

## Subscribing to our Contaminated Sites E-mail Service

Our “CS e-Link” contaminated sites e-mail service has been provided to the public since 1999. This fact sheet tells you what kind of information you will receive if you subscribe, and how to subscribe and unsubscribe from the service.

### **What the CS e-Link Service Will Do**

The CS e-Link is used to notify subscribers when and where to find ministry contaminated sites information, on-line documents, news and announcements.

Also, it is a rapid message system to inform subscribers of developments in contaminated sites management in the province, and about other contaminated sites resources and references available on the Internet.

### **How to Subscribe to the CS e-Link System**

To subscribe to this system please follow the instructions at:

<http://www2.gov.bc.ca/gov/content/environment/air-land-water/site-remediation/contaminated-sites/contaminated-sites-e-link-mailing-list>

When you receive a response requesting confirmation that you wish to subscribe, please visit the web page indicated and complete the subscription process as directed. You will receive another short message welcoming you to the system.

We have configured the mailman computer program that runs the CS e-Link system so that the most basic functions are provided. You will be unable to use a number of the functions referred to in the second welcome message you receive.

### **How to Unsubscribe from the System**

You can unsubscribe anytime by visiting the web site provided in your second welcome message. If you cannot locate that message, please send an e-mail to [site@gov.bc.ca](mailto:site@gov.bc.ca) requesting that you be unsubscribed from the CS e-Link service.

*For more information, contact the Environmental Management Branch at [site@gov.bc.ca](mailto:site@gov.bc.ca)*
