Ambient Water Quality Guidelines for Lead

Addendum to Technical Appendix (1987)
and Overview Report (2001)

June 26, 2020

Water Protection & Sustainability Branch
Environmental Sustainability and Strategic Policy Division
BC Ministry of Environment and Climate Change Strategy
The Water Protection and Sustainability Branch rescinds the B.C. approved lead (Pb) water quality guidelines (WQGs) for the protection of drinking water supplies of 0.05 mg/L (B.C. Ministry of Environment and Parks, 1987). The source drinking WQG value of 0.005 mg/L of total Pb (ENV, 2020) now applies to the Water Quality Criteria for Lead Technical Appendix (B.C. Ministry of Environment and Parks, 1987) and Overview Report (B.C. Ministry of Environment, 2001).
