

BOREHOLE LOG

LOGGED BY: J.P. Chubb
DRILLER: Mud Bay

O.D. & TYPE: 180 mm O.D. Solid-Stem Auger
RIG: Marl, track-mounted

HOLE No: BH L8
WELL PIPE TOP EL. (m): 99.247 m

Depth (m)	DESCRIPTION	Symbol	Depth/Elev.	Well	SAMPLE		VAPOUR ("TOV") CONC.				COMMENTS	
					Type	Rec. (%)	20	40	60	80		
1	SILT/SAND/GRAVEL(POSS. FILL) Greenish-brown above and brown below 0.8 m; moist to wet above and saturated below the water table.		97.1			●						Apr. 1, '98 water level
2	CLAY Greenish-grey; some organics (root frags.) wetter than the plastic limit (field test).		96.6			●						"corkscrewed" augers 0 to 1.5 m 1.5 to 3 m 3 to 4.5 m
3	LOAM Dark-brown; silt and organics; saturated		95.9			●						
4	SAND/GRAVEL/COBBLES Variable proportions; subrounded gravel/cobbles; saturated.		94.3			●						
5	Bottom of Borehole
