¹ ***“Statement of Vision”***

We are all here to stay. We agree to a new government-to-government relationship based on respect, recognition and accommodation of aboriginal title and rights. Our shared vision includes respect for our respective laws and responsibilities. Through this new relationship, we commit to reconciliation of Aboriginal and Crown titles and jurisdictions.

We agree to establish processes and institutions for shared decision making about the land and resources and for revenue and benefit sharing, recognizing, as has been determined in court decisions, that the right to aboriginal title “in its full form”, including the inherent right for the community to make decisions as to the use of the land and therefore the right to have a political structure for making those decisions, is constitutionally guaranteed by Section 35. These inherent rights flow from First Nations’ historical and sacred relationship with their territories.

The historical Aboriginal-Crown relationship in British Columbia has given rise to the present socio-economic disparity between First Nations and other British Columbians. We agree to work together in this new relationship to achieve strong governments, social justice and economic self-sufficiency for First Nations which will be of benefit to all British Columbians and will lead to long-term economic viability.”

FISH AND WILDLIFE COLLABORATIVE MANAGEMENT FRAMEWORK

1.0 Definitions

1.1 Words and expressions not defined in this Appendix but defined in the Strategic Engagement Agreement have the meanings ascribed to them in the Strategic Engagement Agreement.

1.2 In this Appendix:

“Annual Allowable Harvest” and “AAH” means the number of animals, in a particular class and geographic area, that are allowed to be harvested each year after accounting for all sources of unregulated human-caused mortality, including poaching, crippling losses, and animals destroyed as problem Wildlife;

“Conservation Concern” means any concern that a population has declined to a level where the risk of extirpation or extinction is high;

“Fish” has the same meaning as described in the *Wildlife Act*;

“Fish and Wildlife Program” means the Provincial employees responsible for regulating and managing the sustainable use and conservation of Fish and Wildlife populations across British Columbia in accordance with the *Wildlife Act* and the delegated authority under the *Federal Fisheries Act*;

“Fish and Wildlife Regional Manager” has the same meaning as described in the *Wildlife Act*;

“Fish and Wildlife Working Group” means the designated representatives assigned by the Natural Resources Council Co-Chairs as described in subsection 6.2(c) of this Agreement;

“Fish and Wildlife Working Group Coordinators” means the designated representatives assigned respectively by the Regional Fish and Wildlife Manager and the Kaska Fish and Wildlife Manager;

“Framework” means the Fish and Wildlife Collaborative Management Framework as described in Appendix E of this Agreement;

“Habitat” has the same meaning as described in the *Wildlife Act*;

“Invasive Species” means non-indigenous species that have adverse affects to the natural species and ecosystems;

“Kaska Dena Management Principle” refers to the principle that a lack of full scientific certainty is not used as a reason for postponing measures that could be implemented to reduce impacts to Fish and Wildlife species. Other knowledge can be used with available scientific knowledge to support implementing the measures to reduce or stop the impacts to Wildlife species;

“Kaska Dena Fish and Wildlife Manager” means the representative identified by the Kaska Dena Responsible Official to support the delivery of this Framework;

“Licensed Hunting” means hunting opportunities licensed by British Columbia for resident and non-resident hunters in accordance with the *Wildlife Act*;

“Management Concern” means any concern that a population has declined or may be declining based upon scientific information or Traditional Knowledge and includes a concern that a population has declined at a spatial or temporal scale that is relevant to either Party;

“Wildlife” has the same meaning as described in the *Wildlife Act*;

“Wildlife Act” means the *Wildlife Act* and the regulations made there under, all as may be amended from time to time.

2.0 Principles

- 2.1 The Natural Resources Council and the Fish and Wildlife Working Group will apply the Kaska Dena Management Principle and other relevant information when applying this Framework and acknowledge that Wildlife populations and ecological systems are dynamic, that knowledge of these natural processes is incomplete, and that uncertainty increases risks.

3.0 Purpose

- 3.1 The purpose of this Framework is for the Parties to engage on a government-to-government basis with respect to Fish and Wildlife management that:
 - (a) focuses on maintaining healthy and diverse native species and ecosystems;
 - (b) allows for the sustainable use of Fish and Wildlife resources;
 - (c) places the appropriate higher priority on conservation and on Kaska Dena’s Aboriginal Rights before allocating opportunities under an AAH to Licensed Hunters;
 - (d) implements Shared Decisions that are an outcome of this Agreement; and
 - (e) establishes mechanisms to facilitate positive working relationships between the Parties.

4.0 Membership

- 4.1 The Fish and Wildlife Working Group will consist of six (6) members comprising representatives from the following: Daylu Dena Council (1); Dease River First Nation (1); Kwadacha Nation (1); MFLNRORD-Skeena (1); MFLNRORD-Peace (1); and MFLNRORD-Omineca (1).
- 4.2 The members will select a Kaska Dena – Co-Chair (1); and MFLNRORD – Co-Chair (1).
- 4.3 In addition, technical representatives, Land and Resource Officers, Kaska Dena or BC Co-chairs and Coordinators can attend at the request of their members to participate in discussions.
- 4.4 Each member will identify alternates, and it is up to each member to ensure the alternates are informed of the business and recommendations of the Fish and Wildlife Working Group. Each Party should provide notice of their alternate attending a meeting to the Co-Chairs at least twenty-four (24) hours in advance of any meeting.
- 4.5 It is the responsibility for alternates to inform their member on the outcomes and actions from the meeting they attend.

5.0 Scope

- 5.1 This Appendix applies to the Provincial Agency that manages the Fish and Wildlife Program within the Kaska Dena Traditional Territory.
- 5.2 Collaboration under this Framework will focus on the management of Fish and Wildlife species that are most important to both Parties, including:
 - (a) moose, woodland caribou, bison, thin horn sheep, mountain goat, bears, furbearers, wolves, and freshwater Fish; and
 - (b) other species or populations where Conservation Concerns or Management Concerns are brought forward to the Fish and Wildlife Regional Manager or the Kaska Dena Fish and Wildlife Manager, or both.

6.0 Process

- 6.1 On an annual basis, the Fish and Wildlife Regional Manager and the Kaska Fish and Wildlife Manager with input from the Natural Resources Council will identify and agree upon Fish and Wildlife management priorities within the Kaska Traditional Territory.
- 6.2 Where Fish and Wildlife management priorities are identified in subsection 6.1 of Appendix E, the Fish and Wildlife Working Group Coordinators will facilitate the participation of the appropriate technical officials in the Fish and Wildlife Working Group.
- 6.3 The Fish and Wildlife Working Group will develop and implement a workplan which may include the following activities:
 - (a) identifying critical ranges, Habitats and special features of Fish and Wildlife species as identified in subsection 5.2 of Appendix E;
 - (b) assessing population stability and trends of identified Fish and Wildlife populations;
 - (c) analysing harvest data and recommending sustainable harvest levels;
 - (d) reviewing or assessing impacts of domestic species, Invasive Species or game farming on Fish and Wildlife;
 - (e) setting goals and objectives for species management, including goals for population recovery;
 - (f) developing strategies to achieve the population goals and objectives identified in subsection 6.3(e) of Appendix E;
 - (g) reviewing the effectiveness of the current management unit boundaries for harvest data collection and population management;
 - (h) identifying areas of Habitat loss, decreased function of Habitats and range, and loss of Habitat quality;
 - (i) undertaking Fish and Wildlife inventories or studies;
 - (j) completing a review of Fish and Wildlife regulations;

- (k) review of climate change strategies, mitigations, adaptations, and studies as they apply to Fish and Wildlife in the Kaska Dena Traditional Territory; and
 - (l) other matters as agreed to by both Parties.
