List the top three actions taken by your organization in 2013 to reduce GHG emissions and/or improve sustainability

Action

1. We are conducting a feasibility study on the installation of solar panels. We are looking into biomass heating.
2. We are continued powersmart members and are continually working towards improving and implementing cost saving measures. Replacing older power hungry computers with newer more energy efficient models. Continue upgrading as money allows.
3. Using remote controlled heating, so that we are using our energy more efficiently and when occupied. This is lowering our consumption of power use.

Describe Plans your organization has for continuing to minimize your GHG emissions

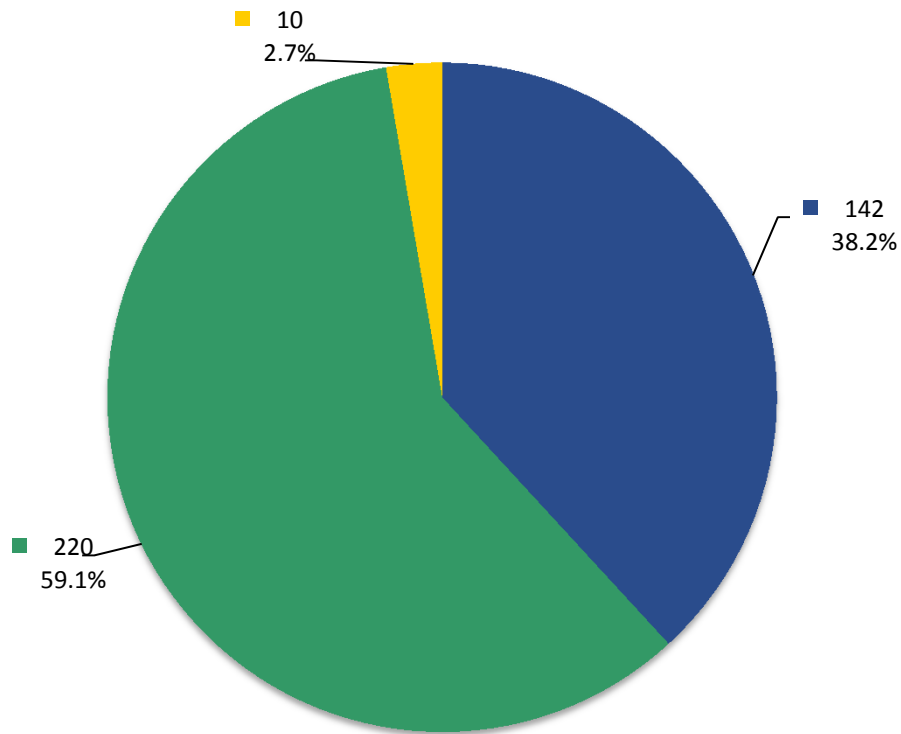

Continue to replace older appliances and fixtures with newer energy efficient models as the budget allows.
