REQUESTS FOR INVESTIGATION OF A DRINKING WATER THREAT UNDER THE DRINKING WATER PROTECTION ACT

1. Purpose
Under section 29 of the Drinking Water Protection Act, if a person considers that there is a threat to their drinking water, the person may request the drinking water officer (DWO) to investigate the matter. This document contains a sample template questionnaire form for such investigations.

2. Application
INFORMATION FOR THOSE REQUESTING AN INVESTIGATION UNDER SECTION 29

Requests for investigation can be made by any person that believes that there is a threat to their own drinking water supply. Section 29 requires requests to be in writing.

A request for investigation should include the information contained in the form below. The questionnaire will assist in documenting the specific facts related to the drinking water threat and provide health authority staff with relevant information that can be reviewed in an expeditious manner to determine if an investigation is warranted.

This form should provide the local DWO with enough information as to determine whether an investigation should be initiated under section 29, however the DWO may ask for further information depending on the specifics of the case. Consequently, it is recommended that persons making these requests contact the DWO beforehand.

If the DWO decides not to conduct an investigation, he or she should provide a written explanation as to why the decision was made.

If an investigation is conducted, the DWO must advise of the results of the investigation. When doing so, the DWO should specify his or her findings regarding whether any threat was found, and what, if any, follow-up action will be taken. DWO’s should also provide this information in writing.
