DUST ADVISORY ENDED FOR GOLDEN

(January 30, 2025 10:00 AM) The Ministry of Environment and Climate Change Strategy in collaboration with the Interior Health Authority has ended the Dust Advisory that was issued on January 29, 2025 for Golden due to elevated concentrations of dust. Changing meteorological conditions have improved conditions across the region.

Real-time air quality observations and information regarding the health effects of air pollution can be found at <https://www.gov.bc.ca/airquality>.

Additional Information

- The provincial air quality objective for PM₁₀ is 50 micrograms per cubic metre (µg/m³), averaged over 24 hours. 24-hour average PM₁₀ concentrations are summarized below for Golden and nearest monitored communities at 10:00 AM local time today:

Community	Castlegar	Elkford	Golden	Sparwood	Vernon
24-hr average (ug/m3)	26.3	5.5	48.3	15.7	25.0
