The map shows the flood risk areas in Squamish South, District of Squamish. The map includes flood protection works such as dikes, relief wells, and water survey Canada (WSC) real-time gauges. Due to morphological, hydrological, and other changes in or about river systems, such a dike shown on the map may not continue to meet current standards. It is NOT intended to replace detailed floodplain maps provided by a standard dike. Flood protection works that conform to this classification often protect rural activities.

Accuracy or sufficiency by the Ministry of Environment, FLOODING MAY OCCUR OUTSIDE OF THE FLOODPLAIN AREAS SHOWN. The Ministry of Environment, FLOODING MAY OCCUR OUTSIDE OF THE FLOODPLAIN AREAS SHOWN.
