

## Voucher Specimen Collection, Preparation, Identification and Storage Protocol for Plants and Fungi - Series 4b - June 1999

### Errata May 2018:

This document is in the process of being retired due to being out of date with respect to many aspects of the protocol, including laws, procedures, provincial data submission requirements, and herbaria contacts. Sections on cost recovery for herbaria are focused on Royal BC Museum and do not reflect current procedures. Sections on rare plants and inventory are also much expanded upon in a new RISC standard called **Inventory and Survey Methods for Rare Plants and Lichens** - Standards for Components of British Columbia's Biodiversity No. 43. May 2018. The relevant updated information for vouchering is available in the Appendix B of the new RISC document. The Fungi component of the retiring standard is in the process of being updated and will be available at the RISC site by 2019.
