

Substantive Changes Made to Protocol 16

Determining the Presence and Mobility of Nonaqueous Phase Liquids and Odorous Substances

From version 1 signed in final form December 4, 2009

To version 1.01 signed in final form May 31, 2010

Section 3.2.1 When LNAPL is mobile

A clarification was made to subsection c), indicating that the conditions listed in the bullet points only apply when free phase liquid is present in monitoring wells at a thickness greater than 2 mm.
