What's the Story?

Build a better mousetrap and the world will beat a path to your door. You'll also help build the workforce of the future and develop your community's economic diversity.

Our featured guests will introduce the nuts and bolts of applied research partnerships and share examples of how this approach to innovation has build economic benefits for their communities.

Applied research partnerships combine the research and innovation power of post-secondary institutions with the market savvy of visionary entrepreneurs. Research partnerships promote enhanced productivity in industries, businesses, and community organizations while developing the next generation of our workforce.

Did we mention that applied research partnerships can potentially attract funding to build your community's economic resilience and a future-ready workforce?

You don't want to miss this interactive learning opportunity!
