## **The Compendium of Recommended Keys for British Columbia Freshwater Organisms:**

*Part 1: Freshwater Keys.*

**Part 2: Taxonomic Bibliography of Literature pertaining to the Freshwater Organisms of British Columbia.**

*Part 3: Classification Scheme of Freshwater Organisms*

### **Introduction**

This document is the second part of the series, Compendium of Recommended Keys for British Columbia Freshwater Organisms. Taxonomic bibliographic references, deemed useful for the aquatic flora and fauna are listed in this document, with emphasis on species found in British Columbia.

The references are grouped under the major headings that follow commonly accepted taxonomic classification schemes: Monera, Protista, Fungi, Plantae and Animalia (see Part 3: Classification Scheme of Freshwater Organisms). The references under each major heading are further defined, wherever possible, to the level of Order. References are also given for General Limnology. This document augments the information given in Part One of this series, The Freshwater Keys.

Please note that this is not a comprehensive list and is primarily directed towards aquatic invertebrates and plants. Where no literature exists for British Columbia, references are given for similar species found in North America and worldwide. This document is subject to updates as more literature becomes available and/or amendments to the classification schemes are made.

## Kingdom PLANTAE: Aquatic Plants

The following information was provided by Dr. Pat Warrington, Water Quality Branch, B.C. Environment, Victoria, with some additions. References which pertain only to B.C. are listed separately at the end of this section.

The following references contain information about the biology, common names, distribution, culture, identification and taxonomy of aquatic plants found in British Columbia. Species which are not yet known to be naturalized in B.C. are also referenced if they are commonly used in garden pools or aquaria and may be found from time to time. Species from neighbouring areas which are gradually spreading or increasing their range are also included in anticipation of them reaching B.C. soon. This is only a partial list of useful references.
