

MONITORING WELL ID: MW07-47

Location: New Westminster Sawmill - 401 Jardine Street
 Drilling Contractor: Uniwide
 Drilling Equipment/Method: Solid Flight Auger

Project Name/No.: 9354-03
 Client: Western Forest Products Inc.
 Engineer/Geologist: KLL
 Date: September 10, 2007

Depth (ft/m)	Symbol	Soil / Sediment Description	Sample Type	% Recovery	Sample Analyzed (Y,N)	Sample ID	Headspace			Elevation (m)	Well Construction	Remarks
							0	100	300			
0		Ground Surface								100.57		
0		ASPHALT					25.0			100.47		
1		FILL Brown medium grained SAND with trace gravel, loose. No odours or staining.		100	N	MW07-47 (0.2)						
2												
3							40.0			99.57		
4		FILL Grey medium grained SAND, loose, moist, well sorted. No odours or staining.		100	N	MW07-47 (1.0)						
5										99.17		
6		CLAY (CL) Greenish grey CLAY, medium dense, dry to moist, wet at 1.8 mbg. No odours or staining.		100	Y	MW07-47 (1.8)	80.0					
7												
8							40.0					
9												
10							30.0			97.57		
11		SILT (ML) Grey SILT, soft, wet, with trace wood debris. No odours or staining.		100	N	MW07-47 (2.4)						
12							30.0

19							15.0					
20		End of Hole								94.57		

Location of Well: North of M.P.D. Building
 Date of Water Level: Sept. 20, 2007
 Water Level (Top of Casing): 99.267
 Co-ordinates: n/a

Well-Borehole Diameter: 150 mm
 Well Casing Diameter: 50 mm
 Well Casing Material: PVC
 Well Screen Slot Size: 10 mm

Depth of Well (TOC): 4.5 m
 Well Elevation (TOC): 100.426
 Well Elevation (Ground): 100.567
