Mainland/Southwest)
CLOVERDALE FUEL LTD.	Cloverdale Fuel is a wood waste processor that collects a variety of wood waste residuals from other forestry sector operators that would otherwise go into landfills and processes it into biofuel to generate energy and heating, supporting a circular economy. This project will support the company to commission new equipment that will double production of high-grade biomass fuel and reduce emissions by moving away from using fossil fuels to power their production process, and will create 15 full-time jobs.	\$830,000	Langley (Mainland/Southwest)

DOWNIE TIMBER LTD.	Downie Timber is a lumber milling and remanufacturing wood processor. This project supports the purchase and commissioning of a new debarker system that enables the company to process small profile logs and optimize operations. This project will protect 229 jobs.	\$825,000	Revelstoke (Thompson-Okanagan)
SUNRISE ENGINEERING AND MFG INC.	Sunrise is a machine shop that specializes in machining and fabricating services, primarily equipment repairs for the pulp mill industry. This project purchases and commissions new equipment that will increase efficiency, improve quality of production, maintain competitive advantage, and attract new workers. This project will create 5 jobs.	\$805,000	Delta (Mainland/Southwest)
ACCESS PRECISION MACHINING LTD.	Access Precision Machining is an advanced manufacturing machining and fabrication service provider that manufactures custom machined parts for various industries including oil and gas, aerospace, and commercial sectors. This project involves purchasing seven machines, including six CNC machines, to extend their capacity and upgrade current machining abilities. This project will create 18 jobs.	\$800,000	Salmon Arm (Thompson-Okanagan)
DYNAMIC WINDOWS AND DOORS INC.	Dynamic Windows and Doors is a custom window and door manufacturer. This project will purchase and install automated equipment and integrate new automated processes into the company's production. This project will create 9 jobs.	\$755,000	Abbotsford (Mainland/Southwest)
GRT HOLDINGS LTD.	GRT operates a resource regeneration facility that takes waste and excess soils from construction projects and creates aggregate products required by the construction industry. This project purchases and commissions new equipment that will drive production and diversify the aggregate products recycled and distributed to the construction industry and will create 6 jobs.	\$735,000	Nanaimo (Vancouver Island/Coast)
WHEN WE EAT MANUFACTURING LTD.	When We Eat Manufacturing manufactures frozen food snacks for distribution at large retailers. This project expands their production facility, installs new equipment to minimize CO2 emissions, and scales up their manufacturing to support future growth and diversified product offerings. This project will create 50 jobs and protect an additional 30.	\$623,000	Coquitlam (Mainland/Southwest)

NAERA ENTERPRISES INC.	Naera Enterprises owns Stoke Juice, who manufacture organic cold- pressed juice using B.C. grown imperfect fruit and vegetables that can't be sold in stores, reducing food waste. Their project will construct a new manufacturing facility, allowing them to double their current production rate, access new markets, offer cold storage and transportation for other local producers, and hire more employees. This project will create 34 jobs.	\$618,000	Kimberley (Kootenays)
NOVO TEXTILE COMPANY LTD.	Novo is a textile company that manufactures medical-grade masks and other single-use healthcare products. Their capital project consists of acquiring and installing highly specialized, automated equipment to develop an N95 mask production department to both diversify their current product offering and grow into export markets. This project will create 13 jobs.	\$584,000	Coquitlam (Mainland/Southwest)
THOMPSON RIVER VENEER PRODUCTS LTD.	Thompson River Veneer Products Ltd. is a value-added wood manufacturer that purchases dry, low grade and green veneer from coastal producers and produces custom, high-value plywood panels used in residential and commercial construction. Funding will support the company to improve their equipment by commissioning six additional press platens which will increase productivity and improve the surface quality of the panels, helping make the business more competitive through accessing higher value markets, while creating up to 11 additional full-time jobs.	\$583,000	Kamloops (Thompson-Okanagan)
PACIFIC BENDING INC.	Pacific Bending Inc. is an advanced metal fabrication company that creates custom products for the forestry sector as well as mining, construction and automotive industries, with its largest location based in 100 Mile House. Funding will support the construction of a new building that will increase capacity to meet current demand, while creating 10 new full-time jobs.	\$582,000	100 Mile House (Cariboo)
WAYCON MANUFACTURING LTD.	Waycon Manufacturing is a specialty metal fabricator that designs and manufactures heavy-duty equipment, machinery, and custom parts and hydraulic systems for the forestry, carbon capturing and energy sectors. This project will expand their operations and	\$575,000	Penticton (Thompson-Okanagan)

	purchase new equipment to meet increasing demand and diversify their product offerings. This project will create 12 jobs.		
COMMAND INDUSTRIES LTD.	Command Industries Ltd. is a contract manufacturing facility that manufactures metal components used in the construction of mass timber buildings. This project will purchase advanced equipment that will double their production capacity, allow for the creation of new and specialized products, and bring more of the manufacturing process in-house. This funding is anticipated to create up to 12 full-time jobs.	\$550,000	Kelowna (Thompson-Okanagan)
MACON INDUSTRIES INC.	Macon Industries is a custom steel and aluminum manufacturer for the mining and forest sectors. This project establishes a dedicated space for aluminum fabrication that will increase efficiency and product diversity through new equipment. This project will create 10 jobs.	\$540,000	Chemainus (Vancouver Island/Coast)
CATALYST PAPER CORPORATION	Catalyst Paper produces pulp, paper, packaging and specialty paper. This project supports equipment upgrades and protects 329 existing jobs.	\$540,000	Port Alberni (Vancouver Island/Coast)
KINSOL TIMBER SYSTEMS	This project involves building a pre-fabrication facility at Kinsol's operating site to increase capacity for mass-timber production. The facility will add a nail-laminated timber line, increase its sawn-timber and glue-laminated-timber fabrication, and establish a new panelized wall line. This project will create 9 jobs.	\$500,000	Mill Bay (Vancouver Island/Coast)
CANADIAN CULTURED DAIRY INC.	Canadian Cultured Dairy is a licensed dairy processor that produces yogurt products for retailers. This project consists of transitioning to a newly built dairy manufacturing facility and purchasing new automated equipment to increase production capacity. This project will create 9 jobs.	\$500,000	Comox (Vancouver Island/Coast)
DH MANUFACTURING INC.	DH Manufacturing Inc. is a secondary wood product manufacturer specializing in finger joint lumber, dunnage, strips and lathe products. This project will support the installation of a new finger jointer that will increase productivity and support the creation of higher value products from residuals and lower-grade fibre. This project will protect 40 existing positions.	\$480,000	Houston (Nechako)

MONSTER INDUSTRIES LTD.	Monster Industries is a steel construction company specializing in mechanical and structural installations and maintenance for forestry, energy and mining industries. This project involves building a new fabrication facility and purchasing a new crane that will help manufacture drying kilns for the forestry industry in B.C., which are essential for the production of value-added wood products. This project will create 7 jobs.	\$466,000	Terrace (North Coast)
FRASERWOOD INDUSTRIES LTD.	Fraserwood Industries Ltd. is a value-added timber remanufacturer specializing in mass timber products. Funding will support the expansion of their facility to accommodate new equipment that will optimize productivity, drive new product development, and allow the company to scale up to meet demand as an important niche producer in the local mass timber ecosystem, while creating 10 full-time jobs.	\$465,000	Squamish (Mainland/Southwest)
OPEN WATERS DESIGN AND MANUFACTURING INC.	Open Waters Design and Manufacturing Inc. manufactures proprietary solar panels used by the marine and transportation sectors. This project will retrofit their facility with advanced and automated equipment that will allow the company to scale-up their new product line to full commercialization, helping them to expand into new markets while creating 20 full-time jobs.	\$450,000	Prince George (Cariboo)
FAB TECH DESIGN AND BUILD LTD.	Fab Tech Design and Build manufactures custom prefabricated wall packages for the residential construction industry. This project will upgrade their facility and purchase advanced equipment to expand prefabricated production lines to include wood panel walls, stairs and floor systems and double their overall production capacity. This project will create 20 jobs.	\$431,000	Chilliwack (Mainland/Southwest)
FRANKLIN FOREST PRODUCTS LTD.	Franklin Forest Products converts primarily old growth fibre and utility grade logs into niche lumber products that are sized and graded for specific end users. This project involves retrofitting and purchasing equipment to more effectively process wider variety of log diameters and shift from old growth logs to smaller, more uniform second growth timber. This project will create 5 jobs and protect an additional 37.	\$425,000	Port Alberni (Vancouver Island/ Coast)

TSI DEL DEL DEVELOPMENT CORPORATION	Tsi Del Del Development Corporation is 100% owned and operated by the T̓s̓ideldel First Nation. This project will purchase equipment for the creation of a sort yard for biomass that aims to centralize the processing of waste wood that would otherwise be burned in order to manufacture higher value products. This project will create up to 16 jobs.	\$422,000	94 Mile House (Cariboo)
SAINT GERMAIN BAKERY LTD.	Saint Germain Bakery produces baked goods which they sell in their retail stores across Canada and the U.S and to wholesale distributors that supply goods to commercial airlines, hotels and other retailers. This project adds automated processing lines and AI-capable equipment that will significantly increase production while creating up to 6 jobs.	\$420,000	Richmond (Mainland/Southwest)
J.H. HUSCROFT	J.H. Huscroft is a value-added specialty manufacturer of glulam, trim, boarding and flooring. This project purchases and replaces equipment that will boost productivity and capacity at its sawmill, expanding the types of logs that can be processed, and protecting 71 existing jobs.	\$400,000	Creston (Kootenays)
WILSON CONCRETE (GROSSO PRECAST LTD.)	Wilson Concrete, a subsidiary of Grosso Precast Ltd., manufactures precast concrete for civil, industrial, and infrastructure projects throughout Northeastern B.C. This project will purchase new, less carbon intensive equipment that will increase production and quality of products they currently manufacture and establish a new product line, allowing them to service more projects in the region with cleaner processes and creating 13 jobs in a remote community.	\$344,000	Fort St. John (Northeast)
WELDCO-BEALES MFG B.C. LTD.	Weldco-Beales designs and manufactures heavy equipment attachments for various resource and construction industries and customized attachments for several other applications. This project includes the purchase of new advanced and automated equipment that will optimize production capacity and efficiency by reducing manual production processes. The project will allow the company to design and manufacture new product lines, reduce lead times, and create 14 jobs.	\$343,000	Langley (Mainland/Southwest)

KICKING HORSE COFFEE CO. LTD.	Kicking Horse specializes in roasting, packaging, and retailing coffee throughout North America and is the largest organic and fair-trade coffee roaster in Canada. This project supports the purchase of new equipment to increase production, efficiency, and the automation of their manufacturing, allowing them to create a new product offering to increase their market share, and create 5 jobs.	\$330,000	Invermere, (Kootenays)
LAUTEN WOODWORKING LTD.	Lauten Woodworking Ltd. is a residential and commercial cabinetry and millwork manufacturer. Funding will support the retrofit of their manufacturing facility and the purchase of new equipment that will enhance processes and efficiencies while creating 4 full-time jobs.	\$320,000	North Vancouver (Mainland/Southwest)
WESTERN WOOD PRESERVERS LTD.	Western Wood is a lumber treating facility. This project expands and renovates a processing facility to double production and meet increasing demand. This project will create 7 jobs and protect an additional 9.	\$300,000	Aldergrove (Mainland/Southwest)
NEW WAVE DOCKS LTD.	New Wave manufactures docks and floats out of wood, metal and roto-molded plastic for residential and commercial markets, including resorts and marinas. This project will construct a new 14,000 square foot steel engineered building on the existing site, designed to house a large-scale roto-oven and aluminum fabrication shop. This project will create 7 jobs.	\$300,000	100 Mile House (Cariboo)
C.W. CREATIVE WOODCRAFT LTD.	C.W. Creative Woodcraft is a cabinet and millwork manufacturer specializing in using local, second growth fibre. This project supports the expansion of their existing facility and the acquisition of new machinery to double their production capacity, optimize production and reduce waste. This project will create 14 jobs.	\$286,000	Cobble Hill (Vancouver Island/Coast)
INTERNATIONAL STEEL FABRICATION INC.	International Steel Fabrication Inc. is a steel fabricator serving the forestry, oil and gas, mining and construction industries. This project will retrofit a former pellet mill and add equipment to their main shop, allowing for increased production and a safer working environment for employees. This project will create 10 jobs.	\$275,000	Kamloops (Thompson-Okanagan)

PROLENC MANUFACTURING INC.	Prolenc Manufacturing is a metal manufacturing business specializing in machine brake links and drill heads for the logging and mining industries. Their capital project will purchase and install new machinery that will enhance their manufacturing capabilities and increase efficiency to meet current demand. This project will create 2 new jobs in addition to upskilling 12 existing positions.	\$254,000	Prince George (Cariboo)
SELKIRK SPECIALTIES (DOWNIE TIMBER LTD.)	Selkirk Specialties is the remanufacturing arm of Downie Timber Ltd. that provides value-added remanufacturing for rough cut and unfinished wood products produced by the Gorman Group. Funding will support upgrades to the panel and post laminator process, which will improve production, increase fibre usage, and produce new products to support long term growth and viability. This project will create 3 jobs.	\$250,000	Revelstoke (Thompson-Okanagan)
OT TIMBER FRAMES LTD.	OT Timber Frames is a custom residential and commercial timber frame manufacturer. This project expands their production facility and adds two CNC machines to scale-up the production of pre-fabricated homes, including a new product offering, and maintains year-round employment for staff. This project will create 5 jobs and protect an additional 20.	\$235,000	150 Mile House (Cariboo)
D3 CUSTOM CABINETS (JACKSON CABINETS LTD.)	D3 Custom Cabinets is a full-service custom cabinet and commercial millwork manufacturer. Funding will support the expansion and retrofitting of their current production space and the purchase of new advanced equipment that will enable them to optimize and increase production and add new product lines, while creating up to 4 full-time jobs.	\$226,000	Richmond (Mainland/Southwest)
TIGER TOOL INTERNATIONAL INC	Tiger Tools is a machinery manufacturer of tools and equipment for the automotive, heavy-duty truck and industrial sectors. This project purchases and installs two CNC machines to enable high-precision production of tools and equipment and creates 3 jobs.	\$220,000	Abbotsford (Mainland/Southwest)
DROP MARINE INC.	Drop Marine Inc. manufactures commercial marine vehicles and components for industrial customers primarily in the forestry sector. This project will support the construction of a new manufacturing facility and the purchase of equipment that will	\$218,000	South Slocan (Kootenays)

	allow them to scale up production with significantly reduced lead times to bring their fleet of vehicles to full commercialization. This project will create 30 jobs.		
HARROP-PROCTOR COMMUNITY COOPERATIVE	Harrop-Procter is a cooperative that manages public forests and runs a sawmill where they process wood products. This project will upgrade the mill and replace old equipment to improve efficiency and adapt to smaller diameter logs. This project will create 3 jobs.	\$215,000	Harrop Procter (Kootenays)
NEXUS GLOBAL BUILDING SOLUTIONS	Nexus will expand and upgrade their existing facility and purchase new machinery that will diversify their product lines for the construction of modular and manufactured homes. The integration of increased efficiencies and component accuracy will save money and reduce waste. This project will create 12 jobs.	\$200,000	Cobble Hill (Vancouver Island/Coast)
PIPPIN POINT FARMS LTD.	Pippin Point is an agriculture company that produces juice, cider, and reusable wooden boxes from BC plywood. This project constructs a new, larger production plant and purchases a CNC machine and processing equipment to allow them to operate year-round, increase the manufacturing of their wooden boxes, and hire new staff. This project will create 4 jobs.	\$176,610	Wynndel (Kootenay)
SIMOLO CUSTOMS LTD.	Simolo Customs manufactures low-speed electric vehicles and is Canada's only manufacturer of street legal golf carts. This funding will support them to expand their current production facility and purchase new equipment. This project will create 20 new jobs.	\$175,000	Vernon (Thompson-Okanagan)
ROOTSIDE PROVISIONS LTD.	Rootside is a winery, specializing in producing mead and apéritifs. This capital project builds a new manufacturing facility and upgrades equipment, resulting in tripling its production capacity and expanding distribution. This project will create 6 jobs.	\$156,000	Nanaimo (Vancouver Island/Coast)
HEARTWOOD MANUFACTURING LTD.	Heartwood Manufacturing builds office furniture which they distribute nationally. This funding will support with upgrading equipment that will increase efficiency, production and sales. This project will create 3 jobs.	\$154,000	Kelowna (Thompson-Okanagan)

BIG EDDY MACHINE SHOP LTD.	Big Eddy Machine Shop is a machine part manufacturer for numerous industries, such as forestry repair and rail maintenance equipment. Their project will add a large CNC milling machine, increasing efficiency, adding a new product line and a more inclusive/accessible operating environment and will create 1 job.	\$152,270	Revelstoke (Thompson-Okanagan)
YARROW WOOD (2012) INC.	Yarrow Wood is a lumber remanufacturer, providing custom square and rectangular lumber remanufacturing for forestry companies. This project installs new equipment that will support the profiling of lumber in-house and will allow them to mill a wider variety of value-added wood products utilizing diverse log species. This project will create up to 7 jobs.	\$130,000	Chilliwack (Mainland/ Southwest)
BIOFLAME BRIQUETTES LTD.	Bioflame Briquettes manufactures briquettes from waste sawdust from the forestry industry. This project purchases and commissions a hammermill and briquette press to increase fibre diversity and production. This project will create 4 jobs.	\$117,320	Chemainus (Vancouver Island/ Coast)
PARADIGM BUILDING SOLUTIONS	Paradigm Building Solutions is a prefabricated wall panel manufacturer. This project will purchase an automated saw, which will result in increased output, reduction of waste, and a new product line including floor panels and roof trusses. This project will create 5 jobs.	\$106,000	Louis Creek (Thompson-Okanagan)
CONIFEX MACKENZIE FOREST PRODUCTS INC. (CMFP)	Conifex Mackenzie manufactures high-quality lumber for sale to markets in North America and Japan. This project will purchase equipment to improve tipping and sawing accuracy, increase the quality and efficiency of their lumber production, lengthen saw life, reduce downtime, and improve recovery and value from their fiber volume. This project will protect 159 jobs.	\$105,000	Mackenzie (Cariboo)
BID GROUP TECHNOLOGIES LTD.	Bid Group designs and manufactures equipment for the sawmill industry. This project increases manufacturing capacity at the Vanderhoof facility by replacing two manual lathes to enable them to reduce outsourcing and optimize parts production.	\$100,000	Vanderhoof (Nechako)
STREAM 2 ANNOUNCED PROJECTS			\$109,021,200
OTHER COMMITTED STREAM 2 CAPITAL PROJECTS – Not yet announced			\$14,888,000

BUSINESS NAME	BRIEF PROJECT DESCRIPTION	FUNDING ALLOCATION	COMMUNITY
STREAM 1 PLANNING PROJECTS			
GOLD RIVER AQUAFARMS	Gold Rivers Aquafarms is a new aquafarm venture. This project includes final stage planning required to repair and retrofit a former pulp and paper mill warehouse to become an aquafarm and salmon processing facility.	\$50,000	Gold River (Vancouver Island/Coast)
STUWIX RESOURCES INC.	Stuwix Resources is a forestry management company owned by eight First Nations. The planning activities include a feasibility assessment to implement long log harvesting, which will turn wood waste into merchantable products.	\$50,000	Merritt (Thompson-Okanagan)
K-C RECYCLING LTD.	K-C Recycling is a lead acid automotive battery recycler. This project includes final stage business planning to prepare for a new recycling facility that will turn recycled materials into new products.	\$50,000	Trail (Kootenays)
B COLLECTIVE HOMES INC.	B Collective is a home construction company with a focus on energy efficient passive homes with sustainable bio-based closed panel construction. This project moves offsite prefabrication of panels in-house to allow B Collective to target affordable housing projects that are urgently needed in the Vancouver region.	\$50,000	Vancouver (Mainland/Southwest)
POWER WOOD CORP.	Power Wood is a specialty cedar lumber remanufacturing business which produces high-value cedar end products such as siding, paneling and trim. They are completing business planning, technical drawings, and engineering to build a new Thermal Modification facility. The project will allow them to make use of new fiber sources and double their production capacity.	\$50,000	Agassiz (Mainland/Southwest)

KRUGER KAMLOOPS PULP L.P.	Kruger Kamloops produces northern bleached softwood kraft and unbleached softwood kraft pulp. This project conducts planning activities required to install a diffusion washer at the pulp mill, which will allow them to pursue new, innovative product lines using cellulose and lignin.	\$50,000	Kamloops (Thompson-Okanagan)
TIICMA MANAGEMENT SERVICES LIMITED PARTNERSHIP	Tiicma Management Services LP is the economic development arm of Kyuquot and Checlesheht First Nation. This project conducts operational and technical assessments required for a potential capital project that will construct an electric boat manufacturing facility.	\$50,000	Kyuquot (Vancouver Island/Coast)
ATLI CHIP GENERAL PARTNER LTD.	Atli Chip processes wood chips and hog fuel for the pulp and paper industry. This project completes a technical assessment to help determine costs and requirements for replacing aging onsite infrastructure and ensuring ongoing viability.	\$50,000	Port McNeill (Vancouver Island/Coast)
GROSSO PRECAST LTD.	Grosso Precast manufactures civil precast concrete products. Their planning activities will prepare them for a capital project that aims to double their production, improve efficiency and add new high value products.	\$50,000	Williams Lake (Cariboo)
CUREWOOD ENGINEERED BUILDING PRODUCTS LTD.	CureWood Engineered Building Products produces premium finger-joint precision end trimmed studs and other value-add products utilizing hemlock off cuts from nearby sawmills. This funding will support them to complete operational assessments required to move into a new production facility and continue to scale up production.	\$50,000	Surrey (Mainland/Southwest)
VALLEY ACRYLIC BATH LTD.	Valley Acrylic Bath is a plumbing fixtures manufacturer.
