

PROJECT: 952-1848

RECORD OF BOREHOLE DW 95-6

SHEET 1 OF 1

LOCATION: Davis Wire (east of building)

BORING DATE: June 8, 1995

DATUM: G.S.

DEPTH SCALE METRES	BORING METHOD	SOIL PROFILE		SAMPLES				OVM Concentration ppm				COMPLETION DETAILS		
		DESCRIPTION	STRATA PLOT	ELEV.	SAMPLE No.	SAMPLE TYPE	CORE No.	CORE RECOVERY %	2	4	6		8	
				DEPTH (m)										☐
0		Ground Surface		5.22										
		Asphalt		0.08										Asphalt
		Loose to compact, damp, brown, medium SAND, trace fine gravel, (Subrounded)												Siica sand
1				3.97										Bentonite seal
		Compact to dense, damp to moist, brown to black (at 1.46m) medium SAND, some fine to coarse gravel (subangular to subrounded).		1.25										
				3.58	1	CS								Bentonite/Siica sand
				1.64										
2							1	94						
	Photo Sonic Drilling	Compact, damp to wet, brown grey to black (from 4.3m down) medium SAND, trace fine gravel, (subrounded).												
3														
				0.83	2	CS								
		Firm, damp to moist, grey, SILT trace clay, lenses of wet grey fine to medium sand.		4.39		CS								
				0.43	4	CS	2	55						
5		Compact, moist, grey black silty fine SAND, trace to some organics (rootlets, twig fragments as band at base.		4.78										
				0.18										
		Compact, wet, black, silty fine to med. SAND, trace silt in lenses.		5.06	5	CS								
				-0.11										
				5.33										
		End of Hole.
